

Unit Synopses

AMB031 Mandarin 1

Anti-requisites	HHB051 and HUB453
Equivalents	AMX031, HHB031
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces students who have little or no prior knowledge of Chinese Mandarin to the four macro skills of listening, speaking, reading and writing through an integrated communicative approach to teaching. Content will include: the Mandarin sound and tonal systems; the Pinyin Romanisation system; introduction to Chinese character writing, greetings and introductions; expression of family relations, and talking about nationalities, places, objects, locations and directions.

AMB032 Mandarin 2

Pre-requisites	AMB031 or HHB031 or HUB453 or HHB051
Anti-requisites	HHB052, HUB454
Equivalents	AMX032, HHB032
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This subject continues to develop the four macro skills of listening, speaking, reading and writing through an integrated communicative approach. While there is further consolidation of the knowledge of the Pinyin Romanisation system, greater attention is devoted to the reading and writing of characters. With acquisition of language, students receive further exposure to aspects and characteristics of Chinese culture.

AMB033 Mandarin 3

Pre-requisites	AMB032 or HHB032
Equivalents	AMX033, HHB033
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

- SEM-1

This unit is designed to meet student needs to further develop their basic knowledge and skills for understanding, speaking, reading and writing Mandarin Chinese in a wide range of everyday situations. Eligible students are those who have: successfully completed introductory Mandarin units HHB031/AMB031 and HHB032/AMB032 at QUT, and those who have successfully completed equivalent Mandarin study elsewhere. Graduates from high schools who have completed Year 12 Mandarin should also enrol in this unit. (Students who have undergone primary and secondary education in China and Taiwan are not eligible for this unit. Students who cannot speak Mandarin Chinese but can read and write Chinese script are not eligible either. They can apply to do Mandarin speaking units cross-institutionally at UQ.)

AMB034 Mandarin 4

Pre-requisites	AMB033 or HHB033
Equivalents	AMX034, HHB034
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit follows on from AMB033. Students further develop their knowledge and skills needed to understand, speak, read and write Mandarin Chinese in a wide range of everyday situations and to give presentations on given topics. Resources include textbook, workbook, CDs, DVDs and online multimedia materials. Students learn about 400 Chinese characters and have further exposure to various aspects of Chinese society and culture.

AMB045 Chinese - English Translation for Business Communication

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is for students who have a good command of both Chinese language and English and who want to develop their translation and written communication skills applicable to business situations.

The unit teaches basic translation theories and helps students develop their skills through a large amount of varied translation practice. The materials used for translation practice include general business correspondence and sample texts in areas of advertising and marketing. The introduction to business Chinese and English and the translation practice also helps students improve their skills in writing business documents.

AMB046 Chinese - English Translation on Business Topics

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is for students who have a good command of both Chinese language and English, who want to develop their translation and written communication skills applicable to business situations. The unit teaches basic translation theories and helps students develop their skills through a large amount of varied translation practice. The materials used for translation practice include general business correspondence and sample texts in areas of advertising and marketing. The introduction to business Chinese and English and the translation practice also helps students improve their skills in writing business documents.

AMB047 Chinese - English Liaison Interpreting

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is designed mainly for native speakers of Chinese who study any discipline at QUT and who are interested in developing their interpreting skills applicable to various cross-language and cross-culture oral communication situations. Non-native speakers of Chinese who have acquired native or near-native competence in Chinese language can apply to do this unit too and they need to see the unit coordinator for an assessment interview before final approval. The unit teaches basic interpreting theories and helps students develop practical skills in dialogue interpreting, sight interpreting and consecutive interpreting through a large

amount of varied interpreting practice. The knowledge and skills the students acquire through learning this unit will add to their competitive edge when they apply for work in any field of their own discipline.

AMB048 Chinese - English Speech Interpreting

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is designed mainly for native speakers of Chinese who study in any discipline at QUT and who are interested in developing their interpreting skills applicable to various cross-language and cross-culture oral communication situations. Non-native speakers of Chinese who have acquired native- or near-native competence in Chinese language can apply to do this unit too and they need to see the unit coordinator for an assessment interview for final approval. The unit teaches basic interpreting theories and help students develop practical skills in dialogue interpreting, sight interpreting and consecutive interpreting through a large amount of varied interpreting practice. Specifically, students will be trained through substantial practices to think and shift rapidly between Chinese and English so that they can conduct various types of interpreting in a wide range of situations.

AMB120 Bridging Cultures

Pre-requisites	Completion of 96 credit points or more of study
Anti-requisites	AMB390
Equivalents	HHB001
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit develops students' awareness, understanding, sensitivity and ability to deal with individuals and organisations from different cultural backgrounds. It takes a practical approach to the issues involved by providing not just a theoretical framework for interpreting differences in cultural behaviour, but also skills and strategies which can help in appropriately responding to culturally different situations. This unit will be of particular value to students about to embark on in-country study or exchanges, to incoming

international students, or to anyone with a general interest in intercultural communication. It will be a useful complement to the study of a second language, but does not require or assume prior language study.

AMB200 Consumer Behaviour

Pre-requisites	BSB126 or CTB126 or BSB116 or BSB117
Anti-requisites	MIB204
Equivalents	AMX200, CTB200
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-1, SEM-2 Gardens Point - SEM-1, SEM-2, SUM

This unit provides students with the fundamental theories and models to develop a sound understanding of consumers, their needs, and behaviours. It provides a detailed examination of the consumer decision process and the internal and external influences on this core decision process. The unit also assists students in applying this knowledge to the development, implementation and evaluation of marketing activities within an organisation.

AMB201 Marketing and Audience Research

Pre-requisites	BSB126, CTB126, BSB116, or BSB117
Anti-requisites	MIB305, MGB220, COB334
Equivalents	AMX201, CTB201
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-2 Gardens Point - SEM-1, SEM-2, SUM

This unit provides an introduction to the conduct and evaluation of marketing and audience research across the disciplines of advertising, marketing and public relations. Class members explore how field studies, survey and experimental research are employed to support advertising, marketing and public relations information needs. The unit provides an overview of research process, research design, methods of data collection and analysis, and the development of research proposals to

support decision-making. Class members also explore issues related to research on media audiences, research ethics, and the management of client briefings.

AMB202 Integrated Marketing Communication

Pre-requisites	BSB126 or CTB126 or BSB116 or BSB117
Anti-requisites	COB207, MIB309
Equivalents	AMX202
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-1 Gardens Point - SEM-1, SEM-2

In past decades many organisations separated the different forms of marketing communication that convey their corporate and marketing messages. They developed separate plans for their advertising, public relations, direct marketing, personal selling and sales promotion with separate goals, objectives, strategies and budgets. Today many companies recognise the concept of integrated marketing communication which integrates these different functions along with other aspects of the marketing mix that communicate with stakeholders and customers. Integrated marketing communication requires a 'total' approach to planning marketing communication programs and coordinating communication strategies in omnichannels in support of overall brand and product/service marketing objectives. Specifically, the use of online social media as an important communication tool is highly examined within this subject.

AMB203 Independent Study

Anti-requisites	COB206
Other requisites	Subject to Unit Coordinator Approval
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2, SUM

AMB204 Purchasing and Procurement

Pre-requisites	BSB119 or CTB119
----------------	------------------

Units

Anti-requisites	IBB312
Equivalents	AMX204
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit examines the nature and importance of Procurement in the role of business today. Procurement has become increasingly important and valued by organisations that are part of global supply chains. The management and strategic control of procurement functions in modern businesses adds profit through cost control in businesses and that has gained significance in the drive to maintain profit in internationally competitive markets. Modern procurement professionals require the use of many skills to achieve these outcomes and this unit introduces students to the functions of purchasing and procurement in an organisation.

AMB206 Social Marketing

Pre-requisites	BSB126, CTB126, PUB104, BSB116, XNB151 or BSB117
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Social marketing is the application of commercial marketing principles to solve social problems. It is increasingly being adopted by governments around the world as they seek effective solutions relating to public health and climate change, environmental issues. This unit introduces students to the theory and application of social marketing, explaining how techniques such as branding, segmentation and the marketing mix can be used to respond to social and health issues. Students will learn to analyse real world problems and develop innovative and creative solutions using social marketing frameworks. This is an elective unit for business and public health students

AMB207 Entertainment Marketing

Pre-requisites	BSB126 or CTB126
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The entertainment industry is the second largest in the world, worth nearly US\$2 Trillion and offers great opportunities. However the marketing of entertainment provides some unique challenges to the application of marketing tools. Students will complete a marketing case study that will clearly demonstrate to potential employers that students have the necessary skills and abilities to work in an entry-level position/analytical role within a marketing department in the entertainment or arts field.

AMB209 Tourism Marketing

Pre-requisites	BSB126 or CTB126
Equivalents	AMB351, AMX209
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit examines tourism marketing in the context of destinations, which is a fundamental pillar of the travel industry and tourism research. The majority of tourism activities take place at destinations, which are now the biggest travel brands. The majority of governments now fund a destination marketing organisation (DMO) to enhance competitiveness in global markets where travellers are spoilt for choice. The success of individual tourism businesses is reliant to some extent on the competitiveness of their destination. Therefore the unit analyses the tourism macroenvironment, and the role of the DMO in developing and coordinating a holistic destination marketing plan that encourages collaboration between the many stakeholders for the wider benefit of the community.

AMB210 Importing and Exporting

Pre-requisites	BSB119 or CTB119
Equivalents	AMX210, IBB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Trade has become fundamental to the survival and growth of many businesses in Australia as well as other economies. International business students need an

understanding of the many challenges entailed in the management of trade. Import and export practice is an applied, technical and evolving area of international business operations that reflects the dynamic nature of trans-national trade in the global economy. This unit examines the importance of importing and exporting for Australia's economic development, provides key information related to importing and exporting, uses industry perspectives on issues of current importance in international trade and provides a structured tutorial programme to achieve this.

AMB211 Brand Management

Pre-requisites	BSB126
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Learners will develop a comprehensive understanding of brand building concepts and techniques to improve the long term profitability of brand strategies. Although brands may represent invaluable intangible assets, creating and nurturing a strong brand poses considerable challenges for organisations. This elective unit draws on the concept of branding theory to provide marketers with ideas around planning and implementing brand management programs, measuring and interpreting brand performance, and growing and sustaining brand equity.

AMB220 Advertising Theory and Practice

Pre-requisites	BSB126, CTB126, BSB116, or BSB117
Anti-requisites	COB308
Equivalents	AMX220
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit serves as an introduction to later units in the advertising major and gives learners an overview of the advertising industry and the management of the advertising function. The unit traverses the interrelationship of the institutions of advertising, the advertisers, the advertising agencies and the media. It introduces research and details methods of determining advertising objectives, budgets, establishing target audiences, interpreting audience ratings and

circulation figures, and enables learners to gain a preliminary understanding of the creative functions of the advertising industry. It also shows the ethical and legal side of advertising and its important role in society and the economy.

AMB240 Marketing Planning and Management

Pre-requisites	BSB126 or CTB126
Equivalents	AMX240, CTB240
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2 Caboolture - SEM-2

This unit extends the student's knowledge of the fundamental marketing concepts and theories introduced in the Faculty Core unit in Marketing, by adding further breadth and depth of knowledge of marketing and developing skills in the application of this knowledge to marketing planning and management within the business environment. Emphasis is on the roles within a marketing team at the product management level in undertaking analysis, planning, implementation and control of marketing activities. Specifically this unit uses a role-play simulation called QUTopia to engage students in real-world learning. QUTopia is unique to QUT and has awards at both local and national levels as an exciting way of engaging students.

AMB251 Innovating Products and Services

Pre-requisites	BSB126 or BSB116 or CTB126
Anti-requisites	MIB227
Equivalents	AMX251
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit covers the dynamics of product and service innovation within the marketing function of an organisation. Products are defined in the broadest sense as both tangible and intangible and include the various categories of consumer and industrial products and services. The course covers product market analysis, the product/service development process, research and testing, new product financial analysis, branding and new product

commercialisation.

AMB263 Introduction To Public Relations

Pre-requisites	BSB126, CTB126, BSB116, or BSB117
Equivalents	AMB260, AMX263
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces students to the theory and practice of public relations, the discipline that deals with the creation, maintenance, and enhancement of relationships between organisations and their publics. Topics covered include publicity, events, and public opinion. This unit may be taken concurrently with AMB264 Public Relations Techniques especially by students undertaking a public relations major. However, it may also be taken by those students doing a public relations minor, or as a stand alone unit by those students in a wide variety of study disciplines who wish to understand more about this important area of business.

AMB264 Public Relations Techniques

Pre-requisites	BSB126, CTB126, BSB116, or BSB117
Anti-requisites	AMB261, AMB262
Equivalents	AMX264
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

AMB264 Public Relations Techniques focuses on writing for audiences - including the media - on behalf of organisations. It introduces students to public relations skills such as research, developing key messages, writing, and editing. It also helps them develop an understanding of how media work. AMB264 has been designed to be undertaken as part of the public relations major and minor. It may also be taken as a stand-alone unit by students in other disciplines. Note that students who enrol in this unit are assumed to have a high level of competency in written English. Students are also required to have or acquire a basic knowledge of public relations: readings are provided to help students refresh or acquire that knowledge.

AMB300 Independent Project 1

Other requisites	Subject to Unit Coordinator Approval
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

AMB302 Project

Other requisites	Subject to Unit Coordinator Approval
Assumed Knowledge	null
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

AMB303 International Logistics

Pre-requisites	(AMB240 or CTB240) or (AMB210 or IBB210). AMB210 can be studied in the same teaching period as AMB303
Equivalent s	AMX303, IBB303
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit examines international logistics through the concepts of international distribution channels and international supply chain management. Strategy in managing international logistical constraints is emphasised with practical studies of contemporary international supply chain management in international industries. Traditional costs and financial aspects of supply chain management are considered. Contemporary issues are incorporated including: the impact of e-business on international logistics; the evolution of new technologies for 'smart' packaging, warehousing and international stock control; the combination of international services with goods products; recent technological developments in international transportation and product quality control.

AMB304 Logistics Operations

Pre-requisites	AMB210
Equivalents	AMX304
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is designed to provide strategic and practical knowledge of the role of logistics operations within the context of contemporary business. This unit extends the study of logistics and completes the logistics major offering.

AMB310 Real World Internships and Projects

Equivalent s	AMX310
Other requisites	Completed 192 credit points or more; major in advertising, international business or logistics, marketing or public relations; and GPA of 4.0 or higher. Placements must be approved by Unit Coordinator. Placements are minimum of 120 hours
Assumed Knowledge	Knowledge and skills in major area of study appropriate to an undergraduate student in final two semesters of study is assumed knowledge
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The unit provides real world learning experiences for undergraduate students majoring in advertising, international business or logistics, marketing or public relations. Students complete internships or projects with approved industry and community partners, learning through authentic activities that are planned and assessed. An internship is a work integrated learning opportunity, with a student completing a placement in an organisation. A project is a work integrated learning opportunity, with a student completing a service learning, community, industry, or work-based project, often as a member of a small team of students. Internships and projects are learning opportunities for students, focused on practising, developing and refining knowledge and skills.

AMB318 Advertising Copywriting

Pre-requisites	AMB220 or COB308
Equivalents	AMB221, AMX318
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

There are two parts to any copywriting process the thinking and the writing. In the first part, students learn to solve advertising problems through an understanding of the prospect and the product and the formulation of incisive creative strategy. In the second part, creative thinking techniques are applied and advertising concepts emerge from the creative strategy. Students' thinking and writing skills are refined in weekly workshops and culminate in a group project.

AMB319 Media Planning

Pre-requisites	AMB220
Equivalents	AMB222, AMX319
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces the qualitative and quantitative factors affecting media selection and use by advertisers. It covers the costing and scheduling of media, market targeting, measuring media exposure, media comparisons and trends. In-depth analysis of advertising media will allow learners to develop an understanding of the characteristics of each. The application of the concepts of media decision making, media strategy and research to the development of a media plan are emphasised.

AMB320 Advertising Management

Pre-requisites	(AMB318 or AMB221) and (AMB319 or AMB222)
Equivalents	AMX320
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit takes the perspective of the Advertising Manager and addresses the use of research in developing, implementing, managing, and assessing a successful advertising campaign. In Advertising Management, learners use the case method of learning to examine the advertising process from its place in the marketing mix to the formulation of objectives, strategy and budget to the development of creative and media tactics and their ongoing evaluation. In addition, issues that impinge upon the advertising campaign management process such as legal and ethical issues, globalisation and the client-agency relationship are discussed.

AMB330 Digital Portfolio

Pre-requisites	((AMB318 or AMB221) and (AMB319 or AMB222)) or AMB372 or AMB240
Equivalents	AMX330
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2 Caboolture - SEM-1

This advanced unit leverages and extends the theoretical perspectives and applied skills introduced to students in earlier advertising, marketing and public relations units. It explores the digital environment, interrogates digital platforms and integrates critical research, planning and an understanding of analytics into digital campaign development. This understanding is then applied through hands-on exercises in areas such as search, analytics or content to build a portfolio of digital skills.

AMB331 Direct Marketing

Pre-requisites	AMB202, AMB220, AMB240, CTB240, or AMB249
Anti-requisites	COB315
Equivalents	AMX331
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The discipline of Direct Marketing has grown in importance because of its precise targeting, easy accountability, its foundations role in Integrated Marketing Communication (IMC), and its increasing share of the marketing communication

budget. This unit focuses on the principles of direct marketing and the role of the database in locating prospects, tracking customers, and building relationships. It examines the components of direct marketing telemarketing, personal selling, and direct response advertising. As the main communication discipline of direct marketing, the emphasis is on direct response advertising. Students analyse the offer planning, strategy, creative, media, testing, and evaluation of direct marketing campaigns.

AMB336 International Marketing

Pre-requisites	AMB240, CTB240, AMB210, or IBB210
Equivalents	AMX336, IBB213
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Caboolture - SEM-2

The aim of this unit is to provide students with a thorough understanding of the multiplicity of issues that impact on the development of international marketing strategies and plans and their operational implementation. The unit is highly applied and provides students with the following opportunities: to analyse global international firms, their marketing strategies and various international marketing issues in a variety of geographic and industry contexts; to evaluate methodologies and new practices for handling problems and issues typical of global and international markets and competition; to develop an operationally sound international marketing plan.

AMB339 Advertising Campaigns

Pre-requisites	AMB320 and AMB330
Equivalents	AMB321, AMX339
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This capstone advertising unit draws from all the theoretical, analytical, and applied material developed throughout the advertising major, and applies it to a client

brief. Learners develop advertising solutions that incorporate all aspects of an advertising campaign, including objectives, budgeting, message development, message delivery, and measurement. The key emphasis is on the use of research to develop sound advertising strategy, which is then executed as creative and media ideas and evaluated through ongoing benchmarks.

AMB340 Services Marketing

Pre-requisites	AMB240 or CTB240, and AMB201 or CTB201
Anti-requisites	MIB311
Equivalents	AMX340, CTB340
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2 Caboolture - SEM-1

This unit explores the special characteristics of services that distinguish the marketing of services from goods. Topics include the distinctive aspects of consumer decision-making relative to services and the implications for marketing strategy formation, the management of demand and supply, customer service and its influence on service satisfaction, service quality management and measurement, internationalisation of the service sector, and distribution modes for services that reflect the significant impacts of new technologies on service delivery

AMB342 Strategic Procurement

Pre-requisites	AMB204
Equivalents	AMX342
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is designed to provide knowledge of strategic procurement practices and practical knowledge of the role of procurement within the contemporary logistics industry. This unit extends the study of procurement and its place in a modern firm.

AMB359 Strategic Marketing

Pre-requisites	AMB340, and AMB335 or AMB241
----------------	------------------------------

	or AMB330
Equivalents	AMB341, AMX359
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2 Caboolture - SEM-2

Emphasis of the capstone Marketing unit is on the role of the marketing manager at the corporate and strategic business unit/division levels. Underpinned by client projects, learners are exposed to a variety of strategic marketing techniques and issues, and learn how to apply these in increasingly competitive and changing marketplaces. The relevance extends to corporate, government and not-for-profit planning and management activities.

AMB369 International Business Strategy

Pre-requisites	AMB336, AMB303, IBB303, or IBB213
Equivalents	AMX369, IBB300
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit focuses on the definition and implementation of corporate strategy for worldwide operations. As the capstone unit in the International Business major, it is designed to build upon the knowledge base of previous units, introducing you to the strategic management of firms, and engage you in the strategic choices which international managers face in the international environment.

AMB372 Public Relations Planning

Pre-requisites	((AMB263 or AMB260) and AMB264)) or (AMB261 and AMB262)
Equivalents	AMX372
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces students to the public relations planning process. Students build skills in planning by analysing the components, execution and evaluation of contemporary public relations campaigns. The public relations planning process, partnered with theoretical concepts and ethical considerations, is examined

Units

across practice contexts and areas.

AMB373 Issues, Stakeholders and Reputation

Pre-requisites	(AMB263 or AMB260 and AMB264) or (AMB261 and AMB262)
Equivalents	AMB360, AMX373
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Issues, Stakeholders and Reputation (AMB373) provides students with the opportunity to build on and apply their understanding of public relations to an in-house organisational role to anticipate and respond to issues that influence stakeholder relationships and organisational reputations. Corporate communication provides foundational skills and knowledge of the issues management process and decision making to understand and respond to stakeholder opinion.

AMB374 Global Public Relations Cases

Pre-requisites	AMB372, AMB261, or AMB262
Equivalents	AMB370, AMX374
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Global Public Relations Cases applies the theoretical underpinnings of broad public relations practice to particular practice areas, using case based learning. Analysis and discussion of real-world cases in local, national and international settings and the public relations responses will improve students' application of knowledge and skills in public relations and strengthen students' decision-making and critical thinking skills.

AMB375 Public Relations Management

Pre-requisites	AMB372 and AMB373, or AMB360
Equivalents	AMX375
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Public Relations Management develops student knowledge and skills in the development and management of public relations programs in an organisational setting. Key concepts relevant to the practice of public relations include corporate reputation, internal communication, organisational culture and change programs, corporate social responsibility, and issues and crisis management.

AMB379 Public Relations Campaigns

Pre-requisites	AMB374 or AMB370, and AMB201 or CTB201
Equivalents	AMB361, AMX379
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

As the capstone unit, Public Relations Campaigns sees the student bring together the design, strategic planning and tactical preparation that underpins an effective public relations campaign. Students research, develop and present their plans for a real world client, enhancing their portfolio prior to graduation.

AMB390 Bridging Cultures - International

Anti-requisites	AMB120
Other requisites	To enrol students must have completed 144cp (or equivalent to three semesters full-time study), have a course GPA of 4.5, which must include a minimum of 48cp of study in BS08
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit develops students' awareness, understanding, sensitivity and ability to deal with individuals and organisations from different cultural backgrounds. The unit is designed specifically for students

enrolled in Bachelor of Business - International (BS08).

AMN400 Consumer Behaviour

Anti-requisites	MIN419
Equivalents	AMX400
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit provides an introduction to the area of consumer behaviour and a forum for discussion of theory and research in the field. The current state of consumer behaviour research will be reviewed and some of the emerging trends in the area are explored through several avenues of assessment. The unit provides the environment for students to conduct their own research in areas that are relevant, of interest to them and reflect the interdisciplinary nature of consumer behaviour.

AMN401 Integrated Marketing Communication

Anti-requisites	CON421
Equivalents	AMX401
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

Integrated Marketing Communication (IMC) focuses on the strategic integration of the functions of Public Relations, advertising, promotion, direct marketing and personal selling to achieve brand equity and increase the effectiveness of promotional communications with target audiences. The fragmentation of mass markets is also addressed, along with the explosion of new technologies, the emergence of global markets and the rapid changes in economic conditions within which organisations operate.

AMN403 Marketing and Survey Research

Anti-requisites	MIN413
Equivalents	AMX403
Credit Points	12
Campus	Gardens Point and External

Units

Availabilities	Gardens Point - SEM-1, SEM-2
	External - SEM-1, SEM-2

This unit provides a detailed overview of marketing research to support decision making in the areas of advertising, integrated marketing communication, marketing and public relations. The unit builds an advanced understanding of the use of survey research to support the descriptive and predictive information needs of management in such areas as consumer opinions and behaviour, and stakeholder analyses. Students will explore issues related to survey research design, questionnaire development and administration, sampling, measurement, data analysis including descriptive and multivariate statistics and presentation of research results.

AMN404 Readings in Integrated Marketing Communication

Pre-requisites	AMN401
Anti-requisites	CON416
Equivalents	AMX404
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

The unit provides participants with the opportunity to make a detailed exploration of the literature on a particular topic or problem in the area of Integrated Marketing Communication under the direction of a supervisor. The readings integrate and consolidate theory and research related to IMC and from other studies undertaken in the course. Students undertake a formal and systematic review of literature in a particular problem area of IMC related to their interests, project or thesis. Students may also explore work covered in other specialisations.

AMN405 Decisions and Issues in Integrated Marketing Communication

Pre-requisites	AMN401 or AMN420
Equivalents	AMX405
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2

External	- SEM-1, SEM-2
----------	----------------

This unit surveys the intellectual and ethical foundations of a number of business decisions and contemporary issues emerging within the advertising and IMC disciplines. Through the use of intensive case study analysis and discussion, students will refine conceptual understanding and analytical skills to explore advertising and IMC topics. This will not only help inform IMC planning and strategic decisions, but also provide systematic explanations of their societal implications and consequences.

AMN406 Project

Pre-requisites	Completion of 60 credit points of approved prior study
Anti-requisites	CON405
Equivalents	AMX406
Credit Points	24
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

In this unit, students examine in detail and offer a solution for a real world problem in one of the disciplines of the QUT Business School. The study is based on a work integrated learning (WIL) project and in industry information, published journal literature and may involve primary research and analysis. Project supervision will be arranged by the Unit Coordinator through consultation with the student and available staff members.

AMN411 Independent Study

Other requisites	Subject to Unit Coordinator Approval
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

AMN420 Advertising Management

Anti-requisites	CON417
Equivalents	AMX420
Credit Points	12
Campus	Gardens Point and

External	
Availabilities	Gardens Point - SEM-1, SEM-2
	External - SEM-1, SEM-2

This unit empowers students to make effective management decisions within the advertising process. It examines the setting of advertising objectives, and the need for coordination of these with marketing, communication and organisational objectives. It develops a sound understanding of advertising regulations and ethics, budgeting, research and campaign coordination. It further examines management's participation in the creative, media and production processes, and the contribution of advertising management to the cohesion and creativity of the agency.

AMN423 Strategies for Creative Advertising

Anti-requisites	CON419
Equivalents	AMX423
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit explores the substantive body of academic research on creative advertising. It follows the creative process, beginning with the formulation of consumer insight, to the development of creative strategy and big idea and concluding with campaign evaluation. Through cases and presentations, students examine how copywriters think, the illumination of the 'big idea' and its execution across the very diverse advertising and digital platforms.

AMN425 Digital Strategy

Equivalents	AMX425
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

Australia is one of the first countries in the world where advertising expenditure in the online environment exceeded that of television and all other traditional media. This necessitates a seismic shift in the way we need to think about advertising,

public relations and marketing. It signals an imperative need to understand how digital campaigns are planned, created and measured. This introductory digital strategy unit fulfils this remit by explaining and practicing fundamental digital skills such as analytics, search, content creation, mobile and social media. It introduces the theory behind the practice in order to inform managerial decision-making and best practice in digital strategy.

AMN430 International Logistics Management

Equivalents	AMX430, IBN410
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces international logistics functions and develops a strategic approach to international business transactions and integration focusing on supply chain management. The unit introduces traditional and contemporary logistics concepts and describes international logistics operations including global transport systems, inventory management, materials handling and information management. Global supply chain management cases and strategies are integrated throughout the unit.

AMN431 Marketing Internationally

Anti-requisites	MIN421
Equivalents	AMX431, IBN421
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit gives students essential knowledge and skills to understand and strategically respond to the challenges and opportunities of international marketing. Students will evaluate and formulate international marketing strategies. Students will develop and practice their critical thinking, data analysis and decision making skills. They will also learn to craft and defend their judgements to make effective contributions to marketing strategy informed by cultural and ethical understanding.

AMN434 Special Topic in International Business

Equivalents	AMX434
Other requisites	Subject to Approval of Subject Area Coordinator
Assumed Knowledge	null
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is a research unit for Masters students choosing the International Business major. It consists of a structured proposal, literature review and written research paper.

AMN442 Marketing Management

Anti-requisites	MIN422
Equivalents	AMX442
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

The study of marketing, marketing systems and marketing management and marketing planning within contemporary structure of social, cultural, political, economic, business and organisational environment. Concepts are applied through the study and construction of a marketing plan, which involves market and sales analysis, target market strategies, tactical decision planning, and implementation and control. Marketing management concepts are applied to virtual and physical markets and attention is given to a range of skills in finance, human resources, information and other skills needed by marketing managers in these markets.

AMN443 Product and Service Innovation

Anti-requisites	MIN423
Equivalents	AMX443
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External

- SEM-1

This unit examines the dynamics of innovation and development within the mix of core marketing activities of organisations. Once establishing the integral role innovation plays in organisations, the unit also reviews the key stages in the process of creating, developing and implementing new product and service concepts including product, service and market analysis, design, innovation, evaluation and testing of ideas, branding and packaging, market testing and investment analysis.

AMN444 Services Marketing

Pre-requisites	AMN442
Anti-requisites	MIN424
Equivalents	AMX444
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit introduces a framework for studying services and explores both strategic and operational issues including the design and delivery of services; the formulation of communication strategies; the definition, measurement and implementation of customer-focused marketing programs in service industries; and the establishment and maintenance of relationships with customers.

AMN445 Strategic Marketing Management

Pre-requisites	AMN442
Anti-requisites	MIN425
Equivalents	AMX445
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This is a capstone unit which aims to ensure students can manage the complete marketing function at a senior level within a corporation, and includes assessing the marketing function's performance with appropriate tools to diagnose, assess, track and evaluate performance and to modify processes to improve the function. Links between the marketing function and other functions of a business such as accounting,

Units

operations and human resources are drawn, so that the student would be in a position to move into top management if the opportunity arose.

AMN447 Contemporary Issues in Marketing

Anti-requisites	MIN407
Equivalents	AMX447
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit offers advanced study of topical issues and emerging trends in marketing practice as a result of new technologies, current events and their impact on local, national and international enterprises. In depth interaction with business and public policy leaders expands students research, reflection and strategic thinking abilities.

AMN460 Corporate and Investor Relations

Anti-requisites	CON409
Equivalents	AMX460
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit explores aspects of the public relations function in corporate communication contexts, with a focus on the intersection of theory and professional practice. There is consideration of legal, regulatory and governance requirements for organisations, and the influence on public relations strategy, planning and tactics.

AMN461 Corporate Media Strategy and Tactics

Anti-requisites	CON424
Equivalents	AMX461
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit examines theories underpinning mass media and links these with the practice of public relations media tactics. Students analyse techniques and skills used in liaison with news media across paid, owned, earned and shared platforms. Students will produce a media strategy rationale and a digital media portfolio encompassing a range of media kit tools such as media releases, fact sheets, and photo opportunities.

AMN462 Community Consultation and Engagement

Equivalents	AMX462
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit introduces students to the key public relations engagement strategies of information, consultation, and participation, and develops their understanding of the theoretical foundations of these strategies. It provides students with the skills and knowledge to identify the expectations stakeholders have of organisational engagement; and to develop appropriate public relations communication programs based on strategies of information, consultation and/or participation in response. Ethical practice is a key organising framework for this unit.

AMN465 Public Relations Management

Anti-requisites	CON415
Equivalents	AMX465
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

AMN465 Public Relations Management provides learners with an overview of the theory and research that constitute the foundations of public relations practice. The unit provides a detailed inspection of communication processes necessary for the management of organisational relationships with publics. The unit focuses on such topics as issues management, organisational change, public opinion, and mass media effects in order to explore the foundations of

contemporary public relations management.

AMN467 Public Relations Campaigns

Equivalents	AMX467
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Public Relations Campaigns provides a systematic exploration of the planning, management and evaluation of public relations campaigns and programs. The primary goal of the unit is to build a detailed understanding of existing theory and research that informs the development and evaluation of public relations campaigns. The unit focuses on key problem areas of campaign management including strategy, design and evaluation. Contemporary best practice campaigns are identified and critiqued. In response to a real world client brief, a public relations campaign plan is developed.

AMN468 Issues and Crisis Management

Anti-requisites	CON408
Equivalents	AMX468
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

AMN468 examines the strategic management of crisis communication for organisations. Following a strategic planning approach content covered includes organisation analysis, issues identification, audience prioritisation, strategy formulation, tactical planning and implementation and evaluation. Issues in management (pre-crisis) will be addressed as well as proactive and defensive communication strategies during crisis. The unit will demonstrate the application of general communication tools to a specialised area.

AYB114 Forensic Digital Analysis

Anti-requisites	BSB212, CTB212
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The rise of the Internet and the rapid development of technological applications is significantly changing the way in which business is being conducted, how fraud is occurring, and, consequently, how forensic accountants investigate and analyse digital data. The technologies that impact on business operations and fraud investigation include Office technologies, Social Media, Mobile applications, Virtual technologies and Cloud Computing. In addition, a significant increase in the use of mobile devices has implications for businesses and for the way forensic accountants investigate fraud related issues. Therefore, although these tools are enabling businesses to create new business process and product/service opportunities that transcend the barriers of distance and time, they have also enabled the ways in which fraud can be perpetrated. This unit introduces students to the ways in which a myriad of digital data can be investigated and analysed. In addition, students will be able to recognise the new data risks and governance issues facing organisations in the digital age. Studying a variety of these technological developments and software used to analyse data emanating from the various technologies will provide students with up-to-date tools and techniques used in forensic investigation.

AYB115 Governance, Fraud and Investigation

Equivalents	BSB213
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Governance issues and fraud have an increasingly large impact on business. When implementing business strategies, professionals in all sectors of the economy are confronted by a wide range of governance issues because of the electronic and global nature of their business operations. Fraud is an ever present problem in a technology driven business environment and understanding how fraud occurs and can be prevented and detected is becoming a necessity for business operations. Business professionals need to have an understanding of the IT governance issues, be familiar with risk management, fraud detection and prevention, gathering evidence and have an understanding of legal issues that are associated with the forensic accounting role, including participation in a mock trial.

AYB200 Financial Accounting

Pre-requisites	BSB110 or CTB110
Equivalents	AYB121, AYX200
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-2 Gardens Point - SEM-1, SEM-2, SUM

Financial Accounting examines the accounting concepts and procedures for the preparation of external financial reports relevant to corporate structures within the context of the Australian accounting profession's conceptual framework, the relevant accounting standards, and Corporations Law requirements. Topics include: an introduction to the international regulatory environment and the conceptual framework underlying international accounting standards, financial reporting requirements for companies; accounting for leases; and the professional role of accountants.

AYB205 Law of Business Entities

Pre-requisites	BSB111 or CTB111
Anti-requisites	AYB223
Equivalents	AYB305
Credit Points	12

Units

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit looks at the various types of business entities that exist in Australia today and laws applicable to these entities. The unit will also take into account consideration of a range of issues affecting these legal entities, such as capital raising and finance, taxation, accounting, audit and statutory requirements under the relevant Acts and legislation.

Equivalents	AYB325, AYW219
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2 Caboolture - SEM-1

This unit introduces students to the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levy of income tax are examined including general and specific categories of assessable income and allowable deductions, capital gains tax and administration aspects of the tax system. The taxation of fringe benefits is also examined. The unit also provides a brief overview of the taxation of partnerships, trusts and companies and an overview of the goods and services tax. Emphasis is placed on developing students' skills in problem solving through research and analysis of taxation issues.

AYB221 Accounting Systems and Technologies

Pre-requisites	BSB110 or CTB110
Anti-requisites	AYN443
Equivalents	AYX221
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-1 Gardens Point - SEM-1, SEM-2

This unit provides an examination of the concepts, processes and issues relevant to computerised accounting systems including: accounting information

systems; internal controls; design and development of computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle and payroll cycle; computer fraud, security and crime; accessing accounting information; and accounting in an electronic environment. Practical application of these concepts is enhanced by the use of accounting software such as MYOB, spreadsheet software such as Excel, database software such as Access, and interactive resources such as CasWorkX on Accounting Information Systems Cycles.

AYB225 Management Accounting

Pre-requisites	BSB110 or CTB110
Equivalents	AYX225
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2 Caboolture - SEM-2

This unit introduces students to accounting systems and techniques that provide management at all levels with information for use in planning, controlling and decision making. This can be contrasted with financial accounting, which provides summary financial information principally for external users (i.e. shareholders, creditors, banks, etc). Emphasis is placed on developing a range of accounting systems (in particular product costing) which may be used in manufacturing firms, although the principles and concepts used to develop such systems can be adapted to service organisations.

AYB227 International Accounting

Pre-requisites	BSB110 or CTB110, and BSB119 or CTB119
Equivalents	AYX227
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

International Accounting is designed to provide students with an insight into, and an appreciation of, many of the financial accounting and reporting issues faced in an international business environment. Issues examined include: comparative, financial, international

accounting systems and practices; cultural influences on financial accounting and reporting policies and practices; comparative international analysis of international, foreign, financial statements; international foreign currency transactions and hedging; international corporate social responsibility (sustainability) reporting and comparative international auditing and taxation issues in the twenty-first century. The unit also examines the impact of international harmonisation of financial accounting and reporting standards on multinational corporations and the investment communities worldwide.

AYB230 Corporations Law

Pre-requisites	BSB111 or CTB111
Anti-requisites	LWB334
Equivalents	AYX230
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The unit is intended to equip students with a basic understanding and knowledge relevant to the environment of legal entities, particularly corporations. It also seeks to provide students with sufficient basic understanding of the legal structure of business associations to enable them to recognise the appropriate structure for particular commercial situations.

AYB232 Financial Services Regulation and Law

Pre-requisites	BSB111 or CTB111
Equivalents	AYB312
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This subject looks at the laws and regulations applicable to corporate securities and financial services in Australia, examines disclosure obligations in prospectus and financial products, ASX listing rules, takeovers, and market misconduct.

AYB240 Superannuation Regulation and Practice

Pre-requisites	BSB110 or
----------------	-----------

Units

	CTB110, and BSB111 or CTB111
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces students to the Australian superannuation system and the regulatory framework under which it operates. The unit aims to develop students' knowledge and understanding of the superannuation system to equip graduates seeking career opportunities in the superannuation industry, or other areas of business dealing with superannuation-related matters affecting organisations and/or individuals.

AYB250 Personal Financial Planning

Pre-requisites	(BSB111 or CTB111) and (BSB110 or CTB110) and EFB210. EFB210 can be enrolled in the same teaching period.
Anti-requisites	AYB335, EFB230
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces students to the fundamental aspects of the financial planning process, the legal framework governing the financial planning industry and the responsibilities of financial planners. The unit will also expose students to alternative strategies of wealth creation while taking into consideration taxation, superannuation and social security issues.

AYB301 Audit and Assurance

Pre-requisites	(AYB221 or INB120) and (AYB340 or AYB220)
Equivalents	AYX301
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-2 Gardens Point - SEM-1, SEM-2, SUM

This unit enables students to comprehend the key concepts of auditing as a discipline, to demonstrate the relationship between auditing and the systems of

accountability and to demonstrate the differences between manual and EDP audit processes. The unit builds on the knowledge of accounting and accounting standards acquired in prior units by enabling students to understand in detail the audit process (including professional auditing standards and techniques) which leads to the auditor providing an opinion on the financial reports of various types of entities. Ethics and auditor's liability are also covered.

AYB311 Financial Accounting Issues

Pre-requisites	AYB340 or AYB220
Equivalents	AYX311
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2 Caboolture - SEM-1

This unit examines accounting theories and reporting practices adopted in the financial statements of reporting entities, focusing on publicly listed companies that communicate information to meet the decision making needs of external parties. Emphasis is placed on developing an understanding of, and the ability to critically evaluate, how regulatory requirements and incentives affect financial reporting. The unit overviews the different governance models of corporations and relates them to their financial reporting environment. Touching on accounting theories and their evolution, it seeks to explain accounting policies made by managers. This framework provides a basis for examining specific accounting issues with an emphasis on both the application of specific accounting measurement models (historic cost versus fair value) or regulatory provisions (continuous disclosure requirements). The unit concludes by analysing some of the most recurrent issues of debate in the international arena.

AYB320 Advanced Taxation Law

Pre-requisites	AYB219 or AYB325
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit examines the principles governing the taxation treatment of various business entities including partnerships, trusts, companies and superannuation funds from a domestic and international perspective. The unit provides students with an understanding of other considerations which affect the choice of an appropriate business structure from a taxation perspective, including rollover relief and the CGT small business concessions, the importance of legitimate tax planning and the distinction between tax avoidance and tax evasion and some of the more simple aspects of international taxation between Australia and its major trading partners. The unit also covers an analysis of the GST, a review of types of supplies under the Act and the concept of creditable acquisitions. Specific issues such as the GST implications of real property, the margin scheme, GST planning strategies and the GST avoidance provisions are also covered.

AYB321 Strategic Management Accounting

Pre-requisites	AYB225
Equivalents	AYX321
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Strategic management accounting develops a theory of organisations that provides an understanding of the information requirements of management to facilitate the strategic planning, decision-making and control necessary for the achievement of their objectives. Topics include: developing effective performance-evaluation systems and compensation plans; examining how managers can design organisations to motivate individuals to make choices that increase firm value; strategic planning and budgetary systems; pricing and product mix decisions; managing transfer-pricing disputes among divisions; developing an understanding of new management accounting practices, including activity-based costing (ABC) and the balanced scorecard (BSC); and appreciating the research on the benefits and problems with ABC and the BSC.

AYB338 Accountancy Work Placement

Other requisites	An application, interview and subsequent approval
------------------	---

Units

	by the unit coordinator is required to enrol, in addition to the completion of AYB200 & AYB221& AYB219 OR other units approved by the Subject Area Coordinator.
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit fosters learning through work related experience. Students will be given the opportunity to experience work that is performed by accountants and will enable them to more effectively learn and practice accounting discipline knowledge and graduate capabilities. For additional important information about this unit please refer to the current unit outline.

AYB339 Accountancy Capstone

Pre-requisites	(AYB220 or AYB340 and AYB311), OR (AYB220 or AYB340 and AYB321)
Equivalents	AYX339
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-2 Gardens Point - SEM-1, SEM-2

Accountancy Capstone co-ordinates several parts of the accountancy degree that have already been studied by students. At the same time some new concepts are introduced for each topic. The unit attempts to simulate the real world where the professional advisor/consultant is confronted with unstructured multi-disciplined problems on a day-to-day basis. AYB 339 takes a very practical, hands-on approach with students working together in groups of between four and five discussing and solving simulated real-world client problems. Throughout the unit, students take on the persona of a professional advisor/consultant. The teaching staff will take on the role of the client. Based on a problem-based learning (PBL) methodology, students will learn the process of how to deal with the real-world accounting problems that graduates would typically be expected to encounter in their first year working within a public accounting firm. These problems require students to work together in teams, research issues, gather information and

form conclusions.

AYB340 Company Accounting

Pre-requisites	AYB200 or AYB121
Equivalents	AYX340
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Caboolture - SEM-2

This unit includes: an overview of the statutory requirements that dictate the format and content of published financial reports of companies; the requirements of the Corporations Act 2001 and various disclosure orientated accounting standards; accounting for income tax; accounting for the acquisition of assets (including entities); the preparation of consolidated financial statements; accounting for investments in associates; segment reporting; the translation of the results of foreign operations; and liquidation.

AYB341 Forensic and Business Intelligence

Pre-requisites	AYB114, BSB124, or BSB114
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit focuses on providing skills in forensic and business intelligence through the use of SAS technologies. The unit assists students to analyse large data sources and report their findings to assist managerial decision making. Forensic and business intelligence issues and corporate decision making processes are emphasised. This unit provides students with an important skill base in supporting corporate decision making and investigation in a business environment.

AYN411 Audit and Assurance

Pre-requisites	AYN416
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

Topics in this unit include: the audit environment; legal liability of auditors; professional ethics; the study and evaluation of audit planning and programming, evidence, internal control theory and review techniques; audit program applications; audit in CIS environment and evaluation of CIS controls; computer-assisted audit techniques; computer fraud; audit sampling techniques; audit reporting.

AYN414 Cost and Management Accounting

Pre-requisites	AYN416 Can be enrolled in the same teaching period.
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit introduces students to techniques that provide management at all levels with information for use in inventory valuation, planning, controlling and decision-making. The unit's major focus is on product costing systems for manufacturing firms.

AYN415 External Reporting Issues

Pre-requisites	AYN417 and AYN418
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

External reporting issues integrates the technical skills developed in prior financial accounting units by considering the issues relating to the application of accounting techniques, within an economic and conceptual framework. The aim of this unit is to expose students to a number of contemporary issues in external reporting.

AYN416 Financial Accounting 1

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit provides an introduction to financial accounting within the context of the accounting profession's conceptual framework, relevant accounting standards and the requirements of the Corporations Law. Topics include: the accounting cycle for both service and merchandising entities, the preparation of general purpose financial reports, cash management and control, non-current assets and statement of cash flows.

AYN417 Financial Accounting 2

Pre-requisites	AYN416
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit examines the life cycle of a corporate entity and investigates accounting issues relating to the registration, funding, expansion and termination of a corporate entity. It covers an overview of the statutory requirements of the Corporations Act 2001 relating to the registration of a company; an overview of the statutory requirements that dictate the format and content of published financial reports of companies; the requirements of the Corporations Act 2001 and the major disclosure orientated accounting standards; accounting for income tax; accounting for the acquisition of assets (including business entities); accounting for investments in associates and joint venture arrangements; and accounting for business combinations including the preparation of consolidated financial statements. The unit also examines the statutory requirements that dictate the termination of a company's life and the accounting procedures necessitated by winding up/liquidation.

AYN418 Financial Accounting 3

Pre-requisites	AYN416
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit introduces students to the concepts and theories that underlie financial reporting and disclosure practices. The regulatory environment and factors influencing accounting policy

choices provide a framework for examining the financial effects and behavioural implications of applying different accounting methods to specific accounting issues. Particular emphasis is placed on both the application of specific accounting techniques/rules and the conceptual/theoretical issues associated with alternative accounting methods.

AYN424 International Accounting

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is designed to provide students with an insight into, and an appreciation of, many of the financial accounting, reporting, disclosure and enforcement issues faced by global corporations in an international business environment. The unit examines issues including: international, financial accounting systems in the global environment; international patterns of accounting diversity including cultural influences on external, financial accounting and reporting; comparative international accounting systems and practices across major cultural groupings; the pressures for international accounting convergence which is now taking place in 120 countries; international disclosure and enforcement trends; international corporate social responsibility reporting; international financial analysis of foreign financial statements; and business issues into the twenty-first century such as global corporate governance and international taxation including country-by-country reporting.

AYN426 International Capital Markets Law and Regulation

Pre-requisites	AYN410 or AYN456 or (GSN412 and GSN472)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit focuses on the regulation of global capital markets. The material covered is broad-based and includes the history, philosophy and economics of capital markets and the regulatory models used by governments. The Global Financial Crisis is reviewed in depth including a review of some of the firms seriously affected by the GFC. Applied

capital market regulation is discussed in the context of margin lending, documentary credits and international debt factoring. The Australian Prudential System is discussed in relation to systems in other economies. The Australian Corporations Act is used to provide a foundation in corporate law and regulation for comparison with other regulatory environments. The unit also covers corporate misfeasance; the fundamentals of the Principal-Agent problem; an introduction to the major regulators in the global environment; and the regulation of financial instruments.

AYN433 Research Topics in Accounting

Pre-requisites	AYN417 and AYN418
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit encompasses contemporary accounting research in financial accounting, management accounting, auditing and corporate governance. It looks at the key theories and research methodologies applied in accounting and prepares students to complete their proposed research topic. Students are engaged in the systematic reading and critical review of academic and professional contemporary accounting literature. They will review a range of theories and research approaches applied in the accounting field and identify potential topics and research questions requiring investigation. They will also develop an appropriate research design to address a research question.

AYN438 Taxation Law and Practice

Pre-requisites	AYN410 or AYN456
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit introduces students to the statutory framework of the Australian taxation system. Elements in the determination of taxable income and the levying of income tax are examined including general and specific categories of assessable income and allowable

deductions, capital gains tax and administration aspects of the tax system. The taxation of fringe benefits is also examined. The unit also provides a brief overview of the taxation of partnerships, trusts and companies and an overview of the goods and services tax. Emphasis is placed on developing students' skills in problem solving through research and analysis of taxation issues.

AYN443 Electronic Commerce Cycles

Pre-requisites	AYN416
Anti-requisites	AYB221, AYN402
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit examines the concepts, processes and issues relevant to computerised accounting systems including: accounting information systems; internal controls; design and development of computerised accounting systems including general ledger and reporting cycle, revenue cycle, expenditure cycle and payroll cycle; computer fraud, security and crime; accessing accounting information; and accounting in an electronic environment. Practical application of these concepts is enhanced by the use of accounting software such as MYOB, spreadsheet software such as Microsoft Excel and database software such as Microsoft Access.

AYN453 Financial Forensics and Business Intelligence

Pre-requisites	AYN443
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

As a result of having to make increasing numbers of urgent, strategic, high-risk decisions, management need more than just information to assist them. This unit focuses on providing skills in forensic and business intelligence through the use of MS Access, MS Excel and SAS Enterprise Guide 4.3 to mine and analyse data sets to assist managerial decision making and aid in fraud detection. Applications for financial forensics and business intelligence are emphasised.

AYN454 Forensic Accounting and Investigation

Pre-requisites	AYN417 and AYN418
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The unit is designed to provide students with an understanding of the risks of fraud or corporate failure occurring and an appreciation for the subsequent forensic review processes. An understanding of control environments and their adequacies and inadequacies should also be derived.

AYN456 Business and Corporations Law

Anti-requisites	AYN410 and AYN412
Equivalents	AYX456
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit will introduce students to the Australian legal environment and develop students' knowledge and understanding of the basic principles of business law and the Australian corporations legislation. Students will be encouraged to develop their research and analytical skills relevant to contemporary business and corporate practice.

AYN460 Accountancy Work Placement

Other requisites	An application, interview and subsequent approval by the Unit Coordinator is required to enrol in this unit. In addition to completion of the following units: AYN417 & AYN418.
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit fosters learning through work related experience. Students will be given the opportunity to experience the work

that is performed by accountants which will enable them to more effectively learn and practice accounting discipline knowledge and graduate capabilities. Admission to this unit is by application and subsequent approval by the unit coordinator. For additional important information about this unit please refer to the current unit outline.

AYN505 Financial Analysis and Business Valuation

Pre-requisites	AYN417 and AYN418 and EFN406
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is about the analysis of financial information arising primarily from the financial reports of entities. Fundamental analysis techniques are examined in detail with particular emphasis on the application of these techniques in equity (share) valuation decisions. The unit comprises three related parts. Part one outlines the four basic steps in the fundamental analysis framework; business analysis, accounting analysis, financial analysis and prospective analysis. The next part combines these skills in addressing the question of valuation, while the final section of the unit applies the skills in several different contexts, such as credit analysis, security analysis, mergers and acquisitions and financial policy decisions.

AYN506 Strategic Management Accounting

Pre-requisites	AYN414 and AYN417
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Strategic Management Accounting develops a holistic view of organisations, strategy and management control. The unit prepares students for the real world of unstructured problem-solving and aims to build their practical knowledge and skills as future strategic leaders. In this unit students take on the role of a senior manager to actively understand how organisation's effectively formulate and implement strategy using business case studies aimed at broadening the skills and

Units

abilities of strategic management accountants. Topics include: organisations and making strategy, implementing strategy through the management of control systems; forecasting, internationalisation, social and environmental management accounting and strategic leadership.

AYN507 Governance Issues in Accounting

Pre-requisites	AYN417 and AYN418
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit adopts an accounting perspective to examine issues relating to sound corporate governance, accountability and transparency. Topics covered include the following: the role of the board of directors and board committees; internal control and risk management; audit committees, internal and external audit; duties of directors and management; codes of conduct and ethics; compensation issues; conflict of interest and insider trading.

AYN520 Integrated Issues in Professional Practice

Pre-requisites	AYN417 and AYN438. AYN438 can be studied in the same teaching period as AYN520
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The Accountancy profession has repeatedly stressed the need for accounting university graduates to be 'work ready' and able to deal with and solve unstructured, multi-disciplined problems. This unit is a deliberate attempt to address this concern for students who enter the accounting profession through the Master of Business (Professional Accounting) course and enables students in the Master of Business (Accounting) course to further develop their team work, research and problem-solving skills using problem-based learning (PBL). The unit simulates issues faced by a professional advisor/consultant by presenting students with simulated real world problems. The 'real world' focus of the unit ties strategically into QUT's charter and

provides our students with a potential advantage in seeking employment.

BEB110 Organising and Managing Project Team

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit focus is on the dynamics of managing and organising project teams involved in delivering built environment, engineering or infrastructure projects. Recent literature has identified the need for managers and leaders to acquire knowledge in the areas of self management and the management of

others to contribute to project effectiveness. You will be introduced to key managerial and human resource theories to assist in the development of analytical and interpretive skills to enable you to proactively and effectively lead project teams.

BEB111 Managing Project Quality

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is one of four within the BEE minor in Project Collaboration and is designed to provide you with appropriate knowledge and skills needed for your involvement in delivering projects in professional organisations in the public and private sectors, by ensuring that the achieved project quality outcomes accord with client requirements and satisfy customer expectations.

BEB112 Principle of Project Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Project Management is the overall planning, control and coordination of a project, from inception to completion, aimed at meeting a client's requirements in order that the project will be completed on time within authorized cost and to the required quality standards. The aim of this unit is to provide the key concepts and foundation knowledge in project management, and to describe, clarify, and formalise project management process.

BEB113 Managing Project Cost

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Cost is a major metric of a successful project management. This unit introduces the process of managing project cost which includes planning, estimating, budgeting, and controlling costs so that the project can be completed within the approved budget.

BEB114 Project Financing

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Project is growing in complexity and size. Many projects never get off the ground due to insufficient financing. It is therefore necessary for project managers to know the sources and cost of project funds in order to package a financially viable project for approval. This unit introduces capital budgeting, project finance, and risk analysis. It covers the capital allocation framework, project cash flows, cost of capital, financial risk analysis, and how various types of projects are financed.

BEB801 Project 1

Equivalents	CEB411, CEB420, CNB434, EEB781-1, EEB889-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is usually taken in the final year of study. Students complete an individual project involving the application of skills and knowledge attained during the earlier years of their degree program. For some students, this unit will be taken one of two 'project' units related to the same student project; in such cases this unit may be a pre-requisite or co-requisite to the second unit (or a follow-on from the first unit). The final 'deliverable' for this unit may vary for each discipline and details will be provided in lectures/tutorials and on the Blackboard website.

BEB802 Project 2

Equivalents	CEB415, EEB782-2, EEB889-2
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is usually taken in the final year of study, and is only taken by students completing a two unit project. Students complete an individual project involving the application of skills and knowledge attained during the earlier years of their degree program. This unit will be taken as the second of two 'project' units related to the same student project.

BEB806 Project 1

Equivalents	CEB411, CEB420, CNB434, EEB781-1, EEB889-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is usually taken in the final year of study. Students complete an individual project involving the application of skills and knowledge attained during the earlier years of their degree program. For some students, this unit will be taken one of two 'project' units related to the same student project; in such cases this unit may be a pre-requisite or co-requisite to the second unit (or a follow-on from the first unit). The final 'deliverable' for this unit may vary for each discipline and details will be provided in lectures/tutorials and on the Blackboard website.

BEB807 Project 2

Equivalents	CEB415, EEB782-2, EEB889-2
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is usually taken in the final year of study, and is only taken by students completing a two unit project. Students complete an individual project involving the application of skills and knowledge attained during the earlier years of their degree program. This unit will be taken as the second of two 'project' units related to the same student project.

BEN610 Project Management Principles

Anti-requisites	PMN501 or PMN502
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit serves as an introduction to project management as a fundamental skill for all postgraduate coursework students in built environment and engineering. It offers an overview of the framework, processes and key knowledge areas of project management.

BEN710 Sustainable Practice in Built Environment and Engineering

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Sustainability has become a global agenda that impacts upon our work and everyday life. The unit will introduce principles, challenges and skills for dealing with a diversity of trans-disciplinary issues in sustainable development. By introducing critical sustainability theory and challenging best practices, this unit will prepare you for the impending changes that are necessary in all built environment and engineering disciplines.

BEN910 Integrated Project

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Problems that confront professionals are ill-defined and complex. The ability to define a problem, and collect and analyse relevant information using appropriate research methods is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to consolidate and extend previously gained skills through an activity that is relevant to industry and, where possible, is associated with a specific workplace.

BEN920 Integrated Project

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Problems that confront professionals are ill-defined and complex. The ability to define a problem, and collect and analyse relevant information using appropriate research methods is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to consolidate and extend previously gained skills through an activity that is relevant to industry and, where possible, is associated with a specific workplace.

BEZ910 Integrated Project

Credit Points	12
Campus	Gardens Point and External
Availabilities	External - SEM-1, SEM-2

Problems that confront professionals are ill-defined and complex. The ability to define a problem, and collect and analyse relevant information using appropriate research methods is essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to consolidate and extend previously gained skills through an activity that is relevant to industry and, where possible, is associated with a specific workplace.

BSB009 Service Learning and Community Engagement for Business

Other requisites	Enrolment in this unit requires completion of 96 credit points of approved study including four or more of the Business Core Units
Assumed Knowledge	Enrolment in this unit requires completion of 96 credit points of approved study including four or more of the Business Core Units.
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit is an elective option for students, which supports experiential learning experiences linked to service, volunteering and engagement with communities. These experiences can be part of the QUT Community Engaged Learning Network, which brings together students from a range of disciplines at QUT in teams to contribute to projects with partner community organisations. With the approval of the unit coordinator, students can link the unit to other structured volunteering projects or exchange programs.

BSB110 Accounting

Anti-requisites	CNB293, UDB342
Equivalents	BSD110, BSX110, CTB110
Credit Points	12
Campus	Gardens Point and Caboolture

Units

Availabilities	Gardens Point - SEM-1, SEM-2, SUM
	Caboolture - SEM-1

Accounting data is the basis for decision making in any organisation. Accordingly, the aim of this unit is to provide students with a basic level of knowledge of modern financial and managerial accounting theory and practice so that they can understand how accounting data is used to help make decisions in organisations. The unit covers financial procedures and reporting for business entities, analysis and interpretation of financial statements and planning, control and business decision making.

BSB111 Business Law and Ethics

Anti-requisites	AYB120, LLB101, LLB202, LWB136, LWB145, LWS012, UDB102
Equivalents	BSX111, CTB111
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Caboolture - SEM-2

This unit integrates the concepts and principles of business law with the theories and applications of business ethics. The unit makes extensive use of cases in law and ethics to develop knowledge and skills that enable students to analyse, apply and evaluate the legal principles and ethical decision-making processes relevant to modern business practice.

BSB113 Economics

Equivalents	BSD113, BSX113, CTB113, UDB104
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Caboolture - SEM-2

This unit introduces students to the key economic concepts and their practical applications. It comprises twelve topics each focusing on a current economic issue. Microeconomic topics include

demand and supply, elasticity, production and cost theory and market structure. Macroeconomic topics include measuring GDP, inflation and unemployment, money and banking, and fiscal and monetary policy.

BSB115 Management

Equivalents	BSD115, BSX115, CTB115
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-2 Gardens Point - SEM-1, SEM-2, SUM-1

The unit provides an introduction to the theories and practice of management and organisations. Emphasis is on the conceptual and people skills that are needed in all areas of management and in all areas of organisational life. The unit acknowledges that organisations exist in an increasingly international environment where the emphasis will be on knowledge, the ability to learn, to change and to innovate. Organisations are viewed from individual, group, corporate and external environmental perspectives.

BSB119 Global Business

Anti-requisites	BSB116, BSB112
Equivalents	BSD119, BSX119, CTB119
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-2 Gardens Point - SEM-1, SEM-2, SUM

This unit examines the drivers of globalisation and the diversity of country markets at an introductory level. It develops the skills and understanding needed to identify and respond to the opportunities, challenges and risks of conducting business across politically, economically and culturally diverse environments. An authentic country analysis study is undertaken to help identify where a firm can find opportunities both in terms of actual and potential markets and the location for value-adding activities. The unit aims for students to develop a comprehension of the nature and role of globalisation and the drivers of international business, knowledge of the competitive forces and

challenges confronting all business as a consequence of globalisation processes and an awareness of the additional knowledge and skills required of management to operate business internationally across a diversity of environments in an ethical, legal and sustainable manner.

BSB123 Data Analysis

Anti-requisites	BSB122, CTB122, EFB101, LQB284, MAB101, MAB141, MAB233
Equivalents	BSX123, PYB110
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-1 Gardens Point - SEM-1, SEM-2, SUM

The ability to collect, analyse, manipulate, understand and report data is an important skill in any work environment. This is particularly true in business where learning to deal with randomness, variation and uncertainty is a vital skill for anyone intending to apply their knowledge. This unit is designed to ensure that students gain the basic tools necessary to allow them to develop this skill. Students will also gain an introduction to many of the quantitative techniques which will be used throughout their further studies in their chosen discipline.

BSB124 Working in Business

Equivalents	BSD124, BSX124
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2, SUM-2 Caboolture - SEM-1

This unit will help you to kickstart your study and your career in business regardless of your specific discipline. Not only does "Working in Business" give you an understanding of where business has come from and where it is headed, but you will also gain insights into yourself and how you can develop as both a student and professional in the business world. It covers an overview of business, the important issues for working as a professional in an organisation, and also gives you the opportunity to reflect on

Units

your own skills, preferences and career options so you can plan a future that suits you.

BSB126 Marketing

Anti-requisites	BSB116
Equivalents	BSD126, BSX126, CTB126
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2, SUM Caboolture - SEM-1

BSB126 Marketing is an introductory unit that examines the role and importance of marketing to the contemporary organisation. Emphasis is placed on understanding the basic principles and practices of marketing such as the marketing concept, market segmentation, customer value and consumer behaviour. The unit explores the various elements of the marketing mix, with special reference to product, price, distribution, and promotion, including advertising and public relations. By way of introduction only, key issues relating to services marketing, e-marketing and strategic marketing are also canvassed.

BSB303 Internship (Caboolture)

Anti-requisites	MGB338
Other requisites	Subject to Unit Coordinator approval and 96 credit points of prior studies
Assumed Knowledge	null
Credit Points	12
Campus	Caboolture
Availabilities	Caboolture - SEM-1, SEM-2

This unit for Caboolture-enrolled students only offers a self-directed learning experience with the opportunity to utilise your discipline skills in problem definition, research and development of strategies for effective implementation. You will be provided with guidance from the unit coordinator in the course of your project or placement, but you will have the main responsibility for achieving appropriate and relevant outcomes to meet the unit's requirements and the client's needs. Application of professional standards and ethical conduct in the project are to be maintained at all times. (Caboolture-enrolled students in other discipline areas

who wish to undertake a work placement should contact their Subject Area Coordinator directly for more information).

BSB304 Project (Caboolture)

Other requisites	Subject to Unit Coordinator approval and 96 credit points of prior studies.
Assumed Knowledge	null
Credit Points	12
Campus	Caboolture
Availabilities	Caboolture - SEM-1, SEM-2

This unit for Caboolture-enrolled students only involves a structured program of study focusing on a select topic or set of topics which you have identified as significant to your professional development in your discipline. You will develop an individually tailored learning contract. The specific program will be developed in conjunction with and approved by the Unit Coordinator. The unit is designed to provide valuable professional portfolio building through advanced level examination of content and the development of self-directed learning skills. (Caboolture-enrolled students in other discipline areas who wish to undertake a project should contact their Subject Area Coordinator directly for more information).

BSB305 NEXT Innovation Challenge

Other requisites	Places are limited. Students apply for a place in response to an expression of interest prior to the start of semester
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit provides an interdisciplinary, work integrated learning experience for students as they develop, research and pitch an innovative business idea within the national NEXT Innovation Challenge program. Working with industry mentors and subject matter experts from Deloitte and CSIRO, students will work through a program involving idea generation and refinement; research to explore the potential of ideas; skills to compile convincing evidence to support thinking

and skills to prepare a compelling investor pitch to a panel of experts. Students will strengthen key graduate capabilities including critical thinking, communication, teamwork and self-reflection and gain real world experience to help prepare them for the fast paced and challenging world of business.

BSD110 Accounting

Anti-requisites	BSB110
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

Accounting data is the basis for decision making in any organisation. Accordingly, the aim of this unit is to provide students with a basic level of knowledge of modern financial and managerial accounting theory and practice so that they can understand how accounting data is used to help make decisions in organisations. The unit covers financial procedures and reporting for business entities, analysis and interpretation of financial statements and planning, control and business decision making.

BSD113 Economics

Anti-requisites	BSB113 or UDB104
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

All economic questions arise because we want more than we can get. Wants are infinite and resources to achieve those wants are scarce. Economics is the study of how best to use and distribute scarce resources to meet our needs and wants. Economists look at how people make decisions and the interaction of individuals in markets as a way of distributing those scarce resources. Sometimes markets work and sometimes they do not. Economics examines the role of government in either obstructing or improving market outcomes and the effect of those decisions on the well being of society. Economics also studies the economy as a whole and key topics include economic growth, inflation, unemployment and international trade. In studying these issues economists can understand how to manage the economy for the good of its citizens.

BSD115 Management

Anti-requisites	BSB115
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

An ability to understand the basic functions of management and apply that knowledge to contemporary practice is a key aspect of developing competent business professionals with the skills necessary to become informed and effective managers. The unit provides practical insight into current business issues and practices and provides a solid foundation for students who wish to further their studies in business and management or who simply wish to understand more thoroughly the role of organisations within society. The aims of this unit are to develop a basic and applied understanding of key concepts and theories in management and to develop practical skills in problem solving and effective communication in an intercultural context.

BSD119 Global Business

Anti-requisites	BSD119
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

There is a growing interdependency among people, businesses and institutions in a globalised environment. At an introductory level, this unit examines what "drives" and motivates a business to go global and the complexity and diversity of businesses that operate in a globalised environment. The unit develops the skills and understanding to identify and respond to the opportunities, challenges and risks of conducting business in and across politically, economically and culturally diverse country environments. An authentic business case study is undertaken in order to analyse a firm's market entry strategies and processes inherent in conducting business both in actual and potential markets and make some concluding comments. The aims of this unit are for students to have developed: an understanding of the nature and role of globalisation as a driver of global business: an appreciation of the strategic and operational demands including the competitive forces and challenges confronting all business as a

consequence of globalisation processes; an awareness of the additional knowledge and skills required of management to operate business internationally across culturally diverse environments.

BSD124 Working in Business

Anti-requisites	BSB124
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

Management is a professional practice and a key aspect of working in business is the ability to draw upon a range of management skills including self-awareness, interpersonal effectiveness and communication. The unit provides a platform for the development of these skills by helping students to reflect on their own competencies, preferences and career options. By offering insight into the meanings of professionalism in the workplace the unit creates a solid foundation for students who wish to go on and develop their studies in business or simply wish to understand more thoroughly areas for personal and professional development. The aims of this unit are to develop an understanding of the skills required to work effectively in a professional business environment.

BSD126 Marketing

Anti-requisites	BSB126
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

In order for business to operate successfully and profitably in today's competitive marketplace, its practitioners will need to be conversant with various marketing principles and concepts. More and more firms are finding that survival and growth depends very much on understanding customer needs, as well as the marketing environment in which they compete/operate. This unit introduces students to the key foundation principles of marketing, marketing strategies and tactics in order to adapt and respond to a continuously changing marketplace. To introduce students to the basic concepts of the related disciplines of advertising, marketing and public relations and how they relate to the wants and needs of consumers. To develop the communication skills of students and develop an appreciation of the role of

communication in business.

BSN005 Introduction to Academic Research

Other requisites	Subject to Course Coordinator Approval: 240 credit points of UG study with a GPA of 5.5>; pre-approval of Course Coordinator; subject to supervisor availability and completion of an agreed learning contract.
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

BSN404 Project 1

Anti-requisites	MKN101, MKN102, MKN103
Equivalents	BSX404
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit is designed to permit the student to undertake a research project, subject to the approval of the Course Coordinator.

BSN405 Project 2

Anti-requisites	MKN101, MKN102, MKN104
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit is designed to permit the student to undertake a research project, subject to the approval of the relevant Study Area Coordinator.

BSN406 Project 3

Equivalents	BSX406
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit is designed to permit the student to undertake a 24 credit point research

Units

project, subject to approval of the Study Area Coordinator.

BSN409 Research Project

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

BSN412 Qualitative Research and Analytical Techniques

Anti-requisites	CON500
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit provides a detailed overview of qualitative research to support decision-making in business disciplines. The primary purpose of this unit is to develop a detailed understanding of the theoretical contexts in which field studies and qualitative research methods have developed and the techniques that define the approach. Students develop the ability to analyse, conduct, and evaluate qualitative research in discipline areas related to business. The unit provides a basic preparation for the development of a project, thesis or dissertation proposal based on the use of qualitative research.

BSN414 Quantitative Research Methods

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Quantitative Research Methods is a postgraduate unit designed to introduce students to a range of quantitative research methods and their application to different research questions and types of quantitative data. Throughout the unit, students will be exposed to a wide range of quantitative research issues including survey and index development, factor analysis, multiple regression, experimental data collection and analysis, ANOVA and MANOVA, structural models, secondary data collection and analysis, and longitudinal data analysis. Each lecture will be conducted in computer laboratories to allow students the opportunity to develop their quantitative research skills using SPSS and AMOS with data provided by lecturers.

BSN420 EY Asian Century Growth Initiative

Other requisites	Places are limited. Students apply for a place in response to an expression of interest prior to the start of semester
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This Work Integrated Learning (WIL) unit provides students with a unique opportunity to gain experience in addressing real world issues and problems in consultation with industry mentors from Ernst and Young and with support from subject matter experts. Students will work in interdisciplinary Project Teams to develop, research and pitch a feasible business growth initiative for success in the Asia-Pacific region. This unit helps students to explore the efficacy, assumptions and limitations of discipline theory and to extend their knowledge and skills through application to complex situations and environments where problems are often ill-defined, information is often incomplete and stakeholders present diverse issues to be managed. It is designed to strengthen key graduate capabilities including critical thinking, communication and teamwork and to help prepare students for the fast paced and challenging world of business.

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

- SEM-1, SEM-2

BSN501 Dissertation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

BSN502 Research Methodology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The purpose of this unit is to introduce a range of research designs and methods to help you analyse, evaluate and conduct research in discipline areas related to business. It provides an essential preparation for the development of a thesis or dissertation proposal. Areas of study include research paradigms, higher order thinking, research design, measurement, and sampling. The unit focuses on both quantitative and qualitative research designs.

BSN503 Research Seminar

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

In this unit students prepare detailed literature reviews relevant to the thesis or dissertation proposal. Students are required to prepare and present a detailed seminar paper describing and explaining the results of their review and its relevance to the thesis or dissertation proposal. The unit is in two parts: the first provides a series of lectures from staff advising as to the requirements of a thorough, well-directed literature search and review; the second consists of a series of seminars from students presenting their findings.

BSX110 Accounting (Outbound Exchange)

Equivalents	BSB110
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1,

Credit Points	12
Campus	External
Availabilities	External - XCH-1

BVB101 Foundations of Biology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Biology is the study of living things. But what is "living"? Cells are considered the basic structural unit of life, existing in diverse forms from simple single-celled microbes to complex multicellular organisms such as plants and animals. Using collaborative approaches in workshops and the laboratory you will investigate the diverse nature of cells and consider how they are built and powered and how they interact and reproduce. You will use the concepts developed in this unit to discuss more complex questions such as "are viruses alive" and "can we synthesise life"?

BVB102 Evolution

Anti-requisites	NQB422
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to the concepts of genetics and evolution and how they underpin all biological sciences. The unit focuses on how genetic variation and evolutionary processes, explain patterns of biological diversity. It develops a contextual framework for a broad understanding of Plant (BVB203), Animal Biology (BVB301) and Ecology (BVB204).

BVB201 Biological Processes

Pre-requisites	BVB101 or SCB112
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

An understanding of processes which occur at the cellular level is fundamental to all aspects of biology. Using a combination of theoretical and laboratory-based approaches to enquiry you will explore the biochemical pathways and processes that facilitate biological function and the genetic mechanisms that control them.

BVB202 Experimental Design and Quantitative Methods

Pre-requisites	SEB113 or MAB101 or MAB141 or MXB101
Equivalents	NQB421
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The design, analysis and interpretation of experiments are critical skills in biology. Biological and environmental systems are often characterised by high variability and so specific approaches of observation, experimentation and analysis are required. Experimental Design and Quantitative Methods provides you with an introduction to foundational skills that are essential for the effective design, analysis and interpretation of experiments.

BVB203 Plant Biology

Pre-requisites	BVB101 and BVB102
----------------	----------------------

Units

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on earlier units to develop a deeper understanding of plant biology. Topics covered will include an in-depth examination of plant structure and physiology, including anatomy and morphology (e.g. cells, tissue and organs; growth, development and morphogenesis); photosynthesis and productivity (C3, C4, CAM); transport and mineral nutrition; reproduction; plant hormones and responses to stimuli. Practicals will build on these broad areas with an emphasis on hands-on learning and experimentation.

BVB204 Ecology

Pre-requisites	BVB101 or BVB102 or EVB102 or SCB112
Equivalents	NQB321
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Ecology is the study of the factors and interactions that influence the distribution and abundance of organisms. It is a key component of biology and is central to managing species and ecosystems. This unit examines the major concepts of ecology and develops the conceptual foundation for later subjects in the biology major and minors.

BVB212 Drug Action

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides you with an introduction to the classification of bioactive compounds according to the various physiological systems they influence, such as the cardiovascular system, nervous system and respiratory system. The principles of drug action will be discussed, including the concepts of drug specificity, potency and efficacy. These principles will facilitate a basic understanding of toxicology, the development drug tolerance, addiction and withdrawal. The unit will be taught in the context human and veterinary medicine, as well as the use of drugs in

sport, as poisons, or as food or environmental contaminants. The unit complements 'Drug Discovery and Design' offered in the same semester.

BVB213 Marine and Freshwater Biology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides an introduction to the science of marine and freshwater biology by providing an overview of the diversity of aquatic species and an examination of marine and freshwater ecosystems and their different forms and extent. The unit highlights the multidisciplinary nature of aquatic biology and identifies the properties of marine and freshwater systems that are important when considering their conservation and management.

BVB214 Vertebrate Life

Pre-requisites	BVB101 or BVB102 or EVB102 or SCB112
Equivalents	NQB423
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit examines the diversity and evolution of vertebrates. There is a focus on field- and lab-based identification and understanding of Australian vertebrates, set within the broader context of the global fauna, both extant and extinct. The unit encompasses various aspects of vertebrate life on planet earth: behaviour, phylogeny, physiology, morphology, taxonomy and management.

BVB221 Nature's Pharmacy

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Much of our current pharmacopoeia is derived from natural sources including plants, animals and bacteria. Using a collaborative approach in workshops and the laboratory, you will investigate the sources, uses and production of medicinally-active compounds of biological origin.

BVB223 Insect Life

Pre-requisites	BVB101 or BVB102 or EVB102 or SCB112
Equivalents	NQB322
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Anyone pursuing a career as an ecologist, environmental biologist, or teacher must be familiar with insects and have an appreciation of their remarkable diversity, how they function and interact with their environment, and how to identify the major groups. The aim of this unit is to provide an overview of insect life (and some of their closest relatives, e.g. the arachnids) as a basis for exploring the role of these amazing creatures in both the natural and human-modified world.

BVB224 Plant Diversity

Pre-requisites	BVB101 or BVB102 or EVB102 or SCB112 or LQB182
Equivalents	NQB323
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with an introduction to fundamental evolutionary and ecological concepts in plant sciences. It aims to provide the basis for a conceptual framework and understanding of the diversity of plants with a particular emphasis on the Australian flora and the development of plant identification skills. It builds on foundational biology, chemistry or environmental science studies and contributes to study within the minor in Wildlife Biology and other areas of plant science.

BVB301 Animal Biology

Pre-requisites	BVB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This advanced unit builds on Foundations of Biology and Evolution, to develop a deeper understanding of animal biology. Topics include an in-depth examination of animal diversity and the

Units

evolution of physiological systems across animals (e.g. visual and sensory systems, respiration, the immune system, nutrition and digestion). Tutorials and practicals will build on these broad areas with specialist case-studies in topics such as parasites, socio-biology, microbial interactions and other topical areas.

BVB302 Applied Biology

Pre-requisites	BVB201 and BVB204
Anti-requisites	NQB601
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Conservation and restoration biology, aquaculture, biosecurity and biotechnology are just some areas where biologists put theory into practice. In this unit you will learn how theoretical knowledge gained in previous units is applied to evaluate and solve key problems in the biological sciences. Topics examined will be linked to active research programmes.

BVB304 Integrative Biology

Pre-requisites	BVB202 and BVB203 and BVB301
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This Capstone unit requires you to think critically about an important problem in biological sciences and to integrate the knowledge gained through earlier units to provide an effective solution. You will conduct a research project, applying your knowledge of quantitative techniques and experimental design, to answer a specific challenge. Through critical analysis and reflection on your work and that of your peers, you will gain a deeper understanding of the scientific method and will become confident in applying it. The unit will provide a foundation for future Honours studies, or higher degree research.

BVB305 Microbiology and the Environment

Pre-requisites	BVB201
Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-1
----------------	---------------------------------

Microbiology and the Environment will explore fundamental principals in the biology and ecology of microorganisms in the context of the environment, agriculture industry and research. You will deepen your understanding of the problems and challenges of modern scientific inquiry using a range of multidisciplinary perspectives. This unit links to the work previously undertaken in BVB201 Biological Processes.

BVB311 Conservation Biology

Pre-requisites	BVB204
Equivalents	NQB622
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The theory and practice of conservation biology is essential for maintaining viable populations of rare, threatened or endangered species and for maintaining essential ecosystem processes. In this unit, students will synthesise a diverse range of information including high quality scientific literature, apply field skills in biodiversity monitoring and prepare written reports that provide an incisive and decisive analysis of key conservation issues. Specific modules will train students to critically analyse the link, or lack of, between theory and application in current conservation management approaches.

BVB312 Pest Management

Pre-requisites	BVB204
Anti-requisites	NQB523
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Pest organisms can directly affect human health, disrupt agriculture and negatively impact on the environment. Managing pest organisms in an environmentally sensitive and economically sustainable manner is a core component of the work done by applied biologists and needs to be built on sound science. With a focus on food security systems, this unit will cover relevant aspects of theory and practice for sustainable pest management.

BVB313 Population Genetics and Molecular Ecology

Pre-requisites	BVB204
Equivalents	NQB521
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Understanding the dispersal and movement of genes in populations is fundamental to the management of invasive species, the management of fisheries and wild resources and the conservation of rare species. This unit will provide the theoretical and practical training required for practicing ecologists to use genetic techniques in theoretical and applied settings. The skills learnt in this unit will be further developed in later units of both the Genetics and Genomics and Applied Ecology minors.

BVB317 Principles of Biotechnology

Pre-requisites	BVB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Biotechnology describes the use of biological organisms to make products or to solve problems of importance to society. It is anticipated that biotechnology will provide solutions to emerging challenges facing humanity including food security, pest and disease management, quality of life as well as issues arising from climate change. This unit will provide you with an understanding of the fundamental principles that underpin biotechnology.

BVB321 Invasion Ecology

Pre-requisites	BVB202 and BVB204
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Invasive species are globally recognised as a critical challenge to biodiversity and food security. With a primary focus on invasive plants, animals and pathogens, Invasion Ecology will cover a range of topics that will provide you with

knowledge essential for the effective understanding and management of invasive species in natural and human altered systems.

BVB328 Applications in Biotechnology

Pre-requisites	BVB101 and BVB201 and BVB317
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Biotechnology is the area of research and development using biological and cellular systems to produce many kinds of products that are used in different applications during everyday household living, at research institutions/organizations, as well as in different biotechnological companies and industries. Some specific examples of products and applications in Biotechnology include the use of yeast for dough rising (leavening) during bread making, using yeast in the fermentation and production of alcohol, use of filamentous fungi to produce enzymes that hydrolyse woody biomass to fermentable sugars, use of enzymes in laundry detergents, use of bacteria or animal cell cultures to produce proteins/antibodies for diagnostic kits in disease monitoring and control, application of genetic manipulation, recombinant gene technology and biochemical pathway engineering to obtain better producing/performing microorganisms and animal cell cultures, drought/disease resistant and more nutritious plants, and much more.

BVB330 Genomics and Phylogenetics

Pre-requisites	BVB313
Anti-requisites	BVB314, BVB327
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Biological scientists are currently turning to genomic and phylogenetic approaches to explore biological diversity, improve agricultural practices, develop better drugs, understand the genetic basis of disease and manage endangered or invasive species. This unit showcases variation in genomic structure and

function across life. You will also be introduced to analytical tools for database mining, gene discovery and genome exploration, which will provide an understanding of how genes interact with each other and the environment. You are apply theoretical knowledge to develop advanced data analysis skills, carry out genetics work in a laboratory and use data from active research programs to evaluate and analyse genomic and phylogenetic datasets to solve problems in the biological sciences.

BZB210 Biological Sciences

Anti-requisites	BVB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Cells are the basic structural unit of life. They exist in diverse forms from simple single-celled microbes to complex multicellular organisms such as plants and animals. In this unit you will investigate the diverse nature of cells and consider how they are built and powered and how they interact and reproduce. You will extend these foundation concepts to examine more complex problems involving molecular biology, plant and animal biology, and ecology.

CAB201 Programming Principles

Pre-requisites	IFB104 or MZB126 or ENB246 or MXB103 or INB104 or MAB220
Equivalents	INB270, IND270
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit gives you a positive introduction to modern programming concepts and techniques. Although some theoretical aspects of programming are covered in lectures, the overall emphasis of the unit is to learn programming concepts and related problem-solving strategies through an exploratory problem based approach. Through this means, you will be building abstractions with procedures, data and objects, thereby designing, coding and debugging programs of increasing complexity. The unit gives you the foundation for subsequent programming courses within the Computer Science major.

CAB202 Microprocessors and Digital Systems

Pre-requisites	(IFB104 and (IFB102 or INB102)) or ENB240 or MZB126
Equivalents	ENB244
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces you to the components inside a computer and how these components work together. Modern digital electronic systems rely on embedded microcomputers in order to achieve the level of sophistication present in today's applications. The design and development of such systems requires knowledge of the hardware and software to program the system. This unit identifies these design requirements and lets you develop embedded microcontroller-based system solutions. In particular, the unit covers computer instruction sets and the binary representation of information; an introduction to low-level programming in a command line environment; describes the processes that implement this relationship; provides practical experience through laboratory exercises which progressively expose features of a typical microprocessor; and explains how an embedded computer can interact with its environment (through the addition of I/O, sensors, actuators). The gives you a valuable foundation for further studies in areas such as robotics and networking.

CAB203 Discrete Structures

Pre-requisites	IFB104
Equivalents	INB250
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to basic mathematical principles which underlie all computing systems, thus giving you a deeper appreciation for the way computing technology works. All established technological disciplines have a sound theoretical foundation and Information Technology is no different. Discrete Structures concerns the branches of mathematics and the formalisms especially relevant to Computer Science. It covers topics such as set theory, relations and functions, formal logic, regular languages, finite-

state automata and information theory. These formalisms define the principles underlying programming language semantics, relational database operators, secure digital communication, and so on. An understanding of these topics gives you a deep appreciation for why computer systems and languages are designed and work the way they do. This unit introduces each of these topics in separate modules, thus providing a broad overview of the field.

CAB210 People Context and Technology

Pre-requisites	IFB103 or INB103 or INB182 or EGB100 or ENB100
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit develops a human-centred view of technology and information systems. Individuals and groups interact with information, technology, and other people in a wide variety of information environments of increasing complexity. You will learn to explore and model interactions from a variety of perspectives; cognitive, social, emotional, experiential, cultural, contextual and technological. You will learn to characterise users of technologies and to evaluate their interactions in order to understand their information, communication and learning behaviours. A variety of design techniques will allow you to investigate and represent human experience of technologies and information systems at a variety of scales.

CAB230 Web Computing

Pre-requisites	IFB104
Equivalents	INB271
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The World Wide Web has become our most important computer system. However, designing software for the web is rather different from designing for standalone PC applications. The unit starts with the protocols and architecture of the Internet and World Wide Web, including how search engines like Google work. After reviewing the latest W3C standards for HTML5, Javascript and CSS, the unit moves to designing web

based user interfaces and to programming web based applications. Issues covered include client and server-side data validation, authentication, authorization and combating security threats including SQL injection. The unit concentrates mostly on simple data driven applications, but contrasts these with more complex n-tier, MVC and AJAX based architectures. Beyond web applications, the unit introduces web services and the move toward the cloud.

CAB240 Information Security

Equivalents	INB255
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Information systems are increasingly used to store, process and exchange information, with most sectors of the economy dependent on electronic and often automated information systems. Information systems are vital, but also vulnerable. Information security is about protecting information and the systems that use, store and transmit it. This unit provides an introduction to information security, from the perspective of an IT user, including how to identify fundamental security issues with information systems ranging from single-user systems to those of large multinational organisations. It considers both technical and non-technical measures used to provide security for information systems, and examines guidelines on best practice implementation of information security measures.

CAB301 Algorithms and Complexity

Pre-requisites	CAB201
Equivalents	INB371
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit teaches you the fundamental principles used to assess the efficiency of software algorithms, allowing you to distinguish solutions that can process large amounts of data or perform complex calculations effectively from those that run unacceptably slowly or not at all. Despite extraordinary advances in computer processing speeds and memory capacity,

we still encounter software applications with unacceptable performance, especially on mobile, low-powered devices. Often this is due to basic limitations associated with the program's design, i.e., the algorithm it uses and the associated data structures it implements. In this unit you will examine a range of different algorithm types, review the principles used to predict their efficiency (so-called "complexity" analysis), and perform empirical measurements of specific algorithms to confirm the theoretical predictions.

CAB302 Software Development

Pre-requisites	CAB201 or INB270
Equivalents	INB370
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit teaches you how to advance your skills from 'programming-in-the-small' to 'programming-in-the-large' through the application of a sound software development process and appropriate tools and techniques for development and maintenance of large-scale, long-lived software. Software Development introduces you to the processes and practical techniques of professional application development, providing a foundation for you to work productively as part of a professional team in the workplace. Software Development uses large-scale projects to introduce you to a modern software development process and the technologies that support its effective and efficient application in industry. Motivated via a modern agile development process, you will be introduced to principles such as unit testing, test driven development (TDD), version control and build management, using an industrial-strength programming language and development tools widely used in industry. The unit also introduces advanced aspects of object oriented programming relevant to large-scale program development and maintenance, and gives you practice in working with important Application Programming Interfaces (APIs) for data access and presentation. Some aspects of large-scale program design are also introduced through concepts such as programming patterns and refactoring.

CAB303 Networks

Pre-requisites	CAB202
Equivalents	INB251
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

You will be introduced to the technical underpinnings of computer networks. Computer networks are essential to the activities of modern organisations and daily life and are the basis of a wide range of application systems, noticeably the Internet and the World Wide Web. You will be introduced to practical and theoretical knowledge on a wide range of modern networking topics to be able to design, implement and maintain network-based applications. You will participate in practical networking exercises, and design and develop a network device to provide hands-on experience with network-based computing.

CAB310 Interaction and Experience Design

Pre-requisites	CAB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Human centred design is investigated from theoretical and practical perspectives. This unit extends on the fundamental human-centred view of technology to explore theories and design approaches for particular kinds of interactions, relations and technologies. We will explore interactional stances (e.g. embodied interaction, persuasive technology, game interaction, mobile interaction), emerging human-technology relations (e.g. technology in developing countries, interaction with the internet of things, human-robot interaction), and holistic service approaches (service design, experience design). Methods that respond to the particular interaction/technology context are explored. Methods and philosophical perspectives on engaging participation from stakeholders in design are investigated. The co-evolution of interaction and technology is explored from a historical perspective to inform and examine current and future human-computer interaction approaches. Students will develop an innovative interaction/experience design and construct a theory of interaction that they

will then test.

CAB320 Artificial Intelligence

Pre-requisites	(INB270 or CAB201 or CAB202) and (MZB151 or ENB246 or MZB126 or MXB103)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to the basics of Artificial Intelligence (AI) ranging from Intelligent Search techniques to Machine Learning. It lays the foundations for further studies in Games, Robotics, Pattern Recognition, Information Retrieval, Data Mining and Intelligent Web Agents.

CAB330 Data and Web Analytics

Pre-requisites	CAB230
Equivalents	INB342
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

With every organisations housing massive data sources, data analytics has become an increasingly popular way to turn an organization's data into useful information and knowledge about their customers and business processes. Data analytics has direct applications in social networks, information retrieval, business processes, search-engines, e-commerce, digital libraries, bioinformatics, web information systems and many other utilities. This unit covers the concepts of data and web analytics, both of which aim to improve decision making by discovering and making use of knowledge which might be found in large databases and on the Web.

CAB340 Cryptography

Pre-requisites	CAB203 or MXB102
Anti-requisites	INB355
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Common information security goals are confidentiality, integrity and availability of stored or transmitted information.

Cryptography provides a rich collection of tools that can be used to guarantee confidentiality (by encrypting private information), authentication and integrity of communicated messages (by appending a message authentication code or a MAC). Cryptographic protocols can be used to achieve specific security goals in multiuser environments. In this unit, you will learn about symmetric-key cryptography and the adversarial model used in private-key cryptography. You will study basic tools for cryptanalysis (such as linear and differential attacks). You will investigate public-key cryptography (PKC) and its basic security notions. You will learn about cryptographic protocols such as zero knowledge protocols, multiparty computation and secret sharing.

CAB398 Capstone Project (Phase 1)

Pre-requisites	IFB299
Anti-requisites	IAB398
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit gives you the opportunity, under close guidance appropriate to the project, to apply and extend the knowledge and skills gained in your course to date to a substantial project. You will have the opportunity to gain knowledge and skills required for careful planning, scope control and task management to ensure the success of a project. You will undertake critical tasks required in the early stages of a project, such as: initial concept development and feasibility analysis, requirements gathering and analysis, design, implementation, testing, and project planning. These will culminate in the delivery of an initial version of the project deliverable (e.g., software product or prototype, literature review, research plan, etc.) to stakeholders as a proposal for further development in the unit Capstone Project (Phase 2). Your project will fall into one of the following major categories: Industry-based - A project that is initiated by one or more industry partners. You may be placed in an organisation, working in a team that comprises other students and/or members of the organisation. Alternatively you may conduct some work outside of the organisation but you will still have close interaction with stakeholders from the industry partner. There will be several channels through which you may identify and apply for such

projects. You may need to

CAB399 Capstone Project (Phase 2)

Pre-requisites	CAB398
Anti-requisites	IAB399
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Building upon the unit CAB398 Capstone Project (Phase 1), this unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date to execute the completion of a planned project. In this unit you will apply your disciplinary and professional knowledge and skills to refine and extend the existing deliverable. You will use appropriate quality assurance and testing techniques to ensure you are meeting your stakeholders' needs. You are expected to work professionally to deliver a high quality outcome to project stakeholders. The final product is to be delivered as a professional package that can be used directly by stakeholders and, where appropriate, published for access by the broader community. In most cases you are expected to carry forward a project from CAB398 and develop it to a high level of polish that represents a releasable product. Project deliverables will be assessed at the end of the Capstone Project (Phase 1) unit for their suitability to be continued in this unit. It is your responsibility to have a suitable project plan prior to beginning this unit. In situations where you do not have a project from CAB398 to continue into this project you will need to liaise with the unit coordinator for CAB399 to find a suitable project to undertake prior to the start

CAB401 High Performance and Parallel Computing

Pre-requisites	CAB301
Equivalents	INB375
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Building on your skills in "sequential" programming, this unit teaches you the tools and techniques needed to exploit multi-processor computer systems to achieve dramatic performance improvements for computationally

intensive problems. Parallelism is the fundamental way to overcome the performance limitations of individual computer processors when solving computationally challenging problems or when processing massive amounts of data. However, expressing an algorithm in a form that can be executed efficiently on parallel hardware is generally a very challenging task even for experienced software developers. This unit gives you an understanding of why future computer hardware will be increasingly parallel and the challenges this poses for software development. It gives you an understanding of parallel hardware and practical skills in creating high-performance programs using today's best tools and techniques.

CAB402 Programming Paradigms

Pre-requisites	CAB201 and CAB203
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This advanced unit exposes you to special-purpose programming languages that operate under different paradigms than the conventional "imperative" languages you have used in the course so far. A paradigm is a distinct set of concepts and pattern of thinking. The way software developers think and express themselves is profoundly influenced by the programming paradigm that they adopt. A variety of different programming paradigms have been developed over the years, each with their own strengths and weaknesses. This unit will expose you to new ways of thinking about and expressing software solutions. It will explore advanced programming language constructs, principles for the sound design of new languages and how they evolve. We take a look under the covers, and remove the "magic" by exploring how high level programming languages are practically implemented and ultimately executed as machine code on contemporary hardware. The unit provides both a deep theoretical foundation for programming languages by abstracting them to basic mathematical forms as well as showcasing practical application of those advanced principles for software development in the real world.

CAB403 Systems Programming

Pre-requisites	CAB201 and CAB202
Anti-requisites	INN365
Equivalents	INB365, ITB706, ITB745
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit gives you experience in programming at the level of a computer's operating system, as is needed for IT system administration or to interface computer processors with peripheral hardware devices. Systems programming is one of the many specialisations of software development and maintenance. It concerns software that works at the level of the computer's physical architecture. This unit introduces some of the principles and practices associated with writing programs that operate at such a low level of abstraction. It builds on the knowledge you have already acquired about general applications software development and computer architectures.

CAB420 Machine Learning

Pre-requisites	CAB320
Equivalents	ITB006
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Machine learning concerns the construction and study of systems that can learn from data by generalizing from examples. This approach is often feasible and cost-effective when traditional programming is not. This unit provides you with a broad introduction to machine learning and its statistical foundations. Topics include: definition of machine learning tasks; classification principles; dimensionality reduction/subspace methods; support vector machines, graphical models and deep learning. Application examples are taken from areas such as computer vision, finance, market prediction and information retrieval.

CAB430 Data and Information Integration

Pre-requisites	CAB230 or
----------------	-----------

Units

	CAB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The ever increasing variety (values, raw text, sensors, etc.) and volume of data available, together with recent advances on standards to describe and organise data (e.g. semantic web, relational databases, noSQL) brings both new opportunities and challenges for innovation. In particular, data integration can lead to a better understanding of business processes, increased security of systems and improved decision making. The challenges lie in selecting the data, transforming the data in a way that computers can deal with, and also organise the data in a scalable manner in order to provide powerful visualisations of important phenomena. The unit will start with the principles of data warehouse and data visualizations with OLAP (on-line analytical processing). The students will then be exposed to information extraction techniques meant for non-relational data using NoSQL and others.

CAB431 Search Engine Technology

Pre-requisites	CAB330
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit aims to equip you with a solid foundation in a broad range of topics that are required in order to effectively design, develop and improve Web search and text analysis systems. Through this study, you will be able to demonstrate knowledge of the principles and techniques of Web search, information retrieval, information filtering, text classification and topic modelling.

CAB432 Cloud Computing

Pre-requisites	CAB301 or CAB302 or INB370 or INB371
Equivalent	INB356
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Cloud Computing is among the most important developments in the IT industry

in recent years, and one which has received enormous, and at times ill-informed, media attention. In many respects, Cloud may be seen as a natural progression from earlier trends in service and infrastructure outsourcing and virtualisation, but it differs in the essential characteristic of elasticity: service and infrastructure provisioning is scalable in response to variations in demand, allowing clients to cater for unexpected spikes in load without tying up capital in expensive and potentially underutilised assets. This unit provides an advanced-level overview of the most important issues in the field, enabling you to understand the environment and the business and technical trade-offs at its heart.

CAB440 Network and Systems Administration

Pre-requisites	CAB303 or INB251
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Computer networks are essential for the running of organisations today. To ensure the effective and efficient operation of computer networks, they need to be administered and managed by competent technical people. This unit introduces the theory and practical aspects of network administration, management and security policies in an environment (Unix or Linux) commonly used in industry. It includes aspects of system administration relevant to networking.

CAB441 Network Security

Pre-requisites	(CAB240 or INB255) and (CAB440 or INB351)
Anti-requisites	INN251
Equivalent	ITB006
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Government and private organisations currently face an unprecedented level of malicious computer network activity from a wide range of sources, including hackers, activist groups, organised crime syndicates and nation states. IT professionals are expected to have an understanding of the vulnerabilities and

threats that computer systems under their protection may be exposed to. This unit provides the knowledge and skills needed to better defend electronic system services and applications. It introduces techniques and tools that demonstrate how attackers may exploit system services and applications. The challenge is illustrated using potential attacks on industrial control systems.

CRB001 Mathematics in Primary Education

Anti-requisites	CRB932, MDB001
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

In this unit students will investigate the role of mathematics in cultural and educational contexts. These settings as well as the development of mathematical ideas will be used to provide confidence in this discipline. Relevant curriculum documents will be used to develop knowledge and understanding of primary mathematics and mathematics education. Theories about teaching and learning mathematics will be introduced to assist students' development of mathematics and ensure proficiency of basic numeracy. This unit will prepare students to progress into deeper knowledge and understanding about mathematics curriculum and pedagogy in the subsequent mathematics curriculum units: Primary Mathematics Curriculum Studies 1 & 2.

CRB002 Science in Primary Education

Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

This introductory primary science unit focuses on developing your science content knowledge for teaching primary science, particularly in the areas of biology, chemistry, physics and earth and space sciences. Skills and knowledge specific to primary science will be developed through a context-based approach. The unit develops a foundation for Primary Science Curriculum Studies and introduces you to content and

Units

pedagogy required for initial practical teaching experiences.

CRB003 Humanities and Social Sciences Curriculum Studies 1: History and Civics

Anti-requisites	CLB008, CRB906, EAB013
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - 6TP4, SEM-2 Kelvin Grove - 6TP4, SEM-2 External - SEM-2

This unit introduces key concepts, content and skills that are the foundation of history education in the early childhood and primary years. The unit distinguishes young children as competent, proactive learners who can develop and experience perspectives about the past. Building on this understanding, early years and primary school students investigate and explore challenging topics in social and cultural education to enable them to become critical thinkers and active and informed citizens. As such, educators in the early childhood and primary years engage with children, families and communities that help them understand the role of history, civics and citizenship in society. Such knowledge develops an informed and critical understanding of the past with a view to better understanding of the present and indeed the future. This unit will develop your knowledge of concepts, content and skills in relevant curriculum documents and prepare you with the pedagogy to teach history in early childhood and primary school settings.

CRB004 Humanities Curriculum Studies 2: Geography and Civics

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit introduces key concepts, content and skills that are the foundation of geography education in the early childhood and primary years. The unit distinguishes young children as competent, proactive learners who can

develop perspectives about the environment and sustainability. Building on this understanding, early years and primary school students investigate and explore challenging topics in geography to enable them to become critical thinkers and active and informed citizens. As such, educators in the early childhood and primary years engage with children, families and communities that help them understand the role of geography, civics and citizenship in society. Such knowledge develops an informed and critical understanding of the environment with a view to understanding education for sustainability. This unit will develop your knowledge of relevant curriculum documents and prepare you with the pedagogy to teach geography in early childhood and primary school settings. This unit undertaken in the third year will further develop concepts learned in the second year unit, Humanities and Social Sciences Curriculum Studies 1: History and Civics.

CRB005 Primary English Curriculum Studies 1

Pre-requisites	CLB004 or EAB510
Anti-requisites	CLB006, CRB904
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This unit builds your knowledge and skills in teaching early literacy and comprehension. The unit focuses on: (1) knowledge of the English language; (2) students' English development; and (3) pedagogy for subject English. It links to the work previously undertaken in EAB510 Early Childhood English literacies and language 1 and prepares you for the second English curriculum unit EAB534.

CRB006 Primary English Curriculum Studies 2

Pre-requisites	EAB510 and CRB005
Anti-requisites	CLB007, CRB905
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit further develops your knowledge, skills and application for teaching primary English curriculum. The unit focuses on textual knowledge and skills, planning a unit of work involving multimodal texts, and children's writing development. It links to the work previously undertaken in Early Childhood English, Literacies and Language 1 and Primary English Curriculum Studies 1.

CRB008 Primary Mathematics Curriculum Studies 1

Pre-requisites	CRB001
Equivalents	CRB933, MDB002
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit extends from the introductory unit "Mathematics in Primary Education" to further develop your knowledge, skills and applications that focus on the teaching of numbers and measurement. Specific contents include the investigation of teaching methods for (i) concepts and skills for whole number, common fractions and decimal fractions, (ii) conceptual understanding and procedural methods for each of the four operations and (iii) the teaching of measurement (length, mass, capacity, time, and area), with or without the use of technology.

CRB009 Primary Mathematics Curriculum Studies 2

Pre-requisites	CRB001
Equivalents	CRB934, MDB003
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

Mathematics Curriculum Studies 2 develops essential mathematical knowledge and skills in the teaching of geometry, statistics, probability, and early algebra in primary school. The unit focuses on the development of conceptual understanding and related skills in these strands. Approaches for assessment and provisions for differentiation related to these content strands are also studied in this unit.

CRB010 Primary Science Curriculum Studies

Pre-requisites	CRB002
Equivalents	CRB937, MDB006
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-2 Caboolture - SEM-2

Becoming scientifically literate contributes to learners' capabilities with the skills and knowledge to inquire systematically about the environment. This unit builds upon a prerequisite unit (CRB002 Science in Primary Education), which involved understanding fundamental scientific knowledge for teaching in Australian primary schools. In CRB010 Primary science curriculum studies, students have an opportunity to develop an innovative primary science unit of work with a focus on facilitating primary students' scientific skills and abilities. Importantly, there is an opportunity for students to teach primary science to their peers, as a building block experience towards becoming competent primary teachers.

CRB011 Teaching Technologies

Equivalents	CRB936, MDB005
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

Technology involves envisioning and developing products to meet human needs and wants, capitalise on opportunities and extend human capabilities. This unit focuses on the products of technology including artefacts, processes, systems, services and environments. These products make up the designed world.

CRB013 ICT in Secondary Education

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit develops the theoretical and practical approaches to using information and communication technologies (ICT) in the secondary classroom. It focuses on you individually and collaboratively

participating in open-ended activities that require you to apply problem-solving strategies within the lecturer/tutor led activities.

CRB031 Excursions in Mathematical Reasoning

Equivalents	MDB349
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides a fresh perspective of mathematics from outside-of-mathematics-classroom experiences. It includes both the historical and modern development and applications of mathematics that engage the thinking, reasoning and learning in mathematics. The nature of mathematics in this unit is revealed as profound in its structure, practical in our daily life, and entertaining in the arts and humanity. Through the study in this unit, you will involve in meaningful mathematical problem solving activities in real-world contexts. You will further develop your mathematical knowledge and understanding, and skills to integrate them into your teaching in the mathematics classroom.

CRB038 Engaging with New and Emerging Technologies

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops the theoretical and practical approaches to using new and emerging digital technologies across the curriculum to connect and engage with students. It focuses on you individually and collaboratively participating in activities that require you to explore these technologies and apply them across all learning areas through guided activities.

CRB040 Learning Science Through Teaching

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an opportunity for students to identify and develop their potential as educators and communicators of science and mathematics. Students will develop insights into the processes that drive

people's thinking, learning and communication about science and mathematics. They will consolidate their own understanding of scientific or mathematical concepts through the planning process and build their confidence in presenting to others in a variety of formats. The unit can be taken as a single elective or as the initial unit in the Science and Mathematics Education minor.

CRB103 Interpreting the Past

Equivalents	CLB103, HHB121
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

For the purposes of this unit, 'history' will be taken to mean a set of practices developed by professional historians to produce knowledge about the past. The study of these practices promotes understandings of how historians set about their work, the rules that govern their methods, the reliability of historical knowledge and the value of history socially and culturally.

CRB106 China since the Qin Dynasty

Equivalents	CLB106, HHB246
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The unit provides students with the knowledge of how China, formerly a Dynastic Empire, was disempowered by Western Imperialism, only to obtain independence through the governmental embrace of Communism. The role of powerful individuals in determining China's destiny, and an understanding of how the country's fortunes changed over time are additional features of the content.

CRB107 The Classical World

Equivalents	CLB107, HHB257
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of this unit is to endeavour to explain/understand particular societies

and their transition in the Classical World, by focusing attention on selected periods, aspects and individuals pertaining to ancient Greece and Rome.

CRB108 Nations and Nationalism in Modern Europe

Equivalents	CLB108, HHB260
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit will develop an understanding of matters pertinent to the evolution of nationalism in Europe in the modern era. This will include the influence of social movements and cultural and economic issues.

CRB109 World Regions

Equivalents	CLB109
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit offers an introductory geographical overview of global regions. This is an excellent basis from which to develop an understanding of complex interrelationships between regions and nations. The integrated knowledge gained is of current and practical value to professionals in many fields requiring a knowledge of international affairs including teachers, planners, journalists, business managers travellers and people in general.

CRB110 Environment and Society

Equivalents	CLB110
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

People and nature interact to create distinctive and dynamic places and landscapes. Applied geography, with its integrating perspective and skills-base, helps us to understand this. The discipline hence addresses some of our most pressing social and environmental problems. Geography objectively views human activities, natural systems and their inter-relationships in terms of consequent spatial patterns and impacts on landscapes, regions and places.

CRB111 Environmental Hazards

Equivalents	CLB111
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit takes a geographical perspective to investigate the characteristics and distribution of environmental hazards, patterns of risk and vulnerability, and how people perceive, manage and adjust to hazardous environments.

CRB112 Asia in Focus

Equivalents	CLB112
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Australia's interaction with Asia, including our most populous nearest neighbour, Indonesia, continues to increase in significance. This unit examines aspects of Asian geography, environment, society and culture, in a contemporary framework.

CRB113 Australian Geographical Studies

Equivalents	CLB113
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Australia faces challenging problems and changes in relation to its changing population, socio-economic development and environmental sustainability. Many of these problems, relating to land-use and settlement patterns, migration trends, resource and hazard distribution, regional socio-economic structure, remoteness and accessibility etc, have a geographical basis. The aim is to describe and analyse, Australia's natural and social landscapes, their interaction, and the changes occurring in them from a geographical perspective.

CRB114 Geography in the Field

Equivalents	CLB114
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

- SEM-2

The unit builds upon the geography program to develop advanced understanding of social science research approaches and information capture/analysis. This provides a foundation in research and project design, relevant to a wide range of professions. You will develop skills in the preparation of project grant applications and in presenting a research plan orally.

CRB115 Medieval Europe and the World

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit traces in broad outline the evolution of Europe from the barbarian invasions of the fifth century, through the Carolingian period and the Crusades, to the centuries usually defined as the High Middle Ages. On a thematic level, the unit selectively examines topics concerned with political, religious and intellectual developments, along with the cultural history of Medieval Europe. The students will develop an understanding of how events and forces have contributed to societal, political and cultural change in Europe in Medieval times.

CRB116 The Classical World 2

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The unit explores the emergence of the civilizations of Egypt, the Near East and India, and introduces some of the key cultural, social, political, economic and intellectual developments across the first millennia of recorded history in this region. CRB116 is a core discipline unit in the History major in ED59 Bachelor of Education (Secondary).

CRB117 Australia, Britain and America

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The unit explores British and American social and political influences on Australian foreign policy and social attitudes since 1900. It also investigates Australia's, America's and Britain's relationships with a number of Asian

countries particularly through involvement in war. The lectures and readings, arranged chronologically, examine World War 1, the interwar-years, World War 2 and the post-World War 2 period.

CRB200 English Curriculum Studies 1

Anti-requisites	CLB018, CRB909
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This first English curriculum studies unit for secondary education offers a specific focus and professional application of studies you have undertaken in your discipline and core education units. This unit consequently assumes knowledge of English texts appropriate for secondary students, and contextual issues of education and schooling, adolescent learning development, from prior core Education units and supports the core unit on creating positive learning environments for all students. English Curriculum Studies 1 occurs in the second year of your Education course, because it builds foundational knowledge, understanding and skills gained from discipline units and prepares you for your first Field Experience.

CRB201 English Curriculum Studies 2

Pre-requisites	CRB200
Anti-requisites	CLB019, CRB910
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This second English Curriculum major unit offers a specific focus and professional application of studies you have undertaken in your English discipline and core education units. This unit consequently assumes knowledge of print and ICT texts appropriate for senior secondary English students, and contextual issues of education and society. It further assumes knowledge of prior core Education units, about adolescent learning development, and Indigenous cultural issues, as well as creating inclusive positive learning environments for all secondary students. English Curriculum Major Studies 2 occurs in the third year of your Education course, because it builds on foundational

knowledge of English Curriculum in secondary school contexts, as well as understanding and skills gained from core and discipline units and prepares you for your third Field Experience in the following semester.

CRB203 Intermediate English Curriculum Studies

Pre-requisites	CRB200
Equivalents	CLB019, CRB910
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This second English curriculum studies unit for secondary education offers a specific focus on subject-specific pedagogies and professional application of studies you have undertaken in your discipline and core education units. This unit is for students studying English as a minor teaching area and consequently assumes knowledge of texts appropriate for junior secondary English students, and contextual issues of education and society. Knowledge of both inquiry-based and explicit teaching approaches to lesson planning is assumed from study of English Curriculum Studies 1 with further material on aligning teaching and assessment strategies explored in this unit. English Curriculum Studies 2 occurs in the third year of your Education course and prepares you for your third Field Experience.

CRB204 Mathematics Curriculum Studies 1

Equivalents	CRB923, MDB021
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces the principles and pedagogies of mathematics teaching used in secondary school mathematics classrooms. The unit explores mathematics curricula typically encountered in Queensland secondary schools. The foundations of mathematics teaching developed in this unit will be further deepened in the following mathematics curriculum studies unit(s).

CRB205 Mathematics Curriculum Studies 2

Pre-requisites	CRB204
Anti-requisites	CRB925, MDB022
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit deepens students' understanding of the principles and pedagogies of mathematics teaching used in secondary school mathematics classrooms. The unit further explores mathematics curricula typically encountered in Queensland secondary schools, and considers the design and implementation of mathematics curriculum at the school level. Your mathematics teaching knowledge and abilities will be further deepened in the Advanced Mathematics Curriculum Studies unit.

CRB207 Intermediate Mathematics Curriculum Studies

Pre-requisites	CRB204
Anti-requisites	CRB925, MDB022
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit deepens students' understanding of the principles and pedagogies of mathematics teaching used in secondary school mathematics classrooms. The unit further explores the junior secondary mathematics curriculum in Queensland secondary schools, and considers the design and implementation of mathematics curriculum at the school level.

CRB208 History Curriculum Studies 1

Anti-requisites	CLB054, CRB924
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This is the first of two complementary units in History Curriculum designed to prepare you for a professional role as a teacher of secondary school history. In this first unit, the focus is on curriculum development and teaching approaches in

Units

history. Key concepts, content, skills and recent developments that are the foundations of history education within the Australian Curriculum History: 7-10 are examined. An inquiry approach is utilised to emphasise the importance of engaging with evidence about the past as the basis for the development of historical understanding.

CRB209 History Curriculum Studies 2

Pre-requisites	CRB208
Anti-requisites	CLB031, CRB916
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This is the second of two complementary units in History Curriculum designed to prepare you for a professional role as a teacher of secondary school history. This unit extends the focus of the first unit and explores in greater depth the nature of curriculum development and teaching approaches in history together with the purposes of assessment of and for learning. Key concepts, content, skills and recent developments that are the foundations of history education are explored with reference to Senior Ancient History and Senior Modern History in the Australian Curriculum and in the state-based statutory authority (QCAA) syllabi. An inquiry approach is utilised to emphasise the importance of engaging with evidence about the past as the basis for the development of historical thinking and understanding.

CRB211 Intermediate History Curriculum Studies

Pre-requisites	CRB208
Anti-requisites	CLB031, CRB916
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is the second of two complementary units in History Curriculum designed to prepare you for a professional role as a teacher of secondary school history in the Intermediate Years 7-10. This unit extends the focus of the first unit and explores in greater depth the nature of curriculum development and teaching approaches in history together with the purposes of assessment of and for learning. Key concepts, content, skills and

recent developments that are the foundations of history education are explored in depth with reference to History in Years 7-10 in the Australian Curriculum. An inquiry approach is utilised to emphasise the importance of engaging with evidence about the past as the basis with particular emphasis on the development of historical thinking and understanding.

CRB212 Geography Curriculum Studies 1

Anti-requisites	CLB054, CRB924
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces the knowledge and skills needed for teaching geography. The unit focuses on using the geographical inquiry approach to examine the various topics as outlined in the Australian Curriculum: Geography. It is the first unit in three relating to Humanities and Social Science and specifically prepares teachers for teaching in the lower secondary school.

CRB213 Geography Curriculum Studies 2

Pre-requisites	CRB212
Anti-requisites	CLB028, CRB915
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit deepens students' understanding of the principles and pedagogies of geography teaching used in secondary school geography classrooms. The unit further explores geography curricula typically encountered in Queensland secondary schools, and considers the design and implementation of geography curriculum at the school level. The foundations of geography teaching developed in this unit will be further deepened in the following geography curriculum studies unit(s).

CRB214 Intermediate Geography Curriculum Studies

Pre-requisites	CRB212
Anti-requisites	CLB028, CRB915
Credit Points	12

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops further the knowledge and skills needed for teaching geography. The unit recaps on the inquiry method and the conceptual thinking needed to examine the various topics as outlined in the Australian Curriculum: Geography and further develops planning and assessment strategies needed. It is the second unit in three relating to Humanities and Social Science and specifically prepares teachers for teaching in the lower secondary school.

CRB215 Science Curriculum Studies 1

Equivalents	CRB930, MDB031
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is the introductory curriculum unit in your major teaching area of science focussing on teaching practices and planning processes in junior science (years 7-10). Skills and knowledge specific to science teaching and learning will be developed. The unit develops a foundation for science curriculum 2 or intermediate science curriculum studies.

CRB216 Science Curriculum Studies 2

Pre-requisites	CRB215
Anti-requisites	CRB917, CRB919, CRB921, CRB928, MDB010, MDB013, MDB019, MDB025
Equivalents	CRB929, MDB028
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit develops your understanding and skills of curriculum design and instruction in senior science (years 11 & 12). The focus of the unit is on the design of long-term plans and assessment for engaging a wide-range of learners in science. Strategies for planning considered in this unit are informed by research-based practices in science education and education generally. You will also explore the mandated curriculum requirements for the senior years of schooling for your chosen science

Units

discipline (i.e., Biology, Chemistry, Earth and Environmental Science, Physics). The unit develops further skills and knowledge introduced in Science Curriculum Studies 1. This unit is followed by Advanced Science Curriculum Studies in Year 4 of your course.

CRB218 Intermediate Science Curriculum Studies

Pre-requisites	CRB215
Anti-requisites	CRB917, CRB919, CRB921, CRB928, MDB010, MDB013, MDB019, MDB025
Equivalents	CRB929, MDB028
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

In this unit you will develop further your learning of science teaching and planning processes that was developed in Science Curriculum Studies 1. The focus in this unit is on extending your knowledge of teaching and learning experiences relevant to years 7-10 science. You will learn about the interconnected nature of science technology and society and design instruction and materials to deliver engaging learning experiences that cater for a wide range of learners in senior science. The unit focuses on concepts relating to science, technology and society and teaching approaches relevant to your minor teaching area of science. This is the final Science Curriculum Studies Unit in the development stage of your course.

CRB250 Australian Society and Culture

Equivalents	CLB101, HHB106, HHB108
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Australian Society and Culture combines literary and cultural studies, political analysis and history. It provides a context through which students can acquire knowledge about Australian institutions and traditions, particularly since 1901.

CRB443 Grammar in the Classroom: Theories and Pedagogies

Equivalents	CLB446
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-2 Caboolture - SEM-2

Over the past twenty years, linguistic studies have increasingly informed the development of language curriculum, the assessment of language, and the processes of language and literacy learning in schools. Over the same time the need for teachers to have systematic knowledge of language and how it works has been recognised. In much of Australia this systematic approach to describing language comes principally from the systemic functional school of linguistics. This unit provides an organised, contextualised introduction to that linguistic model through workshop sessions involving the writing and reading of a range of print based and multimodal texts. In this unit, students will learn to critically evaluate texts, their purposes and the language resources employed by writers and text designers.

CRB907 Accounting and Business Management Curriculum Studies 2

Pre-requisites	CRB920 or CLB051
Equivalents	CLB010
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior Accounting and Business Organisation and Management Syllabi to understand mandatory aspects of each syllabus. This unit will prepare students for their professional role as a teacher of secondary business education subjects, in particular, Accounting and Business Organisation and Management.

CRB908 Business Communication and Technologies Curriculum Studies 2

Pre-requisites	CRB920 or CLB051
Equivalents	CLB013
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the second in a suite of three complementary units which can be undertaken in Business Education. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Senior BCT Syllabus to understand mandatory aspects of the syllabus and will prepare students for their professional role as a teacher of secondary business education subjects, in particular, BCT.

CRB911 English Curriculum Studies 3

Pre-requisites	CRB910 or CLB019
Equivalents	CLB020
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides opportunities to develop a theorized understanding of the Queensland English Syllabus for Years 11 and 12, Senior English Communication (SAS) and the Senior English Extension (Literature) Syllabus, and to implement this understanding by analysing and developing senior English programs, teaching and assessment strategies that are appropriate for the needs and interests of diverse learners in particular sociocultural contexts.

CRB914 Film and Media Curriculum Studies 3

Pre-requisites	CRB913 or CLB025
Equivalents	CLB026
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces you to principles and practices related to (i) video and media production from pre to post production (ii)

Units

secondary school media production and the challenges students face (iii) strategies for successful group collaborative learning and project work.

CRB922 Business Education Curriculum Studies 3

Pre-requisites	CRB907 or CRB908 or CRB918 or CLB010 or CLB013 or CLB034
Equivalents	CLB053
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit, the final of three complementary units in the teaching of Business and ICT Education, will develop further your professional knowledge and skills as a learner-focused educator and skilled curriculum developer. The unit explores relevant issues, pedagogy and professional requirements essential for teachers of Business and ICT Education in the twenty-first century classroom.

CRB926 Social Education Curriculum Studies 3

Pre-requisites	CRB916 or CRB915 or CRB918 or CRB938 or CLB031 or CLB028 or CLB034 or CLB040
Equivalents	CLB056
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This is the third of three complementary units in Social Education curriculum. The aim of this unit is to provide you with opportunities to develop an understanding of the ways in which new policies and initiatives have impacted on teaching and learning in social sciences and specific discipline studies in the senior school.

CRB927 Mathematics Curriculum Studies 3

Pre-requisites	CRB925 or CRB021 or MDB022 or MDB453. (CRB925 or CRB021) can be enrolled in the same teaching period as CRB927
Equivalents	MDB023
Credit Points	12
Campus	Kelvin Grove

Availabilities	Kelvin Grove - SEM-1
----------------	--------------------------------

This unit extends students' knowledge and understanding of mathematics curriculum with an emphasis on catering for the range of students engaged in secondary education, inclusive practices and diagnosis of mathematical learning difficulties.

CRB931 Science Education Curriculum Studies 3

Pre-requisites	CRB917 or CRB919 or CRB921 or CRB928 or CRB929 or MDB010 or MDB013 or MDB019 or MDB025 or MDB028
Equivalents	MDB033
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is to provide opportunities for you to develop an understanding of the theoretical underpinnings of a selection of strategies and resources used in the teaching of science.

CRB936 Teaching Primary Design and Technology

Equivalents	MDB005
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit is designed for students to explore content, pedagogical content knowledge and pedagogies important in design and technology education.

CRN650 Primary English, Literacies and Language

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit provides foundation understandings, skills and processes for studying English and literacies in Primary English Curriculum. The unit focuses on developing your knowledge, skills and

application for teaching English curriculum and literacy, including the teaching of phonics, spelling, vocabulary, speaking and listening, and reading. It also addresses strategies for assessing these aspects of literacy. It supports the development of understandings that will be crucial for your future studies of writing, handwriting, grammar, and multimodal design in Primary English Curriculum Studies. The unit provides a space for you to build informed opinions about important issues and to practice articulating these opinions professionally and confidently.

CRN651 Primary English Curriculum Studies

Pre-requisites	CRN650
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit builds on your learning from the previous unit, CRN650 Primary English, Literacies and Language. It further develops your knowledge, skills and application for teaching primary English curriculum. The focus is on textual knowledge and skills, grammar, handwriting scripts, how to extend children's writing skills, and how to plan a unit of work involving multimodal texts that applies teaching strategies addressed in the unit.

CRN652 Primary Mathematics Curriculum Studies 1

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit focuses on the development of your knowledge, skills and applications that focus on the teaching of numbers and measurement. Specific content includes the investigation of teaching methods for (i) concepts and skills for whole number, common fractions and decimal fractions, (ii) conceptual understanding and procedural methods for each of the four operations and (iii) the teaching of measurement (length, mass, capacity, time, and area), with or without the use of technology.

CRN653 Primary Mathematics Curriculum Studies 2

Pre-requisites	CRN652
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit develops essential mathematical skills and knowledge in the teaching of geometry, statistics, probability, and early algebra in primary school. The unit focuses on the development of conceptual understanding and related skills in these strands. Problem solving and posing are employed as the overarching strategy to connect and integrate these mathematical strands. The unit also investigates approaches for assessment and provisions for differentiation related to the content strands that are studied.

CRN654 Practitioner Enquiry

Pre-requisites	EDN662 or EDN672. EDN662 or EDN672 can be enrolled in the same teaching period as CRN654
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit will build your knowledge and capacity to inquire into and research your own teaching practice. As part of enhancing your knowledge of Early Childhood, Primary or Secondary school contexts, the unit will focus on developing your understanding of quantitative and qualitative research methods by examining key research into English as a Second Language (ESL) and English as an Additional Language (EAL/D) students and/or family and community partnerships. The unit prepares you to undertake your own practitioner inquiry in the capstone research project to be undertaken in your final semester.

CRN655 Primary History / Geography Curriculum Studies

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces key concepts, content and skills that are the foundation of history, geography and civics in the primary years. The unit distinguishes children as competent, proactive learners who can develop and experience perspectives about the past. Building on this understanding, primary school students investigate and explore challenging topics in social and cultural education to enable them to become critical thinkers and active and informed citizens. As such, educators in the primary years engage with children, families and communities that help them understand the role of history, geography and civics in society. Such knowledge develops an informed and critical understanding of the past with a view to better understanding of the present and indeed the future. Further, this unit promotes an understanding of peoples and cultures in local, regional and global settings with a view to understanding education for sustainability. This unit will develop your knowledge of the curriculum documents and pedagogy to teach key concepts, content and skills in history, geography and civics and citizenship in a primary school setting.

CRN656 Primary Science Curriculum Studies

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This primary science unit focuses on developing your skills and knowledge to teach primary science through an inquiry-based approach. Science content knowledge will be integrated with pedagogical and curriculum knowledge preparing you to become competent primary science teachers. There will be an opportunity to incorporate innovative ideas in science through the design of an inquiry-based primary science activity.

CRN657 Teaching Technologies

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

Technology involves envisioning and developing products to meet human needs and wants, capitalise on opportunities and extend human capabilities. This unit is in the second

year of your course, and it prepares you to teach the Australian Curriculum Technologies subject area. Technologies comprises of two distinct but related subjects of Design and Technologies (focusing on the products of technology including artefacts, processes, systems, services and environments) and Digital Technologies (focusing on framing problems and creating solutions using computational thinking). This unit comprehensively and explicitly addresses the relevant issues and the strategies available to support the safe, responsible and ethical use of ICT in learning and teaching.

CRP405 Legal Studies Education Curriculum Studies

Pre-requisites	CRP402 or CRP410 or CLP402 or CLP414. (CRP402 or CRP410) can be enrolled in the same teaching period as CRP405
Equivalent s	CLP406
Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit is the second in a suite of three complementary units which can be undertaken in either the Business Education or Social Education streams. It has been designed to expand on previous planning and teaching strategies with a major focus on assessment. Students will examine the QSA Legal Studies Syllabus to understand mandatory aspects of the syllabus. This unit will prepare students for their professional role as a teacher of secondary Legal Studies.

CRP406 Business Education Curriculum Studies 3

Pre-requisites	CRP403 or CRP404 or CRP405 or CLP403 or CLP404 or CLP406 or MDP455. (CRP403 or CRP404 or CRP405) can be enrolled in the same teaching period as CRP406
Equivalent s	CLP407
Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit, the final of three complementary

Units

units in the teaching of Business and ICT Education, will develop further your professional knowledge and skills as a learner-focused educator and skilled curriculum developer. The unit explores relevant issues, pedagogy and professional requirements essential for teachers of Business and ICT Education in the twenty-first century classroom.

CRP407 English Education Curriculum Studies 1

Equivalents	CLP408
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit offers an introduction to English teaching in secondary schools, providing an indispensable foundation for subsequent English Curriculum Studies. You will develop an understanding of language learners and their diverse needs, and of the theories of language and texts which underpin secondary English curriculum and pedagogy and which condition students' learning within English classrooms.

CRP408 English Education Curriculum Studies 2

Equivalents	CLP409
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit aims to provide you with opportunities to develop a critical understanding of the theories and principles which inform the Australian Curriculum: English Framework for Years 7-10 and to implement this understanding by developing junior secondary curriculum units and lessons which are appropriate for the needs and interests of diverse learners in a range of sociocultural contexts.

CRP409 English Education Curriculum Studies 3

Pre-requisites	CRP408 or CLP409. CRP408 can be enrolled in the same teaching period as CRP409
----------------	---

Equivalents	CLP410
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

In this unit, you will develop and implement your understanding of the range of disciplinary approaches (such as Literary and Cultural Studies, Film and Media Studies, and sociolinguistics) which contribute to senior secondary English curriculum and pedagogy. The policy context is the Queensland English Syllabus for Years 11 and 12, Senior English Communication (SAS), the Senior English Extension (Literature) Syllabus, and school to work transition programs. There will be a gradual transition to the Australian Curriculum Senior years as the state moves to this framework (post 2018). You will learn to evaluate and develop English work programs for a wide range of culturally and linguistically diverse students in the post-compulsory years.

CRP410 Social Education Curriculum Studies 1

Equivalents	CLP414
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This is the first of three complementary units in Social Education curriculum aimed at preparing you to teach Social Science subjects in the lower secondary school. This unit focuses on recent developments within the curriculum area of social education, with particular reference to the subjects in the learning area of Humanities and Social Sciences, a key priority in the Australian Curriculum. It explores the theoretical context for these curriculum areas, and places emphasis on the links between theory and practice.

CRP411 Social Education Curriculum Studies 2 (Geography)

Pre-requisites	CRP410 or CLP414. CRP410 can be enrolled in the same teaching period as CRP411
----------------	---

Equivalents	CLP415
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This is the second of three complementary units to be taken in the Social Education stream. This unit has been designed specifically to prepare you for a professional role as a teacher of geography in the years of secondary school. It will build on the planning and teaching strategies developed in your first curriculum studies unit. In this second curriculum unit you will explore in depth theories that influence approaches to teaching in geography and ways of catering for diversity in the classroom.

CRP412 Social Education Curriculum Studies 2 (History)

Pre-requisites	CRP410 or CLP414. CRP410 can be enrolled in the same teaching period as CRP412
Equivalents	CLP416
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This is the second of three complementary units in Social Education curriculum designed to prepare you for a professional role as a teacher in the learning area of Humanities and Social Sciences in the secondary school. This unit builds on the focus of your first curriculum studies unit and extends your knowledge and understanding by exploring the nature of history, historical inquiry and theories that influence approaches to teaching history.

CRP414 Social Education Curriculum Studies 3

Pre-requisites	CRP405 or CRP411 or CRP412 or CRP413 or CLP406 or CLP415 or CLP416 or CLP417. (CRP405 or CRP411 or CRP412 or CRP413) can be enrolled in the same teaching period as CRP414
Equivalent s	CLP418

Units

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This is the third of three complementary units in Social Education curriculum. The aim of this unit is to provide you with opportunities to develop an understanding of the ways in which new policies and initiatives have impacted on teaching and learning in the Humanities and Social Sciences in the Australian Curriculum and in specific discipline studies in the senior school.

CRP415 Social Education Curriculum - Senior History

Equivalents	CLP419
Credit Points	12
Campus	External
Availabilities	External - SEM-1

The aim of this elective unit is to provide you with opportunities to develop an understanding of teaching and learning in history. You will investigate how learning through historical inquiry develops specific historical understandings and skills that are the foundations for historical literacy. This unit provides opportunities for you to critique how recent developments in historical education are impacting upon curriculum development and teaching approaches in Senior Ancient and/or Senior Modern History.

CRP421 Middle Years: Mathematical Understandings

Equivalents	MDP452
Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit will provide the content knowledge and pedagogical strategies to promote mathematical development (both cognitive and social) in the middle phase of learning. The unit will provide a theoretical framework and the opportunity to participate in collaborative problem tasks. There will be a focus on students developing a broader range of thinking and reasoning processes as they work with the mathematical content. Students will be encouraged to critically evaluate ideas, reflect on their learning and freely express personal viewpoints.

CRP423 Mathematics Education Curriculum Studies 1

Equivalents	MDP456
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit provides an introduction to the learning and teaching of mathematics and to begin the development of your understanding of learning environments conducive to the effective learning of mathematics. This unit focusses primarily upon mathematics education in the junior -secondary school.

CRP424 Mathematics Education Curriculum Studies 2

Pre-requisites	CRP423 or MDP456. CRP423 can be enrolled in the same teaching period as CRP424
Equivalents	MDP457
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit deepens students' understanding of the principles and pedagogies of mathematics teaching used in secondary school mathematics classrooms. The unit further explores mathematics curricula typically encountered in Queensland secondary schools, and considers the design and implementation of mathematics curriculum at the senior-school level.

CRP425 Mathematics Education Curriculum Studies 3

Pre-requisites	CRP424 or MDP457. CRP424 can be enrolled in the same teaching period as CRP425
Equivalents	MDP458
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit extends your knowledge and understanding of mathematics curriculum with an emphasis on promoting the life-related application of mathematics and on inclusive practices that cater for the range of students engaged in secondary education.

CRP426 Science Education Curriculum Studies 1

Equivalents	MDP459
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit will provide you with opportunities to examine core educational theory in order to understand the basis for teaching and learning in science including how to establish and manage effective learning environments.

CRP427 Science Education Curriculum Studies 2

Pre-requisites	CRP426 or MDP459. CRP426 can be enrolled in the same teaching period as CRP427
Equivalents	MDP460
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit is to provide an opportunity for you to develop as a learner-centred science teacher in the context of senior schooling, who can plan to meet the needs of individual students in a varied, stimulating and safe environment.

CRP428 Science Education Curriculum Studies 3

Pre-requisites	CRP427 or MDP460 or CRP429 or MDP462 or CRP430 or MDP463 or CRP431 or MDP464 or CRP432 or MDP465. (CRP427 or CRP429 or CRP430 or CRP431 or CRP432) can be enrolled in the same teaching period as CRP428
Equivalent	MDP461

Units

s	
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit provides opportunities for you to draw on the understandings, skills and resources you have developed so far to design effective work programs and unit plans for teaching senior science.

CRP429 Biology Curriculum Studies 2

Pre-requisites	CRP426 or MDP459. CRP426 can be enrolled in the same teaching period as CRP429
Equivalents	MDP462
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit provides an opportunity to develop as a learner-centred Biology teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment.

CRP430 Chemistry Curriculum Studies 2

Pre-requisites	CRP426 or MDP459. CRP426 can be enrolled in the same teaching period as CRP430
Equivalents	MDP463
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit encourages students to develop as a learner-centred Chemistry teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students also develop a critically reflective orientation to their teaching experiences.

CRP431 Earth Science Curriculum Studies 2

Pre-requisites	CRP426 or MDP459. CRP426 can be enrolled in the same teaching period as CRP431
Equivalents	MDP464
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit encourages students to develop as a learner-centred science teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students develop a critically reflective orientation to their teaching experiences.

CRP432 Physics Curriculum Studies 2

Pre-requisites	CRP426 or MDP459. CRP426 can be enrolled in the same teaching period as CRP432
Equivalents	MDP465
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit encourages students to develop as a learner-centred Physics teacher who can plan to meet the needs of individual students in a varied, stimulating and safe environment. Students develop a critically reflective orientation to their teaching experiences.

CSB012 Introduction to Medical Radiations

Equivalents	PCB178
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides an overview of the physical principles of the various medical imaging modalities and techniques used in patient imaging. It includes a brief overview of those techniques used in the diagnosis and treatment of cancer.

CSB020 Systematic Imaging Pathology

Anti-requisites	LSB367, LSB475
Equivalents	PCB252
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit introduces general cellular pathology and applies these principles to the major systems of the body including the gastrointestinal, cardiac, respiratory, urogenital, skeletal and nervous systems. Through lectures and practical classes, you will learn to identify and describe the pathogenesis of common chronic conditions as well as acute medical emergencies typical in the Australian healthcare system. The knowledge and skills gleaned from the unit will underpin your subsequent clinical units.

CSB021 General Radiography 1

Pre-requisites	LSB142 and (CSB012 or PCB178) and (CSB022 or PCB277). CSB022 can be enrolled in the same teaching period as CSB021
Equivalent s	PCB276
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

A full and detailed knowledge of positioning techniques for skeletal radiography is essential to the education of medical imaging technologists. This unit is designed to provide students knowledge of skeletal radiography, and imaging practices.

CSB022 Radiographic Practice

Pre-requisites	CSB111 and CSB012 and CSB021 and PCB272. CSB021 can be enrolled in the same teaching period as CSB022
Equivalent s	PCB277
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Units

This unit is the first unit in radiographic positioning of your course and builds on the foundation knowledge from semester 1. The unit focuses on pre-clinical skills development in the on-campus laboratory and includes a clinical placement in a hospital context. During the placement you will observe the role of the radiographer in a range of contexts within a hospital setting.

CSB023 Treatment Planning 1

Pre-requisites	CSB111 and LSB111 and LSB142 and PCB272
Equivalents	PCB286
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is an introduction to the techniques of radiation therapy treatment planning including patient data acquisition and radiation dosimetry.

CSB024 Radiation Therapy 1

Pre-requisites	CSB111 and LSB111 and LSB142 and PCB272
Equivalents	PCB287
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is the first in a series of Radiation Therapy units and provides an introduction to fundamental concepts essential for Radiation Therapy Practice.

CSB030 Clinical Radiotherapy 1

Pre-requisites	CSB023 and CSB024 and PCB675
Equivalents	CSB038, PCB351
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is the first of four dedicated clinical units and provides students with the opportunity to build on their basic clinical skills from CSB024.

CSB032 Radiation Therapy 2

Pre-requisites	(CSB023 or PCB286) and (CSB024 or PCB287) and PCB675
Equivalents	CSB039
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is the second in a series of Radiation Therapy units and builds on the knowledge and skills gained in the previous unit.

CSB033 Clinical Radiography 1

Pre-requisites	(CSB022 or PCB277) and (CSB021 or PCB276) and LSB142
Co-requisites	CSB034
Equivalents	PCB359
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

CSB034 General Radiography 2

Pre-requisites	(CSB021 or PCB276) and (CSB022 or PCB277) and LSB142
Co-requisites	CSB033
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is designed to extend the student's knowledge of skeletal radiography, minor procedures, and imaging practices. The practical sessions are designed to develop positioning skills through role play and taking radiographs of sectional models to become familiar with radiographic appearances.

CSB035 Treatment Planning 2

Pre-requisites	CSB023 and CSB024
Equivalents	CSB090
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on the fundamental dosimetry understanding gained in Treatment Planning 1 and enables students to apply this to a range of

common tumour sites. In order to prepare them for clinical planning, students will have the opportunity to produce clinically acceptable plans for these routine tumour sites and start to develop essential plan evaluation skills.

CSB036 Medical Imaging Methods

Pre-requisites	CSB012 and PCB272
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit further develops your knowledge of radiation physics as it applies to the operation of imaging equipment. It links to the introductory information provided in CSB012 and PCB272 and extends it to the understanding of the digital image, image processing, image display techniques and storage. Quality control and quality assurance of imaging equipment operation is also provided.

CSB040 Applied Medical Imaging

Pre-requisites	LQB389 or LQB390
Equivalents	PCB452
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit prepares both radiation therapy and medical imaging students for clinical use of patient images. It builds on the regional and sectional anatomy understanding gained in Year 1 to enable identification of relevant structures in a range of medical images.

CSB041 Specialised Imaging Techniques

Pre-requisites	CSB033 and CSB034 and CSB044. CSB044 can be enrolled in the same teaching period as CSB041
Equivalent s	PCB476
Credit Points	12
Campus	Gardens Point
Availabilitie s	Gardens Point - SEM-2

Units

This unit includes specialised techniques of radiography including the skull, macroradiography, obstetrics, gynaecology, CNS, paediatrics and geriatrics.

CSB042 Clinical Radiotherapy 2

Pre-requisites	(CSB030 or PCB389) and (CSB035 or PCB396)
Equivalents	CSB047, PCB451
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is the second of a series of clinical units that provide students with the opportunity to consolidate their academic learning in a clinical environment.

CSB043 Radiation Therapy 3

Pre-requisites	(CSB035 or PCB396) and (CSB032 and PCB397-2) and LQB389
Equivalents	CSB048, PCB457
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is the third in a series of Radiation Therapy units and builds on the knowledge and skills gained in the previous two units.

CSB044 Clinical Radiography 2

Pre-requisites	(CSB033 or PCB379) and (CSB041 or PCB476). CSB041 can be enrolled in the same teaching period as CSB044
Equivalent s	PCB459
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit offers an opportunity to progress from assistant to supervised performer in routine imaging techniques and procedures. This extended period of clinical experience at the end of on campus unit delivery, will enable you to gain experience in the new area clinical placement area of computed tomography. This is in addition to consolidating skills in

general radiography, and minor procedures, and also assisting in the further development of your professionalism and reflective practice.

CSB045 Treatment Planning 3

Pre-requisites	LQB389 and (CSB035 or PCB396)
Equivalents	CSB049, PCB495
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on the planning experience gained in the previous treatment planning units to focus on the application of more in-depth knowledge to complex 3D treatment planning practice. This will consolidate understanding of 3D treatment planning concepts on specific treatment sites and pave the way for progression to more advanced treatment techniques such as IMRT.

CSB046 Complementary Imaging Techniques

Pre-requisites	CSB012 or PCB178
Equivalents	PCB477
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Medical imaging technologists are required to utilise a number of imaging modalities to assist in the diagnosis of disease. Proper utilisation of equipment requires an understanding of the underlying physical principles. Knowledge of the clinical applications enables an appreciation of the overall medical imaging strategies available in a patient's clinical management. The aim of this unit is to provide an appreciation of the physical principles and the complementary nature of the clinical applications of ultrasound and nuclear medicine.

CSB050 Professional Practice in Radiation Therapy

Pre-requisites	CSB042, CSB043 and CSB045
Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-1
----------------	---------------------------------

This unit prepares students to engage in ongoing professional learning by re-inforcing the importance of professional practice, cultural awareness and professional engagement.

CSB051 Advanced Radiographic Technique 1

Pre-requisites	(CSB041 or PCB476) and (CSB044 or PCB479)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit will provide a theoretical and practical understanding on which to build skills in the evaluation and interpretation of radiographic images and recognition of common pathological processes. Practical sessions will extend the practical and interpretative skills involved in image interpretation of general radiography.

CSB052 Clinical Radiotherapy 3

Pre-requisites	CSB040 and CSB042 and CSB043 and CSB045
Equivalents	CSB091, PCB591-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Experience in clinical departments is vital to developing clinical competence and this unit is designed to build on the experience gained in previous units to further develop students' clinical and interpersonal skills. Continuing commitment to reflective practice will empower students to move towards autonomous learning. After completion of this Unit students should be able to assist with the full range of clinical procedures and have clear ideas about how to organise their clinical learning in relation to their future personal and professional development.

CSB053 Clinical Radiography 3

Pre-requisites	CSB053-1 or PCB581-1
Equivalents	PCB581-2
Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-2
----------------	---------------------------------

This unit offers an opportunity to observe and assist in the performance of advanced imaging techniques and procedures is important to the education of medical imaging students. The periods of clinical experience in this full year unit will enable you to gain experience in advanced imaging procedures and modalities in addition to consolidating skills in general radiography and minor procedures.

CSB053 Clinical Radiography 3

Pre-requisites	CSB044 or PCB479
Equivalents	PCB581-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit offers an opportunity to observe and assist in the performance of advanced imaging techniques and procedures is important to the education of medical imaging students. The periods of clinical experience in this full year unit will enable you to gain experience in advanced imaging procedures and modalities in addition to consolidating skills in general radiography and minor procedures.

CSB054 Radiation Therapy 4

Pre-requisites	CSB042 and CSB043 and (CSB045 or PCB495)
Equivalents	CSB092, PCB587
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Oncology and technique are an essential component of radiation therapy skills and application of fundamental principles to routine treatment practice is essential. Students will need to gain practical skills in order to become a competent radiation therapist and this module provides them with the underpinning theory and practice. Students at this level are expected to engage with the literature base in order to support their work and they will have specific support for this via the presentation.

CSB055 Treatment Planning 4

Pre-requisites	(CSB045 or PCB495) and (CSB040 or PCB452) and CSB043
Equivalents	CSB093, PCB595
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on the planning experience gained in Treatment Planning 3 to concentrate on application and evaluation of complex techniques and technology. In order to further prepare them for clinical planning, students will have the opportunity to plan complex tumour sites. Students will also gain valuable plan evaluation and critical appraisal skills.

CSB056 Computed Tomography Imaging

Pre-requisites	LQB390
Equivalents	PCB681
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit covers both the technological and clinical aspects of computed tomography(CT). Clinical applications described include those for specific anatomical areas as well as advanced and interventional applications. The strengths and weaknesses of CT in relation to other imaging modalities are discussed.

CSB057 Image Interpretation

Pre-requisites	CSB041 and CSB044
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on both theoretical knowledge and technical skills achieved in first and second year radiography, anatomy and pathology units and concentrates on application of this knowledge to practice. The recognition of both normal and abnormal anatomy and the ability to describe the image appearances in respect to both technical and diagnostic quality is an important role in clinical practice.

CSB058 Clinical Radiography 3

Pre-requisites	CSB041 and CSB044
Co-requisites	CSB046
Equivalents	CSB053-1 and CSB053-2
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit offers an opportunity to observe and assist in the performance of advanced imaging techniques and procedures. The extended period of clinical experience in this semester will enable you to gain experience in new areas in addition to consolidating skills in general radiography and minor procedures, and also assist in the further development of your professionalism and reflective practice.

CSB060 Specialised Radiotherapy Technique

Pre-requisites	(CSB054 or PCB587) and (CSB055 or PCB595)
Equivalents	CSB069, PCB687
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit includes a study of specialised radiation therapy techniques including techniques applicable to the child patient and patients with communicable disease, total body photon and electron therapy. It also covers the principles, strengths and stage of development of techniques that are integral or complementary to the modern radiotherapy treatment of cancer.

CSB061 Project

Pre-requisites	CSB041 or PCB476 or CSB043 or PCB397-2
Equivalents	PCB672-1
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is a supervised project involving either application of existing theoretical practical knowledge or a literature survey of a selected relevant topic. (12 credit points achieved at completion of PCB672-

Units

1 and PCB672-2). Introductory lectures in research methods and statistics are provided.

CSB061 Project

Pre-requisites	CSB061-1 or PCB672-1
Equivalents	PCB672-2
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The purpose of this unit is to enable you to carry out an independent enquiry within a professionally related area. An introduction to the research process is important preparation for future professional studies. This full year unit will assist you to develop skills in research and reporting writing as independent learners. During semester two you will prepare a report and poster on a chosen topic. (12 credit points achieved at completion of PCB672-1 and PCB672-2.)

CSB062 Advanced Radiographic Technique 2

Pre-requisites	(CSB051 or PCB567) and (CSB053-1 or PCB581-1)
Equivalents	PCB667
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

A knowledge of the principles of operation and application of advanced techniques and their imaging appearances is a necessary requirement of medical imaging students. This unit will expand and extend the knowledge acquired in previous units to advanced imaging investigations and practical imaging sessions will allow maintenance of general radiography skills.

CSB063 Magnetic Resonance Imaging

Pre-requisites	LQB390
Equivalents	PCB682
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Magnetic Resonance Imaging is a specialised modality within the field of

medical radiations. The applications of magnetic resonance imaging have a wide impact on differential diagnoses and subsequent radiographic examinations. This unit will provide you with an introduction to the operation and clinical applications of magnetic resonance imaging.

CSB064 Advanced Treatment Planning Topics

Pre-requisites	(CSB054 or PCB587) and (CSB055 or PCB595)
Equivalents	CSB094, PCB695
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on the planning experience gained in "Treatment Planning 4" to concentrate on the application of more in-depth knowledge of complex planning practice. This will consolidate understanding of 3D treatment planning concepts and introduce more advanced treatment techniques such as IMRT.

CSB065 Advanced Radiation Practice

Equivalents	PCB600
Other requisites	Prior qualification in Medical Radiations Profession is required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The specialised and technically specific nature of each student's previous program in medical radiations requires a customised approach. This unit is necessary to provide an appropriate focussed theoretical and clinical support program to those students who have a prior qualification in the profession.

CSB066 Clinical Radiotherapy 4

Pre-requisites	(CSB052 or PCB590-1 or PCB591-1) and (CSB054 or PCB587) and (CSB055 or PCB595)
Equivalents	CSB095, PCB591-2
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2, SUM

This unit is the final clinical unit in the course, where both academic and clinical learning will be consolidated with the Viva Capstone Assessment.

CSB067 Clinical Radiography 4

Pre-requisites	CSB058
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit offers an opportunity to observe and assist in the performance of advanced imaging techniques and procedures. This second period of clinical experience in this year will enable you to gain further experience in new areas and contexts. This is in addition to enhancing your skills in general radiography and minor procedures, and also assisting in the further development of your professionalism and reflective practice.

CSB068 Advanced Imaging Practice 1

Pre-requisites	CSB057 and CSB058
Co-requisites	CSB067
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will expand and extend the knowledge and skills acquired from previous units in imaging investigations to advanced imaging applications. The unit integrates the skills and knowledge in clinical reasoning and problem solving previously developed across the curriculum, particularly in regard to advanced scope of practice roles, to prepare you for the capstone units, CSB070 Transition to Professional Practice 1 and CSB080 Transition to Professional Practice 2. Unit content includes application of advanced knowledge to advanced imaging techniques and roles.

CSB070 Transition to Professional Practice 1

Pre-requisites	CSB067 and CSB068
Co-requisites	CSB071

Units

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SUM

This unit is a capstone unit which integrates your previously developed knowledge and skills to the professional clinical context. The unit focuses on professional approaches to scope of clinical practice and includes online learning activities. You will consolidate your professional practice skills in workload management and clinical efficiency particularly in relation to general radiography and minor procedures, undertaking this unit within a clinical imaging context. You will be supported to transition to elements of intellectual independence in a supervised environment.

CSB071 Clinical Radiography 5

Pre-requisites	CSB067
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit offers an opportunity to perform advanced imaging techniques and procedures under supervision and a team member. This period of clinical experience will enable you to gain further experience in new areas and contexts. This is in addition to enhancing your skills in general radiography and minor procedures, and also assisting in the further development of your professionalism and reflective practice.

CSB072 Review of Contemporary Clinical Practice

Pre-requisites	CSB600 and (CSB068 or CSB069)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit focuses on your review of a topic of your choice from contemporary medical imaging clinical practices using the skills you developed in previous units. The unit requires you to participate as part of a small group. It links to the experiences you have had during clinical placement experience, and prepares you for the final semester capstone units.

CSB080 Transition to Professional Practice 2

Pre-requisites	CSB070, CSB071 and CSB068
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is a capstone unit which integrates your previously developed knowledge and skills to the professional clinical context. The unit focuses on professional approaches to scope of clinical practice and includes online learning activities. You will consolidate your professional practice skills in workload management and clinical efficiency particularly in relation to general radiography and minor procedures, undertaking this unit within a clinical imaging context. You will be supported to transition further to elements of intellectual independence in a supervised environment.

CSB081 Advanced Imaging Practice 2

Pre-requisites	CSB041, CSB057 and CSB068
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This capstone unit will integrate the knowledge and skills acquired from previous units in imaging investigations to advanced imaging applications. The unit integrates the skills and knowledge in clinical reasoning and problem solving previously developed across the curriculum, particularly in regard to advanced scope of practice roles. Unit content includes application of advanced knowledge to advanced imaging techniques and demonstration of your advanced radiographic imaging skills.

CSB111 Foundations of Clinical Practice

Equivalents	PUB442
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Clinical health professionals work in multi disciplinary teams within the health care system to provide optimal care to

individuals and communities. The nature and standards of professional practice are determined by government and professional organisations, and the scope of clinical practice for clinicians evolves in response to community needs. There is a community expectation that clinical health care professionals will be effective communicators who engage in ethical practice that is continually improved through ongoing reflection. This unit introduces students to these concepts as they apply to professional practice.

CSB330 Foundations of Paramedic Practice 1

Equivalents	PUB180
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is an introduction to ambulance practice and the role of paramedics within the health care spectrum. It prepares students for the first clinical practice unit. Topics include the following: the history, evolution, culture and development of ambulance services on a national and international level; the structure, function, policies and procedures of the Queensland Ambulance Service; the role of the ambulance service in a multidisciplinary and integrated approach to health care; the relationship between field care and in-hospital definitive care; and basic ambulance care including initial assessment, planning and implementing basic procedures, and equipment. The unit includes a structured observer program.

CSB331 Paramedic Clinical Practice 1

Pre-requisites	(LSB282 or LQB281) and (CSB332 or PUB280)
Equivalents	PUB270
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2, SUM

This unit is the first in a series of supervised clinical practice units. Topics include the following: assessing, diagnosing, planning, implementing and evaluating patient care in the out of hospital phase; effective scene management including logistics, safe access and egress, and patient extrication techniques; written and oral

Units

communication including patient interviews, radio procedures, writing ambulance report forms and patient handover at hospital. The placement is six weeks and provides a transition from observer to operational ambulance crew member under the supervision of a qualified paramedic mentor. [Designated unit]

CSB332 Foundations of Paramedic Practice 2

Pre-requisites	CSB330 or PUB180
Equivalents	PUB280
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

CSB333 Foundations of Paramedic Practice 3

Pre-requisites	CSB331 or PUB270 or (LSB111 for Graduate Entry Students). LSB111 can be studied in the same teaching period as CSB333
Equivalent s	PUB383
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

CSB335 Paramedic Management of Cardiac, Respiratory and Neuro Emergencies

Pre-requisites	CSB333 or PUB383 or PUB390
Equivalents	PUB451
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

CSB336 Paramedic Management of Medical and Surgical Emergencies

Pre-requisites	CSB333 or PUB383 or
----------------	---------------------

	PUB390
Equivalents	PUB452
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

CSB337 Paramedic Management of Trauma and Environmental Emergencies

Pre-requisites	CSB333 or PUB383 or PUB390
Equivalents	PUB453
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

CSB338 Ethics and the Law in Health Service Delivery

Equivalents	PUB486
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit enables students to develop an awareness of the ethical and legal issues associated with the public sector and health care in the pre-hospital care setting. This unit covers topics relating to the code of ethics, the code of conduct and the legislation unique to the emergency health services. Students are required to apply content knowledge using the problem based learning strategy. Topics include introduction to ethics, morality and ethical theory, bioethics, public sector ethics, overview of the Australian legal system, consent to and refusal of health care, duty of care, confidentiality, and record keeping.

CSB339 Paramedic Management of Lifespan Emergencies

Pre-requisites	CSB333 or PUB383 or PUB390
Equivalents	PUB566
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

CSB340 Major Incident Management

Pre-requisites	(CSB335 or PUB451) and (CSB336 or PUB452) and (CSB337 or PUB453)
Equivalents	PUB567
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

CSB341 Mental Health Issues in the Out-of-Hospital Environment

Pre-requisites	(CSB331 or PUB270) and (PYB007 or PYB111)
Equivalents	PUB568
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

A significant proportion of calls for ambulance assistance relate to mental health concerns. As a practising health care professional you will require a contemporary understanding of mental health issues and the range of services available to people experiencing acute and chronic mental health issues. You will examine key mental health issues across the life-span and will develop an understanding of both acute and chronic presentations. This unit will emphasise the importance of understanding mental health issues from the perspective of the patient, their carers and other health care providers.

CSB342 Paramedic Clinical Practice 2

Pre-requisites	(CSB331 or PUB270) and (CSB340 or PUB567 or PUB555). CSB340 can be studied in the same teaching period as CSB342
Equivalent s	PUB532
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SUM

Ambulance crews generally work in pairs,

Units

so at the scene of the incident the patient can be managed by you and your partner, and then en route to hospital one paramedic drives the ambulance while the other continues patient care in the back. To be a functional team member it is vital that you grow as a student paramedic in a two officer crew environment. This unit is the second in a series of five that provide the work integrated learning experience. During this unit you will have the opportunity to apply practical theory and understanding from clinical management units. Over a six week period, you will be required to complete approximately 240 hours of placement to be conducted externally through the Queensland Ambulance Service.

CSB343 Paramedic Clinical Practice 3

Pre-requisites	CSB342 or PUB532 or PUB470
Equivalents	PUB673
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

As a third year student you have been exposed to core content of the course. You can approach this clinical practice unit with a better developed knowledge, understanding and skill base to evolve your clinical practice to the level of beginner practitioner. Over a six week period, you will be required to complete approximately 240 hours of placement to be conducted externally through the Queensland Ambulance Service. This is a designated unit. Designated units include professional experience units, units requiring the development of particular skills, and units requiring the demonstration of certain personal qualities, and are deemed to be critical to progress in your course. At the end of each semester, if you fail to achieve a passing grade in this unit you may be eligible for a period of probation or exclusion.

CSB346 Transition to Professional Paramedic Practice (Capstone)

Pre-requisites	CSB343 or PUB673 or PUB570. CSB343 can be studied in the same teaching period as CSB346
Anti-	CSB344, CSB345

requisites	
Equivalents	PUB680
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is the final unit (capstone) in the series of paramedic units that provide you with the opportunity to consolidate the knowledge, skills and attributes required for safe, competent and professional practice in the health workplace as a beginning level graduate paramedic. Learning outcomes of this unit build on previous clinical units and draw upon concepts, principles and theories that have been developed through your studies in paramedic and related sciences. This capstone unit informs your transition towards the graduate paramedic role.

CSB420 Introduction to Pharmacy Practice

Pre-requisites	CSB111
Equivalents	SCB208
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This introductory unit will provide an overview of the activities of a community pharmacy, including the processing of prescriptions, complementary medicine products and other front of shop merchandise. Topics cover foundation practical knowledge and skills (needed for professional placements in later units) together with retailing skills such as merchandising, stock control and computerised point of sales systems.

CSB421 Molecular Basis of Therapeutics

Pre-requisites	CZB190
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Molecular Basis of Therapeutics is a first year unit that introduces the biochemistry of medicines, drugs and other therapeutic goods and their interaction with target biomolecules. Specifically, the unit will establish the interaction between the molecular, chemical and physical properties of drugs and therapeutic

agents and how these properties affect their actions and interactions in living systems.

CSB430 Pharmacy Practice 1

Pre-requisites	CSB420 and CSB433. CSB433 can be studied in the same teaching period as CSB430
Equivalents	SCB308
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will further develop your knowledge, skills and experience in supplying, dispensing and counselling in pharmacy practice. This unit will build on previous knowledge gained in CSB420 and require the application of that knowledge in the experiential placement.

CSB431 I Pharmacist

Pre-requisites	CSB111. CSB111 can be studied in the same teaching period as CSB431
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces the World Health Organisation (WHO) concept of the 8-star pharmacist, and the skills, attributes and competencies required to fulfil the responsibilities of a pharmacist, and the continuously evolving role of the profession in the improvement or maintenance of a patient's quality of life.

CSB432 Molecules to Medicines

Pre-requisites	CSB421
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This second year unit explores the sources and properties of drugs which form the biologically active and therapeutic components of medicines. We will take a molecule from its discovery, through the design and development phases to clinical trials. The chemistry of drugs and the biology of cells and their receptors provides a context to the therapeutic use of drugs.

CSB433 Pharmaceutical Chemistry and Pharmacology 1

Pre-requisites	LQB182 and CVB101
Equivalents	SCB338
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Pharmacists require a detailed understanding of the physicochemical properties of drugs and an appreciation of the process of Drug Discovery to facilitate an understanding of how the current range of medicines have been developed. This unit will also provide an understanding of the analytical chemistry techniques that are used to quantitate the active compounds in both pharmaceutical formulations and biological samples, and spectroscopic techniques used in structural elucidation of biologically active compounds. Additionally, this unit will introduce the discipline of pharmacology which examines the interaction of chemical substances with biological system which is fundamental to the understanding of the molecular actions of pharmaceutical products.

CSB440 Pharmacy Practice 2

Pre-requisites	CSB430 and CSB433. CSB433 can be studied in the same teaching period as CSB440
Equivalents	SCB408
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will further develop your knowledge, skills and experience in supplying, dispensing and counselling in pharmacy practice. This unit will build on previous knowledge gained in CSB420 and require the application of that knowledge in the experiential placement.

CSB441 Quality Use of Medicines

Pre-requisites	CSB431 and CSB420. CSB420 can be studied in the same teaching period as CSB441
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Pharmacists have the responsibility to protect consumers from harm by managing and responding to the risk inherent in medication management systems. This unit explores the role and responsibilities of the pharmacist as an expert in their field who is focussed on patient care and the safe, efficacious, appropriate, judicious use of medicinal products.

CSB442 Pharmacokinetics

Equivalents	SCB428
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit presents the basic concepts of pharmacokinetics with an emphasis on clinical applications. It provides a rational approach to the establishment, optimization, and individualization of dosage regimens of drugs in patients.

CSB443 Medicinal Chemistry and Pharmacology 2

Pre-requisites	CSB433
Equivalents	SCB438
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

A detailed knowledge of medicinal chemistry and pharmacology is essential for the understanding of actions of drugs with endogenous molecular targets. This unit continues to develop the basic principles developed in SCB338 and introduces the concept of structure activity relationships (SARs) which demonstrates the linkage between the chemical structure of drugs and their biological activity and selectivity. The medicinal chemistry of a number of major drug classes are examined in detail, including adrenergic, cholinergic, serotonergic and antihypertensive drugs. This unit also provides an extension of this knowledge in pharmacology and focuses on the drug classes that act on the cardiovascular, respiratory, eye, renal, gastrointestinal systems.

CSB444 Medicinal Chemistry

Pre-requisites	CSB432
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit, CSB444 Medicinal Chemistry, looks at how biologically active molecules affect the body and how the body interacts with these molecules. Using examples of the main classes of drugs, the unit identifies the common drug-receptor, drug-enzyme and drug-drug interactions that occur. The concepts of adverse drug effects and toxicity will be further explored.

CSB445 Patient centred care: Musculoskeletal Dermatological and Special Senses

Pre-requisites	CSB441. CSB441 can be studied in the same teaching period as CSB445
Co-requisites	CSB446
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit of study will integrate the clinical therapeutics of musculoskeletal, dermatological and special senses including the pharmacology, pharmaco-economics, pharmaceuticals, pharmacy practice and management considerations that underpin such drug therapies. This unit will also include the epidemiology, pathophysiology and clinical features of musculoskeletal, dermatological and special senses disorders. Through a problem-based learning approach, students will develop skills in interpretation and application of pharmaceutical and pharmacotherapeutic concepts. Inter-professional communication and the application of your developing specialist knowledge to the implementation of clinical interventions and/or medication management review will also be explored.

CSB446 Patient centred care: Gastrointestinal

Co-requisites	CSB445
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit of study will integrate the clinical therapeutics of the gastrointestinal system including the pharmacology, pharmaco-economics, pharmaceuticals, pharmacy practice and management considerations that underpin such drug therapies. Through a problem-based learning approach, students will develop skills in interpretation and application of pharmaceutical and pharmaco-therapeutic concepts. Inter-professional communication and the application of your developing specialist knowledge to the implementation of clinical interventions and/or medication management review will also be explored.

CSB450 Pharmacy Practice 3

Pre-requisites	CSB440 and CSB453. CSB453 can be studied in the same teaching period as CSB450
Equivalents	SCB508
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will focus on the professional interaction of pharmacists with patients suffering from endocrine diseases, in particular diabetes, a variety of central nervous system (CNS) disorders including epilepsy, insomnia, anxiety and depression, Alzheimer's and Parkinson's disease, addiction and patients experiencing strong and debilitating pain from other disease states. Additionally, you will learn how to interact with patients withdrawing from drugs of addiction and the quality use of the both pharmacological and non-pharmacological therapies available for their treatment. This unit will also provide you with further knowledge and skills in the preparation of extemporaneous pharmaceutical preparations in common demand in today's health care environment.

CSB452 Pharmaceutics 1

Equivalents	SCB528
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is designed to provide knowledge relating to the physical and chemical properties of the components of pharmaceutical formulations. The formulation of drugs has a large influence

on the route of administration, the onset and duration of action and the pharmacokinetic parameters that govern the drugs activity in the human body. This course will introduce you to the basic concepts and theories of pharmaceutical formulation and compounding with a focus on liquid and semi-solid dosage forms.

CSB453 Pharmacology 3

Pre-requisites	CSB443
Equivalents	SCB538
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

A detailed knowledge of the pharmacology of drugs is essential for pharmacists to understand the therapeutic applications of pharmaceutical compounds and their concomitant adverse effects. This unit provides an extension of this knowledge and covers the drug classes that act on the central nervous system, endocrine system, anticancer drugs, drugs of abuse and pharmacotherapies for withdrawal syndromes.

CSB460 Pharmacy Practice 4

Pre-requisites	CSB450 and CSB463. CSB463 can be studied in the same teaching period as CSB460
Equivalents	SCB608
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The dispensing of schedule drugs to the community requires expertise in drug knowledge, packaging, labelling and health regulations, communication techniques, compounding processes and the ability to understand and validate the diagnosis of clinical conditions. This unit will provide students with expertise to dispense pharmaceutical drugs that are used in the treatment of infectious diseases.

CSB461 Pharmacogenomics and Drug Metabolism

Pre-requisites	CSB453
Equivalents	SCB638
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The effects of drugs in patients are determined in part by drug metabolizing enzymes. In addition, the ability of an enzyme to metabolize a drug is determined by genetic variability. A detailed understanding of these factors is necessary for pharmacists to understand drug selection, the biological fate of a drug following administration, the appropriate route of administration, the occurrence of adverse effects and the final effect of a drug. This unit will describe the biochemistry of drug metabolism and genetic factors (pharmacogenomics) that affect drug metabolism and variability of drug effects. The field of pharmacogenomics, is becoming increasingly important for understanding the contribution of the patient's genetic composition to drug effects.

CSB462 Pharmaceutics 2

Pre-requisites	CSB452
Equivalents	SCB628
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is designed to extend the knowledge of pharmacy students in pharmaceutics which is essential to their understanding of pharmaceutical product formulation. This unit will focus on solid dosage form design including tablets and capsules and the theory and practical aspects of controlled release formulations which are increasingly utilised in modern pharmaceutical formulations. Additionally, this unit will extend the student's expertise in the science of compounding of advanced pharmaceutical formulations.

CSB463 Pharmacotherapeutics 1

Pre-requisites	CSB453
Equivalents	SCB648
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

A detailed knowledge of the pharmacology of drugs is essential for pharmacists to understand the therapeutic applications of

pharmaceutical compounds and their concomitant adverse effects. This unit synthesises this knowledge and covers the drug classes that act in the treatment of infectious diseases.

CSB470 Pharmacy Practice 5

Pre-requisites	CSB460 and CSB473. CSB473 can be studied in the same teaching period as CSB470
Equivalents	SCB708
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The pharmacy practice units in the 4th year of the B Pharmacy course will provide both advanced and updated information on the dispensing and counselling of drugs using case based clinical scenarios. Additionally, students will be provided with information that will allow them to critically evaluate clinical trial design using studies of newly released drugs as a reference and the role of regulatory authorities during the process of drug approval. Through a series of case based problems and scenarios that will involve a diverse range of diseases and disorders, the students will gain experience in the skills required to dispense medication and effectively communicate drug knowledge to patients.

CSB473 Pharmacotherapeutics 2

Pre-requisites	CSB463
Equivalents	SCB748
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

A number of factors must be considered before a decision concerning the appropriate drug is prescribed and dispensed to patients. This unit will provide a pathophysiological approach to the identification of cardiovascular, respiratory, renal, and endocrine disorders. Students will be instructed on the factors that determine the correct choice of therapeutic drug and the dosing regimen including drug toxicity, pharmacokinetics and pharmacodynamic consideration for the individual patient, drug-drug interactions and pharmacoeconomics considerations.

CSB475 Pharmacy Management 1

Equivalents	SCB758
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

In addition to their role as allied health care providers, pharmacists are often required to assist in the management of their workplace which consists of supervision and administration of a diverse staff roster, stock inventory and marketing strategies. Moreover, many pharmacists enter into complex partnerships agreements during the purchase of a pharmacy. This unit will provide knowledge and skills in the areas of business strategy, financial management, marketing, inventory management and category management. This knowledge is necessary for managers of community pharmacies or hospital pharmacy departments to be able to make informed business decisions.

CSB476 Professional Placements 1

Pre-requisites	CSB470. CSB470 can be studied in the same teaching period as CSB476.
Equivalents	SCB768
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The role of a contemporary pharmacist in providing healthcare products and advice consists of diverse range of skills and abilities in the preparation of pharmaceutical preparations, the dispensing of medications, counselling of patients and their families in their correct use and performing medication reviews. To assist students in developing expertise in these areas, this unit will provide real world experience through a long-term continuous placement in a community or hospital environment under the supervision of qualified preceptor. These placements will consist of a five (5) week block that will commence in the second half of the semester and assessment will consist of the documented completion of a assignments and experiential log book.

CSB480 Pharmacy Practice 6

Pre-requisites	CSB470 and CSB483. CSB483 can be studied in the same teaching period as CSB480
Equivalents	SCB808
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The pharmacy practice units in the fourth year of the Bachelor of Pharmacy course will provide both advanced and updated information on the dispensing and counselling of drugs using case based clinical scenarios. Through a series of case based problems and scenarios that will involve a diverse range of diseases and disorders and aspects of pharmaceutical care, the students will gain experience in the skills required to dispense medication and effectively communicate drug knowledge to patients, and an understanding of the provision of primary health care in the Australian Health system.

CSB483 Pharmacotherapeutics 3

Pre-requisites	CSB473
Equivalents	SCB848
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Pharmacotherapeutics 3 is a final year unit which builds upon the knowledge of pathophysiology, pharmacology and therapeutics which you have previously obtained in the unit's pharmacotherapeutics I and II. This unit will 1). introduce you to the pathophysiology of neurological, oncological and renal disorders, 2). examine the therapeutic regimes used to treat these disorders and 3). provide you with a mechanistic rationale for the way in which these drugs function to alleviate symptoms of these disorders.

CSB485 Pharmacy Management 2

Pre-requisites	CSB475
Equivalents	SCB858
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

Units

Point
- SEM-2

This unit extends the knowledge of pharmacy students in areas of accounting and finance, management, HR and health care policy in relation to the management of a pharmacy business.

CSB486 Professional Placements 2

Pre-requisites	CSB476 and CSB480. CSB480 can be studied in the same teaching period as CSB486.
Equivalents	SCB868
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is designed to extend the students experiential skills in working in either a community or hospital pharmacy environment. The design and timetabling of the unit is similar to SCB768 Professional Placements 1, but the emphasis will focus on the dispensing and counselling and QUMs of further drug classes and the management skills will be aligned with SCB858 Pharmacy Management 2. These placements will consist of a five (5) week block consisting of four working days that will commence in the second half of the semester and assessment will consist of the assignments and submission of a experiential log book.

CSB520 Disease Processes

Anti-requisites	LSB321, LSB361, LSB367
Equivalents	LSB475
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Clinical health professionals work in multi disciplinary teams within the health care system to provide optimal care to individuals and communities. The nature and standards of professional practice are determined by government and professional organisations, and the scope of clinical practice for clinicians evolves in response to community needs. There is a community expectation that clinical health care professionals will be effective communicators who engage in ethical practice that is continually improved

through ongoing reflection. This unit introduces students to these concepts as they apply to professional practice.

CSB521 Podiatric Medicine 1

Pre-requisites	LSB235 and LSB250
Equivalents	PUB339
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Professional practice as a podiatrist requires the integration of a wide range of knowledge, skills and personal attributes in the clinical setting. This unit introduces you to the clinical, theoretical and professional domains of podiatric practice. Students in this unit begin the transition to the unique and challenging role of clinician, as well as continuing academic learning. The application of prior knowledge e.g. anatomy, physiology and the acquisition of new knowledge, are encouraged through a case-based approach. Principles of evidence -based practice are introduced in a podiatric context.

CSB522 Podiatric Medicine 2

Pre-requisites	(CSB521 or PUB339) and (CSB520 or LSB475)
Equivalents	PUB439
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit builds on the foundational knowledge and clinical skills acquired in Podiatric Medicine 1 enabling you to consolidate these skills and begin to effectively treat patients under staff supervision. The unit introduces you to concepts in clinical biomechanics, orthoses manufacture, the assessment and prescription of footwear, management of common foot conditions, the study of material medica and health issues in ageing and diabetes. The content is developed to enable you to integrate information from other units (Disease Processes, and Microbiology).

CSB523 Podiatric Clinical Gait Analysis

Pre-requisites	LSB235
Equivalents	PUB362

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The evidence provided by gait analysis technology is quantitative and facilitates sound clinical decision making. In order to select appropriate interventions it is necessary to evaluate gait and determine the musculoskeletal and neurological factors which influence lower limb disorders. The process of data collection, data selection and case evaluation in gait analysis is therefore fundamental and underpins the greater part of podiatry practice. It is important that these skills are acquired early in the course.

CSB525 Podiatric Medicine and Clinical Practice

Equivalents	PUB442
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit has been specifically designed for students who are entering the graduate entry podiatry course who have completed a prior degree in a health-related field e.g. nursing, biomedical science. The unit introduces the knowledge and clinical skills required for podiatry students who are commencing patient management at the QUT Podiatry clinic.

CSB530 Pharmacotherapeutics for Podiatrists

Pre-requisites	LSB384 or PUB437
Equivalents	LSB584
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

There is a national movement toward podiatrists seeking and obtaining endorsement for the use of scheduled medicines in the treatment of patients with foot problems. This unit provides a theoretical background for practitioners who wish to use of these medicines as part of their clinical practice.

CSB531 Radiographic Image Interpretation

Pre-requisites	CSB521 or CSB522 or CSB525 or PUB439 or
----------------	---

Units

	PUB442, CSB521 or CSB525 can be studied in the same teaching period as CSB531
Equivalent s	PUB537
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Diagnostic imaging is an integral part of contemporary podiatry practice. As a registered podiatry practitioner you are legally entitled to authorise the taking of x-rays for diagnostic purposes. The knowledge and skills covered in this unit are applied in various clinical settings on a regular basis.

CSB532 Medicine

Pre-requisites	CSB522 or CSB525 or PUB439 or PUB442
Co-requisites	CSB530
Equivalents	PUB438
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Many of the patients treated by podiatrists present with co-morbidity which affects their foot health. This unit is designed to give practitioners insight into medical conditions, their effects on both general and foot health, and an understanding of how appropriate foot care may be delivered with these factors in mind.

CSB533 Podiatric Medicine 3

Pre-requisites	CSB522 or CSB525 or PUB439 or PUB442
Equivalents	PUB539
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The key elements of the National Podiatry Competency Standards which focus on the physical examination and diagnosis of foot pathology of a biomechanical nature will be the guiding principles underpinning this unit. The unit allows you to further develop clinical practice skills by integrating content from other units such as Pharmacotherapeutics for Podiatrists, Disease Processes, Medicine, and

Podiatric Radiology.

CSB534 Podiatric Medicine 4

Pre-requisites	CSB533
Equivalents	PUB639
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Podiatrists are required to exercise high level clinical judgement in diverse settings. This unit is designed to equip students with these skills while participating in a range of specialty clinics with a significant focus on paediatric knowledge, diabetes management and therapeutic intervention.

CSB536 Clinical Therapeutics for Podiatrists

Pre-requisites	CSB532 and (CSB530 or LSB584)
Co-requisites	CSB534
Equivalents	PUB662
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Podiatrists make clinical decisions which are complex and require the practitioner to consider legal, ethical, pharmacological, medical and patient factors as they determine the most efficacious therapeutic approaches to treatment. This unit provides a basis to acquire the practical skills to complete this task.

CSB538 Sports Medicine and Rehabilitation

Pre-requisites	(CSB522 and CSB531) or (CSB525)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Podiatrists encounter patients with a wide range of musculoskeletal problems. This unit provides you with a theoretical and practical background in the diagnosis and management of orthopaedic and sports related injuries. The unit also concentrates on the principals of injury management using the correct rehabilitative and physical therapy methods.

CSB539 Podiatric Anaesthesiology and Surgery

Pre-requisites	CSB530 and CSB532 and CSB533
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Podiatrists routinely perform surgery under local anaesthetics in a range of clinical settings. This unit is designed to give students the knowledge and skills associated with the safe administration of local anaesthetics and performance of minor surgical techniques.

CSB541 Professional Placement 1

Pre-requisites	CSB545 or PUB739. CSB545 can be studied in the same teaching period as CSB541
Equivalents	PUB738
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

CSB542 Professional Placement 2

Pre-requisites	CSB541
Equivalents	PUB838
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Workplace Integrated Learning (WIL) is integral to QUT's approach to learning and teaching. Professional competency requires an appreciation of foot health needs in the community, understanding of the role of podiatrists within the broader health care system, and capacity for team work and collaboration with a range of health professionals in an interdisciplinary environment. This unit will develop students' capacity for reflection and form the basis for lifelong learning in professional practice. Professional Placement 2 will build upon workplace integrated learning experiences in Professional Placement 1. This final semester unit is designed to prepare students for entry into the workplace upon graduation as registered health professionals.

CSB544 Transition to the Clinical Profession

Pre-requisites	CSB545
Equivalents	PUB862
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The unit identifies the legal, ethical, financial and professional frameworks that guide practice management in the public and private health sectors. As pre-professionals, students combine administrative and organisational skills to ensure the delivery of safe, effective, efficient, high quality health services in compliance with relevant laws, policies and guidelines. Essential knowledge in accounting, marketing, human resources, project management and professional management is applied to 'real world' tasks to prepare the student for transition to the management responsibilities of professional practice.

CSB545 Podiatric Medicine 5

Pre-requisites	CSB534 and (CSB537 or CSB538)
Anti-requisites	PUB739
Equivalents	PUB740
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

CSB546 Podiatric Medicine 6

Pre-requisites	CSB545
Anti-requisites	PUB839
Equivalents	PUB840
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

In this final semester unit, students demonstrate proficiency in integrating knowledge and skills obtained throughout the course, applying them in a supervised university podiatry clinic setting. Clinical decisions are informed by relevant physical and diagnostic examinations, conducted within the framework of technological, ethical, financial and legal considerations and an evidence-based context. National and international medical, orthopaedic, pharmacological

and podiatric perspectives guide the design, implementation and evaluation of complex patient management plans. At this point in the course, students will be expected to demonstrate clinical competencies at a level commensurate with national podiatry competency standards, professional guidelines and codes of conduct.

CSB547 Current Theory of Podiatric Medicine

Pre-requisites	CSB534
Co-requisites	CSB545
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This final year unit integrates a broad scope of podiatric medicine knowledge, including management of the high risk foot, advanced diagnostic methods, paediatrics, gerontology and other relevant topics in medicine and orthopaedics. There is an emphasis on application of principles of evidence based medicine in podiatry practice. Theory covered in this unit supports the companion clinical units, Podiatric Medicine 5 and Professional Placement 1, which are comprised largely of Work Integrated Learning experiences.

CSB600 Evidence-Based Clinical Practice

Pre-requisites	CSB111
Equivalents	CSB334, PUB384
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

CSN021 Cardiac Ultrasound 1

Equivalents	PCN155
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This is the first in a series of four cardiac specific theory units that will assist you to develop knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level

cardiac sonographer. This unit focuses on the foundation theoretical concepts which other units will build on throughout the course.

CSN022 Cardiac Ultrasound 2

Pre-requisites	(CSN021 or PCN155) and CSN031. CSN031 can be studied in the same teaching period as CSN022
Equivalent s	PCN259
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The field of medical ultrasound is scientifically based, in an environment that is rapidly changing and undergoing considerable technological advancement. Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit extends and builds on the content of CSN021 by introducing the principles and clinical applications of Doppler Echocardiography in the assessment of the adult heart as well as basic haemodynamic principles and calculations. In addition, this unit also covers the applications of cardiac ultrasound in the assessment of diastolic function of the left heart and other cardiac pathologies such as hypertensive heart disease, diseases of the aorta, ischaemic heart disease and cardiomyopathies in the adult patient.

CSN023 Cardiac Ultrasound 3

Pre-requisites	(CSN022 or PCN259) and (CSN031 or PCN497-2)
Equivalents	PCN359
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart. This unit extends and builds on the content of CSN021 and CSN022 by introducing concepts and techniques of the more complex haemodynamic calculations and

by discussing the applications of these techniques in the evaluation of cardiac valvular disease and prosthetic heart valves and complications.

CSN024 Advanced Cardiac Ultrasound

Pre-requisites	(CSN023 or PCN359) and (CSN031 or PCN497-2)
Equivalents	PCN459
Credit Points	12
Campus	External
Availabilities	External - SEM-2

Cardiac ultrasound (echocardiography) is a highly specialised technique for the assessment of the human heart and is a technique that continues to undergo considerable technological advancements. This unit extends and builds on the content of units CSN022 and CSN024 by introducing more advanced applications of echocardiography. In particular, this unit covers the role of echocardiography in the assessment of more complex cardiac diseases such as diastolic dysfunction, pericardial disease, cardiac masses, systemic diseases with cardiac involvement and congenital heart defects. In addition, this unit also covers new and evolving echocardiographic modalities as well as the role of other diagnostic imaging tests in cardiac assessment.

CSN025 Principles of Medical Ultrasound

Equivalents	PCN162
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit is designed to provide students with a thorough understanding of the physical processes involved in producing an ultrasound image, the features of ultrasound equipment and the role and responsibilities of the sonographer in producing a diagnostic examination. Topics include general scanning principles and considerations, care of equipment, physics of ultrasound, ultrasound equipment features, image production and processing, artefacts, image recording methods, quality control, biological hazards and safety issues,

principles of Doppler ultrasound, care of the patient and communication issues.

CSN026 Ultrasonic Examination 1

Co-requisites	CSN025
Equivalents	PCN159
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is the first in a series of four medical ultrasound specific theory units that will assist you to develop the knowledge, skills and attributes for safe, competent practice in the health workplace as a beginning level medical sonographer. This unit focuses on the ultrasound techniques used to examine the adult abdomen and pelvis, and the ultrasonic appearance of normal and abnormal anatomy and pathology.

CSN027 Ultrasonic Examination 2

Pre-requisites	CSN026 and CSN025
Co-requisites	CSN033
Equivalents	PCN356
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit includes the ultrasound techniques used to examine the head, neck and peripheral organs and the ultrasonic appearance of normal and abnormal anatomy and pathology. It also describes the basic ultrasound techniques used in the 1st, 2nd and 3rd trimester of pregnancy.

CSN028 Vascular Ultrasound

Pre-requisites	(CSN033 or PCN159) and (CSN027 or PCN356)
Equivalents	PCN355
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes the principles and equipment requirements of ultrasound applications in the cardiovascular system. It also includes the clinical techniques and

diagnostic criteria of such applications, in particular those of the peripheral arterial and venous systems.

CSN029 Advanced Ultrasound Topics

Pre-requisites	(CSN033 or PCN197-2) and (CSN027 or PCN356)
Equivalents	PCN357
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The aim of the unit is to provide you with a detailed understanding of the techniques involved in conducting an ultrasound examination in advanced obstetric applications. You will also be introduced to the applications of ultrasound techniques in paediatrics. New and evolving applications of ultrasound will be introduced.

CSN031 Cardiac Ultrasound Clinical Practice 1

Pre-requisites	(CSN021 or PCN155) and CSN022. CSN022 can be studied in the same teaching period as CSN031
Equivalent s	PCN497-1, PCN497-2
Credit Points	12
Campus	External
Availabilitie s	External - SEM-2

This is the first in a series of two clinical practice units that will assist you to develop knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level cardiac sonographer. Learning outcomes of this unit build on your past clinical experiences and inform your future development and progression through the course. This unit focuses on the clinical application of the theoretical concepts learned in other units to date throughout the course (CSN021, CSN022 and CSN025). In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. This is a designated unit. Designated units include professional experience units, units requiring the development of particular skills, and units requiring the demonstration of certain personal

qualities, and are deemed to be critical to progress in your course. Failure to successfully complete the requirements of this unit may lead to a period of probation or exclusion from this course.

CSN032 Cardiac Ultrasound Clinical Practice 2

Pre-requisites	(CSN023 or PCN359) and CSN024. CSN024 can be studied in the same teaching period as CSN032
Equivalent s	PCN597-1, PCN597-2
Credit Points	12
Campus	External
Availabilitie s	External - SEM-2

This is the second in a series of two clinical practice units that will assist you to develop knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level cardiac sonographer. Learning outcomes of this unit build on your past clinical experiences and inform your future development and progression through the course. This unit focuses on the clinical application of the theoretical concepts learned in other units to date throughout the course. In this unit, basic skills are refined and expanded, and advanced echocardiographic skills are developed through employment and training in a QUT approved clinical department. This is a designated unit. Designated units include professional experience units, units requiring the development of particular skills, and units requiring the demonstration of certain personal qualities, and are deemed to be critical to progress in your course. Failure to successfully complete the requirements of this unit may lead to a period of probation or exclusion from this course.

CSN033 Medical Ultrasound Clinical Practice 1

Pre-requisites	CSN025 and CSN026
Equivalent s	PCN197-1, PCN197-2
Credit Points	12
Campus	External
Availabilities	External - SEM-2

Medical ultrasound is a highly specialised technique for the assessment of many areas of the human body and the developing fetus. This clinical practice

unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to other units in the course.

CSN034 Medical Ultrasound Clinical Practice 2

Pre-requisites	(CSN028 or PCN355) and (CSN029 or PCN357)
Equivalent s	PCN297-1, PCN297-2
Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit builds on the skills, knowledge and abilities gained in the unit CSN033. Medical ultrasound is a highly specialised technique for the assessment of many areas of the human body and the developing fetus. This unit is an essential component of the course as it allows the student to be involved in extensive clinical experience that is complementary to all other units in the course.

CSN500 Podiatric Therapeutics 1

Anti-requisites	LSB584, PUB662
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

CSN501 Podiatric Therapeutics 2

Pre-requisites	CSN500
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

CVB101 General Chemistry

Anti-requisites	CZB190
Equivalent s	SCB111
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Chemistry deals with the fundamental building blocks of our universe. An understanding of chemistry is essential to understanding our world and to addressing big challenges faced by our society. The knowledge and skills you will learn in this unit, complemented by CVB102 Chemical Structure and Reactivity, provide the broad foundation to progress to more specialised topics in analytical, inorganic, and physical chemistry.

CVB102 Chemical Structure and Reactivity

Anti-requisites	CZB190, LQB180
Equivalent s	SCB121
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Chemistry relates to all aspects of our lives. An understanding of chemistry is needed to make sense of our world and to address big challenges faced by our society. Together with its companion unit General Chemistry, this unit provides you with a foundation in the science of Chemistry. It builds on the fundamental scientific concepts and skills introduced in first semester. For Chemistry majors, it provides grounding in the sub-discipline of organic chemistry that you will encounter in second and third year. For students majoring in Biology, it provides the chemical framework necessary for the understanding of the behaviour of organic molecules in complex biological systems.

CVB201 Inorganic Chemistry

Pre-requisites	(CVB101 and CVB102) or (SCB111 and (SCB121 or CVB102))
Anti-requisites	PCB334
Equivalent s	PQB331
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides detailed coverage of the chemistry of inorganic compounds with particular emphasis on the bonding in complexes of transition metals, including valence bond theory and orbital hybridisation, coordination theory and crystal field theory. Aspects of molecular geometry and symmetry are also developed. The chemistry of inorganic compounds and transition metal

complexes is introduced and explored deeply. The unit builds on the fundamental concepts introduced in the first year units "General Chemistry" and "Chemical Structure and Reactivity" and prepares you for the final semester units "Coordination Chemistry" and the major capstone project "Chemical Research".

CVB202 Analytical Chemistry

Pre-requisites	(CVB101 or SCB111) and (SCB121 or CVB102) and (SCB131 or CVB102)
Equivalents	PQB312
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is an introduction to modern chemical analysis, including some common instrumental techniques, which are firmly linked to the theory and practice of the discipline in a modern, working laboratory. You will gain essential analytical and deductive skills for chemical science as well as laboratory-based experience in sampling, treatment of samples, principles and practice of making high-quality chemical measurements with chromatographic and spectroscopic instrumentation. This unit further develops your knowledge and technical laboratory skills in chemical instrumentation and analysis. It links to the work previously undertaken in CVB101 General Chemistry and prepares you for the final semester major capstone unit CVB304 Chemistry Research Project.

CVB203 Physical Chemistry

Pre-requisites	(CVB101 or SCB111) and (SCB121 or CVB102) and (SCB131 or CVB102)
Anti-requisites	PCB354, PCB405
Equivalents	PQB401
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Chemistry is ultimately the study of change. Changes of state, the mixing of substances, chemical reactions and spectroscopic transitions are manifestations of change on an atomic and molecular level. This unit provides the tools to quantitatively analyse changes accompanying a wide variety of chemical and physical transformations.

The fundamental factors that govern the extents (equilibria) and rates (kinetics) of chemical reactions can be understood in these terms. The aim of this unit is to demonstrate how reactions and chemical processes can be described, quantified and understood using macroscopic concepts and through understanding of molecular systems at the microscopic level.

CVB204 Organic Structure and Mechanisms

Pre-requisites	(CVB101 or SCB111) and (SCB121 or CVB102) and (SCB131 or CVB102)
Anti-requisites	PQB401
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on the organic chemistry knowledge and laboratory skills gained in CVB101 and CVB 102. The deeper understanding of reaction mechanisms, instrumental characterisation and stereochemistry are important in facets of all subsequent chemistry units. Perhaps most importantly, this unit will be used as the foundation for advanced studies in organic chemistry such as CVB 301 Organic Chemistry: Strategy for Synthesis and potentially your capstone research project in CVB304 Chemistry Research Project.

CVB210 Chemical Measurement Science

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces students to the underlying concepts of quality in testing and calibration for chemical instrumental or wet-chemical laboratory measurements. It introduces the student to the internationally-recognised quality framework of ISO/IEC 17025-2005 for testing and calibration in the context of a practical laboratory program which makes the connection between the theory and practice in a relevant manner. The understanding and skills in quality measurement are complemented by further related studies in introductory chemometrics, process analytical chemistry and laboratory automation,

together with a practical/workshop program in these areas. The practicals and workshops give the student the opportunity to develop technical skills, analytical thinking, communication and problem-solving skills. For instance, practicals and workshops will demonstrate how near-infrared chemical measurements can be used to determine the octane number of fuels using chemometric-calibration techniques and, importantly, to define the quality of those measurements.

CVB211 Industrial Chemistry

Equivalents	PQB623
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit focuses on technologies central to the modern chemical industry such as catalysis and zeolites. Catalysts are used in the manufacture of 90 % of all chemicals produced in the world today. As such, students will be introduced to the basic theories of catalysis and surface science. These theories will then be expanded into industrial practice by discussion of real world industries such as methanol, ammonia, formaldehyde and nitric acid synthesis. The drive towards the implementation of green chemistry will also be shown and the translation of "old chemistry" into modern sustainable processes illustrated.

CVB212 Industrial Analytical Chemistry

Pre-requisites	(CVB101 or SCB111) and (SCB121 or CVB102) and (SCB131 or CVB102)
Equivalents	PQB313
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Modern chemical industry requires comprehensive analytical measurement relating to the raw materials, process streams and outputs in order to control quality and to confer error prevention. This unit develops your knowledge and application of the fundamental principles of Analytical Chemistry upon which modern industrial analysis techniques are based. This unit is complementary to the more empirical approach adopted in

"CVB202 Analytical Chemistry", providing you with grounding in the theory and practice of qualitative, quantitative gravimetric and wet chemical analysis; together with spectrometric and electrochemical methods of analysis for a wide range of industrial applications including foods and beverages, mining, metals, waste waters and related areas. This unit develops your theoretical and applied knowledge of chemical analysis and further develops your technical and laboratory skills in sample treatment, gravimetric and wet chemical methods of analysis. It links to work undertaken in CVB101 General Chemistry, prepares you for the 3rd year unit CVB320 Instrumental Analysis and the final semester major capstone unit CVB304 Chemistry Research Project, as well as a career in a chemically-based industry or industry-related research.

CVB215 Criminalistic and Physical Evidence

Equivalents	SCB384
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Criminalistics is the definitive source for forensic science because it makes the technology of the modern crime laboratory clear to the non-scientist. This unit will introduce the students to the realm of forensics and its role in criminal investigations. The student will be introduced physical evidence collection, preservation and analysis techniques. The unit will bring to the students comprehensive hands-on experience in questioned documents examination, fingerprinting, crime scene investigations and facial recognition.

CVB216 Forensic Chemistry

Anti-requisites	PQB684
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Forensic Chemistry is a special field of chemistry dedicated to the analysis of matter and substances that may have been used in unlawful activities, abused or caused harm to individuals or the public. A forensic chemist is a professional chemist who analyzes evidence that is brought in from crime scenes and reaches a conclusion based

on tests run on that piece of evidence. In the Forensic Chemistry unit, students will gain expertise in all the major branches of chemistry (organic, inorganic, physical and especially analytical) as related to forensic investigations. The analytical aspect of the course has been broadened from a more traditional chemistry focus to include modern and special types of analysis of importance to forensic science.

CVB217 Digital Forensics

Equivalents	PQB584
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The widespread use of computers, mobile phones, PDAs, digital cameras, USB drives, the internet, etc in everyday activities result in mass amount of electronically stored information. The information may be related to unlawful activities and cyber space security. Finding, interpreting and presenting such digital evidence in a manner that is acceptable to the investigating authorities and the court system is complicated and requires special skills in digital evidence analysis. This unit aims at introducing core knowledge and hands-on experience in relation to this modern discipline of forensic practice. The unit will introduce the nature of the digital forensic evidence and the tools to find, analyze and interpret the electronic evidence.

CVB218 Drug Discovery and Design

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides a brief introduction to the history and evolution of drug discovery, including the role of the pharmaceutical industry, to current-day methods including rational computer-aided drug design, drug targets and screening libraries. Case studies may include synthetic hormones, narcotics, chemotherapeutic agents and performance-enhancing compounds. You will be introduced to the concepts of chemical structure and structure-activity relationships. The unit complements 'Drug Action' offered in the same semester.

CVB220 Process Principles

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

CVB221 Unit Operations

Equivalents	PQB525
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit fosters a deeper understanding of the unit operations which are the main components in process flow diagrams. The students will be introduced to among other concepts in the water and wastewater treatment industry disinfection, filtration, ion exchange, adsorption and desalination. Complementary theory regarding mass and heat transfer operations will also be used to ultimately provide a comprehensive overview of water treatment and chemical processes. This unit aims to bridge the gap between academic learning and industrial practice. Examples relating to key industries such as the coal seam gas, mining, manufacturing and wastewater sectors will be provided and cutting edge problems discussed. Students will learn the key skills which industry expects graduates to possess in order to rapidly integrate into project teams.

CVB222 Forensic Analysis of Bio-active Compounds

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with an introduction to the basics of analytical testing, detection and identification of synthetic and natural bio-active substances that are frequently encountered in pharmaceutical, forensic and environmental industries. You will also be introduced to biomedical informatics as applied to the discovery of new diagnostic techniques. The unit will introduce modern instrumental analytical platforms such as spectroscopy, chromatography and immunoassay. The unit will also outline the internationally-recognised quality framework of ISO/IEC 17025 for testing and calibration, in the

context of a practical laboratory program.

CVB225 Forensic Biology and Analytical Toxicology

Anti-requisites	LQB680, PQB680
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The extensive use of biological evidence to identify victims and offenders as well as indicate attempts to control victims prior to abuse or attack has had a significant bearing, in recent years, on the course of law enforcement investigations, criminal court proceedings, and victim service provider issues. DNA evidence arguably has become the most well known type of forensic evidence, probably because it can be uniquely identifying and because it is the genetic blueprint of the human body. In addition, analytical toxicology has become an essential tool to identify some of the conditions under which a crime was attempted. For these reasons, DNA, Osteology and Toxicology evidence have become a highly influential piece of the crime puzzle. In this unit the students will be introduced to the concepts of DNA profiling and analytical toxicology and their applications in forensic case work. The students will develop the necessary skills for analysing and interpreting the DNA and toxicology evidences. The students will also be introduced to the basic concepts of forensic anthropology. This will be through the study of the theory, hands-on practices relevant to real life scenarios as well as training on the forensic interpretation of the evidence.

CVB301 Organic Chemistry: Strategies for Synthesis

Pre-requisites	CVB101 and CVB102 and CVB204
Equivalents	PQB531
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This advanced unit complements and further develops the concepts introduced in CVB102 "Chemical Structure and Reactivity" and CVB204 "Organic Structure and Reaction Mechanisms". The main focus of this unit is on the strategies chemists employ in the

synthesis of complex molecules. This will provide the necessary practical and theoretical skills for those of you wanting to continue your exploration of organic chemistry as a capstone project in CVB304 Chemistry Research Project.

CVB302 Applied Physical Chemistry

Pre-requisites	CVB203
Equivalents	PQB502
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Physical chemistry is a discipline of chemistry in which the physical factors which govern chemical reactions are described, quantified and explored. After an introduction to thermochemistry and the principles that govern the macroscopic behaviour of solids, liquids and gases, the fundamental physical properties which determine the extent of reaction of pure substances are illustrated. These thermodynamic principles are extended to mixtures substances and the properties of solutions.

CVB303 Coordination Chemistry

Pre-requisites	CVB201
Equivalents	PQB631
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides detailed coverage of the chemistry of coordination compounds. Topics include organometallic chemistry, including metal-carbon bonding, main group and transition metal organometallics and applications of organometallic compounds in synthetic chemistry; bioinorganic chemistry; structure and applications of coordination polymers (also known as metal-organic-frameworks); physical methods of structure determination, such as single crystal X-ray diffraction; and electronic spectroscopy and spectroscopic terms. The unit builds on the concepts developed in CVB201 Inorganic Chemistry and complements final year units in the chemistry major.

CVB304 Chemistry Research Project

Pre-requisites	CVB202 and CVB301 and CVB302
Co-requisites	CVB303
Equivalents	PQB642
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

In this unit you will be engaged on a chemistry project that is selected from a range of topics in exciting new areas of relevance to modern chemistry and chemical technology. Examples may include, but are not necessarily limited to nanotechnology, drug design, free-radical chemistry and trace metal speciation in environmental and biological systems. The unit will involve a self-directed project in which you synthesize the knowledge, skills and techniques developed during your chemistry major. In the process, you will be expected to critically review relevant literature sources, demonstrate understanding and depth of knowledge and provide a clear, coherent communication of the chemical project outcomes. The project will provide you with the opportunity to articulate societal and ethical implications of the profession of chemistry as part of the written project report.

CVB313 Environmental Analytical Chemistry

Pre-requisites	CVB202
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Analytical chemistry of the environmental provides the tools and techniques necessary to make quantitative measurements of the extent of environmental alteration by natural or man-made means. Principal areas of study include the analytical and instrumental methods used in measuring: air pollution; water pollution; soil and sediment contamination; and pesticide residue contamination in agriculture. Students will become familiar with the methods of analysis through the lectures as well as a complementary laboratory practical program. This will allow students to develop technical skills such as: sample collection and treatment; using modern instruments, including

atomic spectrometric and IC instruments for inorganic elemental analysis, GC, GC-MS and HPLC instruments for organic components.

CVB320 Instrumental Analysis

Pre-requisites	CVB202
Equivalents	PQB513
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Modern instrumental methods are capable of producing large quantities of data and it is becoming common practice to use data driven chemometric and cheminformatics techniques as an adjunct to instrumental analysis. These techniques are introduced through a project-based investigation of bio-analytically related datasets where you develop understanding of applications of instrumental analysis and further develop your analytical thinking, problem-solving, communication and deductive skills using real-world examples. This unit builds upon the theoretical and practical framework for chemical analysis in the unit CVB202 Analytical Chemistry to develop advanced instrumental and analysis techniques for modern laboratory practice.

CZB190 Chemistry for Health Sciences

Anti-requisites	CVB101, CVB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The study of chemistry forms an important foundation for all students of the health sciences. The organisation of the human body begins with chemicals (atoms and molecules) making up its simplest or smallest scale level of organisation. Chemistry allows us to understand how cells, tissues and organs are formed, how these substances react with each other and their environment, and how these substances behave. This unit will develop the essential concepts of chemistry necessary for students studying health and biological science with topics introduced and applied in a contextualised manner relevant to their disciplines. As part of your early biomedical science training, you need to

explore the chemical composition of the human body and have an understanding of chemical processes relevant to biology. This unit will form an essential foundation to further study in the areas of health sciences.

DAB103 Architectural Visualisation 1

Equivalents	DEB103, DTB103
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Architects work in three dimensions and thus employ a variety of tools to think about and communicate three-dimensional ideas. This unit introduces you to the basic skills and techniques you'll need to support this design visualisation with a focus on analogue media, simple model making, and fundamental drawing skills; both technical and expressive/exploratory.

DAB110 Architectural Design 1

Pre-requisites	DAB103 can be studied in the same teaching period as DAB110
Equivalents	ADB001
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit offers a broad introduction to the field of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Analysis of the constructed environment leads to a number of design projects that engage with issues of context, tectonics, planning, form, and spatial quality. Orthogonal drawing exercises, freehand sketching, presentation graphics and model making all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB203 Architectural Visualisation 2

Pre-requisites	DAB103
Equivalents	DEB203
Credit Points	12
Campus	Gardens Point

Availabilities

Gardens Point
- SEM-2

The unit DAB103 introduced you to the skills and techniques needed to support design visualisation with a focus on analogue media and drawing skills. This unit continues that process of skills development, and integrates digital techniques (computer aided design) with analogue approaches; further developing your ability to imagine and test architectural designs through visual mean.

DAB210 Architectural Design 2

Pre-requisites	DAB203. DAB203 can be studied in the same teaching period as DAB210
Equivalents	ADB002
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit offers a focused introduction to the field of design through engagement with the explicit process of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Architectural design as a manageable process is explored through a number of exercises and design projects. Discrete steps in the process of architectural design are made explicit through staged activities that build to a complete design project. Orthogonal drawing exercises, freehand sketching, presentation graphics, and model making all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB220 Architecture, Culture and Place

Equivalents	DAB420
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The concept of place is highly significant to architectural thought and production. This introductory unit surveys the concept of place in the discourse and practice of architecture and explores how place is understood, interpreted and made in a range of cultural, historical and physical

contexts.

DAB310 Architectural Design 3

Pre-requisites	DAB110
Equivalents	ADB003
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This intermediate level unit in architectural design uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Design problems of increased complexity are tackled through a process of abstraction, experimentation, representation, imagination, and testing. Advanced orthogonal drawing, freehand sketching, presentation graphics, documentation techniques, and model making all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, workshops and studio based activities.

DAB325 Architecture in the 20th Century

Equivalents	ADB011
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Designers in any discipline should possess the ability to appreciate the history of art, design and architecture. In addition, they should be able to analyse developments in design history from multiple perspectives. This unit is a survey course of the history and theory of architecture from the beginning of the 20th century to the present. Teaching and learning takes place through three forms of structured activity: lectures, tutorials, and online.

DAB330 Integrated Technologies 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is the first discipline-based unit in the Technology and Science design stream, through the introduction and application of the architectural principles for

Environmental Design (including sustainability, lighting, and acoustics), Construction, and Structures. It introduces students to the basic technologies and sciences associated with architectural practice and in particular technical skills required for simple design projects. Thermal characteristics of building materials, bioclimatic chart analysis, climate and climatic elements as environmental factors influencing architectural design, basic climatic regions and climate responsive building design, solar heating and cooling of buildings, thermal performance analysis, environmentally sustainable building materials, colour, natural and artificial lighting, ventilation, and condensation will be forming the Environmental Design topics.

DAB403 Architectural Visualisation 3

Pre-requisites	DAB203
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Architects recognise that visualisation or communication of process, decisions and outcomes is crucial. To date, you have learnt how to effectively communicate your architectural intentions using both analogue and digital means. However, the skills you have acquired have been primarily intended for the communication of design. For architects, the ability to communicate technical intentions is equally important. As such, this unit will equip you with technical communication and documentation skills using Building Information Modelling (BIM).

DAB410 Architectural Design 4

Pre-requisites	DAB210
Equivalents	ADB004
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit offers an intermediate level investigation into the field of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Complex design problems deal with issues of social context, ethics, values, as well as the physical constraints

of site, materials, climate, and technology. Design projects require the management of conflicting constraints to achieve optimal design proposals. Precedence, typologies, research and analysis, and representation techniques all form part of the unit content. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB435 Architectural Technology 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit will explore various forms of domestic construction with particular reference to general properties of building materials, common construction practices used in dwellings, single storey and class 10 buildings. Comparison of building systems and their effect on domestic building design will be explored in detail. Students will be introduced to the construction aspects of the BCA including its housing provisions and associated codes for all types of buildings to assist to achieve the requirements for building approvals.

DAB511 Architectural Design 5

Pre-requisites	DAB310
Equivalents	ADB005, DAB510, DAH510
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit offers a focused intermediate level investigation into the field of design as applied to architecture. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. A particular emphasis is placed on the introduction of knowledge and skills to design a technologically enhanced architectural space with the aid of digitally mediated tools and methods while design theory, sustainability, sociology, history and critique, as they all apply to architectural design, all form part of the unit content. Design projects require synthesis of a range of abstract issues to achieve focused architectural proposals. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAB611 Architectural Design 6

Pre-requisites	DAB410
Equivalents	ADB006, DAB610, DAH610
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will develop greater complexity in architectural design skills in an urban context with a focus on ethical and sustainable design solutions and practice. This requires the synthesis of issues, ideas, knowledge and techniques of architectural design as a holistic practice.

DAB810 Architectural Design 8

Equivalents	ADB008
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit offers an advanced level investigation into the field of design as applied to architecture, with particular building type or architectural topic. The unit draws on the breadth of knowledge students have attained through the process of their architectural education. On completion of this unit you will be able to: Demonstrate your understanding of the design process. Demonstrate your development of a range of critical, analytical and speculative research skills applicable to architectural design projects. Establish a defensible position in relation to an architectural problem and to speculate, design and argue from that position. Demonstrate your development of judgement that enables the identification of opportunities that inform architectural design decisions.

DAH525 Architecture and the City

Equivalents	ADB013, DAB525
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit aims to give a comprehensive overview of issues and techniques relevant to architectural design at an

urban scale. Teaching and learning activities are spread across lectures, tutorials, and studio based activities.

DAH530 Integrated Technologies 2

Pre-requisites	DAB435
Equivalents	ADB024, DAB530
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The aim of the structure segment of the unit is to familiarize students with the qualitative influences of structural systems on the design development of buildings. In particular the possibilities and limits of building structure are explored in relation to architectural intention through the use of exemplar.

The aim of the construction segment is to familiarize students with various construction systems used in medium-rise commercial buildings. Here the emphasis is on the criteria to be used for the selection of appropriate systems and their associated materials.

DAH635 Architectural Technology 2

Pre-requisites	DAB530 or DAH530
Equivalents	ADB025, DAB635
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

It is a fundamental task of architectural design to achieve the comfort requirements of the users. This unit aims to promote students' understanding and awareness of the control of indoor conditions through the effective design and integration of building services. Students will participate in a simulated office practice, producing Building Code of Australia compliant construction documentation for low-rise buildings.

DAH710 Architectural Design 7

Pre-requisites	DAB510 or DAB511 or DAH510
Equivalents	ADB007, DAB710

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit offers an advanced level investigation into the field of design as applied to architecture, with particular focus on Urban Design issues that come to bear in the design of a building. On completion of this unit you should be able to; demonstrate, through your project work, your understanding of cities and an awareness of the forces shaping their development. Demonstrate that you have developed critical, analytical and speculative research skills applicable to urban situations. Adopt a reasoned position in relation to an architectural problem and to argue, speculate and design from that position. Demonstrate judgement that enables the identification of design opportunities at an urban scale that inform architectural design decisions.

DAH811 Architectural Design 8

Pre-requisites	(DAB635 or DAH635) and (DAB610 or DAB611 or DAH610)
Equivalents	DAN135, DAN230
Credit Points	36
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is the final 'design studio' of the course, and as such offers an advanced level investigation into the field of architectural design. This 36 credit point unit allows for the in-depth development of an architectural design, and its technological resolution. The unit draws upon all preceding units in the course, and requires detailed design development, and construction documentation, of a complex building. The unit aims to promote student understanding of advanced techniques for the design of environmentally friendly, sustainable, and healthy buildings. This unit provides the opportunity to demonstrate attainment of all of the course learning outcomes.

DAN101 Master Studio A

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit offers a focused high level investigation into the field of design as applied to architecture through the

investigation of a complex design problem. It uses developmental exercises to enhance student perceptions of the built environment in a problem based learning environment. Design theory, sustainability, sociology, history and critique, as they all apply to architectural design, all form part of the unit content. Design projects require synthesis of a range of abstract issues to achieve focused architectural proposals.

DAN125 Contemporary Architectural Culture

Equivalents	ADN014, ADB014
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides the opportunity for the students to become aware of and to debate the innovative and advanced projects and critical thinking in the international field of architecture of the contemporary time. It provides the framework in which the student can locate individual research and design activities. It prepares the student to make informed and creative decisions in professional life. Teaching and learning takes place through three forms of structured activity: lectures, tutorials, and online.

DAN145 Architectural Professional Practice

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces and consolidates key issues in discourses about the professional practice and business of architecture. The unit is delivered in two key modules. Module 1 investigates how to become and what it means to be a professional registered architect, specifically examining the organisation and roles of the bodies that govern the profession of architecture in Australia and the necessity for an ethical orientation in professional life. Module 2 expands on this knowledge, by providing a detailed understanding in the processes of professional relations, with a specific focus on leadership skills, collaboration, communication, discrimination, and health and wellness issues.

DAN201 Master Studio B

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit offers a focused high level investigation into the field of design as applied to architecture through the investigation of a complex design problem as a final project to demonstrate high level design proficiency. It uses developmental exercises to enhance and extend student perceptions of the built environment in a problem-based learning environment. Design projects require synthesis of a range of abstract issues to achieve focused architectural proposals, explored and developed to a professional standard.

DAN235 Project Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces and consolidates key issues in understanding an architect's management of architectural projects. The unit examines various phases of the project management process including inception, schematic design, design development, documentation, contract administration and completion and special emphasis is given to the types of specialist professional writing required at each of these stages. For example, you will investigate: why and how architects conduct feasibility studies for prospective projects, project programming, how architects conduct post occupancy evaluations of constructed projects, journalistic writing, professional correspondence and the importance of this practice for continuing professional development.

DAN245 Contract Administration

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit reinforces, builds upon and consolidates prior learning concerning the documentation and contract administration of architectural building projects. The unit is delivered in two key modules. Module 1 provides a detailed

understanding of the organisation, structure and management of setting up an architectural office. Module 2 examines various forms of contracts, emerging codes and standards that must be adhered to in Australia, the contract administration phase of projects, and includes a review of the laws and statutory regulations that control the practice of architecture.

DEB100 Design and Sustainability

Equivalents	BEB100, DEB200, DED100, EGB100, ENB100, UDB100
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit, with its special focus on the role and impact of designers to shift society toward a more environmentally sustainable way of living, introduces you to essential academic and professional skills and practices for learning to become a designer.

DEB101 Introducing Design

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit offers a uniquely broad introduction to the field of design as applied across the design disciplines. It uses exercises to enhance student perceptions of the natural and human made environments in a problem based learning context. The unit is block taught over several weeks during the semester and will include students from a range of design disciplines participating in a four day field trip (students unable to attend participate in an alternative program). Students work individually and in cross-disciplinary teams in a stimulating and immersive environment. This unit covers content of problem solving, team work, visualisation and communication, and environmental awareness.

DEB110 Introduction to BIM Collaboration

Equivalents	BEB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

- SEM-1

This unit introduces students to the foundational aspects of collaboration within the design and documentation of artefacts, using Building Information Modelling (BIM) approach. Focusing on multidisciplinary collaboration during the complete life cycle of a built environment facility. This unit is an approach to the theory and practice of BIM software, exploring the translation from Computer Aided Design (CAD) to BIM. This unit is also the foundation for DEB210 Advanced BIM Collaboration.

DEB111 Parametric Design Systems

Equivalents	BEB211
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This subject introduces students to the use of parametric geometry systems that are used in early stages of design. These systems allow the creation and manipulation of complex geometry and form through the definition of parameters and modelling of associative relationships, to provide users with greater control over their designs. They are used by major design firms such as Zaha Hadid and Frank Gehry (architecture), SOM (architecture/engineering) and Arup (engineering).

DEB202 Introducing Design History

Equivalents	DEB102, DED202
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit encompasses a broad survey of the history of design from the civilizations of antiquity to the opening of the 20th century - including architecture, industrial design, interior design and landscape architecture. It is a first year foundation unit and serves as preparation for more detailed and specialized studies in history and theory in subsequent years. Key designs, ideas and artefacts and the aesthetic, environmental, technological, socio-cultural and political factors that related to their production will be analysed.

DED202 Introducing Design History

Equivalents	DEB102, DED202
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3

This unit encompasses a broad survey of the history of design from the civilizations of antiquity to the opening of the 20th century - including architecture, industrial design, interior design and landscape architecture. It is a first year foundation unit and serves as preparation for more detailed and specialized studies in history and theory in subsequent years. Key designs, ideas and artefacts and the aesthetic, environmental, technological, socio-cultural and political factors that related to their production will be analysed.

DEH701 Research Methods

Pre-requisites	DAB511 or DAB510 or DAH510 or DNB503 or DNB501 or DTB501 or DFH501 or KFB405 or KFB301 or DXB501 or KIB314 or KIB311 or DLB510 or DLB500
Equivalent s	DEB701
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is a core unit common to architectural studies, landscape architecture, industrial design and interior design. The unit is project based and introduces students to research methods and methodologies that have relevance in design practice. It also provides a foundation for higher degree research. The content covered in this unit includes:

- philosophical context of research in, of and through design
- qualitative research incorporating methodologies and methods of relevance to design
- research rigour and ethics
- developing a research plan
- literature searching and review
- data gathering and analysis
- research dissemination and reporting

DFB101 Fashion Design Studio 1

Equivalents	KFB101, KFB401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is the first in a series of eight Fashion Design Studio units in the Bachelor of Design (Honours) Fashion program and provides introductory knowledge and skills for the theory and practice of fashion design.

DFB102 Introduction to Fashion

Equivalents	KFB103
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

This unit provides an introduction to some of the complexities of the fashion system and is intended to provide a base for students who wish to pursue further studies in fashion.

DFB201 Fashion Design Studio 2

Pre-requisites	DFB101 or KFB101 or KFB401
Equivalents	KFB102, KFB402
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the second in a series of eight Fashion Design Studio units in the Bachelor of Design (Honours) Fashion program and provides further introductory knowledge and skills for the theory and practice of fashion design.

DFB202 Introduction to Fashion Studio Practice

Pre-requisites	DFB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Introduction to Fashion Studio Practice DFB202 provides introductory technical

Units

skills and knowledge of fashion design studio practice (garment construction and pattern making) for the Bachelor of Design (Honours) Fashion program.

DFB203 Sustainability: The Materiality of Fashion

Equivalents	KFB104, KFB104-2, KFB407-2
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an introduction to the environmental, ethical and social issues connected to the production and consumption of fashion, and is intended to provide a base for students who wish to pursue further studies in fashion.

DFB301 Fashion Design Studio 3

Pre-requisites	DFB201 or KFB102 or KFB402
Equivalents	KFB200, KFB201, KFB403
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is the third in a series of eight Fashion Design Studio units in the Bachelor of Design (Honours) Fashion program and provides expanded knowledge and skills for the theory and practice of fashion design, for industry/professional contexts.

DFB302 Fashion Visualisation

Equivalents	KFB107, KVB107, KVB107-2, KVB757-2
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-2

This unit provides introductory skills and knowledge to effectively communicate visual fashion ideas (including technical drawings), using both hand techniques and graphic software.

DFB303 Unspeakable Beauty: A History of Fashion

Equivalents	KFB105, KFB109, KFB206, KFB408
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces you to the history of Western fashion from the 14th century to the 21st century. The unit will guide you to understanding key aesthetic changes in the history of fashion, the role of fashion in defining social and cultural identity, and how fashion is a significant form of visual culture linked to historical, cultural and social contexts. This unit will introduce you to concepts that are essential to the study of history and theory of fashion.

DFB304 Fashion and Costume in Film

Equivalents	KFB210
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit studies the relationship between fashion and its dissemination through visual culture. Magazines, film, photography, television and new media have been fundamental to the dissemination of fashion information, the construction of stardom and femininity, and to the development of the fashion industry. This unit examines two creative media, film and the internet. It examines how historically the cross-pollination between the Hollywood Studios, the cosmetic and the clothing industries first, and, more recently, contemporary blogs and internet images have contributed to the formation of discourses of consumer fashion and feminine aesthetic. By examining internet blogs and images, the unit also studies how fashion media have expanded exponentially, with the advent of the stylist, the pr and the dissemination of fashion images as new global phenomena.

DFB401 Fashion Design Studio 4

Pre-requisites	DFB301 or KFB200 or KFB201 or KFB403
Equivalents	KFB202, KFB404
Credit Points	12

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the fourth in a series of eight Fashion Design Studio units in the Bachelor of Design (Honours) Fashion program and provides expanded knowledge and skills for the theory and practice of fashion design, for societal contexts.

DFB402 Fashion Design: 1950 to Now

Equivalents	KFB207
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an understanding of key theories and approaches to fashion design in the 20th and 21st centuries. It builds on knowledge gained in DFB102 Introduction to Fashion and DFB303 Unspeakable Beauty: A History of Fashion and prepares you for further studies in Fashion including DFB602 Critical Fashion Studies.

DFB403 Advanced Fashion Studio Practice

Pre-requisites	DFB301 or KFB200 or KFB201 or KFB403
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides advanced/specialist technical skills and knowledge of fashion design studio practice (garment construction and pattern making) for the Bachelor of Design (Honours) Fashion program.

DFB404 Fashion and Style Journalism

Pre-requisites	DFB102 or KFB103 or KJB224. KJB224 can be enrolled in the same teaching period as DFB404
Equivalents	KFB205, KJB339
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit maps the scope and practice of fashion and style journalism in Australia

and internationally. It will allow you to develop the skills necessary to conceptualise and produce fashion and style editorial content in a variety of styles and contexts.

DFB406 Product Design and Development in the Fashion Industry

Pre-requisites	DFB302 or KFB107
Equivalents	KFB211
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

While many would see the role of the designer as an integral part of any fashion brand, many of the largest fashion businesses in the industry are built on a process of product development instead of traditional ideas of design. Rather than working from a blank canvas, the product developer creatively evolves unique and commercial garments from existing ideas and samples to create ranges that are both profitable and easy to outsource for manufacture. Product development requires diverse skills and knowledge in trend analysis, range building, textile selection and sourcing, garment finishing, specification sheets, global operations, marketing, and business to ensure successful project outcomes. By developing a foundation of knowledge in product development this unit aims to prepare students for work in commercial fashion or to assist them with the skills for creating their own product developed fashion brand.

DFB502 Ragtrade: The Business of Fashion

Pre-requisites	DFB102 or KFB103
Equivalents	KFB209
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit addresses the logistics of the fashion supply chain, the timing of the fashion cycle and the new ways of producing and selling fashion in a global marketplace. The fashion industry will be studied as a system that is determined by economic, political, social, cultural and consumer trends and will analyse the contribution it makes to the global business environment. Opportunities will also be identified for career and

entrepreneurial endeavours.

DFB503 Textiles 2

Pre-requisites	DFB405 or XNB194 or PUB321
Equivalents	XNB196, PUB361
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit further develops your textile knowledge and skills as gained in Textile Studies, and adds to your understanding of the role, development and impacts of textiles in society. The unit focuses on applying your skills in group and individual work in a design studio environment.

DFB601 Design Studio 6

Pre-requisites	DFH501 or KFB301 or KFB405
Equivalents	KFB302, KFB406
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the capstone Design Studio experience and aims to provide students with the opportunity to synthesise prior learning, within university and the workplace, through the production of a final year project. Within this unit students develop confidence and the ability to work with minimal supervision in preparation for graduation.

DFB602 Critical Fashion Studies

Pre-requisites	Completion of 48cp of Fashion discipline units (DFB% or KFB% units)
Equivalents	KFB305
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides you with an understanding of current critical approaches in the analysis of fashion. It also introduces you to emerging areas of research and fashion scholarship. It builds on knowledge developed in DFB303 Unspeakable Beauty: A History of Fashion and DFB402 Fashion Design:

1950 to Now. This critical understanding of the fashion system prepares students for work in the industry, postgraduate research or deepening their fashion practice.

DFH501 Fashion Design Studio 5

Pre-requisites	DFB401 or KFB202 or KFB404
Equivalents	KFB301, KFB405
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is the fifth in a series of eight Fashion Design Studio units in the Bachelor of Design (Honours) Fashion program and provides advanced knowledge and skills for the theory and practice of fashion design, in niche/unique contexts.

DLB100 Landscape Design 1

Equivalents	DLB130
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is your first landscape design studio, introducing you to foundational landscape design knowledge, skills, and applications. You will acquire these in stages, covering a range of design principles, theories and processes which you will apply to real or simulated design scenarios. The first stage is an immersion in, and familiarisation with, landscape's structural and compositional relationships and ways to interpret and express these. Next you will learn to apply basic design problem solving processes to articulate landscape design propositions in response to your interpretations. You will learn and experiment with design and discipline-specific language including application of the representational techniques you will learn in the co-requisite unit DLB103 Visualisation 1. This studio prepares you for the ongoing series of landscape design studio units.

DLB103 Landscape Visualisation 1

Equivalents	DEB103
Credit Points	12

Units

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to foundational manual (non-digital) landscape visualisation skills and applications. Visualisation is the ability to imagine and give form to design ideas. Landscape designers work in four dimensions and thus employ a variety of tools to think about and communicate three- and four-dimensional ideas. This unit introduces you to the skills and techniques you'll need to support this design visualisation with a focus on analogue (non-digital) media, manual drawing skills and simple model making. You will learn and experiment with design and discipline-specific language including application of these representational techniques in the co-requisite unit DLB100. This pairing of units prepares you for the ongoing series of landscape design studio units.

DLB200 Landscape Design 2

Equivalents	DLB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is your second introductory level landscape design studio, building on the foundational knowledge, skills and applications you learnt in DLB100 and DLB103. In it you will explore landscape as an experiential, spatial and temporal expression of cultural meaning. You will experiment with the interpretation and design of landscape using your own body to 'read' local landscapes, and how they are culturally designated. You will experiment with design development processes and the language of landscape design to articulate new perceptions of landscape experiences, places, times and scales, and design propositions to transform the landscape. You will experiment with application of the representational techniques you will learn in DLB203 Visualisation 2. This studio prepares you for your second year, intermediate level design studios, beginning with DLB300.

DLB203 Landscape Visualisation 2

Equivalents	DEB203
Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-2
----------------	---------------------------------

This unit introduces you to foundational digital landscape visualisation skills and applications, and their integration with the manual skills and analogue media you worked with in DLB103. It draws on digital visualisation's realist and abstract properties to efficiently explore and express complex landscape ideas. The range of software available offers you a selection of methods to capture and rapidly explore the complex three-dimensional forms and ephemeral temporal processes (the fourth dimension) that characterise landscapes. You will learn and experiment with design and discipline-specific language including application of these representational techniques in the co-requisite unit DLB200 Landscape Design 2. This pairing of units prepares you for your second year, intermediate level design studios, beginning with DLB300.

DLB240 Landscape Technology

Pre-requisites	DLB103
Equivalents	DLB430
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces the foundational principles and processes of landscape technology, to understand and apply the technical manipulation of landforms as part of the landscape design process. DLB240 continues your DLB100 design learning at a finer scale of detail and precision, including landform grading for drainage and circulation. This unit extends the technical graphic design development and communication skills developed in DLB103, and prepares you for your second year, intermediate level unit in landscape construction, DLB440.

DLB300 Landscape Design 3

Pre-requisites	DLB100
Equivalents	DLB310
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This intermediate level landscape design studio unit builds on the foundational knowledge, skills and applications you learnt in first year, and in DLB325. In it

you will explore theories of environment and behaviour, place-making and environmental psychology, including how people perceive and respond to landscapes both individually and collectively, building on your understanding of landscape as a cultural expression developed in DLB200. You will engage in the application of these theories for systematic landscape appraisal and design development to articulate sustainable site-based design propositions. You will further develop your application of the representational techniques learnt in DLB103 and DLB203, consolidating the details of landscape design communication conventions as well as experimentation. This studio prepares you for the consolidation of your intermediate level design skills in DLB400.

DLB320 Landscape Horticulture

Equivalents	DLB230
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This introductory level unit builds on the foundational knowledge of environmental sustainability you learnt in DEB100, and the knowledge, skills and applications you learnt in your first year core landscape architecture units. This unit introduces you to scientific, horticultural and planting design principles and the basic plant sciences (botany, ecology and horticulture) including: botanical nomenclature, morphology, plant forms, assemblages and systems, and plant cultivation requirements. You will apply this knowledge to develop and articulate sustainable site-based planting design propositions, and extend the communication techniques you learnt in DLB103 and DLB203 to learn the specific conventions of planting design communication. This unit prepares you for your first intermediate level landscape design studio DLB400 and further studies in environmental science in DLB420.

DLB325 People and Place

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This introductory level unit builds on the foundational knowledge of design history you learnt in DEB202. In it, you will

explore theories of environment and behaviour, place-making and environmental psychology, including how people perceive and respond to landscapes both individually and collectively. You will learn about a wide range of foundational concepts developed from the 1960s to the present, regarding human interactions and relationships with the environment, essential to the formulation of sustainable landscape design propositions. You will explore and apply this knowledge in stages, including a site-specific project to develop your critical thinking and research skills. This unit extends the communication techniques you learnt in DEB100 to a wider range of written and visual methods of investigation and communication. It prepares you for further expansion of your intermediate level design understanding and skills in DLB400 and independent interpretation of the effects of past and present landscape designs in your third year unit DLB525.

DLB400 Landscape Design 4

Pre-requisites	DLB200
Equivalents	DLB410
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This intermediate level landscape design studio unit consolidates the introductory knowledge, skills and applications learnt in your course so far. In conjunction with DLB420, you will explore design theories and processes related to urban ecology including human processes in landscape formation. You will apply these in the appraisal and design of site-based landscape propositions, including their sustainable integration into wider landscape systems such as the movement and exchange of people, capital, services, water and energy. This unit will build on the understanding of the complexities of landscape you have developed through your learning to date, and consolidate your landscape design development and communication skills, preparing you for further expansion of your intermediate level design skills in DLB500.

DLB420 Landscape Systems

Equivalents	DLB330
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens

Point
- SEM-2

This introductory level unit builds on the foundational knowledge of environmental sustainability you learnt in DEB100 and DLB320. In conjunction with the unit DLB400, you will explore theories of landscape ecology and regional ecosystems theory, with geomorphologic and human processes in landscape formation. Landscape architects need to understand the systems that create and are created by the landscape, and so this unit will develop your ability to comprehend the interconnectedness of landscape structures, systems, processes and developments, essential to the formulation of sustainable landscape design propositions. You will apply this knowledge in a semester long landscape study project, extending the communication techniques you learnt in DEB100 to learn the specific conventions of scientific reporting. This unit expands your understanding of landscape from a small site to a broad and holistic level, preparing you for expanding your intermediate level design skills in DLB500 and learning landscape planning theory and application in DLH700.

DLB440 Landscape Construction

Pre-requisites	DLB240
Equivalents	DLB530
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This intermediate level unit builds on the foundational principles and processes of landscape technology you learnt in DLB240 by introducing the principles and processes of landscape design construction. It introduces basic structural theories, material properties and principles, and design and construction principles and processes. These help you analyse technical briefs, and critically evaluate and select appropriate materials and construction techniques to formulate sustainable landscape design propositions and implementation strategies. This unit also introduces you to the legislative environment governing landscape construction. It extends the technical graphic design development and communication skills you developed in DLB240, and prepares you for your third year, advanced level unit in landscape design, technology and construction, DLH600.

DLB500 Landscape Design 5

Pre-requisites	DLB300
Equivalents	DLB510
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This final intermediate level landscape design studio unit builds on the knowledge, skills and applications consolidated in DLB400. In conjunction with DLB525, you will explore design theories and processes related to interactions between society (including culture, economy and technology) and the environment, placing an emphasis on developing landscape speculations which address sustainability in cultural and biophysical landscape contexts. Your learning will involve the rigorous testing of design ideas against the constraints of selected landscapes and briefs. You will develop and test a philosophical basis for design exploration, engaging with experimental design processes and self-directed research. This unit shifts your learning toward greater design complexity and independent application and development of your communication skills. It prepares you to engage with advanced level landscape design in DLH600.

DLB525 History and Criticism of Landscape Design

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This intermediate level unit builds on the broad foundational knowledge of design history in DEB202 and theoretical knowledge and critical thinking and research skills learnt in DLB325. Learning from the past enriches and informs our current and future landscape design practice, and in conjunction with DLB500, you will explore the ways history and criticism inform us about interactions between society (including culture, economy and technology) and the environment (materials, climate, landform, ecology, etc.), and the consequences for designed landscapes. You will review landscape design and criticism across world history through the lens of historiography (critical examination of history). This unit consolidates the communication techniques you learnt in

DEB100 and DLB325, and prepares you for critical explorations of design history and theory to support your advanced level landscape design units.

DLH600 Landscape Design 6

Pre-requisites	DLB440 and DLB400
Equivalents	DEB601 and DLB630
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is your first advanced level landscape design studio unit, and your first 24 credit point unit in the 4-year landscape architecture course. As such, it unites two of landscape architecture's core study areas - Landscape Design up to DLB500, and Landscape Technology / Construction in DLB240 and DLB440. DLH600 unites and builds on the principles and processes learnt in these units in a program of advanced design resolution through the development of technical documents commensurate with those produced by the profession for landscape construction contractors. This unit shifts your learning toward greater creative and technical design specificity and independent application, providing a solid foundation for the critical and creative complexity and independence required in your final year landscape design studios beginning with DLH700.

DLH700 Landscape Design 7

Pre-requisites	DLB500
Equivalents	DLB700, DLB710, DLB810
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This advanced level 24 credit point landscape design studio unit builds on the knowledge, skills and applications developed in your landscape architecture core units to date. In it you will explore advanced theory in landscape planning to help you conceptualise the complex social and environmental issues and policy frameworks that inform land development, and the related design and planning theories and processes such as those emerging through landscape urbanism. In a sustained, semester-long

project you will engage with a large scale site and associated complex problems of planning, design and management, and independently formulate innovative and sustainable landscape planning and design propositions and implementation strategies. This unit shifts your learning toward greater complexity and independent application of advanced skills in the generation of detailed communication and presentation techniques commensurate with professional-level landscape architectural investigation and practice. The following semester unit DLH800 will build on these skills in your capstone landscape project.

DLH800 Landscape Design 8

Pre-requisites	DLH600
Equivalents	DLB730, DLB830
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This 24 credit point capstone landscape design unit invites you to explore and demonstrate an advanced individual expression of the knowledge, skills and applications developed in your landscape architecture core units to date. You will undertake a sustained, semester-long thesis-style project at an advanced conceptual and schematic landscape design level, based on substantial independent research and rigorous design development. Understanding landscape architecture as a contextual and relational discipline, you will formulate innovative and sustainable landscape planning and design propositions and implementation strategies to balance competing social, cultural, economic, and ecological constraints and opportunities. This unit substantiates your independent skills in professional-level landscape architectural investigation and practice enabling you to engage with the wide range of projects you will encounter in your professional life.

DLH845 Professional Practice in Landscape Architecture

Equivalents	DEB801
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This capstone unit builds on understandings of legal and regulatory environment in which landscape architects operate. Design practice requires the understanding and adherence to a range of ethical, cultural, business and legal concerns and requirements. This unit provides you with the knowledge to understand and participate in professional design practice by introducing key issues in the design professions, including: the organisation and roles of the regulatory and professional bodies governing the professions; the cultural and legal context for contemporary design practice; essential skills in consultancy and construction contracts; and the ethical values and attitudes which govern professional practice. An emphasis on integrated scholarship and collaborative links with other professions will build your capacity and resilience as you transition from life as a university student to life as a beginning professional.

DNB101 Industrial Design 1

Pre-requisites	DNB103 can be studied in the same teaching period as DNB101
Equivalents	ADB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Industrial design revolves around the creation of products that satisfy human needs constrained by industrial production. This involves the manipulation of form with an understanding of structure, function, and aesthetics. Through projects you will be exposed to: basic design elements and principles; design sketching and marker rendering; introduction to research through design, design process and concept development; basic model making techniques; and design presentation.

DNB103 Product Visualisation 1

Equivalents	DEB103
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Industrial designers employ a variety of tools to think about and communicate three-dimensional product concepts. This unit introduces you to the skills and techniques needed to support design

visualisation, focussing on analogue media, drawing skills and simple model making.

DNB201 Industrial Design 2

Pre-requisites	DNB101 and DNB203. DNB203 can be studied in the same teaching period as DNB201.
Equivalents	ADB202
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit continues with the development of your visual and creative thinking within the context of industrial design with special emphasis on the development of product symbolism. Through projects you will be exposed to: symbolic aspects of products; design process methods and concept development; model making and documentation skills; consideration of materials, manufacturing, technology and sustainability; and design presentation.

DNB202 Product Usability

Equivalents	ADB212
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with the foundational knowledge of human-centred design approach that is built upon an understanding of people and their capabilities. The main content covered in this unit includes: anthropometrics; introductory principles of physical and cognitive ergonomic requirements; usability principles; and usability evaluation methods and techniques.

DNB203 Product Visualisation 2

Pre-requisites	DNB103
Equivalents	DEB203
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit continues developing your analogue media and drawing skills gained in DNB101 Industrial Design 1 and introduces digital and analogue approaches and visualisation techniques to support your industrial design projects.

DNB301 Industrial Design 3

Pre-requisites	DNB101
Equivalents	ADB203
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to design investigation and application of design methods to support sustainable practices in constructed and natural environments. It covers introduction to products and systems differences; intermediate design methods and design management.

DNB304 Product Technology 1

Equivalents	DNB302, DNB303
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds your knowledge of the technological aspects relevant to Industrial Design. It focuses on providing experience and skills in the use and application of technology as part of the design, which is essential for your Industrial Design practice.

DNB305 Culture and Design

Equivalents	DNB402
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

An understanding of people and their cognitive and emotive relationship with the world is essential for designing responsive products and environments. This unit encourages a diversity of knowledge for you to gain a broader perspective of culture, and understand how issues of culture influence product design and the designer's interaction with society and diverse cultures. The content covered includes: theoretical perspectives of culture; psychological implications of everyday human-artefact interactivity; environmental and cultural perception; changing socio-cultural landscapes; ageing population; sustainability and globalisation; potential for design to advance social changes and quality of life; and psychological implications and

attitudes embedded in product semantics and symbolics.

DNB401 Industrial Design 4

Pre-requisites	DNB201
Equivalents	ADB204
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit advances the knowledge you gained in DNB301 Industrial Design 3. The unit examines how various design approaches contribute to the design of complex product or systems. Through a collaborative project you will be exposed to: introduction to design research and innovation; communication skills; and manufacturing technologies.

DNB404 Product Technology 2

Pre-requisites	DNB304
Equivalents	DNB303
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on the knowledge and skills you gained in DNB304 Product Technology 1 by introducing you to advanced materials and the potentials of their application. This forms an essential part of the skills and knowledge base required of you as an Industrial Design practitioner.

DNB405 History, Theory and Criticism

Equivalents	DNB502
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit guides you to become aware of theoretical and historical discourse in industrial design and to debate innovative and advanced ideas and critical thinking in the field internationally. It provides a framework in which can locate individual design activities. The content covered in this unit includes: contemporary history of industrial design; relationship between social and technological change and industrial design; contemporary design theory and discourse; criticism methodology; writing about design; and

learning to critique design.

DNB503 Industrial Design 5

Pre-requisites	DNB401 and DNB404
Equivalents	DNB501
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to design methods and strategies to explore people's behaviours and the context of use of everyday products. The design approach focuses on the user experience and on developing product designs that are suitable for manufacturing.

DNH603 Industrial Design 6

Pre-requisites	DNB503
Equivalents	DNB601
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to interdisciplinary design concepts and strategies that are relevant to the design of future products and systems. As more products are an integration of digital and physical interfaces, people's experiential responses must be addressed. To achieve this DNH603 Industrial Design 6 extends the design methods and techniques you acquired in DNB503 Industrial Design 5 by transferring them across disciplines.

DNH703 Applied Design Research 1

Pre-requisites	DNH603
Equivalents	DNB702, DNB703
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit incorporates studies of the dynamic relationships between people, products/artefacts and systems, and their contextual environment. The unit will introduce you to the ways research about people can contribute to product innovation, an essential aspect of industrial design. It will introduce how to integrate the applied research skills and

knowledge that support the development of an innovative product or system proposal. It also provides you with the foundation for higher research degrees. The major topics covered in this unit include: human-centred innovation framework application of qualitative research methods to industrial design; situating product/ systems within the socio-cultural context; and communication of research outcome.

DNH704 New Product Development

Pre-requisites	DNH603
Equivalents	ADB235, DNB602, DNB704
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will focus on the introduction of new products into the market. It will provide you with an overview of the relationship between product design and commercialisation. It will introduce you to strategy development where the aim is to meet consumer expectations whilst achieving corporate objectives. The major topics covered in this unit include: new product development process; idea generation; strategic planning; introduction to marketing; product screening and evaluation; and commercialisation and post-launch review.

DNH803 Applied Design Research 2

Pre-requisites	DNH703 or DNB703
Equivalents	DNB701, DNB801, DNB802
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit requires you to apply the research proposal you developed in DNH703 Applied Design Research 1 to the design of a product or system at a professional level. This is an independent project reinforcing your skills of leadership and project management.

DNH804 Professional Practice in Industrial Design

Pre-requisites	Completion of 240cp in course
Equivalents	DEB801
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will focus on the introduction of the role of professional practice management and its significance to industrial design. It is included in semester 8 to compliment student design activities and their involvement in live projects. The major topics covered in this unit include: the role of professional practice and management, management of design projects, type of contracts, the role of design administration, liability, design law; intellectual property, designer-client relationships.

DTB101 Interior Design 1

Pre-requisites	DTB103 can be studied in the same teaching period as DTB101
Equivalents	ADB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to knowledge, skills and application of design concepts and processes relevant to interior design at a foundational level.

DTB103 Interior Visualisation 1

Equivalents	DAB103, DEB103
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to foundational visualisation and two-dimensional/three dimensional communication skills including drawing and rendering, technical drawing and model making relevant for (interior) design development and presentation.

DTB201 Interior Design 2

Pre-requisites	DTB101 and DTB203. DTB203 can be studied in the same teaching period as DTB201.
----------------	---

Units

Equivalents	ADB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit further develops your knowledge, skills and application for interior design at a foundational level. It links with work previously undertaken in DTB101 and DTB103 and prepares you for subsequent interior design units.

DTB202 Interior Technology 1

Equivalents	ADB122
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

As part of your foundational year studies this unit will introduce you to the knowledge and skills necessary for communicating technical information to a project team. The application of these skills is a fundamental requirement for the practice of interior design and will prepare you for visual communication practices throughout your course.

DTB203 Interior Visualisation 2

Pre-requisites	DTB103
Equivalents	DEB203
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit advances the knowledge that you learnt in DTB103 Interior Visualisation 1, focussing on integrating digital and analogue media to visualise and communicate design ideas and proposals.

DTB301 Interior Design 3

Pre-requisites	DTB201
Equivalents	ADB103
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit further develops your knowledge, skills and application in regards to the person-environment relationship and the implications for spatial design, as well as extending your

knowledge of design process. In DTB301 you will investigate the fundamental aspects of transition, interiority, building character, site context, and materiality in relation to interior design practice and associated fields through the refurbishment of an existing one-storey building. It links to the work previously undertaken in DTB101, DTB201, and DTB203, and prepares you to undertake more complex interior design projects and collaborative design process in DTB401.

DTB302 Colour Studies

Equivalents	ADB152
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops advanced knowledge in the theory and application of colour, and its interdependence with light. It focuses on experimental research and design application of colour, relevant to design and design practice.

DTB303 Interior Technology 2

Pre-requisites	DTB202
Equivalents	ADB123
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will provide opportunities to develop your knowledge and skills of the components required to assemble a set of construction documents for a commercial interior design scenario. It links to and builds on the concepts explored in DTB202 by introducing you to the commercial sector, in particular exploring 2D and 3D digital drafting conventions, building codes, standards and basic services integration.

DTB401 Interior Design 4

Pre-requisites	DTB301
Equivalents	ADB104
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit further develops your knowledge, skills and application in regards to the person-environment relationship, and the implications for dual-

function, sensory spatial design, as well as building on foundational design processes. In DTB401 you will investigate the fundamental aspects of immersion (Space/time 4th dimension, Reverie, Presence and Phenomenology) and Interaction (Participation, Experience, Responsibility, Inclusivity and Activism) in relation to interior design practice and associated fields through the experimentation of model making and the refurbishment of an existing two-storey building with vertical circulation. It links to the work previously undertaken in DTB101, DTB201, DTB301 and DTB203, and prepares you to undertake more complex interior design projects in DTB501.

DTB402 Interior Technology 3

Pre-requisites	DTB303
Equivalents	ADB153
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will introduce you to a greater complexity in commercial interior construction and services integration while also developing your technical drawing communication skills. This unit links directly to your previous studies in units DTB202 and DTB303 and provides the necessary knowledge, skills and application required to communicate your designs through all of your core units.

DTB403 Design Psychology

Pre-requisites	Completion of 72cp of Creative Industries units (K% or D% units)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Drawing on environmental psychology relevant to spatial design, this unit provides the theoretical and analytical resources to enable you to identify the ways in which the individual and the built environment interact, influencing behaviour and experience. Located in the second year of the course, the unit complements the socio-cultural aspects of design addressed in the third year unit DTB502 Design in Society providing core theoretical and technical knowledge to support intermediate and advanced design learning.

DTB501 Interior Design 5

Pre-requisites	DTB401
Equivalents	ADB105
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit further develops your knowledge, skills and application for interior design through project based real world issues and contexts. It links to the work previously undertaken in DTB 401.

DTB504 Design in Society

Pre-requisites	Completion of 72cp of Creative Industries units (K% or D% units)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides theoretical and analytical resources to enable you to identify the way the designed world intersects with social life. These insights are crucial to the capacity of design to respond to the way the designed world is lived and experienced. This unit will 1) review theories and case studies to illuminate the relationships between design and everyday practice across cultures and time, and 2) provide an opportunity to apply these insights in an analysis of a contemporary designed environment. Located in the 3rd year of your course, Design in Society provides valuable resources for design practice in other units as it develops concepts and processes suited to the emphasis in the latter years of the course - not just on problem solving - but on problem framing and conceptualisation. With its emphasis on socio-cultural aspects of design, Design in Society complements the more psychological emphasis of the unit, DTB403 Design Psychology.

DTH601 Interior Design 6

Pre-requisites	DTB501
Equivalents	ADB106, DTB601
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit further develops your knowledge, skills and application for interior design through more complex

project based real world issues and contexts. It links to the work previously undertaken in DTB501 and DTB502 prepares you for the final year of the course.

DTH603 Furniture Studies

Pre-requisites	DTB201 and DTB303
Equivalents	DTB503
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit develops at an intermediate course level your knowledge, skills and their application regarding furniture and joinery in the interior and exterior context with a specific focus on experimental design and prototype construction. It builds upon the technical issues introduced in the units DTB202 and DTB303.

DTH702 Interior Design Practice Studio 1

Pre-requisites	DTH601 or DTB601
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The final year design program is aimed at adequately preparing you for the professional challenges ahead. This unit further develops and consolidates the knowledge, skills, and application abilities gained during the foundation and intermediate years of the course in order to prepare you for the final semester Capstone project. It is project-based with the major focus being on a course of self-directed learning in an area of personal and professional relevance, enacted through high level engagement in the design studio. It is intended to guide you through the "transitional" phase of what is an on-going educational journey to becoming a fully qualified professional and beyond.

DTH802 Interior Design Practice Studio 2

Pre-requisites	DTH702
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens

Point
- SEM-2

The final year capstone interior design unit encompasses a self-directed journey of "design through creative exploration". Students are required to articulate their own area of design interest, defining the focus of the year's work through research, analysis, experimentation, project development and refinement, communication, and presentation. It builds upon, consolidates, and advances the work undertaken in the previous foundational and intermediate years of the course.

DTH803 Professional Studies in Interior Design

Pre-requisites	DTB501
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit gives emphasis to your responsibilities and obligations as a professional interior designer. In this unit you will have the opportunity to further develop your knowledge of the interior design discipline and profession and to actively engage with issues highlighting responsibilities of life-long learning, social responsibility and ethical interior design practice.

DUB501 Mapping Cities

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops the knowledge, skills and application of urban design mapping techniques. The unit explores a number of different approaches to urban design mapping in an urban context and the application of these techniques and approaches in practice.

DXB101 Design and Creative Thinking

Equivalents	KIB100
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Design processes and creative thinking are at the core of interactive and visual

Units

design disciplines. This unit is an introduction to conceptual and practical methods of idea generation and development with an emphasis on creating innovative interactive and visual design for a variety of contexts. Through the combination of lectures, studios, and design charrettes, you will learn theoretical underpinnings of creative thinking and design processes; and cultivate fluency and flexibility in applying the theories into practice to produce original design solutions both individually and collaboratively.

DXB102 Visual Communication

Equivalents	KIB101, KIB801
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1, SEM-2 Caboolture - SEM-1, SEM-2

Interactive and Visual Design deals with visual communication and the creation of meaning through images. This unit will introduce you to the principles, production and presentation of visual design and communication.

DXB201 Visual Interactions

Pre-requisites	DXB102 or KIB101 or KIB801
Equivalents	KIB102, KIB802
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit further develops visual interface design skills for communications technologies including iterative design process, interaction and design development, narrative-based visual systems, refinement of concepts and ideation, project brief analysis and visual problem solving through a range of presentation modes.

DXB202 Image Production

Pre-requisites	DXB102 or KIB101 or KIB801
Equivalents	KIB120, KVB204
Credit Points	12
Campus	Kelvin Grove

Availabilities

Kelvin Grove
- SEM-2

This introductory unit provides you with foundation skills and knowledge of image creation and production. It offers opportunities for you to start developing your own personal style, and to build, practice and improve your abilities to create new images to suit specific design briefs across media. This unit deals with issues of originality, creativity and suitability of images used in the interactive and visual design context.

DXB203 Introduction to Web Design

Equivalents	KIB103, KIB007, KIB807
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit provides an introduction to theories and skills underpinning the application of multimedia technology with the Creative Industries, providing a foundation of conceptual and practical skills related to contemporary modes of electronic hypermedia production, communication and publishing.

DXB301 Interface Design

Pre-requisites	(DXB203 or KIB103) and (DXB201 or KIB102)
Equivalents	KIB204, KIB230, KIB211
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Visual Interface design is an essential part of contemporary communication media. It is required to produce digital media forms for the web, mobile devices, or large touch screens. Visual interface design requires an in-depth understanding of how visual design and communication principles apply to the creation of visual interfaces. Through this unit you will learn how to design visual interfaces, and the related principles of interaction design. This unit provides the knowledge and skills in interface design that will be required to design effective interactive media, which you will apply in future studies in Interactive and Visual Design.

DXB302 Typographic Design

Pre-requisites	DXB202 or KIB120 or KVB204
Equivalents	KIB231, KIB335
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Typography surrounds us. The way in which type is used is essential to the transmission and understanding of messages. This unit deals directly with the understanding of, use and manipulation of type in order to communicate messages more effectively and originally. It combines theory and practice, history and experimentation in a vibrant studio environment. You will deal with interdisciplinary briefs and use type as the main element of visual expression in your work.

DXB303 Programming for Visual Designers

Equivalents	KIB205, KIB210
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

As part of a contemporary art and design production, practitioners often need to understand aspects of computer programming. This unit provides artists and designers with an introduction to computer programming. It demonstrates how artists and designers use programming within their practices and introduces the principles of programming that will allow you to use computing as a tool for art and design innovation. The unit is presented in a manner that is suited to the learning styles of visual designers and artists, and requires no previous computer programming experience. These skills will be applied to the creation of art and design outcomes in a studio setting.

DXB304 Interactive Narrative Design

Equivalents	KIB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit addresses theoretical issues associated with non-linear story structures and interactive narratives through the analysis of game structures, the creation of original game ideas and the application of techniques of information design to the structuring of non-narrative content. Addressing the creative and analytical roles of writers, conceptual designers and information designers in the context of interactive digital media and the Creative Industries.

DXB401 Advanced Web Design

Pre-requisites	DXB301 or KIB204 or KIB211 or KIB230
Equivalents	KIB216
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Web Design has extended significantly from the concept of information delivery into social networking and other expanded modes of engagement. Web applications now appear in a range of delivery platforms from the desktop to personal and mobile technologies, such as media players and mobile phones. This unit will extend upon the knowledge and skills acquired in Introduction to Web Design, Interaction Design and Interface Design. It will introduce you to dynamic Web publishing employing contemporary open source content management systems. Theoretical understandings gained in lectures will be complemented by technical skills and applied to the development of authentic projects within design studios.

DXB402 Theories of Visual Communication

Pre-requisites	DXB202 or KIB120 or KVB204
Equivalents	KIB207
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit aims to build on your understanding of the principles of visual communication and its role on determining the values of our contemporary cultures and societies. Through theory and discussions you will critique and analyse images and visual designs applied to multiple contexts.

DXB403 Design for Interactive Media

Equivalents	KIB109, KIB210, KIB214
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Designing for contemporary media requires a sophisticated understanding of how we effectively interact with new technologies, software applications, displays and environments. This unit focuses on the field of interaction design and user experience design. It develops an understanding of the theories, methods, and processes employed by Interaction Designers through a series of lectures and tutorials. These principles are then applied to authentic design briefs within design studios.

DXB404 Enabling Immersion

Pre-requisites	DXB304 or KIB201
Equivalents	KIB202, KIB814
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

As creative practitioners within a highly networked technological society, it is important to develop a critical understanding of how the application of technology influences modes of communication, production processes and creative practices, particularly within the Creative Industries. This unit provides an introductory overview of the philosophies underlying applications of technology, and critically examines current applications in order to explore creative visions of future technology.

DXB501 Tangible Media

Pre-requisites	DXB303 or KIB205 or DXB401 or KIB216 or INB385 or IFB104
Equivalents	KIB314, KIB311
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The design and production of computational and interactive media

forms requires theoretical knowledge and an understanding of the processes that underpin the tangible as well as the embodied ways in which people interact with such systems. Therefore, it is important for you to build upon previous studies in embodied interfaces and extend these studies into the field of tangible media.

DXB502 Visual Information Design

Pre-requisites	DXB302 or KIB231 or KIB335
Equivalents	KIB340, KIB211
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Information is an essential aspect of everyday life. In contemporary society the generation of data is much greater than the ability to digest and visualise this as meaningful information. Through this unit you will expand your visual design and communication knowledge to include principles for effective information design.

DXB503 Design Thinking

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Do you want to change the world, to make a difference? Do you have what it takes to imagine a different future - to dream up new and innovative approaches to solving complex problems? Do you want to work with a team of like-minded students from across the university? If so this class is for you. We are calling for students who are passionate about their studies and want to become change agents, social entrepreneurs, strategists, and innovative thinkers. This "unit" is about disruptive trans-disciplinary practices, practices that will challenge your imagination and expectations about what university and learning is about. It is an intensive design challenge that begins with you, and by the end of semester - an enterprise ready for "Kickstarting"!

DXH601 Integrated Experience Design

Pre-requisites	DXB502 or KIB340 or
----------------	---------------------

Units

	KIB211
Equivalents	KIB338
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Design does not operate in isolation. All our decisions as designers affect not only the produced outcome, but the society and environment in which it is inserted. This unit provides you with the knowledge and skills to work on integrated design projects from conception to production that are focused on creating meaningful and transformative experiences for the users.

DXH602 Embodied Interactions

Pre-requisites	DXB501 or KIB314 or KIB311
Equivalents	KIB309
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Interaction with technology has advanced beyond the desktop paradigm of mouse and keyboard to embodied interfaces that incorporate video tracking, audio input, and gestural interaction techniques. Applications range from wearable technology to tangible media installations. This unit introduces an experimental field of interactive media design through the practical application of the processes and techniques of tangible media applications. Lectures, which provide the theoretical grounding of the study area, methodologies and examples of the application of tangible media are complemented by practical classes and support the development of embodied media outcomes within design studios.

DXH702 Contemporary Issues in IVD

Pre-requisites	(DXB402 or KIB207) and completion of 180cp of study
Equivalents	KIB315, KIB813
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The ubiquitous uptake of new technologies in communication, social interaction, and expression has changed the way that we conceptualize interaction and visual design. Designing within a

contemporary context requires a sophisticated understanding of new design practices, methods, and theoretical models as well as an understanding of issues that arise when we explore digital technologies. This theory unit is designed to create an awareness of contemporary design practices, theories, methodologies and philosophical contexts; and to develop the critical, creative and analytical thinking that is required for design innovation. The unit will be taught through a combination of lectures, seminars readings and presentations.

DXH803 Professional Practice for Designers

Pre-requisites	DXH702
Equivalents	KIB322, KIB806
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will enable you to outline a strategy for your future as a designer and present yourself as a design professional in public contexts. It is based on professional workshops and presentations that will cover collaborative and inclusive work practices. It is a capstone unit in the Interactive and Visual Design program.

DXP401 IVD Practices and Techniques

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit will provide you with the knowledge of the tools, techniques and practices required to support future studies and projects. This includes the skills and knowledge required to design for contemporary interactive media technologies, such as mobile applications, web based media, and domains such as large touch surfaces.

DXP402 Critical Practices in Visual Design

Equivalents	KIP401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

	- SEM-2
--	---------

Communication Design deals with visual communication and the creation of meaning through images. This unit will introduce you to the principles, production and presentation of visual design and communication.

DXP403 Designing Interactions

Equivalents	KIP402
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit further develops interface design skills for communications technologies including design priorities, visual systems, refinement of concepts, project analysis and problem solving through presentation models.

DXP404 User Experience Design

Equivalents	KIP403
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an introduction to theories and skills underpinning the application of multimedia technology with the Creative Industries, providing a foundation of conceptual and practical skills related to contemporary modes of electronic hypermedia production, communication and publishing.

DXP412 Advanced Practice in Interactive and Visual Design

Pre-requisites	Admission into KK86MJR-INVISDN - Interactive and Visual Design Major
Equivalents	KIP412
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit builds on up to dated knowledge and techniques through experimental and innovative production activities with practical and realistic approaches. Through the exploration of current interactive, animation and visual design issues, you will develop design discourse and visual design principles to enhance your interactive, animation, visual design and communication capacities.

EAB006 Leadership and Management in Early Childhood Services

Credit Points	12
Campus	External
Availabilities	External - SEM-2

Early childhood settings, including primary schools, operate by using site-based management practices that rely heavily on participation by teachers, staff from all levels of the organisation, and parents. Early childhood teachers need excellent leadership and management strategies to participate effectively in group decision-making for the development of high quality programs and services. They also need an understanding of how management structures impact on programs and service provision. This understanding, together with a high level of personal power, helps individual teachers influence and lead decisions about what happens in early childhood settings.

EAB017 The Early Childhood Professional

Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove - 6TP4 Caboolture - 6TP4 External - SEM-1

This unit involves students in drawing together and analysing information from a variety of disciplines and historical perspectives with a view to developing an understanding and knowledge that will provide them with a basis for creating and evaluating an integrated curriculum in early childhood settings.

EAB026 Early Childhood Community Arts Project

Pre-requisites	EAB012
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

This unit has a focus on pedagogies,

planning and assessment within the curriculum organisers of the New Basics, the Preschool Curriculum Guidelines and the key learning areas. It aims to increase knowledge and understanding of how curriculum organisers and outcomes can be used to plan intellectually challenging curricula for young children.

EAB130 Negotiating Curriculum with Young Children

Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit provides a sound understanding of the key concepts which underpin early childhood education, in relation to childcare, preschool, prep and lower primary settings. Students begin to learn along with a community of learners, and make links between research, theory and practice, each informing the other.

EAB510 Early Childhood English, Literacies and Language 1

Anti-requisites	CLB004
Equivalents	EAB008
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1 External - SEM-1

This unit provides foundation understandings, skills and processes for studying English and literacies in either Primary English Curriculum Studies 1 and 2 (Primary students) or Early Childhood English, literacies and language 2 and 3 (Early Childhood students). The unit focuses on (i) theories of literacies for current times; (ii) children's literature; (iii) language acquisition; (iv) diversity, social justice and how language and texts work; and (v) English and literacy policy in EC and primary education contexts.

EAB511 Early Childhood Contemporary and Comparative Perspectives

Equivalents	EAB001
Credit Points	12
Campus	Kelvin Grove and Caboolture

Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1
----------------	--

This is a foundation unit in which you will explore a range of contemporary and comparative perspectives on the care and education of young children in differing socio-cultural contexts, in Australia and other countries. Linking past to present, you will examine the evolution of key philosophies, theories and approaches in early childhood education and care (ECEC), and consider their influence on contemporary policy, curriculum and practice. The unit encourages you to reflect critically on ways of thinking about children, childhood, development and learning and ECEC and to begin to formulate a personal philosophy of ECEC.

EAB512 Child Health, Safety, Wellbeing and Movement Education

Equivalents	EAB021
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-2 Caboolture - SEM-2

This unit provides foundation understandings, skills and processes for understanding Child Health, Wellbeing, Safety and movement as they impact upon working with children, and as they relate to the learning area Health and Physical Education. The unit focuses on food, nutrition and wellness principles and policies for early childhood education settings; management of health and wellness components within early childhood settings; and planning early childhood health and wellness education.

EAB513 Partnerships with Families and Communities

Equivalents	EAB002
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2 External - SEM-2

This is a foundation unit in which you explore theory, research, policy and practice in relation to contemporary

Units

children, their families and communities in Australia. This unit encourages you to reflect critically on ways of thinking about children, families and communities, and to consider ways to promote respectful, collaborative partnerships with children, families and communities in diverse socio-cultural contexts.

EAB514 Inclusive Education and Early Intervention in Early Childhood

Pre-requisites	EAB121
Equivalents	EAB005
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2 External - SEM-2

The unit promotes an understanding and valuing of inclusive educational programs and practices for working with young children with a diverse range of abilities and backgrounds in early childhood settings. You will relate your knowledge of children's behavioural and developmental characteristics to early intervention and inclusive principles and practices in early childhood programs.

EAB515 Leadership and Management in Early Childhood

Equivalents	EAB006
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This is a fourth year unit in which you explore leadership and management as an essential element of quality early childhood education and care for children and families. Effective management skills and strategies are integral in building strong, respectful and meaningful relationships with children, families and staff. Understandings of leadership and management enable early childhood educators to work optimally with diverse children, families and communities in varying early childhood contexts.

EAB516 Research in Early Childhood

Equivalents	EAB016
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit will help you to understand contemporary research in early childhood. Early childhood research is a dynamic and interdisciplinary field of investigation in which important questions about children and early childhood education and care can be addressed.

EAB530 Arts Curriculum Studies 1: Visual and Media Arts

Anti-requisites	EAB011, KKB201
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit is a foundational Arts unit examining the basic elements and concepts relevant to the Visual and Media arts in particular. The unit provides opportunities for practical exploration of these art forms, and introduces relevant arts pedagogies that emphasise the role of the arts in society and in the care and education of children from birth to 12.

EAB531 Early Childhood Science Education

Anti-requisites	EAB015
Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1 External - SEM-1

This unit develops your understanding of early childhood science education for children from birth to eight years of age. It develops knowledge, skills and dispositions that will enable you to apply these understandings to effective inquiry-based science teaching and learning in

early childhood centres and the early years of school.

EAB532 Early Childhood Mathematics Education 1

Anti-requisites	EAB027
Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1 External - SEM-1

In this unit, you will develop an understanding of the contemporary context of Early Childhood Mathematics Education (ECME) and be introduced to mathematical content knowledge and the pedagogical practices associated with Number and Algebra. Through your participation in this unit and the preceding Early Childhood Mathematics Education 2 unit, you will develop conceptual and pedagogical knowledge of early years mathematics teaching and learning.

EAB533 Early Childhood Mathematics Education 2

Anti-requisites	EAB028
Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove - SEM-2 Caboolture - SEM-2 External - SEM-2

In this unit, you will engage in learning about foundational concepts in mathematics; exploring ways in which early childhood educators can develop appropriate learning opportunities to encourage and foster children's mathematical development. The Early Childhood Mathematics Education (ECME) content specific to this unit is Measurement and Geometry and Statistics and Probability. This unit builds on concepts and understandings developed in Early Childhood Mathematics Education 1.

EAB534 Early Childhood English, Literacies and Language 2

Pre-requisites	EAB510
Equivalents	EAB009
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1 External - SEM-1

This unit further develops your knowledge, skills and application for teaching English curriculum and literacy to young children. The unit focuses on the teaching of reading and writing in the early years of school, and develops understandings about effective literacy teaching in prior to school settings. It links to the work previously undertaken in Early Childhood English, Literacies and Language 1 and supports the development of understandings that will be crucial for your future studies in Early Childhood English, Literacies and Language 3.

EAB535 Early Childhood English, Literacies and Language 3

Pre-requisites	EAB510 and EAB534
Equivalents	EAB010
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2 External - SEM-2

This unit builds on the content of earlier units Early Childhood English, Literacies and Language 1 & 2. The unit focuses on broadening the knowledge and understandings of students about the current context of education in relation to literacy and English in prior to school and primary school settings. The unit provides a space for students to build informed opinions about important issues and to practice articulating these opinions professionally and confidently.

EAB536 Early Childhood Arts Curriculum Studies 2: Performing Arts

Pre-requisites	EAB530
Equivalents	EAB012
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This unit examines the basic elements and concepts relevant to the art forms of dance, drama, media and music; provides opportunities for practical exploration of these art forms; builds a repertoire of relevant arts pedagogies and extends on the foundational knowledge acquired in EAB530 Arts Curriculum Studies 1: Visual and Media Arts, with further analysis of the importance of the arts in the care and education of young children.

EAN601 Investigating Curriculum and Pedagogy in Early Childhood

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

The aims for this unit are to assist students in developing a critically-informed and research-based understanding of the current issues that are under scrutiny in the field of Early Childhood Education. Recognition and appreciation of gender, culture and customs are essential to the consideration of the issues, and students will make active contributions to promoting codes of practice relevant to the specific professional area of education/learning.

EAN603 Child Development in Context

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

The aim of the unit is to foster critical understanding of current developmental theory, the conduct of developmental

research and the application of research findings to practice in early childhood education and other fields in which professionals work with children and families.

EAN614 Arts and Sciences in Early Childhood

Credit Points	12
Campus	External
Availabilities	External - SEM-1

The unit challenges students, as leaders in early childhood teaching and learning, to interrogate a broad range of ideas, principles and guidelines to assist them in making decisions about curriculum in the arts and sciences. It challenges students to engage with trans-disciplinary and cross-disciplinary knowledge and innovation.

EAN615 Mathematics in Early Childhood

Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit aims to develop a sound understanding of the theories which inform early childhood mathematics and the teaching and learning of mathematics. Students develop a broad knowledge of mathematical content specifically for early childhood contexts.

EAN616 Language, Literacies and Communication in Early Childhood

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

The focus of this unit is to help students to understand recent research-based practices for literacy learning and teaching in the years before compulsory schooling and the early years of schooling. Emphasis is placed on a definition of literacy as critical social practice, and a balanced approach to literacy teaching and learning is foregrounded. The unit highlights the importance of all children becoming active participants in society and of knowing and engaging in a range of literacy practices.

Units

The unit will provide opportunities for students to consider the importance of providing 'high quality' literacy instruction to all students as a basic foundation of a socially just or 'high equity' education system.

EAN650 Mathematics Education

Credit Points	12
Campus	External
Availabilities	External - SEM-1

In this unit, you will explore ways in which early childhood educators can develop appropriate learning opportunities to encourage and foster children's mathematical development in Number and Algebra. You will develop expertise in content knowledge and pedagogical practices associated with Number and Algebra. Through engagement in this and the proceeding unit you will build knowledge of theory and practice whilst developing your research proficiencies that will support mathematics teaching.

EAN651 English, Literacies and Language

Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit provides understandings of the theoretical foundations of literacy, English and language, with a particular focus on the early years. The unit prepares students for further studies in Teaching English and Literacy in the early years, and for their future teaching of young children. The unit focuses on 1) theories of literacies for current times; 2) children's literature; 3) the place of digital and multimodal texts in young children's lives 4) language acquisition; and 5) diversity and its implications for teaching and learning literacy. The unit provides a space for students to build informed opinions about important issues and to practice articulating these opinions professionally and confidently.

EAN652 Contemporary and Comparative Perspectives in Early Childhood

Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit explores contemporary and comparative perspectives of early

childhood education and care (ECEC) and their influences on young children in differing socio-cultural contexts, in Australia and other countries. This unit will encourage you to reflect critically on the theories and beliefs that you hold about early childhood education and their origins. Considering that early childhood professionals do not work in a vacuum, this unit will ask you to investigate and analyse contemporary policy, curriculum and practice within varied contexts of teaching and learning and the implications of these. The unit encourages you to develop complex ways of thinking about children, childhood, development and learning and ECEC.

EAN653 Primary and Early Childhood Arts Curriculum

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit examines the basic elements and concepts relevant to all strands of the Arts, including Visual Arts, Dance, Drama, Media Arts and Music. The unit provides opportunities for practical exploration of each of these art forms through problem-finding, problem-solving and inquiry-based approaches to learning. This unit challenges students to interrogate a broad range of ideas, principles and guidelines to assist them in making decisions about curriculum in the Arts. Students are introduced to relevant Arts pedagogies for each strand and across all developmental phases, emphasising the role of the Arts in society and in the care and education of children from birth to 12.

EAN654 Well Being, Child Health and Safety, HPE Curriculum Studies in Early Childhood and Primary

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit will equip you with knowledge, skills and dispositions for understanding child health, wellbeing and safety and teaching health and physical education (HPE) curriculum studies. In addition you will engage with and apply health-related

principles from the Early Years Learning Framework (EYLF) and the Australian Curriculum Health and Physical Education: Foundation to Year 10. The unit promotes an evidence-based and multidisciplinary approach with a special focus on ways of managing children's behaviour.

EAN655 Early Childhood Science Curriculum Studies

Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit develops understanding of early childhood science education for children from birth to eight years of age. It develops knowledge, skills and dispositions particularly in the areas of biology, chemistry, physics and earth and space sciences. This subject will enable you to apply these understandings to effective inquiry-based science teaching and learning in early childhood centres and the early years of school. This unit develops your understanding of science education and introduces you to content, curriculum and pedagogy required for initial practical teaching experiences. It is to be undertaken in your first year and will complement your studies in other key learning areas such as Early Years Humanities Curriculum Studies, EAN658.

EAN656 Teaching Mathematics in the Early Years

Credit Points	12
Campus	External
Availabilities	External - SEM-1

In this unit, you will engage in a critical analysis of the contemporary context of Early Childhood Mathematics Education (ECME) to develop theory-based practices. You will develop expertise in content knowledge and pedagogical practices associated with Measurement and Geometry and Probability and Statistics. Through engagement in the unit you will build your research proficiencies that will support mathematics teaching. This unit augments the concepts and understandings developed in the unit, Mathematics Education.

EAN657 Teaching English and Literacy in the Early Years

Pre-requisites	EAN651
----------------	--------

Units

Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit further develops your knowledge, skills and application for teaching English curriculum and literacy to young children. The unit focuses on the teaching of reading and writing in the early years of school, and develops understandings about effective literacy teaching in prior to school settings. It links to the work previously undertaken in Early Childhood English, Literacies and Language and supports the development of understandings that will be crucial for your future studies and work as an early childhood teacher.

EAN658 Humanities Curriculum Studies

Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit introduces key concepts, content and skills that are the foundation of studies in the humanities, with a focus on history and geography education in the early childhood and lower primary years. The unit distinguishes young children as competent, proactive learners who can develop and experience perspectives about the past, present and future, and about environments and sustainability. Building on these understandings, early years and primary school learners investigate and explore challenging topics in social and cultural education, and in history and geography to enable them to become critical thinkers and active and informed citizens. As such, educators in early childhood and the lower primary years engage with children, families and communities in ways that support understanding about the role of history and geography, civics and citizenship in society. This unit engages you with relevant curriculum documents and pedagogical strategies that support teaching and learning around Humanities in early childhood and primary school settings.

EAN659 Early Childhood Pedagogies in the Field: Family and Community Partnerships

Credit Points	12
Campus	External
Availabilities	External - SEM-2

This is a final year capstone unit that draws together your professional knowledge and experience to date, and supports you to reflect critically on your developing identity as an early childhood professional. This includes articulating your educational philosophy and pedagogy of teaching, both of which are central to your transition to teaching. Developing understanding about professionalism in education and the complex roles and responsibilities of early childhood professionals includes engagement with research; both in terms of accessing and applying research findings to teaching practice, and generating knowledge through teacher-research within classrooms, centres or schools. This unit provides a natural opportunity for students to consider appropriate communication planning and records management of student achievement. This unit supports you to plan and conduct an action research project focussed around early childhood pedagogies and partnerships with families and communities. As a research methodology, action research supports teachers to investigate issues relevant to their own classroom practice, such as inclusive education, embedding Indigenous perspectives, supporting family engagement and behaviour management practices.

EAP402 Early Years: Arts and Humanities

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	External - SEM-1, SEM-2

This unit aims to develop students' capacities as scholars, educators and researchers, through adopting a problem-finding, problem-solving and inquiry-based approach to learning. Through engaging in their own inquiry-based investigation of a social/ environmental issue, students learn how the arts can be used as a learning and teaching tool. Students will investigate Indigenous studies and SOSE through descriptive, interpretive, analytic and expressive processes, to share and create knowledge with students and staff.

EDB003 Teaching and Learning Studies 3: Practising Education

Credit Points	12
Campus	External

Availabilities	External - SEM-2
----------------	----------------------------

Education is a social and cultural activity. This unit provides a sociological and cultural studies framework that provides an insightful explanation of how education in its various sites is constructed and organised. The unit includes a socio-cultural analysis of an educational site which will be undertaken in conjunction with the Field Studies unit.

EDB004 Teaching and Learning Studies 4: Inclusive Education

Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

This unit aims to develop students' understanding and appreciation of the contributions that diversity, belonging and trust make towards a quality learning environment for all learners. Students will learn to engage in teaching a broad range of students in diverse and inclusive ways utilising pedagogies and curriculum practices that enhance learning for all students and generate inclusive cultures within the school and classroom settings. Desired outcomes are achieved through descriptive, interpretive, analytic and expressive processes to share learning with fellow students and staff.

EDB005 Teaching and Learning Studies 5: Professional Work of Teachers

Pre-requisites	EDB033, EDB023, or EDB013
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - 6TP4 Kelvin Grove - 6TP4 External - 6TP4

Students will share the responsibility for shaping their beginning career learnings through a process of professional induction with a number of key significant stakeholders. The process will be proactive, collaborative and self-determined and students will need to become professionally responsible for developing a professional development

Units

program that best accommodates their needs at the close of the teacher education program.

EDB007 Culture Studies: Indigenous Education

Credit Points	12
Campus	External
Availabilities	External - 6TP4

Numerous government reports and recent discussions about reconciliation have called for an increased commitment to Indigenous education in Australia. Teachers are increasingly being asked to improve their skill, knowledge and understanding to teach Indigenous students, and to teach curricula which incorporates Indigenous viewpoints on social, cultural and historical matters. This unit begins with an analysis of the students' own cultural place in the Australian context and afterwards moves towards an understanding of Aboriginal and Torres Strait Islander perspectives on history and contemporary issues, and an understanding of why Aboriginal and Torres Strait Islander students have been so disadvantaged by the Australian education system.

EDB011 Early Childhood Field Studies 1: Development and Learning in the Field

Credit Points	12
Campus	External
Availabilities	External - SEM-1

Designated Unit. This unit focuses on students' professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the first set of teaching experiences, in a graduated sequence over the course of the BEd. Students develop the ability to plan, implement and evaluate effective teaching/learning programs in a wide range of settings for children aged from birth to eight years. In this unit of the professional practices strand, students will have opportunities to undertake activities designed to help them refine an increasing number of strategies for teaching and working collaboratively with children and their parents, and with other professional colleagues.

EDB012 Early Childhood Field Studies 2: Practising Education in the Field

Credit Points	12
Campus	External
Availabilities	External - SEM-1

Designated Unit This unit focuses on students' professional development as an educator, and reinforces the twin themes of teacher as researcher, and teacher as reflective practitioner. It provides the second set of teaching experiences, in a graduated sequence over the course of the BEd. In this second unit of the professional practices strand, students will focus upon program planning and implementation in settings for children in lower primary. Students will focus upon teaching in lower primary school classrooms, with an emphasis upon the development of knowledge of relevant policies and resources in curriculum provision. An emphasis will be maintained on understanding Early Childhood approaches to curriculum. Not available to Visiting students.

EDB013 Early Childhood Field Studies 3: Diversity and Inclusivity

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

Designated Unit The aim in this unit is to develop professional support relationships that early childhood practitioners must provide for all children and their families, and an awareness of the need for the teacher to work as a member of the community and as a partner with parents and other colleagues. Not available to visiting students.

EDB014 Early Childhood Field Studies 4: Professional Work of Teachers - Induction into the Field

Pre-requisites	EDB011, EDB012 and EDB013
Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove

- SEM-1, SEM-2
Caboolture
- SEM-2
External
- SEM-1, SEM-2

Designated Unit This final early childhood practice unit is designed to provide a means of transition from the role of the tertiary student to that of a professional early childhood practitioner who is able to work across diverse settings. Students are encouraged to engage in reflection about their professional development and their future career paths and options. Not available to Visiting students.

EDB015 Internship (Early Childhood)

Pre-requisites	EDB014 (Can be enrolled in same teaching period)
Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 Caboolture - SEM-2 External - SEM-1, SEM-2

This unit aims to induct students into the professional work of teachers. The aim is for students to apply the knowledge, skills and understandings of teaching and learning that they have acquired throughout the course in an extended time in the workplace. Not available to Visiting students.

EDB022 Primary Field Studies 2: Practising Education in the Field

Pre-requisites	EDB021 and (CLB006 or CRB005) and (MDB002 or CRB933)
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - 5TP2, SEM-2

Designated Unit Through critical examination of the socio-cultural dimensions of these sites, this unit aims to utilise aspects of social enquiry to analyse the practice of teaching as a social and cultural activity. At the same time, the unit aims to develop students' pedagogical and curriculum skills as a teacher. Not available to Visiting students.

EDB023 Primary Field Studies 3: Inclusive Educational Practices

Pre-requisites	EDB022
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

Designated Unit. As a final year teacher education student you will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. This field experience is designed for students to engage in teaching, learning and assessment practices in their field, interacting with individual students, small groups of students and whole class situations. Students will be required to design, implement and evaluate differentiated teaching strategies, programs and assessment tasks in inclusive and critically reflective ways and in a manner that is responsive to the diverse nature of the students in classes. Not available to Visiting students.

EDB024 Primary Field Studies 4: Professional Work of Teachers - Induction into the Field

Pre-requisites	EDB023 and EDB004
Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove - 5TP2, SEM-2 Caboolture - SEM-2 External - 5TP2, SEM-2

Designated Unit. Learners remain central to the work of teams and must be recognised as culturally and socially diverse as well as intellectually diverse. Within these constructs the graduating teachers are required to provide a range of educational opportunities that facilitate high quality and meaningful learning engagement for all students across differing educational contexts and sectors. This unit is designed to fully immerse the pre-service teacher into the field with a view to scaffolding their repositioning as autonomous, critically reflective, inclusive professional teachers

on completion. Not available to Visiting students.

EDB025 Internship (Primary)

Pre-requisites	EDB024 (Can be enrolled in same teaching period)
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-2 Kelvin Grove - 5TP3, SEM-2 External - 5TP3, SEM-2

This unit aims to induct you into the professional work of teachers. The aim of this unit is for you to apply the knowledge, skills and understandings of teaching and learning that you have acquired throughout the course in an extended time in the workplace. Not available to Visiting students.

EDB032 Secondary Field Studies 2

Pre-requisites	EDB031 and a Curriculum Studies 2 unit. The CS2 unit can be enrolled in the same teaching period as EDB032
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 5TP2, SEM-2

Designated Unit Through critical examination of the socio-cultural dimensions of these sites, this unit aims to utilise aspects of social enquiry to analyse the practice of teaching as a social and cultural activity. At the same time, the unit aims to develop students' pedagogical and curriculum skills as a teachers. Not available to Visiting students.

EDB033 Secondary Field Studies 3

Pre-requisites	EDB032 and Curriculum Studies 3 unit. The CS3 unit can be enrolled in the same teaching period as EDB033
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1, SEM-2

Designated Unit. Students will be required to design, implement and evaluate differentiated teaching strategies, programs and assessment tasks in inclusive and critically reflective ways and in a manner that is responsive to the diverse nature of the students in your classes. Students will be required to argue that their orientations to curriculum, teaching and assessment reflect practices that offer all students access to quality learning experiences. Not available to Visiting students.

EDB034 Secondary Field Studies 4

Pre-requisites	EDB033
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - 5TP2, SEM-2

Designated Unit. This unit is designed to fully immerse the pre-service teacher into the field with a view to scaffolding their repositioning as an autonomous, critically reflective, inclusive professional teacher on completion. Not available to Visiting students.

EDB035 Internship (Secondary)

Pre-requisites	EDB034 (Can be enrolled in same teaching period)
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - 5TP3, SEM-2

This unit aims to induct students into the professional work of teachers. The aim of this unit is to apply the knowledge, skills and understandings of teaching and learning that students have acquired throughout the course in an extended time in the workplace. Not available to Visiting students.

EDB112 ICT in Early Childhood and Primary Education

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove

- SEM-1

This unit is at the introductory stage of your course and provides the foundations for the application of information and communication technologies (ICT) in curriculum and pedagogy. It addresses the knowledge and application of ICT in both early childhood and primary education contexts. It further shows how children can benefit from opportunities to explore their world using technologies to develop confidence in using digital media.

EDB120 Early Childhood Learning and Development 1

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This introductory unit examines the major theories, features and processes of early development. The pace and direction of development are shaped by biological predispositions and personal attributes, as well as by the interactions and experiences afforded to the child. Knowledge of contexts, their impact on individual development, and an awareness of the interrelationships between each area of development is necessary in order to develop an understanding of how children think and learn. Early childhood teachers also require a range of skills for observing and analysing behaviour in order to plan and organise appropriate educational opportunities in early childhood settings. This unit incorporates a 10 day professional placement in a kindergarten setting.

EDB121 Early Childhood Learning and Development 2

Pre-requisites	EDB120
Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1 External - SEM-1

To facilitate learning during early childhood, teachers must have a sound knowledge of the major theories, features and processes of development. The units

in the developmental strand are underpinned by socio-cultural theory, which takes into account both the psychological and the social mechanisms of development and learning. The focus of this unit is children's speech, language and cognitive development. This unit incorporates a 15 day field placement in a child care setting with children aged 0-2 years, and 1 day (equiv) lead in time at the same site. For students on the Advanced Standing pathway incorporating acknowledgement of approved work experience (RPL), the field experience placement will be a 10 day field placement in a kindergarten setting with one day (equiv) lead in. The purpose of the on-site lead in time is for pre-service teachers to orient themselves to the site, to processes at the site, and to the class/group with whom they will be working. Lead in time is only required if the student is going to a new site for field experience.

EDB122 Early Childhood Professional Practice and Pedagogies

Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1 External - SEM-1

This is a final year capstone unit that draws together your professional knowledge and experience to date, and supports you to critically reflect on your developing identity as an early childhood professional, to articulate your educational philosophy and pedagogy of teaching and to prepare for your transition to teaching. Embedded in this unit is a final year field experience, where students apply knowledge developed throughout their course, in the areas of professional work of the teacher and pedagogy. This unit incorporates a 10 or 20 day field placement in a kindergarten setting and 1 day (equiv) lead in at the same site. The purpose of the on-site lead in time is for pre-service teachers to orient themselves to the site, to processes at the site, and to the class/group with whom they will be working. Lead in time is required only if the student is going to a new site for field experience.

EDB140 Teaching Strategies and Planning

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This unit focuses on developing foundational core skills in lesson planning and in designing and implementing teaching strategies for inclusive educational contexts. The unit develops your professional knowledge, skills and practice, and includes site visits as well as 10 days of professional experience in a primary school setting. Professional experience is central to your preparation for the profession, and all units that contain a professional experience component are designated units, that is, students who do not achieve a passing grade for the unit will have their progress in the course reviewed. Failure to pass a designated unit may result in exclusion from the course. This is your first formal supervised professional experience. The unit provides a foundation for further professional experience to be undertaken in EDB170 Creating Positive Learning Environments. The unit content links to your curriculum units to further develop your knowledge, understanding and skills in supporting student learning.

EDB150 Secondary Assessment 1: Summative and Diagnostic Assessment

Pre-requisites	EDB171
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit focuses on planning summative and diagnostic assessment, and the implications for teaching and learning in inclusive educational contexts. The unit develops your professional knowledge, skills and practice, and includes site visits as well as a 4 week block professional experience in a secondary school setting. Professional experience is central to your preparation for the profession, and all units that contain a professional experience component are designated units, that is, students who do not achieve a passing grade for the unit will have their progress in the course reviewed. Failure to pass a designated unit may result in exclusion from the course. This is your third formal supervised professional

experience, and your first 4 week block of professional experience. The unit builds on your professional experience previously undertaken in EDB171 Culture Studies 1: Indigenous Education. The unit content links to your curriculum units to further develop your knowledge, understanding and skills in supporting student learning through summative and diagnostic assessment. The unit prepares you for the final semester Capstone unit, EDB174 Stepping Out/ Making Connections.

EDB170 Creating Positive Learning Environments

Pre-requisites	LCB002
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit develops your awareness, knowledge, and skills of a variety of behaviour support and classroom management strategies and processes and includes field experience. It aims to help you to understand and develop collaborative, positive and inclusive learning environments across a range of educational settings. This unit links to the work previously undertaken in LCB002 Child and Adolescent Development and Learning and helps prepare you for LCB005 Inclusive Education. This unit also develops your professional knowledge, skills and practice, and includes a 10 day field experience, as per the Field Experience Calendar.

EDB171 Culture Studies 1: Indigenous Education

Pre-requisites	EDB120 or EDB170
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2 External - SEM-2

This unit focuses on the impact of culture and cultural identity and its impact on Aboriginal and Torres Strait Islander peoples' education. It involves theoretical understandings around cultural standpoint as well as planning for teaching Aboriginal and Torres Strait Islander

peoples' knowledge in an educational context. The unit develops your professional knowledge, skills and practice, and includes a 10-day professional experience, as per the Professional Experience Calendar.

EDB172 Education and Society 2

Pre-requisites	EDB171 or EDB150
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1 External - SEM-1

This unit focuses on the links between education, culture and society. This unit uses socio-cultural theory previously introduced in Education and Society 1 to better understand and engage with students from diverse backgrounds and has a practical and professional emphasis in that it links Field Experience to recent educational policy initiatives. Such initiatives include the importance of teachers understanding their legal and ethical responsibilities in terms of Child Protection and the Rights of the Child. Field experience is crucial to your preparation for the profession, and all units that contain a field experience are designated units, that is, students who do not achieve a passing grade for the unit will have their progress in the course reviewed. Failure to pass a designated unit may result in exclusion from the course.

EDB173 Early Childhood and Primary Assessment 1: Summative and Diagnostic Assessment

Pre-requisites	EDB172
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This unit focuses on planning summative and diagnostic assessment, and the implications for teaching and learning in inclusive educational contexts. The unit develops your professional knowledge, skills and practice, and includes site visits as well as a 4 week block professional

experience in a primary school setting. Professional experience is central to your preparation for the profession, and all units that contain a professional experience component are designated units, that is, students who do not achieve a passing grade for the unit will have their progress in the course reviewed. Failure to pass a designated unit may result in exclusion from the course. This is your fifth formal supervised professional experience, and your first 4 week block of professional experience. The unit builds on your professional experience previously undertaken in EDB172 Education and Society 2. The unit content links to your curriculum units to further develop your knowledge, understanding and skills in supporting student learning through summative and diagnostic assessment. The unit prepares you for the final semester Capstone unit, EDB174 Stepping Out/ Making Connections.

EDB174 Stepping Out/ Making Connections

Pre-requisites	EDB173 or EDB150
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - 13TP2 Caboolture - 13TP2

This unit is the capstone for the degree program. Students will be required to demonstrate their achievement of the Graduate level of Professional Standards of the profession of teaching, through engagement in a conference, completion of professional experience, and submission of a reflective capstone assessment piece.

EDB175 Internship

Pre-requisites	EDB174
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

Internship is the final unit in your course that bridges preservice teaching and beginning teaching. The Professional Internship differs from field studies conducted earlier in your degree and is undertaken after the successful completion of all other course requirements. The internship provides an enriched and authentic set of learning

Units

experiences which will prepare you for life-long, professional learning as a teacher. As an intern, you will take on the status and position of an Associate Teacher, with an authority to teach from the Queensland College of Teachers (note this is not the same as Full Registration and there are stringent conditions). Internship is the culmination of your preparation to enter the profession, and provides you with an opportunity to practise as a professional, under the mentorship and in partnership with a teacher mentor.

EDB200 Insights into Early Childhood Development

Credit Points	12
Campus	External
Availabilities	External - SEM-1

The unit aims to develop knowledge and understanding of early childhood development with a focus on children's thinking and communicating in a social context.

EDB411 Dissertation (Stage 2)

Pre-requisites	EDB410 (can be enrolled in the same teaching period)
Other requisites	Entry to the Research Pathway is by invitation from the Research Pathway Coordinator. Students are required to have a GPA of 5.5 or above.
Assumed Knowledge	null
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides you with opportunities to develop research skills that are increasingly important for teachers in an era when schools, professional associations and other educational settings are becoming important sites of knowledge production.

EDB411 Dissertation (Stage 3)

Other requisites	Entry to the Research Pathway is by invitation from the Research Pathway Coordinator. Students are required to have a GPA of 5.5 or above.
Assumed Knowledge	null

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit provides you with opportunities to develop research skills that are increasingly important for teachers in an era when schools, professional associations and other educational settings are becoming important sites of knowledge production.

EDB440 Independent Study

Credit Points	12
Campus	Kelvin Grove, Caboolture and External
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM Caboolture - SEM-1, SEM-2 External - SEM-1, SEM-2, SUM

This unit involves self-initiated and self-directed academic study in an area of educational interest that allows study either to a depth not possible in option units, or in an area not covered by the course.

EDN602 Advanced Seminars

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2, SEM-2 (Block), SUM, SUM (Block) External - SEM-2, SUM

This unit provides for the special needs and interests of students. Small groups of students interact at an advanced level with specialists or visiting scholars in seminars, conferences and research projects. Enrolment is with Course Coordinator approval only.

EDN603 Facilitated Study Unit

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional

relevance.

EDN604 Facilitated Study Unit

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

The unit aims to enhance capacities for flexibility and innovation in educational practice as a result of an in-depth investigation of a problem of professional relevance. The unit engages students in a comprehensive examination of relevant theory, research, policy, and/or practice in the area of investigation.

EDN604 Facilitated Study Unit

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

See EDN604-1.

EDN610 Professional Dialogues in Education

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit aims to develop understanding of what it means to be an innovator and a leader in a contemporary professional context. The unit is underpinned by the notion that innovation means being more critical, being open, being able to engage with greater uncertainty and complexity, and being able to learn from the past and from a broad range of contemporary ideas in order to manage the future.

EDN611 Conducting and Evaluating Educational Research

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External

Units

- SEM-1, SEM-2

The unit focuses on developing expertise to seek research knowledge that addresses specific problems or issues in your practice. It assists you to search databases and other sources to locate published research reports in your field and evaluate them critically.

EDN612 Shaping an Educational Research Project

Pre-requisites	EDN611
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

The unit aims to enhance capacities for undertaking research in educational and other learning contexts that is innovative in both its focus and its approach. The unit engages students in a comprehensive examination of relevant research theory and practical application.

EDN631 Supervised Practicum 1

Pre-requisites	(PYN601 or LCN625 or SPN640) and (LCN626 or SPN641). These units can be studied in the same teaching period as EDN631
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The aim is to provide students with a basic level of professional knowledge and skills in the practice of Educational and Development psychology and an awareness of ethical guidelines. Students will also develop a high standard of professional conduct through supervised practice.

EDN632 Supervised Practicum 2

Pre-requisites	EDN631 and (LCN625 or SPN640) and (LCN626 or SPN641) and (LCN627 or SPN642) and PYN601. LCN627 and PYN601 can be studied in the same teaching period as EDN632
Credit Points	12

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to provide students with supervised experience in applying diagnostic, assessment and intervention skills in clinic and educational settings. This unit will also develop students' written and oral communication skills and provide them with practice in using these skills to communicate results of assessments and recommendations for interventions to school staff, parents and other stakeholders.

EDN633 Supervised Practicum 3

Pre-requisites	EDN632
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The unit provides students with supervised experience in applying their diagnostic, assessment and intervention skills within non-educational settings. It will further develop their written and oral communication skills, and provide them with practice in using these skills to communicate results of assessments and intervention strategies within teams from non-educational settings.

EDN634 Supervised Practicum 4

Pre-requisites	EDN633
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit aims to provide students with support in ensuring that they have attained the level of knowledge and skill required to meet the competencies of the Psychologists Board of Queensland.

EDN635 Field Studies in Early Childhood

Pre-requisites	EAN601
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	External - SEM-1, SEM-2

In this unit, students are required to draw

on professional knowledge and experience in making child observations and in planning, implementing and evaluating learning experiences for children.

EDN641 Field Studies in Early Childhood: Birth To 5 Years

Pre-requisites	EAN601
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	External - SEM-1, SEM-2

The aim of this unit is enable you to draw upon your professional knowledge and experience in making child observations and in planning, implementing and evaluating learning experiences for children.

EDN660 Understanding Learners and Learning

Pre-requisites	EAN651. EAN651 can be studied in the same teaching period as EDN660
Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit examines the major theories, features and processes of early development. Knowledge of contexts, their impact on individual development, and an awareness of the interrelationships between each area of development is necessary in order to develop an understanding of how children think and learn. Early childhood teachers also require a range of skills for behaviour management and approaches to assessment, in order to plan and organise appropriate educational opportunities in early childhood setting. This unit incorporates a 20 day professional placement in a kindergarten setting as per the Professional Experience Calendar.

EDN661 Early Years: Development, Diversity and Inclusion

Pre-requisites	EAN650 and EDN660
Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit examines the major theories, features and processes of early development. The pace and direction of development are shaped by biological predispositions and personal attributes, as well as by the interactions and experiences afforded to the child. Knowledge of contexts, their impact on individual development, and an awareness of the interrelationships between each area of development is necessary in order to develop an understanding of how children think and learn. Early childhood teachers also require a range of skills for observing and analysing behaviour in order to plan and organise appropriate educational opportunities in early childhood settings. The unit also promotes an understanding and valuing of inclusive educational programs and practices, including diagnostic assessment, for working with young children with a diverse range of abilities and backgrounds in early childhood settings. You will relate your knowledge of children's behavioural and developmental characteristics to early intervention and inclusive principles and practices in early childhood programs. This unit incorporates a 20 day professional placement in a preparatory setting as per the Professional Experience Calendar.

EDN670 Creating Positive Learning Environments

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit develops your awareness, knowledge, and skills of a variety of child and adolescent development theories, behaviour support and classroom management skills. These are aimed at developing responsive, collaborative, positive inclusive learning environments across a range of educational settings. This unit requires you to participate in Work Integrated Learning (WIL) experiences through a 10 day Field Experience. Field Experience allows you to use the skills and knowledge developed in this unit in a practical and immediate way. Field experience is crucial to your preparation for the profession, and all units that contain a field experience are designated units, that is, students who do not achieve a passing grade for the unit will have their progress in the course reviewed. Failure to pass a

designated unit may result in exclusion from the course.

EDN671 Inclusive Teaching Strategies and Planning for Diversity

Pre-requisites	(CRN650 and CRN652 and EDN670) or (EDN670 and 2 of CRN665, CRN667, CRN669, CRN671, CRN673, CRN675, CRN677, CRN679, CRN683)
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit will develop your knowledge, skills and application of inclusive teaching strategies and planning for diversity. It focuses on curriculum planning for a wide range of learners in classrooms. The learning in this unit will contribute to your preparation for Professional Experience.

EDN672 Teachers as Researchers

Pre-requisites	(CRN651 and CRN653 and EDN671) or (EDN671 and 2 of CRN666, CRN668, CRN670, CRN672, CRN674, CRN676, CRN678, CRN680, CRN684) . CRN651 can be studied in the same teaching period as EDN672
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit develops your knowledge and skills in introductory educational research principles to be applied when researching your own teaching practice. Quantitative and qualitative research skills will be explored as methodologies for teacher-research. Analysing classroom performance data will be discussed highlighting the trends that provide information relevant to teachers. The unit considers the range of data sources available to teachers including self-collected data (e.g. running records) and/or data from standardised test reports. The unit will develop your evaluation skills around the achievement of students and requirements for teaching

strategies to address their learning needs. The unit will present you with value-added data exemplars from real (de-identified) school standardised test data. By the end of this unit, you will show general understanding and facility with the use of data. This unit prepares you for the final semester capstone mini-action research project.

EDN673 Culture Studies: Indigenous Education

Pre-requisites	EDN662 or EDN672
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit begins with an analysis of the student's own cultural place in the Australian context and moves toward understanding about Aboriginal and Torres Strait Islander perspectives on history and contemporary issues. Students examine why Aboriginal and Torres Strait Islander students have been continually disadvantaged by the Australian education system and are supported to develop theoretical understandings about cultural standpoint and principles for embedding Aboriginal and Torres Strait Islander perspectives in an educational context.

EDP415 Engaging Diverse Learners

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

Increasingly rich and complex opportunities are offered to today's learners to engage in personal, contextual and technological approaches to knowledge construction. To participate effectively in modern learning environments, and to be able, in the future, to support the learning of diverse learners, students completing this unit will develop an understanding of the processes of learning, and the influence of both individual differences and socio-cultural contexts in personal, social and professional development.

EDP416 The Professional Practice of Educators

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-1, SEM-2

This Education Studies unit builds your professional and ethical capacity as a Teacher by developing a social science framework for understanding and analysing the professional practice of educators in local and global contexts. The unit will develop your knowledge of the social, cultural, and political 'strategies' shaping professional practice and education today. It will also develop your understanding of the 'identities' produced by these strategies and of the ways in which they might be ethically and equitably managed in all phases of learning.

EDP422 Early Years Field Studies 2: The Professional Practice of Educators

Pre-requisites	EDP421
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	External - SEM-1, SEM-2

Designated Unit. This unit prepares you for your work as a beginning teacher, on completion of this course. It provides you with the opportunity to identify and discuss professional issues for beginning teachers in the early years. It aims to develop strong links between research, theory and practice by emphasising inquiry- and evidence-based approaches to teaching and learning in early childhood settings and professional development for teachers. (33 days Field Studies).

EDP431 Middle Years Field Studies 1: Engaging Diverse Learners

Pre-requisites	MDP452 or CRP421. CRP421 can be enrolled in the same teaching period.
Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit integrates and applies the current perspectives, issues and theoretical frameworks of inclusion and diversity. It enhances the student's ability to identify and address social, cultural, political and legislative issues to provide quality inclusive educational experiences for all learners. Students will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. To do this effectively students will need to identify barriers to student learning and develop strategies to maximize educational outcomes for all students. (22 days Field Studies)

EDP432 Middle Years Field Studies 2: The Professional Practice of Educators

Pre-requisites	EDP431 and (CRP400 or CLP400). CRP400 can be enrolled in the same teaching period.
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	External - 5TP2, SEM-2

Designated Unit. This unit identifies, discusses and applies the professional issues and responsibilities the beginning teacher needs to be aware of. The students' ability to identify the crucial professional issues for them personally will be enhanced. Students will not only engage with the challenges of addressing social, cultural, political and legislative issues to provide quality inclusive educational experiences for all learners but also identify a professional development program that best accommodates their needs as a beginning teacher. (33 days Field Studies). Not available to Visiting students.

EDP441 Senior Years Field Studies 1: Engaging Diverse Learners

Pre-requisites	Curriculum Studies 1 unit. This unit can be studied in the same teaching period as EDP441
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

Designated Unit. This field studies unit integrates and applies the current perspectives, issues and theoretical frameworks of inclusion and diversity. It enhances the student's ability to identify and address social, cultural, political and legislative issues to provide quality inclusive educational experiences for all learners. Students will actively engage with the challenges and practices of inclusive education in the classroom and the broader educational setting. To do this effectively, students will need to identify barriers to student learning and develop strategies to maximize educational outcomes for all students. (22 days Field Studies). Not available to Visiting students.

EDP442 Senior Years Field Studies 2: The Professional Practice of Educators

Pre-requisites	EDP441 and Curriculum Studies 3 unit. The CS3 unit can be enrolled in the same teaching period as EDP442
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-1, SEM-2

Designated Unit. This Field Studies Unit is designed to alert you to the professional issues of ethical and equitable practice, to legal responsibilities that face any educator, and to the need to stay informed of new developments shaping professional practice. In the field study placement you will move towards becoming a graduate teacher, managing learning environments that are educationally productive, being alert to student diversity and the legislative context, as well as being mindful of the need for ongoing career enrichment and planning. (33 days Field Studies). Not available to Visiting students.

EDR703 Interdisciplinary in Education Studies (Advanced Seminars)

Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block)

This unit is a reading and seminar program that aims to broaden and deepen the student's initial perspective to

Units

include elements derived from theoretical perspectives drawn from a number of disciplines. The unit seeks to provide a context of learning for educators who seek the personal and professional benefits that the broadening and deepening of their professional knowledge affords.

EFB106 Cost-Benefit Analysis for Project Appraisal

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Cost Benefit Analysis (CBA) is a key technique used to assess the relative desirability of competing alternative uses of limited resources. CBA has a well-established theoretical foundation and is a commonly used method of economic evaluation. CBA is used to appraise investment projects, socio-economic programmes and policies with the results from CBA providing decision makers with useful information to make informed decisions. This unit provides students with opportunities to understand, analyse and apply the analytical framework of CBA across a range of industries in the public and private sector.

EFB201 Financial Markets

Pre-requisites	BSB113 or CTB113
Equivalents	EFX201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces students to the institutional structure of global financial markets, and thereby complements the understanding of theoretical finance gained in EFB210. Topics covered include the functions of financial markets, the banking and payments system, financial system deregulation, non-bank financial institutions, stock exchange operations, debt markets, foreign exchange markets and markets for financial derivatives.

EFB210 Finance 1

Pre-requisites	BSB113 or MAB126 or MXB105 or UDB104 or MZB126
Equivalents	EFX210

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit covers the following topics: an introduction to the financial institutional framework; an introduction to debt and equity instruments; financial mathematics applied to the pricing of debt and equity securities; a firm's investment decision including Net Present Value (NPV) and Internal Rate of Return (IRR); introduction to risk and uncertainty using the Capital Asset Pricing Model (CAPM) and Weighted Average Cost of Capital (WACC) concept and risk management.

EFB222 Introduction to Applied Econometrics

Pre-requisites	BSB122 or BSB123 or MAB101 or MAB233 or MXB107
Anti-requisites	EFB101
Equivalents	EFX222
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will provide students with the necessary background for advanced study in economics, econometrics and finance. It should also enable them to use basic mathematical and statistical techniques for economic and financial analysis and enable the confident and independent use of these skills. Students will be helped to understand the use of these techniques with reference to real world applications drawn from the fields of economics and finance.

EFB223 Economics 2

Pre-requisites	BSB113 or CTB113 or UDB104
Equivalents	EFB102, EFX223
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Consumer behaviour, the role of the government in market intervention, allocative efficiency and market structure are some of the fundamental issues in microeconomics addressed in this unit. Business cycles and the related issue of macroeconomic stabilisation policy are

analysed and explained within the Australian context. The significance of the international economy is described through a discussion of foreign exchange markets, the Australian dollar and the terms of trade.

EFB225 Economics for the Real World

Pre-requisites	BSB113 or CTB113
Equivalents	EFX225
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In this unit economic concepts and theories at the introductory level will be used to forensically and critically investigate current social and public issues of interest. These issues relate to consumer choice, business pricing strategies, education, inequality, unemployment and poverty, population policy, tax reform, economic growth, the environment and globalisation.

EFB226 Environmental Economics and Policy

Pre-requisites	BSB113
Equivalents	EFB334, EFX334, EFX226
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit introduces students to some of the current environmental and natural resource issues confronting society and how planners and decision-makers could better understand and address these problems using economics. This unit demonstrates that economics has a major role to play in helping us to understand and solve some of the environmental problems facing societies. It will be demonstrated that economics can often be used to help protect the environment rather than harm it. The unit would benefit those who wish to work either in the public or the private sector.

EFB240 Finance for International Business

Pre-requisites	(BSB119 or CTB119 or BSB116) and (BSB113 or CTB113)
----------------	---

Units

Anti-requisites	EFB312, MIB202
Equivalents	EFX240, IBB202
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

In this unit students analyse the ways that international operations and performance of businesses can be put at risk by changing financial and regulatory conditions across borders and determine how best to manage the exposure to this risk. This unit examines the following: the evolution of the international financial system; the foreign exchange market; the types of foreign exchange rate exposures; managing exchange; translation and consolidation risks; assessing foreign direct investment targets; comparing the performance of foreign affiliates; operations exposure to regulatory risk of tax; investment evaluation and policy changes; country risk assessment and managing country risk exposure.

EFB308 Empirical Finance

Pre-requisites	(EFB307 or EFB343) and EFB335
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit includes the following topics: a study of contemporary finance research; CAPM; beta estimation; valuation theory; market efficiency; value at risk; use of finance research tools; anomalies and extension of finance theories. Students are required to complete a research project combining theory and practice. This unit covers many topical areas in contemporary finance research. These include, but are not limited to: asset pricing; beta estimation; market efficiency; value at risk; mutual fund performance; volatility modelling; and the term structure of interest rates. Students are required to complete a research project combining theory and practice.

EFB309 Financial Derivatives

Pre-requisites	EFB344
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit explores a range of pricing models and develops students'

knowledge and skills in the application of these for derivative pricing. Students will construct and generate a variety of derivative prices and draw on discipline knowledge, technical skills and critical thinking skills to adapt these models to solve problems.

EFB311 Financial Institutions - Lending

Pre-requisites	EFB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit examines the fundamental motivations for lending by financial institutions, and the ways in which these are reflected in loan market practice. Specific topics cover the theoretical basis of lending as financial intermediation, the purpose and utilization of loans by borrowers, the major costs of lending for financial intermediaries (including a strong focus on credit costs), lenders' compensation, lending relationships, the structural features of loan agreements, loan security and enforcement, and special topics on syndicated lending and project finance.

EFB312 International Finance

Pre-requisites	EFB201 and EFB210
Anti-requisites	EFB240, IBB202
Equivalents	EFX312
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit examines the theory and practice of international finance, including: the mechanics and uses of the spot, forward, swap, futures and options markets in foreign exchange; the relationship between domestic and international capital markets; interest rate and exchange rate determination; risk management of foreign exchange; international trade finance; and evaluation of offshore investment.

EFB326 Applied Portfolio Management

Pre-requisites	EFB210
Equivalents	EFX326
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces the student to the treasury environment in which financial institutions operate. The key to the unit is the raising of funds and the management of interest rate risk. This unique hands-on unit allows students to develop these skills by trading in a simulated environment of international economic uncertainty. Students have trading parameters within which they should operate. Students must make decisions concerning source of funds, term and duration, interest rate re-set, and risk management with derivatives. Trading will be conducted over a simulated four quarter year.

EFB330 Intermediate Macroeconomics

Pre-requisites	EFB223 or EFB102
Equivalents	EFB202, EFX330
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The unit introduces macroeconomic theories and policies. During the course of the semester, you will become familiar with various macroeconomic issues faced by a modern economy, policies to solve these issues as well as the limitations of these policies. You will develop a critical view when confronted with the different theories and policies.

EFB331 Intermediate Microeconomics

Pre-requisites	EFB223 or EFB102
Equivalents	EFB211, EFX331
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is concerned with the economic analysis of the decisions and actions of consumers, firms, and governments in modern economies. It focuses on the interplay between government, private firms, and consumers and on developing the student's ability to apply

Units

microeconomic concepts to a range of economic issues and problems. The theoretical and empirical content of this unit provides the basis for understanding the decisions and actions of consumers, firms and governments in modern economies with a focus on applying theories to real world problems.

EFB332 Applied Behavioural Economics

Pre-requisites	EFB331 or EFB337
Equivalents	EFX332
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is designed to expose students to current and practical applications of behavioural economics that can be used to improve the understanding of important topics in the area of sports, arts and entertainment. It uses an economic approach to explore topics such as superstardom, fakes, fads and herding behaviour, favouritism, awards and creativity, pressure, pay and performance, positional concerns or outcome uncertainty. The theories and methodological tools learned in this unit can also be applied to other economic areas and industries.

EFB333 Applied Econometrics

Pre-requisites	EFB222 or EFB101
Anti-requisites	EFB200
Equivalents	EFX333
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops and applies econometric methods introduced in earlier units. As a final year unit the focus is primarily on applied skills using common methods that business, economics and finance graduates will encounter in practice. Students will develop technical and critical thinking skills and gain an appreciation of many of the theoretical results underpinning econometric models to assist in their application. The knowledge and skills gained in this unit will enable students to address problems encountered across the areas of microeconomics, macroeconomics and finance. These skills are essential for

research in economics and finance and for use in future employment.

EFB335 Investments

Pre-requisites	EFB201 and EFB210
Anti-requisites	EFB318
Equivalents	EFX335
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit advances the students' understanding of how investment decisions are made, what securities to invest in, how they fit in a portfolio, the impact of transaction costs, the risks associated with investing and performance evaluation of the investment process. This unit aims to provide students with an intermediate to advanced level of investment decision making skills which are essential for finance students in their personal and professional lives.

EFB336 International Economics

Pre-requisites	EFB223 or EFB240 or EFB201
Anti-requisites	EFB314
Equivalents	EFX336
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

International economics advances student understanding of global markets and positions through theories and analyses of trade, intervention, currencies, current transactions, capital positions and obligations in an interdependent world. Through considerations of international positions and competitiveness the unit develops a framework for understanding of the prospects and challenges facing firms, organisations, institutions and governments active in the international economy and of the wider issues of global progress and stagnation.

EFB337 Game Theory and Applications

Pre-requisites	EFB223
Equivalents	EFX337

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit presents the basic concepts of game theory and its application to economic phenomena, focussing on how individuals and firms deal with uncertainty and situations involving strategic interactions. The theoretical concepts are illustrated with applications from both the private and public sectors. Contents include the economics of uncertainty and information, asymmetric information, auctions, bargaining, strategy and voting and evolutionary game theory.

EFB338 Contemporary Application of Economic Theory

Pre-requisites	(EFB330 or EFB202) and (EFB331 or EFB211) and (Completion of 168 credit points)
Equivalents	EFB329, EFX338
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

EFB338 is a unit designed to summarize your studies in economics. The unit comprises usually of three or more topics of current research in economics. The topics cover micro and macro economics, trends in current theoretical, empirical and economic policy research. The unit is designed to develop your ability to summarise, evaluate and criticise research findings as well as to introduce you to how research in economics evolves to allow you to keep up with the progress made in economics after your degree.

EFB339 Financial Planning and Investments

Pre-requisites	EFB210
Anti-requisites	AYB250
Equivalents	EFB230
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2 (Block)

This unit builds on the introduction to finance concepts, theories and skills that students gain in EFB210 and earlier Finance units. Building on prior knowledge and skills this unit focuses on

Units

financial planning and financial decision making including the regulatory framework underpinning the decision making process. It also looks at the key instruments and methods used for financial planning and decision making in industry. Drawing on financial planning theory, students will gain analytical, evaluative, technical and advisory skills to address individual investor client needs including solving financial planning problems and designing financial plans with reference to superannuation, managed investments and deposit products.

EFB342 Workplace Experience in Economics and Finance

Pre-requisites	(EFB343 or EFB307) or (EFB330 and EFB331)
Other requisites	Subject to Unit Coordinator approval of an appropriate placement within industry; and GPA: 4.5 or above
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit aims to expose students to an organisational setting in the fields of economics and finance where theoretical knowledge is applied to solving real world problems. In the process of application, students' understanding of their learned knowledge will be enhanced. The unit will also help students appreciate the provisional nature of knowledge and the importance of dealing with incomplete information and the ambiguity/complexity of information in these fields.

EFB343 Corporate Finance

Pre-requisites	EFB210
Anti-requisites	EFB307
Equivalents	EFX343
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit develops and extends the knowledge and skills fundamental to the financial management of an organisation introduced in EFB210 Finance 1. Topics examined include: working capital management, capital investment decisions (including: estimation of required rates of return, sensitivity and

scenario analysis, and the valuation of real options), issuance of corporate securities and capital structure, payout policy, mergers and acquisitions, and financial restructuring.

EFB344 Risk Management and Derivatives

Pre-requisites	EFB201 and EFB210
Equivalents	EFX344
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit develops knowledge and skills required to identify, measure and hedge the risks associated with an exposure to financial securities. It also develops knowledge of a variety of derivative contracts with a specific focus on how these securities are priced and how they are used to manage and hedge risk. Topics in risk management include: understanding risk, measuring risk, managing risk and exploring the value of risk management. Subsequent topics on derivatives include: the pricing and use of forwards, futures, swaps and options contracts.

EFB360 Finance Capstone

Pre-requisites	EFB335 and (EFB307 or EFB343)
Equivalents	EFX360
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is designed to encompass the theory and knowledge gained in the entire Finance Major. The topics included in this unit are project evaluation, investment analysis, corporate valuation and advanced financial decision making. This unit aims to provide students with the forum to practice their finance skills in an applied setting which acts as a bridge between university studies and real-world employment in the financial services industry.

EFN405 Applied Economics

Anti-requisites	GSN203, GSN411, GSN414, GSN491, GSN492, GSZ491
-----------------	--

Equivalents	EFX405
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-1, SEM-2

This introductory unit provides students with a broad understanding of the economic forces that impact consumers, business and government. It develops skills that they will continue to apply in later units where more complex situations and issues are covered. Consumer behaviour, the efficiency of markets, and market structures are some of the microeconomic topics addressed in this unit. The macroeconomic topics include the cost of living, economic growth, the financial system, and fiscal and monetary policy.

EFN406 Managerial Finance

Anti-requisites	GSN413, GSN423, GSZ413
Equivalents	EFX406
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

This unit gives students an essential grounding in applied finance, addressing fundamental issues of how we can use finance in a commercial sense and how this impacts critical organisational and managerial decisions in an increasingly complex and demanding financial environment. This unit introduces students to key themes in finance including Financial Markets and Instruments, Market Efficiency, Risk and Return and Cost of Capital. It also addresses key financial decisions of the firm including investment, dividend and financing decisions.

EFN408 Special Topic - Economics, Banking and Finance A

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

EFN412 Advanced Managerial Finance

Pre-requisites	EFN406
Equivalents	EFX412
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit expands on material introduced in EFN406 Managerial Finance. Its objective is to examine the key decisions made by corporate financial managers including investment, financing and dividend decisions. Topics include: the financing decision and capital structure; debt versus equity; lease versus debt; the dividend decision and dividends versus capital gains; franked versus unfranked income; firm valuation; the free cash flow model; evaluation of takeovers; risk, return and diversification; the CAPM model, its practical application and its relationship to the efficient market hypothesis; forwards, futures, options; risk management using financial derivatives, and real options.

EFN414 International Finance

Pre-requisites	EFN406
Anti-requisites	EFN417
Equivalents	EFX414
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit extends the knowledge and skills students have gained in prior units by exploring the influences, issues and challenges of the international environment. Students will investigate financial management issues arising in international settings and develop problem solving and decision making skills essential for financial practice. This unit introduces the theory and practice of international finance, the relationship between domestic and international financial markets, international parity conditions and arbitrage, foreign exchange risk management, country and political risk management, international trade finance, international portfolio investment, multinational cost of capital and capital structure, international capital budgeting and foreign direct investment.

EFN415 Security Analysis and Portfolio Management

Pre-requisites	EFN406
Equivalents	EFX415
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit focuses on the theories and techniques found in security analysis and investment management. It develops essential theoretical and practice-based knowledge and skills, including research, analysis and technical skills required for project valuation.

EFN416 Treasury and Portfolio Management

Pre-requisites	EFN406
Equivalents	EFX416
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces the student to the treasury environment in which financial institutions operate. The key to the unit is the raising of funds and the management of interest rate risk. This unique hands-on unit allows students to develop these skills by trading in a simulated environment of international economic uncertainty. Students have trading parameters within which they should operate and decisions must be made concerning source of funds, term and duration, interest rate re-set, and risk management with derivatives. Trading will be conducted over a simulated four quarter year.

EFN420 Introduction To Financial Management

Equivalents	EFX420
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit introduces students to key knowledge and skills necessary, not only in a commercial sense, but also from the perspective of individuals functioning in an increasingly complex and demanding financial environment. Subsequent units

will build on and extend the knowledge and skills gained in this unit.

EFN421 Financial Planning and Strategies

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit aims to give students a solid grounding in the world of Financial Planning and Superannuation. This will involve gaining knowledge of financial markets and instruments as well as the appropriate regulatory framework.

EFN422 Economics and Data Analysis

Anti-requisites	EFN405, EFN419, GSN403, GSN411, GSN414, GSN491
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

The aim of the unit is firstly to provide a basic understanding of how market conditions are determined and, in particular, it investigates market forces that drive production and prices in both individual markets and the national economy. Secondly, the aim is to help students to develop a statistical way of thinking to assist with decision-making in the absence of complete information in real world situations.

EFN423 Health Economics: Applications and Policy

Anti-requisites	PUN211
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit provides a strategic overview of economics as applied to the health sector. The unit develops a set of skills with applications to health and financial management decision-making principles and processes. After developing an understanding of basic economic concepts you will learn to apply this

knowledge to financial management in Australian and international health care settings. This will include a discussion and analysis of health evaluation. Economics aids in making better informed and logically coherent decisions. The unit will equip emerging health managers with skills and theory to enable them to effectively manage resources and the associated financial implications for their area or department

EFN424 Equity Trading Floor

Pre-requisites	EFN405 and EFN406
Equivalents	EFX424
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The aim of the unit is to develop students' critical thinking skills and to help them see issues from a range of viewpoints and perspectives. Additionally, the unit aims to develop students' research, reflection and technical skills through the delivery of a large scale academic style portfolio that reflects their transition from theory to strategy and trading and reflection. The unit is NOT designed to be taken as a traditional book learned class. Reading and knowledge is gained from many sources including case studies, books, journals and newspapers.

EFN425 Financial Markets and Institutions

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit introduces students to a range of key concepts and ideas in finance, giving students grounding in how financial markets operate and also the ability to critically apply knowledge and skills to address real world problems and issues arising in financial markets. The unit considers key developments in the rapidly changing financial environment and the role of financial theories and models in this context. Students are introduced to theories, institutions and instruments to better understand how financial markets operate, to consider the stresses on these markets and to address problems and issues that arise. Students will develop and practice critical thinking skills through

the practical application of finance knowledge and skills to analyse and address real world financial market events in addition to considering ethical perspectives and behaviours in financial markets.

EFN426 Applied Research in Finance

Pre-requisites	EFN406 and EFN420
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit develops students' technical skills for approaching a research problem from an econometric approach. Students will gain basic skills in the use of regression methods and learn to make determinations as to when and where these methods can appropriately be applied. With reference to a variety of research projects, students will learn how to set up the research problem in terms of the modelling framework, undertake a range of statistical analysis, carry out estimation and inference and make informed conclusions. The knowledge and skills gained in this unit will enable students to work effectively with the variety of data and business problems and will have further application in addressing problems that they encounter in the subsequent units of this course.

EFN500 Contemporary Macroeconomic Theory

Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces students to contemporary theoretical approaches in the field of macroeconomics and applies these approaches to a range of macroeconomic issues. It places these theories in their historical and philosophical contexts. This will provide students with a deeper appreciation of macroeconomic policy debates as well as a more complete insight into the macroeconomic problems of inflation,

unemployment, inequality, underdevelopment and economic fluctuations.

EFN502 Developments in Microeconomic Theories

Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit involves the discussion and analysis of contemporary developments in microeconomic theory, such as game theory and its applications, consumer behaviour, problems of collective action, evolutionary economics, the economics of voting, externalities, public goods, and the market mechanism. It explores refinements in microeconomic theory which have been contemporaneously used in the development of government policies in areas such as the environment, energy, public enterprises and industrial development.

EFN505 Financial Risk Management

Pre-requisites	EFN412 and EFN426
Equivalents	EFX505
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The unit covers the main areas of modern risk management. The focus is on measuring risks in financial institutions. Particular attention is paid to developing understanding of the analytical techniques prescribed by the BIS Accord II. Topics covered include market risk, credit risk and operational risk.

EFN507 Advanced Capital Budgeting

Pre-requisites	EFN412
Equivalents	EFX507
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

Units

- SEM-1, SEM-2

Topics in this unit include: capital investment analysis, the NPV rule, adjusted present value, replacement decisions, retirement decisions, unequal lives, optimal life, cost of capital, estimating beta, capital rationing, valuation of new issues, mergers and takeovers, analysis of financial and leverage leases, the impact of recent taxation changes on the financing, dividend and investment decisions of the firm, capital budgeting in an international context, access or infrastructure pricing, and real options. The course includes a series of case studies, problems and exercises, which require the student to apply the theory they have learned, to practical situations not covered in normal undergraduate courses. A basic understanding of spreadsheets is assumed.

EFN508 Econometric Methods

Anti-requisites	BSN506
Other requisites	Unit Coordinator Approval and undergraduate degree with a major in Economics or Finance required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1 (Block), SEM-2 (Block)

This unit provides a comprehensive grounding in the econometric methods necessary for conducting research. Recent contributions to the econometric literature are studied.

EFN509 Policy Economics and Evaluation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This Economics Honours unit lays emphasis on economic policy and evaluation. The primary purpose of this unit is to focus on the application of microeconomic and macroeconomic principles to informing contemporary commercial, economic and social policy in Australia, and the global economy. This unit has a strong focus and will illustrate

in a practical manner how economic tools can be used to assess policy issues and to evaluate potential solutions. The unit will complement theory with appropriate tools of analysis (inclusive of both analytical methods and model-based arguments).

EFN511 Finance Theory

Equivalents	EFN504
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides an advanced coverage of the theory of finance, building on work done in undergraduate courses. Topics include: basic utility theory and risk aversion, investment decision, market equilibrium, the capital asset pricing model, arbitrage pricing theory, and multiperiod investment decisions. The unit provides a theoretical basis for further specialisation in this area.

EFN512 Asset Pricing

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides an advanced coverage of the empirical asset pricing literature, building on work done in Finance Theory and Econometric Methods. The unit will provide a broad coverage of key empirical work in a broad range of asset pricing and risk management, with topics including: understanding the distribution of financial returns, testing asset pricing models, stochastic discount factors, momentum, and aspects of financial risk management.

EFN513 Corporate Finance

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is an advanced unit in Corporate Finance. The primary purpose of this unit is to expose and familiarise students to the major literature and recent developments in corporate finance research. This unit has a strong focus on research and covers a number of major subject areas in corporate finance, including capital raising, capital structure,

payout policy, and corporate governance.

EFN514 Behavioural Finance

Equivalents	EFX514, EFN427
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Behavioural Finance has revolutionised our views about how investment and finance decisions are made and about market price efficiency and market dynamics. Using insights from psychology and economic theories of decision, this unit looks at the decision making processes of investors and financial firm managers and also the dynamics of financial markets.

EFN515 Economic and Financial Modelling

Pre-requisites	EFN415
Anti-requisites	AYN419, EFN503
Equivalents	EFN410, EFX410, EFX515
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces students to the modelling techniques which are frequently used in business and financial environments. Modelling is used as an aid to decision-making, as a means of forecasting important variables and as a planning and analysis tool. Various modelling exercises are used to illustrate the use of these modelling techniques in an economic and financial context.

EFN555 Advanced Applications in Finance

Pre-requisites	EFN412 and EFN415
Equivalents	EFX555
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This capstone unit aims to consolidate students' analytical, problem-solving, and decision-making skills to effectively

Units

respond to complex and contemporary problems and issues in finance. Real-world case studies are used to connect student learning across the Applied Finance program to facilitate employment-focused teamwork.

EFX201 Financial Markets (Outbound Exchange)

Equivalents	EFB201
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

EFX210 Finance 1 (Outbound Exchange)

Equivalents	EFB210
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

EFX222 Quantitative Methods for Economics and Finance (Outbound Exchange)

Pre-requisites	BSB122 or BSB123 or MAB101 or MAB233 or MXB107
Anti-requisites	EFB101

Availabilities	External - XCH-2

EGB100 Engineering Sustainability and Professional Practice

Equivalents	ENB100
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is an introductory unit for all engineering disciplines. It provides you with a wide appreciation of the engineering profession, its achievements and current and future challenges. It will introduce you to the concept of sustainability and how sustainability impacts current and future engineering ventures. It will also develop your professional skills that will be essential to your functioning as an effective professional engineer both individually and as part of a team.

EGB111 Foundation of Engineering Design

Pre-requisites	EGB100 (can be enrolled in the same teaching period)
Equivalents	ENB150
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Analysis, designing, building, testing and maintaining are the core elements of engineering; Foundations of Engineering Design provides you with fundamental knowledge and skills to design, build and test simple engineering systems through a number of exploratory, hands-on activities, leading to the design and build of a practical engineering system. This unit is the first of a series of engineering design units which form the backbone of the engineering program.

EGB113 Energy in Engineering Systems

Anti-requisites	PVB101
Equivalents	ENB130
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Engineers work with numerous kinds of systems where consideration must be given to the energy within the system. This unit introduces the student to the concepts of energy in the context of real engineering systems. The inter-relationships of between forces, motion and energy (in systems composed of liquids, solids or gases) is described as related to the flow of energy within these engineering systems. After an introduction to engineering units, concepts and data, Newton's first and second laws are used in the description of system motion and the concepts of force and energy, conservation of momentum and conservation of energy are introduced and described. Thermodynamic processes, certain thermo-physical parameters and the first and second law of thermodynamics are introduced and used to describe simple engineering systems. This is then expanded to include the generation and transport of energy through these systems.

EGB120 Foundations of Electrical Engineering

Pre-requisites	EGB113 or PVB101
Equivalents	ENB120
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces you to basic electrical circuit concepts. It requires you to perform circuit analysis, circuit synthesis, and the measurement and testing of relevant quantities within circuits.

EGB121 Engineering Mechanics

Pre-requisites	EGB111 or EGB113 or PVB101. EGB111 can be enrolled in the same teaching period as EGB121
----------------	--

Units

Equivalents	ENB110
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is a foundation engineering unit that will develop the necessary skills in analysing mechanical and civil engineering systems (cranes, buildings, bridges and mechanical equipment) to maintain equilibrium leading to the determination of direct, bending and shear stresses. This unit forms the foundation for the units in Stress Analysis and Structural Analysis.

EGB123 Civil Engineering Systems

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is a foundation civil engineering unit that will introduce you to civil engineering systems and thinking through local urban site investigations and large industry project contexts. You will integrate systems thinking and information science with skills in investigation, analysis and synthesis, and written and visual literacy that underpins civil engineering practice. You will develop both independent and collaborative strategies for managing and completing tasks on time in real world contexts taking into account social, economic, environmental and political issues with guidance from academic and industry leaders. This unit provides the foundation for most of your second year units in a major civil engineering study area. It also exposes you to areas of future work and study choice (e.g. Study Area B options).

EGB210 Fundamentals of Mechanical Design

Pre-requisites	EGB111 or ENB150 or EGB113 or PVB101
Equivalents	ENB215
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Mechanical Design forms the backbone of the Mechanical Engineering Degree. It brings together fundamental engineering

units such as Applied Mechanics, Mechanics of Solids, Fluid Mechanics and Materials Study and is a common unit for students studying Mechanical Engineering, Medical Engineering and Mechatronics. It will develop systematic knowledge and practice of procedures of design, design for sustainability, universal design, concept development, creative problem solving, basic component design, computational schemas in design, manufacture & materials. It lays the basis for advanced study in Mechanical Design.

EGB211 Dynamics

Pre-requisites	(EGB113 or ENB130 or PCB136 or PCB150 or PVB101) and (MZB126 or MAB126 or MAB180 or MAB131 or equivalencies)
Equivalent s	ENB211
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

In this introductory unit, you are introduced to the concepts of dynamics in the context of real engineering systems. The basic principles for dynamics of particles and rigid bodies in 2D are introduced and discussed as related problems within various engineering systems. A brief introduction to the vibration of the single-degree-of-freedom systems is also included.

EGB214 Materials and Manufacturing

Pre-requisites	EGB121 or ENB110
Equivalents	ENB231, ENB331
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Engineers design and make product out of materials using appropriate processing methods with minimum environmental impact and costs. They need to know the interactions and interrelationship between processing, microstructure, properties and performance of various engineering materials in order to utilize new designs and fabrication. This unit introduce the fundamentals of engineering materials and their manufacturability, deformation of materials at the micro-scale and how

mechanical properties of materials can be tailored by mechanical processing and heat treatments. This knowledge along with a range of complex deformation and machining processes (including casting, bulk deformation, material removal, mechanics of metal cutting and other non-traditional manufacturing processes) are important to graduate engineers in their design and decisions.

EGB220 Mechatronics Design 1

Pre-requisites	EGB111 or ENB150
Equivalents	ENB229
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Mechatronics Design 1 is a project unit with a hands-on introduction to mechatronics. You will be introduced to the basic concepts in mechatronics, focusing on the mechanics, electronics, and embedded software principles. The unit focuses on the research, design, and implementation of a mechatronic product to conform to a customer's needs. This is the first in a series of design units specifically for Mechatronics, building on your Introduction to Design unit in first year.

EGB240 Electronic Design

Pre-requisites	EGB120 or ENB120
Equivalents	ENB245
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is an introduction to applied electronic circuit design. It will provide you with experience and confidence to draw upon theory, literature and CAD tools to synthesise electronic circuit designs to solve real world problems. In this unit you will complete two practical projects (individually and as part of a team) to design, build, evaluate and document simple electronic circuits.

EGB241 Electromagnetics and Machines

Pre-requisites	(EGB120 or ENB120) and (MZB126 or MAB127 or ENB246)
----------------	---

Units

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit covers static electric and magnetic fields and carries on to power frequency time varying fields used in AC and DC machines and wave propagation on a transmission line. The generalised concepts of capacitance and inductance as well as the interaction of fields with materials are developed. It also covers electromagnetic induction, wave propagation, transmission line theory and the basics of the DC machines as well as 3 phase power and AC induction motors. It links to work previously developed in EGB120 Foundations in Electrical Engineering, and prepares students for more advanced studies in EGB341 Energy Supply and Delivery.

EGB242 Signal Analysis

Pre-requisites	(EGB120 or ENB120) and (MZB126 or MAB127 or ENB246 or equivalencies)
Equivalents	ENB242
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The unit introduces concepts of signals and systems in the context of electrical and electronic circuits. In particular, the unit introduces frequency domain analysis of signals and systems, and provides the foundation for later units in EGB348 Electronics, EGB342 Telecommunications and Signal Processing, and EGB345 Control and Dynamic Systems. The unit introduces important mathematical concepts and transforms, such as Fourier and Laplace, which are used across a large number of electrical engineering units.

EGB243 Aircraft Systems and Flight

Pre-requisites	(EGB113 or PVB101) and MZB126
Equivalents	ENB121
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Aircraft systems and flight introduces you to aircraft systems and the principles of flight. Utilising the skills and knowledge

you acquired in Introductory Engineering Mathematics and Engineering Computation, this unit introduces the principles of flight through aerodynamics, examines the systems on an aircraft with a particular focus on aircraft avionics, and examines the regulatory and air management environment in which aircraft operate. Your skill and knowledge in this area will be further advanced in the Unmanned Aircraft Systems unit.

EGB260 Operations Management and Process Economics

Pre-requisites	EGB363
Equivalents	ENB260
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit will cover material that allows the Process Engineer to maximise the profitability of a factory. The Operations Management subsection covers quality management, operational scheduling and project management systems. The financial implications of decisions are covered in the Process Economics subsection through cost estimation, Discounted Cash Flow analysis and sensitivity analysis as measured against standard financial performance measurements. The unit will also cover communication and leadership in an operations management context.

EGB270 Civil Engineering Materials

Equivalents	ENB273
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This module starts with an overview of the world of materials and materials selection, followed by an analysis of why and how concrete is used in construction and the fundamental knowledge of soils and structural steels. The constituent materials used in concrete (cement, sustainable cementitious materials, aggregate, and admixtures) are studied with emphasis on their influence on the microstructure of concrete. The focus is then on the fresh properties and mechanical performances, behaviour of concrete under different types of loadings and temperatures, and durability. The

module also introduces structural steel and steel corrossions. And it will end up with introduction of soil concepts and materials which will provide a basis for soil mechanics. The module is taught as a series of lectures and embedded informal tutorials. This unit prepares you for the further study in analysis, design, and maintenance of concrete structures. It also equips you with basis for steel structures and soil mechanics.

EGB272 Traffic and Transport Engineering

Pre-requisites	MZB126
Equivalents	ENB376
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is an intermediate civil engineering unit that will develop the necessary theoretical and analytical knowledge of traffic and transport science and engineering analysis. It will develop cognitive skills and applications of investigation, analysis, synthesis and problem solving, written and visual literacy, needed to address complex traffic and transport issues and challenges.

EGB273 Principles of Construction

Equivalents	ENB275
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is an intermediate level unit that introduces students to the principles of construction, and its tools and techniques necessary for their infrastructure designs to be turned to reality. The student will learn how to combine these tools and techniques and apply them diligently to ensure safety and constructability of designs.

EGB275 Structural Mechanics

Pre-requisites	EGB121 or ENB110
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

As an engineer, you will need to understand the mechanics of structures through analysis for appropriate design of components and systems such as buildings and bridges. In this unit the principles learnt in the introductory unit of engineering mechanics will be developed to enhance your understanding of the methods of analysis of statically determinate and indeterminate structures and their response to loads. The topics taught include moment distribution, bending moment and shear force diagrams for structures using indeterminate analytical and computer methods, principle of virtual work and its application for deflection calculations, transformation of stresses, Mohr's circle, torsion, shear flow, shear centre, unsymmetrical bending, the principle of compatibility and combined loading of structural members.

EGB314 Strength of Materials

Pre-requisites	(EGB121 or ENB110) and (MZB126 or equivalencies)
Equivalents	ENB212
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces the analysis of stress and strain in engineering components and systems such as principal stress and maximum shear stresses, stress transformation, thin walled structures, combined loading, yield criteria, and introduces the buckling of columns. This unit is located in second year and builds on your first year work in engineering mechanics.

EGB315 Materials Degradation

Pre-requisites	EGB214 or PVB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

After studying Fundamentals of Mechanical Design and Design of Machine Elements, in this unit you will study design of different systems of motor racing vehicles. This will accomplish systematic study of Mechanical Design and will enable you to carry out design of race vehicles and prepare them for a competition. Attention will be paid to styling and ergonomics as well as construction methods used in building

race vehicles. The topics covered include: Introduction. Concept development of a race vehicle. Tyre selection. Suspension geometry, components and alignment. Brakes. Race car handling. Engine and engine tuning. Drive train (gearing and differentials). Frame and body. External and internal aerodynamics of a race vehicle. Driver compartment (fitting and comfort). Testing and preparation for a competition. Safety in motor racing (accident avoidance and driver protection).

EGB321 Dynamics of Machines

Pre-requisites	EGB211 or ENB211
Equivalents	ENB312
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit focuses on the application of the theory of kinematics and kinetics to the typical components of real world machines. This unit will enable you to analyse displacement, velocity, acceleration and forces in machine components (gears, cams, linkages) including vibrations in multi degree of freedom systems. Mathematical concepts required for this unit will be introduced in the lectures to scaffold the learning of Dynamics of machines. The capability of analysing these are essential to graduates in Mechanical Engineering, to ensure safe operation of the engineering system to improve productivity hence eliminating waste and leading to a sustainable environment.

EGB322 Thermodynamics

Pre-requisites	EGB211 or ENB211
Equivalents	ENB222
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Thermodynamic behaviour of substances; theory and application of the 1st and 2nd laws of thermodynamics; thermodynamic cycles, including gas cycles, vapour power cycles and refrigeration cycles; gas-vapour mixtures and the principles of air-conditioning; fuels and combustion.

EGB323 Fluid Mechanics

Pre-requisites	EGB113 or PVB101 or ENB130
Equivalents	ENB221
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Engineers work with numerous kinds of systems where consideration must be given to the motion within, and interactions between the system and its environment. This unit introduces the student to the concepts of fluid mechanics in the context of real engineering systems. The basic principles and equations of fluid mechanics are presented and discussed as related fluids within various engineering systems. After an introduction to the units and properties of fluids, pressure, hydrostatics and the energy and momentum equations are presented followed by an application of these principals to real fluids in piping systems. A brief introduction to the methods of computational fluid dynamics is presented and this methods utility to the solution of real world problems illustrated.

EGB336 Lean Manufacturing

Equivalents	ENB336
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Aim of this unit is to develop skills and understanding the concepts and techniques of lean manufacturing (methods engineering). These includes identifying wastes using Value Stream Mapping (VSM), 5S, SMED, JIT, plant layout, cell design with proper material handling and balance and job design with due consideration to ergonomics.

EGB339 Introduction to Robotics

Equivalents	ENB339
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to the components, systems and mathematical foundations of robotics. The unit introduces the technologies and methods

used in the design and programming of modern intelligent robots, and encourages critical thinking about the use of robotic technologies in various applications. The unit emphasizes the practical application of robotic theory to the design and synthesis of robotic systems that respond accurately and repeatably.

EGB341 Energy Supply and Delivery

Pre-requisites	EGB241
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit covers the technical and market aspects Electric Energy delivery. The structure of energy delivery from power stations through transmission and distribution to customers will be addressed, including discussion of electricity markets and reliability. Transformers, transmission lines and synchronous and induction motors will be studied as key components of electricity network. This subject will lay the foundations for EGH441 Power System Modelling and EGH440 Power Systems Analysis.

EGB342 Telecommunications and Signal Processing

Pre-requisites	EGB242 or ENB242
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Revolutionary developments in the field of Analogue and Digital Telecommunications and Signal Processing Technology have enabled improvement in the characteristics of communication systems in order to meet the performance requirements for transmission of information for private, business and industrial applications. This unit addresses analogue modulation techniques (AM and FM), base-band digital data communication techniques using time and frequency domain analyses. It also covers elements of a Digital Communication Systems and provides students with an in-depth understanding of the theory and applications of digital communication systems and technology.

EGB345 Control and Dynamic Systems

Pre-requisites	EGB242 or (ENB120 and MAB126)
Equivalents	ENB301, ENB348
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit further develops your knowledge, skills and application for control systems. The unit focuses on classical control system modelling and design. It links to the work previously undertaken in EGB242 Signal Analysis and prepares you for control units at the advanced level.

EGB346 Unmanned Aircraft Systems

Pre-requisites	EGB243 and MZB126
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to unmanned aircraft systems which builds upon your knowledge gained in aircraft systems and flight, and applies it to the field of unmanned aircraft systems. In this unit, you will apply principles of aircraft systems understanding in the context of unmanned aircraft systems, identify and analyse the context and implications of unmanned systems in the airspace environment, and apply a risk based approach to the operation of unmanned aircraft systems. Completion of this unit equips you with the knowledge and skill to undertake advanced unmanned aircraft systems.

EGB348 Electronics

Pre-requisites	EGB242 or ENB242
Equivalents	ENB240
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit further develops your knowledge, skills and application. The unit focuses on experimental design

applicable to the field, the laboratory and using ... specific software. It links to the work previously undertaken in EGB242 Signal Analysis and CAB202 Microprocessors and Digital Systems and prepares you for the final semester Capstone project.

EGB360 Plant and Process Design

Pre-requisites	(EGB322 or ENB222) and (EGB323 or ENB221). EGB322 and EGB323 can be enrolled in the same study period as EGB360
Equivalent s	ENB433
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit includes the relevant physical and thermal considerations to assist in the design of the common plant that is found across industries. An understanding of various design considerations will be included in the unit to allow you to design a series of components to varying degrees of detail for a specific purpose and under certain design constraints. The equipment to be considered will include heat exchangers cooling systems and piping systems and will provide exposure to various applications of these components. This unit is the first of the design units and builds upon your skill and knowledge developed in the foundation units and operations management and process economics, as it prepares you for process modelling and your capstone projects.

EGB363 Safety and Environmental Management

Equivalents	ENB363
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Legislation, regulation and WHS risk management strategies is included. The unit includes the design of relief systems, hazard identification and risk assessment techniques. The issues, design considerations and preventative strategies for fires and explosions will be covered. The learnings from contemporary disasters, such as Beaconsfield Mine and the Japanese

Nuclear Disaster will be covered as Case Studies. This unit covers material related to minimising the impact of a process on the environment in both the planning and operational stages. It contains a mixture of theory and team-centred learning. Specifically the unit includes environmental management principles Environmental Impact Assessment and dispersion modelling techniques for quantifying the environmental impact as well as a team-based case study.

EGB371 Engineering Hydraulics

Pre-requisites	MZB126
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is an intermediate level unit that provides knowledge on hydrodynamic (fluid flow) principles and its application in engineering. The topics to be covered are: Kinematics and continuity, The energy equation and the momentum equation for real fluids, frictional flow in pipes, application of pipe resistance formulae, fitting losses, pump characteristics and selection and pipes network analysis, similitude and dimensional analysis, lift and drag, and open channel flow. The knowledge gained in this unit will be further developed in an advanced level unit later in the course.

EGB373 Geotechnical Engineering

Pre-requisites	(EGB121 or ENB110) and EGB123 and EGB270
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit covers the aspects of geotechnical engineering at an intermediate level which includes: how water flows in soil (permeability and seepage), in-situ soil stresses, how the externally applied load distributed in soils, soil deformation, strength of soil, how to design a shallow foundation. It links to the work previously undertaken in Civil Engineering Materials and prepares you for Highways & Pavement Engineering, Advanced Geotechnical Engineering, Applications in CE Design & Construction,

and the final semester Capstone project. It also exposes you to the areas of future work and study choice (e.g: Study area B options)

EGB376 Steel Design

Pre-requisites	(EGB270 or ENB273) and (EGB121 or ENB110)
Equivalents	ENB375
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is an intermediate level civil engineering unit that will provide in-depth knowledge and understanding about the behaviour, analysis and design of steel structures. It will also provide you the necessary skills and experience in analysing and designing simple steel structures. This unit forms the foundation for a number of advanced civil engineering units in later years of the course.

EGB415 Motor Racing Vehicle Design

Pre-requisites	EGB316
Equivalents	ENB315
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

After studying Fundamentals of Mechanical Design and Design of Machine Elements, in this unit you will study design of different systems of motor racing vehicles. This will accomplish systematic study of Mechanical Design and will enable you to carry out design of race vehicles and prepare them for a competition. Attention will be paid to styling and ergonomics as well as construction methods used in building race vehicles. The topics covered include: Introduction. Concept development of a race vehicle. Tyre selection. Suspension geometry, components and alignment. Brakes. Race car handling. Engine and engine tuning. Drive train (gearing and differentials). Frame and body. External and internal aerodynamics of a race vehicle. Driver compartment (fitting and comfort). Testing and preparation for a competition. Safety in motor racing (accident avoidance and driver protection).

EGB422 Energy Management

Pre-requisites	EGB323
Equivalents	ENB422
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Topics covered in this unit include: Global energy and climate issues, the systematic process by which energy use is monitored and analysed; individual treatment of electricity, fuels and their properties, compressed air, buildings, cycle requirements, energy recovery equipment; financial analysis of proposals. Environmental aspects will be considered for each topic.

EGB423 Heating, Ventilation and Air Conditioning

Pre-requisites	EGB323
Equivalents	ENB423
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Heating, Ventilation and Air Conditioning (HVAC) is closely related to human habitation, comfort and productivity. It also consumes considerable amount of energy. With increasing global warming, it is becoming one of the most important engineering systems in modern buildings. This unit will introduce you basic principles of HVAC and refrigeration systems. It will discuss the design factors and practices related to the design and operation of HVAC systems. It will also provide you with other relevant knowledge commonly used in the building services industry. This course should therefore provide you a good basis to undertake further study, research and professional work in this field.

EGB432 Asset Management and Maintenance

Pre-requisites	EGB316 or ENB316 or EGB319 or ENB319
Equivalents	ENB432
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Units

This unit includes the following: engineering asset management policy statement; overhaul and replacement of engineering assets; organisation for maintenance; maintenance planning and control; failure mode and effect analysis; reliability, maintainability and availability analysis; risk assessment; spare parts inventory management.

EGB434 Tribology

Pre-requisites	EGB323
Equivalents	ENB434
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Tribology is the study of friction, wear and lubrication. In this unit, the knowledge you acquire is applied to solve problems prevalent in engineering. Topics covered range from the theory of friction, lubricant properties and chemistry, to the control of friction and wear by proper selection of both materials and lubricants.

EGB476 Advanced Steel Design

Pre-requisites	EGB376
Equivalents	ENB373
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is an advanced structural design unit that provides the required knowledge and skills for the analysis, design and construction of steel buildings by engaging in a steel building project on a real site.

EGD113 Energy in Engineering Systems

Anti-requisites	PVB101
Equivalents	EGB113, ENB130
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

Engineers work with numerous kinds of systems where consideration must be given to the energy within the system. This unit introduces the student to the concepts of energy in the context of real engineering systems. The inter-relationships of between forces, motion and energy (in systems composed of

liquids, solids or gases) is described as related to the flow of energy within these engineering systems. After an introduction to engineering units, concepts and data, Newton's first and second laws are used in the description of system motion and the concepts of force and energy, conservation of momentum and conservation of energy are introduced and described. Thermodynamic processes, certain thermo-physical parameters and the first and second law of thermodynamics are introduced and used to describe simple engineering systems. This is then expanded to include the generation and transport of energy through these systems.

EGD120 Foundations of Electrical Engineering

Pre-requisites	EGB113
Equivalents	EGB120, ENB120
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This unit introduces you to basic electrical circuit concepts. It requires you to perform circuit analysis, circuit synthesis, and the measurement and testing of relevant quantities within circuits.

EGD121 Engineering Mechanics

Equivalents	EGB121, ENB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This is a foundation mechanical engineering unit that will develop the necessary skills in analysing mechanical and civil engineering systems (cranes, buildings, bridges and mechanical equipment) to maintain equilibrium leading to the determination of direct, bending and shear stresses. This unit forms the foundation for the units in Stress Analysis and Structural Analysis.

EGD125 Introductory Engineering Mathematics

Anti-requisites	MAN120
Equivalents	MAB100, MAB120, MAB125, MAB180, MXB100, MZB125

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

A sound understanding of the language and techniques of mathematics is essential for any quantitative discipline, and so this unit provides an introduction to fundamental mathematical concepts especially applicable to engineering. This unit addresses the need of some students for additional preparation in their transition from high school to university, particularly those who have not studied Queensland Senior Mathematics C or equivalent.

EGD126 Engineering Computation

Equivalents	MZB126
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This unit introduces you to a structured approach to problem solving using mathematical methods and computational tools. You will develop your skills in this area by taking part in the analysis and eventual solution of a number of discipline-based real world problems, thereby exposing you to issues across more than one discipline. The accumulation of transferable applicable skills, including the use of elementary computational methods as a component of your solution strategies, will enrich your problem solving capability.

EGD270 Civil Engineering Materials

Equivalents	EGB270, ENB273
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

Civil engineers often use and specify a vast range of engineering materials for various projects. The choice of materials used in each project will depend on the conditions and performance requirements of the specific component or system with which the engineer will be engaging. Consequently, the knowledge of the basic properties of the more common engineering materials is essential to make appropriate selection and use of these materials.

EGH403 Foundations of Research and Work Integrated Learning

Pre-requisites	276cp in current course
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit facilitates the acquisition of knowledge and skills essential to engaging with, and conducting research. This unit introduces you to the research process, project planning and management, and methodologies used in science, information technology, engineering, mathematics, urban development and property economics. The learning acquired in this unit will be applied to your project which is further developed in the Project units. This unit also provides opportunities to learn from workplace experiences. It involves attendance, participation, observation, critical reflection, and report writing on workplace activities.

EGH404 Engineering Research Methods

Pre-requisites	192 Credit Points
Equivalents	EGH403
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to methods, principles and processes that are fundamental to doing good research, and relates them to professional engineering practice. It builds on your understanding of fundamental concepts and language in your engineering discipline and directly prepares you for your final year engineering project, as well as research-based professional engineering practice.

EGH471 Advanced Water Engineering

Pre-requisites	EGB371 or ENB280 or ENB378
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit covers the fundamental topics of Australian hydrology and hydraulics. The main topics to be covered are: the hydrologic cycle and its application to the estimation of runoff from small catchments, probability and risk of flooding, selection of design floods, hydrologic data, estimation of peak runoff using the Rational Method, estimation of runoff hydrographs using rainfall-runoff routing models, use of computer modelling tools for runoff estimations, the hydraulic characteristics of culverts and retention basins and the operation of urban drainage systems.

ENB205 Electrical and Computer Engineering

Pre-requisites	ENB120 or ENB103 or EGB120
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces computing fundamentals, programming in MATLAB and Excel and their electrical and computer engineering applications. It also covers single and three phase power, electrical machines, principles of transformers, electronic circuits and sensors, filters, operational amplifier applications.

ENB222 Thermodynamics 1

Pre-requisites	(ENB130 or EGB113 or PVB101) and (ENB221 or EN40MJR-PROCENG)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Thermodynamic behaviour of substances; theory and application of the 1st and 2nd laws of thermodynamics; thermodynamic cycles, including gas cycles, vapour power cycles and refrigeration cycles; gas-vapour mixtures and the principles of air-conditioning; fuels and combustion.

ENB240 Introduction To Electronics

Pre-requisites	ENB103 or ENB120 or EGB120
Equivalents	EEB312
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Module Electronics A provides a basic understanding of the characteristics and operation of discrete semiconductor components. Electronic circuit design is introduced with emphasis on the small signal low and high frequency response of those circuits. Module Digital Electronics gives students a good grounding in the basic principles of digital design, with particular regard to the fundamentals of digital number systems, Boolean algebra, combinational and sequential logic design.

ENB241 Software Systems Design

Pre-requisites	ENB246 or INB104
Equivalents	EEB612
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit introduces students to Software Engineering by considering a whole Software Lifecycle. Each step of the lifecycle is treated in detail, such as concept phase, requirement definition, software design, human-computer interaction, implementation, audits, and maintenance. Software design principles and techniques are presented as well as real-time system design. CASE development tools are briefly introduced as well as object oriented programming for which a structured Object Oriented Analysis and Design are considered.

ENB246 Engineering Problem Solving

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces students to the use of computers as tools for solving engineering problems. MATLAB is introduced as a numerical computing environment with the capacity to support complex mathematics and to be programmed to solve specific engineering problems. Stand alone application development using C++ is introduced as a means of exposing students to the high and low level computer programming concepts that are necessary to the

implementation of engineering solutions in hardware specific programming environments.

ENB270 Engineering Mechanics of Materials

Pre-requisites	ENB101 or ENB110 or EGB121
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces calculating the stress produced in various members of a structural system due to the forces applied to them, and how to determine the design specifications (size and shape) of the members to withstand the forces to prevent the structural system failing.

ENB272 Geotechnical Engineering 1

Equivalents	CEB209, CEB232
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Soil mechanics is a part of geotechnical engineering, soil types, their description, classification and engineering properties. The unit includes the following: granular and cohesive soil classification systems; volume and mass components; density and air voids; determination of soil geostatic vertical pressures; pore water pressures and effective stress; permeability theory and fluid seepage in soil, with erosion and piping analysis; soil shear strength assessment and application to retaining wall lateral pressures; retaining wall design; slope stability analysis and stabilisation. Computer simulation and analysis programs are used where appropriate.

ENB274 Design of Environmentally Sustainable Systems

Pre-requisites	BEB200 or ENB200 or ENB100 or UDB100 or SCB110 or EGB100
Equivalents	CEB214, UDB214
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will provide you with an understanding of the principles of site analysis, site investigation and planning for a selected site covering sustainability issues in the following areas: Sustainable Transport, Land Planning including assessment of the surrounding suburbs, Water and Wastewater Management and Environmental Impact Assessment. This unit extends and applies the knowledge developed in first year design based engineering units to important issues such as site analysis, site investigation, development of site planning criteria, site planning, environmental management and quality, pollution prevention and control, and resource and waste management.

ENB276 Structural Engineering 1

Pre-requisites	ENB102 or ENB270
Equivalents	CEB215
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit includes the following: development of the method of moment distribution and its application in analysis of continuous beams and frames; theory of influence lines and its application to determine the effects of moving loads on beams and trusses; 'pattern loading' on frames and continuous beams; behaviour of reinforced concrete members; applications in the design of beams and columns.

ENB277 Construction Engineering Law

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

A study of the Workplace Health and Safety Act 1989/1990, the regulations applying and Codes of Practice. The application of this legislation to a Site Safety Management Plan. Basic understanding of negligence, duty of care, nuisance, fraud and conversion. Contract Law including elements of contract, content of a valid contract, collateral, contract misrepresentation, implied terms; formal requirements and part performance; contract documents and their interpretations; substantial

performance and quantum meruit.

ENB280 Hydraulic Engineering

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit primarily provide a basic understanding of hydraulic (fluid) principles and an understanding of the use of these principles in engineering applications. The main topics to be covered are: Units and properties of fluids, Forces in static fluids, Buoyancy, Kinematics and continuity, The energy equation and the momentum equation; Similitude and dimensional analysis, Lift and drag, Frictional flow in pipes, Application of pipe resistance formulae, Fitting.

ENB301 Instrumentation and Control

Pre-requisites	MAB126 or MAB182 or MAB132 or MZB126
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit introduces the student to classical control systems, analysis and synthesis, and implementation in an industrial control context. It introduces the principles of electrical measurements and instrumentation, sensors, PLC, DSC and industrial networks, and foundation of feedback control theory for engineers.

ENB311 Stress Analysis

Pre-requisites	ENB102 or MZB126 or ENB212 or EGB314
Equivalents	MMB212
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Advanced analysis of stress and strain; experimental stress analysis techniques; failure criteria and factors of safety, axisymmetric systems; energy methods; plates and shell theory, principles of finite element analysis, and torsion of non-circular sections.

ENB312 Dynamics of Machinery

Pre-requisites	ENB211
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Kinematic and dynamic analysis of planar linkages and mechanisms; multi-degree of freedom systems with steady and transient vibrations, Introduction to noise.

ENB313 Automatic Control

Pre-requisites	ENB211 or EGB211
Equivalents	ENB301
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to the theory and practice of control systems engineering. The unit introduces system modelling principles for mechanical, electrical and electromechanical systems, using the Laplace transform to build transfer-function models of system components. The unit emphasizes the practical application of control theory to the analysis and design of feedback systems to ensure stability, reduce steady state errors and improve transient response.

ENB314 Industrial Noise and Vibration

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit is about the study of noise and vibration measurement and control which is experienced in industry. It includes a basic understanding of the theories and capable of modelling and predicting noise and vibration in an industrial environment. This unit will provide you with sufficient experience in instrumentation and measurement of noise and vibration and to apply them in industry.

ENB316 Design of Machine Elements

Pre-requisites	ENB215 or EGB210
Equivalents	MMB381

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Analysis of operating conditions and their impact on design solutions, design of fasteners, shafts and other mechanical components, design of springs, Design for manufacturability, fundamentals of lubrication, computer aided design (solid modelling), frames and housings.

ENB317 Design and Maintenance of Machinery

Pre-requisites	ENB316
Equivalents	MMB382
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Design of equipment for special applications such as pressure vessel, food processing, Design of machine system, Optimisation of design, machinery failure, prediction, analysis and prevention. Design for reliability application of FMEA, Condition monitoring, ethics, Fundamentals of friction, wear related to design, Failure analysis & OH&S.

ENB318 Biomechanical Engineering Systems

Pre-requisites	ENB211 or EGB211
Equivalents	MMB391
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Topics covered in this unit include an appreciation of the mechanics of the tissues of the joints (micro mechanics or tissue mechanics) and the function of the body during normal activities (macro-mechanics or biomechanics). This unit is designed to develop an understanding of the complex properties of the individual tissues and practical competencies in the evaluation of human function and performance from a biomechanical perspective. Biomedical engineers require the ability to analyse the mechanics of the human body for applications such as prosthetic design (both artificial limbs and replacement joints), design of assistive devices for people with disabilities,

sporting performance, ergonomic tasks, and other health related areas.

ENB319 Biomechanical Engineering Design

Pre-requisites	ENB215
Equivalents	MMB392
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is structured to further develop the engineering design skills of students, with particular emphasis on the role of computer-aided design (CAD), materials selection, manufacturing processes, assembly and maintenance in the design and management of bio-engineering devices. A knowledge of manufacturing processes, fundamentals of engineering design, engineering drawing and engineering materials is assumed. Contents include design for manufacture, materials selection, computer-aided design and solid modelling, rapid prototyping techniques, user interface, and case studies of selected medical devices.

ENB321 Fluids Dynamics

Pre-requisites	ENB201 or ENB221
Equivalents	MMB352
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Hydraulic and pneumatic systems; design, analysis and performance of pumps, turbines and fluid couplings; unsteady pipe flow; flow around solid bodies, including potential flow and boundary layers; compressible flow and shock waves.

ENB322 Biofluids

Pre-requisites	ENB201 or ENB221
Equivalents	MMB362
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit looks at the properties of biofluids, such as blood and synovial fluid, and techniques to analyse their viscous

Units

behaviour. This leads to an understanding of how biofluids interact with medical devices and of criteria for the design of devices to fulfil their function without damaging the biofluid and, in the case of blood, the cells transported in the fluid.

ENB329 Mechatronics Project 2

Pre-requisites	ENB229 and ENB243 and ENB244
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

ENB329 focuses on teams of students applying advanced mechatronics principles to design and build an autonomous robot. Students will integrate aspects of mechanical, electromechanical, electrical, software, signal processing and control engineering that they have learnt in their course. The core learning outcomes include development of teamwork and communication skills, engineering design and implantation skills and the ability to communicate about your robot.

ENB331 Materials and Manufacturing 2

Pre-requisites	ENB231
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit extends the formative body of knowledge gained in ENB231 and introduces the shear deformation mechanisms of engineering material and how these properties can be used to understand the mechanics of metal cutting. Descriptive and analytical information about different material removal processes and material failure mechanisms are provided to you through lectures, tutorials, practical laboratory and case studies. The unit also provides you with an excellent opportunity to apply the knowledge in the design and manufacture of a component.

ENB333 Operations Management

Equivalents	MMB476
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

Point
- SEM-2

This unit develops students' ability in applying quantitative techniques in solving different types of industrial operations problems. Topics include: product mix, assignment and transportation models; location and layout decisions, job design analysis; project planning; quality control and the use of simulation in operations management.

ENB334 Design For Manufacturing

Equivalents	MMB374
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Topics covered in this unit include: basic concepts in the analysis of a mechanical engineering design, relating the design requirements to a range of manufacturing processes; an understanding of the complete manufacturing specifications for mechanical designs based on functional requirements, manufacturing processes, interchangeability and standardisation; introduction to the basic principles in the design of jigs and fixtures in manufacturing.

ENB335 Modelling and Simulation For Medical Engineers

Pre-requisites	ENB318
Equivalents	MMB496
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Traditional experimentation techniques can often not be applied to investigate the mechanics of biological systems. Medical engineers are often then required to use modelling and simulation techniques to understand the behaviour of biomechanical components and/or systems. This unit introduces you to some of the fundamental principles of modelling and simulation techniques and their applications in Biomedical Engineering.

ENB338 Biomaterials

Equivalents	MMB292
Credit Points	12
Campus	Gardens Point

Availabilities

Gardens Point
- SEM-2

Topics covered in this unit include: an understanding of the relationships between the properties, failure mechanisms, processing and microstructures of various materials used for medical applications and their interaction with human tissues; an understanding of the fundamentals of the use of materials in a medical environment and an understanding of the fundamentals of materials properties and processing; consideration of metallic, ceramic, polymeric implant materials; composites as biomaterials; structure-property relationships of biomaterials; tissue response to implants; soft tissue replacements; hard tissue replacements.

ENB340 Power Systems and Machines

Pre-requisites	ENB103 or ENB250
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is a core unit that develops the basic topics essential for an electrical engineer working in areas that include the resources sector, the process industries, electrical power utilisation, electric power generators as well the electricity supply industry. Topics covered in machines include magnetic circuits, single phase and three phase transformers; electric machines including electromechanical energy conversion, reluctance motors, induction motors, synchronous machines, D.C. machines, stepper motors, P.C. motors; motor control; heating, cooling and rating. Power system topics include power generation and energy sources, electricity market operation, fault calculations, basic protection and power system operation, in particular real and reactive power control.

ENB342 Signals, Systems and Transforms

Pre-requisites	ENB242
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit covers the area of Signals in Linear Systems for which a detailed study

of Fourier theory applied to both analogue and discrete-time signals and to the analysis of linear systems will be given. Systems will be represented in time as well as in frequency and various characteristics and relationships in the two domains will be discussed. The students will be introduced to the fundamentals of analogue and discrete-time signal processing; analogue and discrete Fourier transform; linear and discrete convolution. Finally, the students will learn the fundamentals of digital filter design and implementation, with examples and applications arising from various disciplines.

ENB344 Industrial Electronics

Pre-requisites	ENB240
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit gives a basic understanding of linear and switching applications in industrial electronics. Practical knowledge associated with interfacing and design is developed. Students will also study the theory and design of advanced digital embedded systems as well as the practicalities associated with implementation. It also covers power rectification, controlled rectification, inverters, AC and DC drives, uninterruptible power supplies and power switching components.

ENB345 Advanced Design and Professional Practice

Pre-requisites	ENB245
Equivalents	EEB684
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Detailed design and realisation of typical electronic subsystems used in all areas of electrical and electronic systems engineering. The unit enhances the student's ability in solving complex engineering problems. The design builds on the theoretical knowledge gained in other units. The student is required to write a detailed technical report and also give an oral presentation on her/his design.

ENB346 Digital Communications

Pre-requisites	ENB342
Equivalents	EEB560
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Revolutionary developments in the field of Digital Communication Technology have enabled improvement in the characteristics of communication systems in order to meet the performance requirements for transmission of information for private, business and industrial applications. This unit which covers Elements of a Digital Communication System aims at providing the students with an in-depth understanding of the theory and applications of digital communication systems and technology.

ENB350 Real-time Computer-based Systems

Pre-requisites	ENB244 or CAB202
Equivalents	EEB566
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit covers the area of embedded systems and real-time kernels. C programming is reviewed in the context of real-time applications where it is often mixed with assembly language. Data representations, input-output programming, concurrency, scheduling, memory management and system initialisation are discussed. Programming laboratory exercises introduce development tools and reinforce fundamental concepts such as polling, interrupt driven input-output, serial port communication, pre-emptive and non pre-emptive scheduling, resource sharing, priority inversion and deadlock. Students develop a simple real-time process control application using programmable logic and micro-controllers.

ENB352 Communication Environments For Embedded Systems

Pre-requisites	ENB350
Equivalents	EEB666

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit addresses the following: computer networks; network programming; open network foundations; embedded systems; client/server; bus architectures; network controllers; distributed systems in automation and process control; embedded Java; distributed objects; distributed databases; distributed operating systems.

ENB354 Introduction To Systems Design

Equivalents	EEB585
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Introduction systems engineering methodologies and techniques as applied to Aerospace Engineering projects. The students receive formal lectures and apply the knowledge gained to a specific case study or mini project.

ENB355 Advanced Systems Design

Pre-requisites	ENB354
Equivalents	EEB685
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is based on the experiences already gained in first semester. The purpose of this unit is to lead to a deeper understanding of the system engineering process and the relations between the project phases, requirements, review processes, documentation and/or related deliverables. Practical examples will be given based on currently ongoing projects. A further objective of this course is to outline the importance of understanding contractual relations of Test Reports (TR), Design Documents (DD), Verification and Validation (V&V), Acceptance Tests (AT) and delivery.

ENB357 Spacecraft Dynamics and Control

Credit Points	12
Campus	Gardens Point

Units

Availabilities	Gardens Point - SEM-2
----------------	---------------------------------

This unit offers a general introduction to space technology. It includes the following: coordination of systems and time references used within space dynamics; rocket dynamics; satellite orbit and attitude dynamics and control; an introduction to a satellite as a system and subsystems.

ENB360 Heat and Mass Transfer Operations

Pre-requisites	(EGB323 or ENB221) and (EGB322 or ENB222)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Optimal delivery of heat and mass transfer is a key outcome of process engineering design and operations. This unit delivers core knowledge of heat and mass transfer concepts to improve unit operations.

ENB361 Minerals and Minerals Processing

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit will provide an understanding of the principles of physical and chemical mineral processing operations. An emphasis will be placed on: 1) characterisation of ores, 2) ore preparation, 3) physical separations and 4) chemical separations. This unit will use current Australian mining industries to demonstrate the importance and significance of each stage of mineral processing.

ENB362 Bulk Materials Handling

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces and develops your knowledge, skills and application of the transportation, handling and storage of industrial quantities of materials, both raw

and processed. The unit focuses on bulk material design requirements in the context of the Queensland process engineering industry. It links with work previously undertaken within the Process Engineering minor such as ENB361 Minerals and Mineral Processing, ENB360 Heat and Mass Transfer, CVB General Chemistry and ENB221 Fluid Mechanics, preparing you for your final year of studies and as a graduate engineer in the process engineering industry.

ENB371 Geotechnical Engineering 2

Pre-requisites	ENB272
Equivalents	CEB322
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit includes: further study on the behaviour of soil and rocks; determination of subsurface pressures from surface loadings; soil settlement including time related clay consolidation settlement and immediate settlements on sand and clay as related to shallow foundations; assessment of bearing capacity and allowable bearing pressures under shallow foundations; pile foundation systems and analysis for capacity and settlement; rock mass behaviour, classification and joint shear strength applied to slope stability assessment and stabilisation measures.

ENB372 Design and Planning of Highways

Equivalents	CEB317
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Civil engineers as professionals are responsible for the delivery of major transport infrastructure items through the stages of inception, planning, design, development, maintenance and management. The purpose of such projects is to improve the quality of life of the community by offering safe and efficient access to activity locations and mobility between locations. In delivering such infrastructure it is imperative that social, economic, and environmental impacts and benefits are considered and addressed. This unit offers students an

opportunity to explore the role of the civil engineer in the preparation of a feasibility design study for a road as a major transport infrastructure item.

ENB375 Structural Engineering 2

Pre-requisites	ENB102 or ENB270 or ENB276
Equivalents	CEB318
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit considers the following: limit states design of steel structures; buckling and ultimate strength behaviour of steel structures; tension members, compression members; local and global buckling (flexural and flexural torsional buckling modes) concepts as applied to compression members and beams; effective lengths of compression members and beams; design of beams; effect of lateral restraints on buckling; web stresses including web crippling and buckling; beam-columns; bolted and welded connections; unsymmetric bending of beams including principal second moments of area; shear stresses in beams of thin-walled open cross-sections and their shear centres. Most cold-formed steel sections are unsymmetric and hence the latter topics are useful in steel design.

ENB376 Transport Engineering

Equivalents	CEB323
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The transport system is an essential part of our physical infrastructure. It is imperative that civil engineers are able to undertake typical road and traffic engineering investigations, analyses and designs. These require an understanding of the intent of individual road system elements, how they operate, and how they are delivered and managed: this understanding is developed in this unit. Further, it is important that civil engineers are able to undertake multi-modal transport surveys to gain an understanding of the operation of a particular transport system.

ENB377 Water and Waste Water Treatment Engineering

Pre-requisites	ENB201 or ENB280
Equivalents	CEB321
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The provision of a safe, wholesome and adequate supply of water and the proper treatment, disposal, and reuse of wastewater are essential for protecting human health and well-being. Water and wastewater treatment are required for the control of water-borne diseases and the provision of proper sanitation for urban, rural, and recreational areas. Water and wastewater treatment engineering is a major field of civil and environmental engineering and is manifested by sound principles and practice in terms of solving sanitation problems.

ENB378 Water Engineering

Pre-requisites	ENB201 or ENB280
Equivalents	CEB319
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The main topics to be covered in this unit follow: the hydrologic cycle and its application to the estimation of runoff from small catchments; probability and risk and the selection of design floods; hydrologic data; estimation of peak runoff using the Rational Formula estimation of runoff hydrographs using rainfall-runoff routing models; the hydraulic characteristics of open channels; uniform flow, gradually varied flow and rapidly varied flow; the hydraulic characteristics of culverts and retention basins; the operation of urban drainage systems.

ENB379 Transport Engineering and Planning Applications

Equivalents	CEB419
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The environmental engineer must be familiar with the role of each transport

mode in the overall transport task, along with current issues associated with each mode. This must be overarched by an understanding of the system for planning and management of transport projects and systems, particularly in context with economic, environmental and social attributes. This unit provides students who wish to pursue a career in environmental engineering with an understanding of these areas. The unit also includes case studies covering the environmental impacts for some of the urban and rural transport and infrastructure projects especially in the area of community consultation.

ENB380 Environmental Law and Assessment

Pre-requisites	ENB383 or EVB301
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The adverse consequences of human activity have resulted in the adoption of various international treaties, enactment of stringent legislative requirements, and a growing demand for improved management practices. Engineers need to be aware of the way in which the law works, to be able to communicate with lawyers, and to recognise the legal and political implications of their projects. An understanding of the local, state, and federal governments' power to regulate development and the legal and planning requirements and assessment procedures is essential for professional engineering practice.

ENB381 Civil Engineering Construction

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Detailed studies of the methods and equipment employed in the execution of civil engineering construction. Includes earthworks, heavy foundations, steel fabrication and erection, bridge construction, marine construction, water retaining structures, road and airfield construction and mechanical erection.

ENB382 Estimating in Engineering Construction

Pre-requisites	ENB381
Equivalents	CEB513
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The majority of the unit applies construction, planning and commercial understanding previously developed to fundamental estimating skills suited to firm bidding. The conversion of an estimate to a tender, includes the review process, the determination of risk and profit and the drafting of a tender letter conclude the critical content. A comparison with sub-contract pricing and the use of Bills of Quantity is studied and is linked to conceptual estimating, preliminary estimates for budgets and proposals.

ENB383 Environmental Resource Management

Equivalents	CEB418
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit addresses management of solids and hazardous wastes generated from domestic, commercial, and industrial sources. It includes the following: waste minimisation; promotion of efficient use of resources; promotion the use of waste through recycling and energy production; viewing waste as a resource; reducing the mass, volume and toxicity of the waste; disposing of waste in a socially and environmentally acceptable manner; waste avoidance; recycling; energy production; treatment; disposal. Waste management is an important aspect of civil and environmental engineering education.

ENB384 Design of Masonry Structures

Pre-requisites	ENB102 or ENB270
Equivalents	CEB516
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Historic development & Modern Masonry; Constituent Materials – testing standards; Design for durability; Limit state design principles – capacity & serviceability; General design aspects of walling, Fire design provisions; Out-of-plane behaviour of unreinforced masonry walling; Design of facades, ties & accessories; Unreinforced masonry – in-plane behaviour, shear walls & construction detailing; Reinforced masonry – design for flexure, in-plane and out-of-plane shear; Design for compression & slender walls; Novel designs – prestressed masonry, dry-stack masonry, thin bed masonry, geometrical sections, cavity walls and diaphragm walls; Case study - industrial building / medium rise apartment building.

ENB421 Thermodynamics 2

Pre-requisites	ENB222 and ENB321
Equivalents	MMB351
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Applications of heat transfer theory in steam power plant, refrigeration and gas turbines; steady state and transient conduction; convection with internal or external flow; free convection in stationary fluids; boiling and condensation; thermal resistance networks; heat exchangers; radiation heat transfer.

ENB435 Computer Integrated Manufacturing

Equivalents	MMB471
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Topics covered in this unit include: introduction of the concepts of strategic planning for computer integrated manufacturing; concepts of advanced manufacturing technologies and the various components of computer integrated manufacturing system; the importance of concurrent engineering in the context of CIM; introduction to the principles of modelling and simulation techniques as a design and evaluation tool for manufacturing systems.

ENB436 Mechatronics System Design

Equivalents	MMB478
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides students with an understanding of design and interpretation of hydraulic and pneumatic circuits (including graphical symbols, fluid logic and components of fluid systems) and a basic understanding of PLC programming for control of manufacturing systems with the emphasis on hands on practice of developing a control system for a given process. Topics include the following: mechatronics systems design; power supply; introduction to fluid power and graphical symbols; hydraulic and pneumatic systems; simple circuits; fluid logic; logic symbols and circuits; hydraulic components, fluids, system design, circuits; pressure compensated flow control.

ENB437 Health Legislation in the Medical Environment

Equivalents	MMB492
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides an introduction to the types of legislative control in the health and medical industries. It highlights the minimum requirements in relation to the role of medical engineers and their contribution to successful and ethical relationships with medical, health legislative and regulatory affairs professionals. Content includes: national and international legislative controlling bodies and codes (EC, TGA, FDA); structure and sources of legal system (State and Federal); Good Manufacturing Practice (GMP); ISO9000 Quality Systems; Total Quality Management; ethics committees and clearance; industry case studies.

ENB439 Advanced Robotics

Pre-requisites	ENB339
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit extends the robotic concepts introduced in ENB339 and introduces you to the components, systems and mathematical foundations of mobile robots. The unit introduces the fundamental approaches and techniques which enable modern mobile robots to usefully and safely navigate an environment to perform useful tasks. The unit encourages critical thinking about the use of robotic technologies in various applications, and emphasizes the practical application of robotic theory to the design and synthesis of mobile robotic systems that can understand their environment and plan their actions accordingly.

ENB440 RF Techniques and Modern Applications

Pre-requisites	ENB343
Anti-requisites	ENB445
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit addresses the following: lumped and distributed microwave and RF circuits, including [y], [t] and [s] parameters; impedance matching techniques; passive and active microwave devices; RF circuit design techniques; microwave and RF measurement techniques; linear antennas and microwave antennas; analysis and synthesis of antenna arrays; specialised antennas and antenna measurements; EMC definition, standards and regulations; test plan; measurements; interference coupling; susceptibility; EMC design techniques, component selection, circuit layouts, grounding, shielding, filters, suppressors, isolation and safety; EMC management; propagation of electromagnetic fields in electrical materials; application of numerical methods.

ENB446 Wireless Communications

Pre-requisites	ENB346
Equivalents	EEB960
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit addresses the following: cellular mobile radio system concepts; mobile radio propagation; spread spectrum

techniques and CDMA; speech coding modulation and channel coding techniques for GSM and CDMA; fading mitigation through diversity; inter-symbol interference mitigation; the GSM and CDMA standards; the WAP and the GPRS; introductions to UMTS/IMT2000; introduction to personal communications; introduction to blue tooth technology; other wireless systems including wireless LAN, wireless local loop, microwave local multipoint distribution systems (LMDS) and LEO satellite communication.

ENB447 Navigation Systems For Aircraft

Pre-requisites	MAB127 or MAB182 or MAB132
Equivalents	EEB835
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Modern aviation continues to flourish, with millions of passenger flying each year throughout the world and in all kinds of weather condition. Safe and reliable navigation is one of the primary functions that enable these flights. In past years pilots navigated visually relying on fair weather conditions. Today pilots use navigation aids to allow navigation in all types of weather conditions day or night. This unit presents the principles and practices of modern navigation sensors and systems.

ENB448 Signal Processing and Filtering

Pre-requisites	ENB342
Equivalents	EEB941
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit gives a comprehensive introduction to the representation and processing of signals distorted or corrupted by noise, and the systems needed to process them. Techniques to enhance, detect, classify and estimate useful information from the signals in the presence of noise and other distortions will be presented. The methods presented will be tested on real signals drawn from different engineering applications, such as speech signals, image signals, biomedical signals and signals in communications systems.

ENB451 Aerospace Radio and Radar Systems

Pre-requisites	ENB343
Equivalents	EEB760
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes a thorough treatment of the elements of radio and radar systems, ground, air and space based. This is a highly technical unit and an emphasis will be put on the solution of technical problems and the knowledge required to solve these problems. Electromagnetic Compatibility and Electromagnetic Interference principles are covered in detail. Analysis of antennas, modulation techniques, amplifiers and filtering techniques for radio, as well as, types of radar and applications, Mechanisms for Ranging, Doppler Radar and Receiver Processing are some of topics addressed.

ENB452 Advanced Power Systems Analysis

Pre-requisites	ENB340
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The aim of this unit is to introduce you to the basic topics of power system analysis relevant to engineers involved in both operations and planning. Specific tasks will be evaluation of faults on lines, load flow and stability analyses using commercial packages.

ENB453 Power Equipment and Utilisation

Pre-requisites	ENB340
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit emphasises the use of relevant standards to the specification and design of electrical equipment for the use of electrical energy supply for buildings and for earthing. Design approaches emphasise current engineering practise.

ENB454 Power System Management

Pre-requisites	ENB340
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The aim of this subject is to develop skills in the operational management and the overall system management of Power systems. There are many decisions to be made in the context of imperfect information. This subject provides tools to provide a degree of structure to the decision process, whether at purchase time or in daily operation. These tools cover the areas of risk analysis, reliability and asset management and extend to the operational areas of utilization of equipment and quality of supply. The outcome is to achieve a balance between maintenance and capital purchases between investment and reliability.

ENB455 Power Electronics

Pre-requisites	ENB344
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit introduces the student to advanced industrial electronics and power converters with different applications. Students learn how to model power converters, design a controller and simulate power electronic systems using Matlab/Simulink software for different applications. They also learn practical issues such as EMI, efficiency and losses to design a controller and power circuits.

ENB456 Energy

Equivalents	EEB911
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Renewable energy sources including solar and wind energies are becoming more important than ever due to increasing energy demand, dwindling oil and gas supplies, increasing pollution levels in the atmosphere and the associated global warming effects. Renewables may also help improve competitiveness and have a positive impact on regional development and

employment. An overview of the different energy sources will be covered followed by an understanding of the characteristics of solar energy, radiation calculation, measurements and applications in remote, hybrid and grid interactive configurations. Students will be equipped with fundamentals of alternative energy sources including solar thermal, photovoltaics and wind conversion technologies.

ENB457 Controls, Systems and Applications

Pre-requisites	ENB301
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Control systems are playing an increasingly important role in process control, energy management and utility management. This unit is concerned with the application of advanced control systems with an emphasis on physical architectures and implementations. Topics covered include control system actuators, sensors and controllers, control system architectures, human machine interfacing, adaptive control strategies and intelligent control.

ENB458 Modern Control Systems

Pre-requisites	ENB301
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces the student to the following concepts: Discrete time control systems and their design, state space modelling and control system design using state space techniques, linear optimal control, non-linear systems, and adaptive control with applications of neuro-computing and fuzzy logic.

ENB460 Advanced Process Modelling

Pre-requisites	(ENB222 or EGB322) and ENB360
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will cover theory and practice for the advanced modelling of process systems. The teaching will predominantly occur in the computer laboratory. A real world process engineering scenario will be studied by participants via a project. The project leads on from ENB360 and will help develop engineering skills useful for BEB801 and BEB802.

ENB461 Advanced Process Control Systems

Pre-requisites	ENB313
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Advanced Process Control Systems extends the concepts of ENB313: Automatic Control to systems that are commonly found in process engineering. The unit focuses on developing control-oriented process models and developing and tuning controllers (e.g. PID control) as well as familiarising students with some more advanced control methods.

ENB471 Design of Concrete Structures and Foundations

Pre-requisites	ENB276 and ENB371
Equivalents	CEB424
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Concrete design and construction; roles of building professionals; current structures; structural systems; load paths; rules of thumb; building layout, function and form, design effects; seismic and element loads; formwork and placement constraints; reinforced and prestressed concrete slabs, beams and columns; architectural issues, connections and detailing; site investigation, spread and pile footings and foundations; retaining walls.

ENB472 Project Engineering 2

Equivalents	CEB412
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit builds on the understanding of the physical aspect of construction gained in Project Engineering 1 to develop the skills needed to manage a project. Further studies in estimating, contracts administration and cost control provide support for a major computer simulation exercise based on the construction management of a complex industrial project. This experiential component provides a framework for the exploration of issues in the legal, managerial and technical areas which form the basis for the professional presentations that conclude the unit.

ENB473 Design and Construction of Multi-storey Buildings

Pre-requisites	ENB275 and ENB375
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds on the structural, material, construction and design units of previous semesters, in particular Design of Steel and Concrete Structures, and applies that knowledge and skills to a multi-storey building on a real site to perform a real function. The unit covers a range of topics as applicable to multi-storey buildings, namely, structural systems, analysis techniques, design and construction methods, composite floor systems, steel framed buildings, construction, fire safety and durability. Using a realistic building project it enables QUT students to prepare themselves to pursue a career in structures and/or construction. There will be a special emphasis on the interdependency between construction and design. The aim of this unit is to help you to learn and develop professional engineering skills with special emphasis on analysis, design and construction of multi-storey buildings.

ENB474 Finite Element Methods

Pre-requisites	ENB475
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The Finite Element Method (FEM) is 20th century's answer for treating complex

problems, which had hitherto remained impossible to solve, in several areas of engineering such as structural, geotechnical, electrical, heat conduction, etc. The applications of this powerful computer based method has rapidly extended to cover several areas of engineering. In the structures area, the displacements and stresses in complex concrete connections, dams, deep beams with openings, shell structures, etc., can only be obtained by finite element analysis. Basic theory of FEM and its features such as engineering actions, modelling techniques, choice of elements, boundary conditions and input data will be covered in this unit. It aims in equipping engineers with skills to apply FEM effectively in structural, geotechnical and water engineering problems.

ENB475 Structural Engineering 3

Pre-requisites	ENB276
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is an advanced structural engineering unit which builds up on previous knowledge in this area and covers applications. Load paths in structures and cable structures with applications in bridge engineering will be covered. The stiffness method, which is the basis of all structural analysis software packages will be covered in detail. The formation of plastic hinges (failure points) and failure mechanisms in structures will be treated with simple applications. Structural dynamics and vibrations in structures will be introduced and illustrated with applications. Application of structural dynamics will be extended to seismic engineering. The basics of seismic engineering and the use of the Australian code for analysing structures subjected to seismic loads will be covered.

ENB476 Civil Engineering Design Project

Pre-requisites	(ENB371 and ((ENB372, ENB376, and ENB378) or EN40MJR-CVCOENG)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Through preparation of various civil engineering design elements of a major project, this final design strand unit builds upon the earlier units to polish students' professional capabilities as expected of a graduate civil engineer. Students will be expected to apply to their project the knowledge and experience gained in the civil engineering sub-disciplinary core units including: Geotechnical Engineering 2, Water Engineering, and Transport Engineering. The aims of this unit are to provide you with an understanding of the role of the civil engineer within a major project, including the various technical activities undertaken, overall project management, and an understanding of community expectations.

ENB477 Facade Engineering

Pre-requisites	ENB375 or ENB311
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit provides the basic knowledge and skills required by facade engineers and designers. It introduces you to new materials such as aluminium, composite aluminium panels, natural stone, structural silicone adhesive and one of the more unique and challenging structural materials - glass. It then presents the required knowledge and skills for thermal and weather performance analyses and structural design of typical aluminium framed and glazed facades. The unit will provide a basic understanding of selection, analysis and design of innovative and large span facades and glass structures. Fabrication and construction are integral aspects in the selection and design of facades, so an insight into fabrication and construction methods are presented along with an understanding of their collaboration in design.

ENB478 Advanced Water Engineering

Pre-requisites	ENB378
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit primarily intended to provide detailed conceptual knowledge on river and coastal processes. The main topics to be covered under River Engineering

are: catchment and flood plane management, river flow modelling, sediment transport and application of water sensitive urban design to urban systems. The main topics to be covered under Coastal Engineering are: wave theory, coastal inlets and canal systems, planning and design of coastal structures and coastal management and planning.

ENB481 Civil Engineering Project Management

Pre-requisites	ENB275
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Engineers are invariably required to manage projects. This unit reinforces the student's understanding of current management principles in the context of construction projects. Other topics include administration, cost control, claims, legal and insurance issues together with outsourcing, problem solving, communication and dispute resolution. The focus of the unit is to ensure students develop an appreciation of the commercial and non-technical issues associated with successful projects. The aim of this unit is to help the student understand the nature of the decisions required of an Engineer managing a project and practising making these decisions within the fast-moving commercial and economic environment for such projects.

ENB485 Advanced Geotechnical Engineering Practice

Pre-requisites	ENB371
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The aim of this unit is to firstly, develop the generic technical skills required to identify and solve geotechnical engineering problems of the type commonly encountered by specialist geotechnical consultants, and secondly, to have a good understanding of some specialist techniques for site investigation, performance prediction and construction. The unit will be presented as study modules, each one emphasising a different area of geotechnical engineering. The study areas and the

Units

case studies used for practice may change from year to year depending on the availability of experienced practitioners and on current geotechnical projects and interests.

ENN510 Engineering Knowledge Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Knowledge management is an innovative process that needs to be closely aligned to organisation goals. The development of knowledge management systems requires a sound understanding of the related issues such as knowledge identification, knowledge development, knowledge preservation, knowledge representation and knowledge distribution. All engineering managers must have the fundamental skills and knowledge to understand, design and develop and manage knowledge management systems in an organisation. This unit provides the basic knowledge and skills to understand the complex issues of knowledge management that are essential to the career advancement of engineering managers.

ENN515 Total Quality Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Total Quality Management (TQM) has evolved beyond its roots in statistics and the quality control function. Today, many observe consider it to be a framework for "excellent" management. The dominant themes are: a data-based approach to problem solving; a strong emphasis on organizational and behavioral considerations; a customer-oriented market-sensitive approach to designing and delivering both products and services; and finally, a desire for continual improvement. TQM practice is a pathway to the achievement of world class competitiveness.

ENN522 Advanced Communication Systems

Credit Points	12
---------------	----

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will focus on fundamental principles as well as recent developments in communication technologies including advanced multiple access techniques, multiple-input multiple-output systems, modern antenna systems, Orthogonal Frequency Division multiplexing, advances in cellular systems and cognitive radio systems.

ENN523 Advanced Network Engineering

Anti-requisites	INB352, INN352
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Computer networks have become an integrated part of the fundamental infrastructure in modern industries and societies. Building new networks or upgrading existing networks requires a deep understanding of the concepts and principles of network engineering. Building on previously acquired knowledge and techniques of computer networks, this advanced level unit further introduces students to systems approach, service oriented network planning, performance evaluation, traffic engineering and other advanced topics. Then, it exposes students to the theory and practice of the analysis and planning of local and wide area networks through assembling various network technologies in a cohesive fashion with emphases on the connectivity, scalability, reliability, security, QoS and recent developments of computer networks.

ENN524 Mobile Network Engineering

Anti-requisites	INN353
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Wireless communications, mobile networks and navigation have been widely deployed and integrated into various mobile platforms for value-added services. This unit highlights the recent advances in wireless local area and wide area networks, vehicular networks and

Internet of Things with focus on selected standards and network protocols. The unit also provides an overview for satellite navigation systems, wireless positioning technologies and location-based services.

ENN530 Asset and Facility Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Professionals are often involved in the management of infrastructure including transportation, water, energy, buildings and telecommunications. In today's business environment, the efficient maintenance and management of these assets and associated risks is critical. The professionals need to know how to manage the whole of life cycle of assets; organise maintenance based on condition and reliability assessments; and create as well as implement effective asset management and maintenance plans so as to meet the business objectives of the organisation.

ENN531 Advanced Materials and Engineering Applications

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Design, material selection and processing play a vital role in developing products and structures. This unit is designed to introduce the recent development of advanced materials and their potential applications. The advances in characterization and simulation techniques will be also covered. The unit teaches the inter-relationships between the microstructure, properties and processing so that the fundamental principle of structure-property relationship and materials selection can be understood. The unit also provides students an opportunity to apply the knowledge to analyse a typical material problem through project work and use of state-of-the-art material selection software.

ENN533 Advanced Engineering Design and Maintenance

Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-1
----------------	---------------------------------

This unit introduces advanced methods and tools of engineering design and machinery maintenance such as problem identification, creative problem solving and best concept selection, ensuring machine reliability at the design stage, machinery failure analysis prediction and prevention, design of machinery for special application (e.g. pressure vessels, conveyors, pharmaceutical and food processing equipment), advanced maintenance systems and machine condition monitoring methods.

ENN541 Research Methods for Engineers

Anti-requisites	IFN600, INN700, INN701
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Problem identification, research design and planning, literature search and communications through reports and presentations are essential attributes of engineers in all the disciplines. Research methods and their applications to the solve discipline specific real world problems are skills that in demand from engineers at today's work place. It is also equally important to communicate solutions clearly and effectively in writing and verbally.

ENN542 Statistical and Optimisation Methods for Engineers

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit offers an introduction to statistical methods and optimisation methods useful for engineers in practice. It includes the following: the process of stochastic research, linear regression analysis, simultaneous equation model, count data model, time series, classical optimisation methods, Nonlinear, geometric and dynamic programming.

ENN552 Solar Thermal Systems - Heat and Power

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

ENN570 Enterprise Resource Planning

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Enterprise resource planning (ERP) systems integrate internal and external information across an entire organization, for example, embracing manufacturing, sales and service, customer relationship management, procurement, finance/accounting, maintenance, inventories and interacting with suppliers. The purpose of ERP is to facilitate the flow of information between all business functions inside the boundaries of the organization and manage effective connections to outside stakeholders. ERP activities can be automated by the use of an integrated software application. This unit is designed to equip you with advanced knowledge of various processes that are essential to running manufacturing and service organisations and how ERP integrates these various functions into one complete system to streamline processes and information across the entire organization. The central feature of all ERP systems is a shared database that supports multiple functions used by different business units. In practice, this means that employees in different divisions can rely on the same information for their specific needs.

ENN590 Project 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This project unit aims to give students experience in solving advanced engineering problems in a relevant discipline and the opportunity to apply the knowledge gained throughout the course. Through the project students will gain experience in project identification, research planning, finding solutions and communications.

ENN590 Project 2

Pre-requisites	ENN590-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This two-semester unit is a project unit aims to give students experience in solving advanced engineering problems in a relevant discipline and the opportunity to apply the knowledge gained throughout the course. Through the project students will gain experience in project identification, research planning, finding solutions and communications.

ENN591 Project 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This two-semester unit is a project unit aims to give students experience in solving advanced engineering management problems and the opportunity to apply the knowledge gained throughout BN87 course. Through this project work, students will gain experience in project identification, research planning, communications and problem solving.

ENN591 Project 2

Pre-requisites	ENN591-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This two-semester unit is a project unit aims to give students experience in solving advanced engineering management problems and the opportunity to apply the knowledge gained throughout BN87 course. Through the project students will gain experience in project identification, research planning, communications and problem solving.

ENZ541 Research Methods for Engineers

Equivalents	ENN541
Credit Points	12

Units

Campus	Online
Availabilities	Online - SEM-1

Problem identification, research design and planning, literature search and communications through reports and presentations are essential attributes of engineers in all the disciplines. Research methods and their applications to the solve discipline specific real world problems are skills that in demand from engineers at today's work place. It is also equally important to communicate solutions clearly and effectively in writing and verbally.

ERB101 Earth Systems

Equivalents	NQB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In ERB101 Earth System you will focus on the key components of our planet - the lithosphere, hydrosphere, and atmosphere. The focus will be on these large-scale processes and how these systems interact and determine the landscapes we live on, how they change in time and the potential impacts on society. This provides a fundamental introduction to Earth Sciences, building on the knowledge and skills developed through Semester 1, and prepares you for more in depth exploration of Earth evolution, natural hazards, environmental management, resource sustainability and climate change.

ERB102 Evolving Earth

Equivalents	NQB202
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In ERB102 Evolving Earth you will focus on key events in the history of our planet – the formation of our planet, the concept of geologic time, the origin of the oceans and atmosphere and the evolution of life. You will learn about the connections between the evolution of life and geological processes and events, to appreciate the complexity of life that exists on Earth today. This provides a fundamental introduction to evolution and geological time, building on the knowledge and skills developed through Semester 1, Imagine Science, and

prepares you for more in depth exploration of Earth system connectivity, natural hazards, environmental management and climate change.

ERB201 Destructive Earth

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

In ERB201 Destructive Earth, we will focus on the Science of Natural Hazards. By understanding the conditions and processes that lead to, and cause, severity of natural processes such as earthquakes, tsunamis, volcanic eruptions, landslides, cyclones, tornadoes, storms/blizzards, floods, bushfire, and asteroid impacts, you will be better informed as to why there are natural hazards and disasters, and how to prepare and mitigate for future events that will have a range of social, economic and political impacts. We will build on the knowledge and skills developed in Year 1 to provide you with a global perspective of how we, as a society, will continually be confronted by natural hazards.

ERB202 Marine Geoscience

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Oceans make up 70% of the Earth's surface, yet less than 5% of them have been explored. There is therefore still much to learn about the marine environment, marine resources and management. This unit will develop a detailed understanding of oceanography, carbonate geology and reef structures, marine biota and interpretation of depositional processes and products in the shallow through to the deep marine environment.

ERB203 Sedimentary Geology and Stratigraphy

Pre-requisites	ERB101 and ERB102 and ERB202
Anti-requisites	NQB413
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with an introduction

to sedimentology and stratigraphy, incorporating sediments and sedimentary rocks and how they relate to depositional environments. The unit focuses on the link between features preserved in sedimentary rocks and what those features tell us about how the rock was emplaced, the environment it was emplaced into and the subsequent burial history of the rocks. Sedimentology and stratigraphy is a fundamental part of the education of any earth scientist, and especially of those who wish to be involved in fossil fuel (i.e., coal, petroleum and gas) exploration, water resource management, and environmental geology, such as geosequestration of carbon dioxide, landscape remediation and soil science, investigation of extreme events (e.g., landslides, tsunami and storm surge) and climate change.

ERB204 Deforming Earth

Pre-requisites	ERB101
Equivalents	NQB412
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will introduce the geological "fingerprints" and fundamental mechanics of the continuous deformation processes that shape our planet. The deformation of Earth materials is intimately related to earthquakes, the formation of tectonic plates, mountain building, volcanoes, fluid flow in the lithosphere, and the generation of resource deposits. All rocks exposed at the surface of Earth have experienced some form of deformation. Therefore, this unit provides essential tools for the field geologist, geotechnical engineers, rock physicists, etc., and paves the way for the capstone unit "Geodynamic Earth".

ERB205 Earth Materials

Equivalents	NQB311
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Earth Materials comprises the study of minerals and rocks which form the solid Earth. The study of Earth Materials is essential for understanding the structure and composition of the earth and the detailed processes of the rock cycle. Earth Materials forms the basis for petrology (the study of the genesis of rocks) and geochemistry.

ERB206 Petrology

Pre-requisites	ERB205
Equivalents	NQB411
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Petrology is the study of Igneous and metamorphic rocks. These rock types compose the bulk of the Earth. Understanding what these rocks are and how they form is an essential part of the study of geoscience and is fundamental to a wide range of higher level units. This unit focuses on the description, classification and origins of igneous and metamorphic rocks.

ERB301 Chemical Earth

Pre-requisites	ERB101 and ERB102
Equivalents	NQB615
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Earth Science examines the interaction of physical, biological and chemical processes in the fractionation and differentiation of the Earth. Geochemistry is therefore an essential component of understanding the origin of the Earth, its evolution through time and the functioning of systems that are active today. This unit aims to apply and develop your theoretical knowledge and practical skills, to use and apply a wide range of environmental and geochemical tools available to the modern scientist to address a variety of environmental and geological problems.

ERB302 Applied Geophysics

Pre-requisites	ERB204 and (SEB113 or MXB105 or MAB101 or MAB141 or MAB105)
Equivalents	NQB513
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Applied geophysics provides geoscientists with the tools to investigate the generally inaccessible subsurface. These tools enable us to detect temporal and spatial changes in the physical

properties of Earth. Knowledge of material properties such as density, electrical resistivity, magnetisation, elasticity and natural radioactivity is essential for the exploration of minerals, hydrocarbons and groundwater. Beyond exploration geophysical methods are used in disciplines as diverse as plate tectonics, environmental geology, engineering geology, and seismic hazard assessment.

ERB303 Energy Resources and Basin Analysis

Pre-requisites	ERB203 and ERB302
Equivalents	NQB612
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The vast majority of the world's energy is derived from fossil fuels. Advanced concepts of stratigraphy and basin analysis are fundamental for exploration, evaluation, exploitation and conservation of oil, gas, coal and water in sedimentary rocks. Knowledge of subsurface geologic methods using core, well and geophysical data is essential for anyone wishing to enter the petroleum, coal or strata-bound minerals industry. This unit will cover advanced basin analysis concepts and combine project based learning and practical exercises to provide insight into the exploration of petroleum and other natural resources.

ERB304 Dynamic Earth:Plate Tectonics

Pre-requisites	ERB203, ERB204 and ERB302
Equivalents	NQB613
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

How we think about Earth processes and evolution has been revolutionised by the recognition that rigid lithospheric plates forming the outer layer of the Earth move relative to one another and interact at their boundaries. This notion is a cornerstone of the unifying theory of Plate Tectonics. In this unit, you will be introduced to the fundamental physics of the Earth and how it relates to the driving forces of Plate Tectonics. You will become familiar with the igneous,

metamorphic and sedimentary responses associated with specific tectonic environments, and how they have evolved through Earth's evolution. This is a synthesis course integrating all knowledge that you have gained from your Earth Science Major units.

ERB305 Geological Field Methods

Pre-requisites	(ERB203 or NQB413) and (ERB204 or NQB412) and (ERB206 or NQB411)
Equivalents	NQB502
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Field experience is an essential part of the professional training of geologists, environmental scientists and natural resource specialists in general. The theory and practice of methods to map, measure and interpret important geological features and characteristics are essential to the study of geology. Methods of mapping, orientation and interpretation are necessary skills for resource assessment, geo-exploration and environmental impact assessment. This unit assumes knowledge of geological principles and methods, namely structural geology and lithology (sedimentary, igneous and metamorphic rocks). It provides professional experiences that is essential for the employability for geology graduates.

ERB306 Earth's Mineral Resources

Pre-requisites	ERB204 and ERB206 and ERB301
Equivalents	NQB512
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Australia's wealth and future economic growth depend largely on its natural resources. A mineral resource represents an enrichment of an element or mineral that can be mined, processed and rehabilitated with financial and social benefit. The natural enrichment of an element or mineral to the levels of a mineral resource requires specific and complex interplay of a variety of geological processes. Thus, mineral resource exploration, delineation and

Units

extraction require skilled application of basic geological concepts and an appreciation of social implications.

ERB310 Groundwater Systems

Pre-requisites	ERB101 or EVB312
Equivalents	NQB614
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit focuses on the origin, occurrence and movement of groundwater; aquifer properties; chemistry and quality of groundwater; exploration methods for groundwater; drilling methods and well testing equipment; assessment of groundwater problems, both supply and quality; and introduction to modelling of groundwater systems. Groundwater resources of Australia and current issues associated with these resources are covered.

EVB102 Ecosystems and the Environment

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In EVB102 Ecosystems and the Environment you will focus on broad-scale factors that shape ecological systems to assess ecosystem change and human impacts on the environment. As well as providing an introduction to the science of ecology, this unit further develops foundation knowledge and skills developed through Semester 1, and prepares you for the exploration of global environmental issues.

EVB201 Global Environmental Issues

Pre-requisites	EVB102 or EGB100
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The capacity for understanding complex global environmental problems such as climate change, now and in the future, will rely on the capacity of environmental scientists to interpret and critically

analyse environmental systems. This unit focuses on understanding long and short term climate and environmental change and opportunities for action as crucial to sustainable development within our biotic, geomorphic and cultural landscapes.

EVB203 Geospatial Information Science

Pre-requisites	ERB101 or EVB102
Equivalents	UDB181
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit encourages spatial thinking by introducing geographic information sources, presentation and basic spatial data collection skills. It explores real world applications of geographical information technologies including GIS, remote sensing and global positioning system for scientific understanding of the environment. It builds on knowledge and skills from Ecosystems and the Environment (EVB102) or Earth Systems (ERB101) from first year.

EVB210 Geospatial Mapping

Equivalents	UDB381
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will provide the student with a sound knowledge and understanding of cartographic communication principles, processes and contemporary presentation methods in a variety of mapping formats applied to Geospatial Information.

EVB211 Geographic Information Systems and Science

Equivalents	UDB281
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides a theoretical and practical introduction into geographic information systems and science that incorporates modern processes of acquisition, manipulation, validation,

storage, extraction, analysis, modelling and presentation of spatial information.

EVB212 Soils and the Environment

Pre-requisites	ERB101
Equivalents	NQB403
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will provide you with grounding in soil science and its application to environmental soil analysis and management, the importance of soil for ecosystem function in a changing environment, and the critical role of soils in the context of climate change. The unit links biological, ecological and geological systems and contributes to your understanding of the complexity of environmental systems in general.

EVB221 Remote Sensing of the Environment

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides a theoretical and practical introduction into remote sensing science and technologies applied for the acquisition of information about an object or phenomenon without making physical contact with the object. It explores the use of aerial sensor technologies to detect and classify objects on Earth by processing of electromagnetic radiation emitted from aircraft or satellites.

EVB222 Spatial Analysis and Modelling Practice

Pre-requisites	EVB211
Equivalents	UDB388
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides a theoretical and practical introduction into the current and evolving practice of spatial analysis and spatial data modelling. The unit builds on the theoretical and practical skillset attained by the successful completion of all components of EVB211 Geographic

Information Systems and Science.

EVB301 Urban and Natural Environmental Systems

Pre-requisites	EVB204 or EVB212
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides background and details on environmental management issues and sustainable practices with a focus on natural and urban systems. It is therefore an important unit of study for any graduate wishing to pursue a career in environmental science who shares an abiding interest in the sustainable management of our environmental systems.

EVB302 Environmental Pollution

Pre-requisites	BVB202
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit deals with major problems of pollution of water, the land surface and the atmosphere. It covers processes responsible for the occurrence and release of pollutants in the environment, dispersion mechanisms, the hazards associated with different types of pollutant, accumulation of toxic substances, and procedures for the reduction of emissions and remediation of contaminated environments. It applies your learning from the Quantitative Skills in Environmental Science unit, EVB202 to assess and report on environmental pollution.

EVB304 Case Studies in Environmental Science

Pre-requisites	EVB205 or EVB301
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This Capstone unit requires you to think critically about an important problem in environmental science and to integrate the knowledge gained through earlier

units to provide an effective solution. You will evaluate a case study, applying your knowledge of quantitative techniques and experimental design, to address a specific environmental problem and present a practical solution. Through critical analysis and reflection on your work and that of your peers, you will gain a deeper understanding of the scientific method and its application to environmental science.

EZB210 Earth and Space Sciences

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will build on foundation material in the general chemistry unit, and combine the principles of physics and geology to develop an understanding of the structure, composition and origins of our planet, and the universe. You will examine properties of light; determination of physical properties of stars; nebulae; stellar spectra and classification; historical models of the solar system; Kepler's law, gravitation; physical geology of the planets and formation of the solar system; phenomena of astronomical origin; brief introduction to stars and galaxies.

GSN403 Data Analysis and Decision Making

Pre-requisites	GSN405
Equivalents	GSZ403
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP1, 6TP4

Business Leaders and managers work in complex business environments, in the era of Big Data, where mind-boggling volumes data and information is generated daily on just about every aspect of the business and the economy. The Data Analysis and Decision Making unit provides students with the opportunity to learn how to make effective business decisions based on the application of a number of standard data analysis techniques to real world business problems. This unit provides students with the opportunity to integrate and draw upon their disciplinary knowledge in analysing data and making decisions.

GSN404 Accounting for Decision Making

Anti-requisites	GSN202
Equivalents	GSZ404
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3, 6TP6

This unit provides students with the opportunity to develop an understanding of accounting techniques that are useful for managerial decision making. Essentially this unit concentrates on two key areas of particular importance to business managers and leaders: budgeting and cost control accounting and the analysis and interpretation of financial statements. Through the study of this unit, students will be in a better position to make informed predictions, recommendations and decisions about future directions and actions that are needed to ensure the financial stability of a particular organisation.

GSN405 Strategic Management

Anti-requisites	GSZ602
Equivalents	GSZ405
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP5

Strategy is the process of determining goals and moving towards the achievement of those goals in a business, government, or not-for-profit setting. The Strategic Management unit introduces the concept of strategy and explores the basic tenets of the strategy process, competitive advantage, and strategic management in a changing global environment. It lays the foundations for students in terms of understanding contemporary thinking in the strategy field.

GSN406 Contemporary Human Resource Management Issues

Equivalents	GSZ406
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3, 6TP6

There is increasing recognition internationally of the critical contribution of effective people management in obtaining and sustaining a strategic advantage in an increasingly globally competitive

business environment. This unit provides students with the opportunity to examine the challenges faced by managers and leaders in achieving effective human resource management in the complex business environments of today and tomorrow. The unit adopts an issues-based approach, designed to build awareness of the human resource management issues and build contextually specific solutions to those issues in diverse industry contexts.

GSN407 Communicating to Influence

Anti-requisites	GSZ603
Equivalents	GSZ407
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP3, 6TP6

Specialised knowledge alone is no longer enough to guarantee success in business; you must be able to effectively communicate this knowledge with a variety of audiences, in a variety of situations and using a range of communication technologies. This unit provides students the opportunity to develop highly effective and persuasive oral, written and technology enabled communication skills. The unit encourages students to develop an understanding of their audience, sensitivity to language use and to demonstrate the value and power of language as a means of persuasion in managerial and leadership contexts.

GSN408 Marketing Strategically

Equivalents	GSZ408
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP5

The Fundamentals of Marketing Management unit provides students with the opportunity to critically examine and evaluate the role of marketing and its contribution to the strategic processes of organisations operating in increasingly complex and highly competitive global business environments. A study of key marketing decisions made by real world organisations are examined including the marketing concept, the marketing mix, marketing information systems, marketing research, market segmentation, targeting and positioning, and the process of marketing planning, implementation and

control.

GSN409 Understanding and Leading Others

Anti-requisites	MGN412, BSN202
Equivalents	GSZ409
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3, 6TP6

The Understanding and Leading Others unit will help students to be able to identify, assess and understand the factors that influence the thoughts, feelings, motivations and actions of individuals in the workplace. Students will then have the opportunity to apply these insights into human behaviour within organisations to determine the most effective strategies and courses of action for maximising the potential of individuals and to lead and build high performing face-to-face and virtual teams.

GSN410 Entrepreneurship

Anti-requisites	MGN428
Equivalents	GSZ410
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP1, 6TP4

The Entrepreneurship unit introduces students to the field of entrepreneurship and the management of innovation. Through the study of this unit, students will be able to develop an understanding of entrepreneurial attitudes, abilities, behaviours and culture and explore a range of issues related to opportunity recognition, viability screening for sustainable competitive advantage, risk recognition and mitigation, intellectual property protection and developing a business model for a new enterprise.

GSN412 Business Law

Anti-requisites	AYN410, EFN413
Equivalents	GSZ412
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3, 6TP6

-

GSN413 Financial Management

Pre-requisites	GSN403
Anti-requisites	EFN406
Equivalents	GSZ413
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP5

It is essential for business leaders and managers who must make financial decisions, to have a fundamental understanding of the operation of financial markets and how these markets impinge on the operation of their organisation. They must know how to properly value cash flows and other assets, and understand the fundamentals of asset diversification, risk and return, and the cost of capital. This unit introduces students to the national and international financial environments in which they operate from a personal and business perspective. The unit explores the three major lessons in finance: time value, diversification and arbitrage.

GSN415 Understanding Leadership and Complexity

Equivalents	GSZ415
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3, 6TP5

In a complex society where changes are occurring with increasing speed and frequency, leadership has never had greater significance, nor has it been more challenging. The Leadership and Complexity unit is designed to improve the capacity of students to understand, communicate and influence the people they will lead in complex, rapidly changing business environments. Students will be taken through a variety of reflective activities designed to help them to shape up their own leadership philosophy that will form the foundation of their leadership style.

GSN428 International Study Tour

Equivalents	GSZ428
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP5 (Block)

GSN444 Special Topic 1

Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP1, 6TP2, 6TP3, 6TP5

GSN445 Special Topic 2

Equivalents	GSZ445
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP6

GSN464 Systems Thinking for Managers

Equivalents	GSZ464, GSN502, GSZ502
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP1, 6TP4

Leaders and managers of organisations deal with complex problems whose resolution requires holistic approaches, sophisticated thinking and pluralist methodologies. Systems Thinking is an approach that has been successfully used by business managers and leaders to engage with and manage complex and often ambiguous business problems. This unit provides students with foundational knowledge related to systems methodologies and their underpinning epistemologies that enable business leaders and managers to solve and manage the complex, multi-faceted business problems of today and tomorrow.

GSN468 Problem Framing for Creative Action

Equivalents	GSN504, GSN526, GSZ468, GSZ526, GSZ556
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP1, 6TP4, 6TP6

Simple problem solving approaches are no longer sufficient to solve and manage the complex and multi-faceted business problems of today and tomorrow. Instead, managers need to be skilled in new approaches such as

problem reframing, creative problem solving, lateral, analogical and design thinking that support creative and innovative approaches for dealing with complex business challenges. This unit enables students to explore contemporary and creative approaches to problem framing and problem solving in complex business environments both at the individual and group level. Students will also have the opportunity to investigate how to create workplace environments that encourage and foster creativity and innovation.

GSN473 Corporate Governance and Accountability

Pre-requisites	GSN404 and GSN409 and GSN412 and GSN491
Equivalents	GSZ473
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP1, 6TP4

Boards of directors and managers of organisations are now legally as well as morally accountable for policies, processes, and outcomes to an increasingly vocal set of stakeholders. This unit introduces students to the principles underlying good corporate accountability and governance and examines the roles of the board and management in implementing and monitoring a sound corporate culture, proactively identifying and dealing with risk, and safeguarding the company's assets and its place in our society and economy. Comparative models of governance are also discussed drawing on examples from many cultures and jurisdictions, as well as large and small businesses.

GSN481 Philanthropic and Nonprofit Frameworks of Governance

Anti-requisites	GSN472, GSN229
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2 External - 6TP2

The unit explores contemporary understandings of philanthropic and nonprofit governance in the context of social, economic and political systems. It

locates these understandings in various theoretical and descriptive frameworks providing students with both the knowledge and analytical skills that are necessary to reflect critically on philanthropy and nonprofit governance systems and their environments.

GSN483 Ethics for Philanthropic and Nonprofit Organisations

Anti-requisites	AMN480, GSN230
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP3 External - 6TP3

This course introduces students to ethical theories and constructs with a focus on producing effective personal and professional resolutions to ethical dilemmas specifically associated with Philanthropic and NonProfit (PANFP) organisations. The unit recognises the distinctive mission and character of PANFP organisations, while seeking to provide an understanding of integrity and response-ability.

GSN484 Management for Philanthropic and Nonprofit Organisations

Anti-requisites	AMN480, GSN230
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2 External - 6TP2

In the context of the multiple management challenges facing non-profit and philanthropic entities, this unit provides students with an introduction to contemporary thinking and practice in the effective and efficient management of organisations. While the focus is on non-profit management, wider management and organisational theory will be drawn on in order that proactive responses to situations, problems and dilemmas facing non-profit organisations can be developed by students.

GSN485 Legal Issues for Philanthropic and Nonprofit Organisations

Anti-requisites	GSN231
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP4 External - 6TP4

The unit introduces students to critical issues of philanthropic and nonprofit law and taxation. The unit examines the regulatory, taxation and governance framework of nonprofit organisations and philanthropic transactions in Australian Federal and State jurisdictions.

GSN486 Accounting and Finance Issues for Philanthropic & Nonprofit Organisations

Anti-requisites	GSN231
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP5 External - 6TP5

This unit provides an overview of the accountability of nonprofit organisations, particularly via their annual and financial reports. The unit begins with an overview of the notion of accountability and the importance of financial literacy in order to interpret annual and financial reports. These documents need to be 'decision useful' when communicating with a variety of organisational stakeholders. The unit then builds an understanding of how to read the various financial statements that comprise a financial report. The importance of the Australian financial reporting framework, various standards, financial ratios, are examined in order to inform accurate interpretation of financial reports. Finally various ways of financing nonprofit organisations, are considered.

GSN487 Introduction to Social Enterprise

Anti-requisites	AMN482
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP3

External
- 6TP3

There has been a significant increase in social enterprises in many OECD countries recently. The nonprofit sector continues to mature and expand with the establishment of more sophisticated social enterprise programs. This interest is driven partly by significant reductions in the traditional sources of revenue for nonprofits, together with increasingly sophisticated competition and dramatic changes in expectations from clients and stakeholder groups. These shifting expectations create demand for more strategic approaches to developing business models, the need for improved business planning, and allowing for more collaborative and hybrid business practices. The unit offers a background to social enterprise and associated issues in social business planning.

GSN488 Fundraising Development Principles

Anti-requisites	GSN232, MIN409, AMN481
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP4 External - 6TP4

This unit considers the broad factors that influence fundraising/development success. It applies theories of marketing, public relations and management to fundraising and development and builds an understanding of the philanthropic environment and donor perspectives. It re-examines the principles of fundraising/development, institutional readiness, case preparation, leadership, constituencies and fundraising markets to build understanding of the context in which good, ethical development practice occurs.

GSN489 Fundraising Development Techniques

Pre-requisites	GSN488
Anti-requisites	GSN232, MIN409, AMN481
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP5 External - 6TP5

This unit builds on GSN488 to delve into particular techniques of resource mobilisation in nonprofit organisations. It considers a range of income generation vehicles and techniques including capital and major gifts, special events, bequests, direct mail, telemarketing, e-fundraising, donor circles and the art of building donor relationships. It also examines evaluation of fundraising programs.

GSN490 Managing Technological Innovation

Pre-requisites	GSN405 and GSN410
Equivalents	GSZ490
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP5

The management of technological innovation is a strategic process that supports, drives and influences the strategic management of the firm. The Managing Technological Innovation unit explores the dynamics of technological innovation, how to identify trends within their technological and competitive environments and use these insights to craft an innovation strategy and importantly strategies for operationalizing the innovation.

GSN491 Economics in Business

Anti-requisites	EFN405, GSN411, GSN414
Equivalents	GSZ491
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP1, 6TP4

For business leaders and managers to operate in the volatile global business environment of today, it is important for them to have a fundamental understanding of both macro and micro economics to guide their business decision making. This unit introduces students to an analytical framework that is needed to understand how market conditions are determined at both the micro and macro levels and how market conditions affect business performance, including issues such as supply and demand, market structures and how they impact pricing strategies and decisions of individual firms, structure of the economy as well as some exploration of international trade.

GSN497 Personal Leadership and Change

Equivalents	GSN503,GSZ497,GSZ503,GSZ554
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP5

It is widely recognised that self-awareness provides a foundation for understanding ourselves as leaders and is a key attribute that characterises truly great leaders. This unit explores personal leadership in the context of cultural understanding and ethics and how students' interactions with others impact on their effectiveness as leaders in a complex business environment. This unit provides students with the opportunity to look inwardly to gain a deeper understanding of themselves and to benchmark where they are currently as a leader. Students are encouraged to identify opportunities for growth and development through the development of a leadership development plan that will be revisited in GSN415 Leadership and Complexity.

GSN498 Investment Strategies for Technology

Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3

Organisations are spending an estimated 25 - 45% capital expenditure on Information and Communications Technologies (ICT) related investments and between 2 - 10% of operating expenditure on running their ICT portfolios. Business leaders struggle to keep abreast and be responsive to the latest technological developments and the impact of disruptive technologies on their business. This unit introduces students to ICT governance and an understanding of the inter-relationships between business strategy and business-IT alignment. It also provides students with some strategies for investigating and evaluating the impact of some current disruptive technologies that have the potential to radically change the process of business and business models.

GSN551 Negotiation Skills and Strategies

Equivalents	GSZ551
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP5

Negotiation is an important part of everyday management, and effective negotiation skills are indispensable for successful managers operating in a globalised and complex business environment. The Negotiation Skills and Strategies unit introduces students to a conceptual framework for analysing the business negotiation process. The exploration of negotiation practices in different contexts better prepares students for negotiation in the increasingly globalised business environment.

GSN558 Stakeholder Engagement and Media Principles

Equivalents	GSZ558, GSZ555, GSN496, GSN523, GSZ523
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP1

In this globally connected world it has never been so important for organisations to effectively manage their public reputation portrayed in both traditional and social media. The Stakeholder Engagement and Media Principles unit develops students understanding of the role of stakeholder engagement, the importance of stakeholder analysis and the role media plays in influencing organisational issues.

GSN559 Improving Business Operations

Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP4

The use of a Business Process Improvement (BPI) approach is recognised as being effective for improving business operations. The Improving Business Operations unit introduces students to the Business Process Improvement process including the tools, and phases of business process

re-engineering. The unit is designed to stimulate strategic thinking and analysis by applying business process re-engineering theory in a real world context.

GSN560 Advanced Strategy for Global Business

Pre-requisites	GSN405 or GSZ405
Equivalents	GSZ560
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP6

Business leaders today need to be multi-disciplinary strategic thinkers, who have foresight and an ability to take a big-picture, long term view of an organisation. Additionally, the ability to make decisions, often with incomplete information, and to determine appropriate strategic responses to complex, global business problems and opportunities is seen as the key determinant of positive business outcomes and the longevity of organisations. The Advanced Strategy for Global Business unit helps students to develop a sophisticated knowledge and application of strategic analysis techniques and approaches including the dynamics of inter-firm dependencies, the nature of complex-adaptive systems, an understanding of the pivotal role of data in the strategy process and the limitations of theoretical models.

GSN590 Integrated Workplace Project

Equivalents	GSZ572, GSN570, GSN571
Other requisites	84 credit points of core MBA units as approved by the MBA Director including GSN405
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2, 6TP5

The Integrated Workplace Project is the capstone unit in the MBA program. This 12cp unit is designed to enable students to draw together and integrate the learnings from the MBA program and apply their learning to a live workplace project. Students will be required to identify, scope and investigate a real world workplace problem or opportunity for a specific organisation, including

conducting applied business research in relation to the issue. Additionally students will be required to make a series of informed recommendations for addressing the problem or opportunity and deliver these recommendations through a comprehensive written report and a persuasive pitch to the Executive Sponsor from the organisation.

GSN621 Grounding Theory and Practice

Anti-requisites	BSN201, MGN441, MGN442
Equivalents	GSZ621
Credit Points	12
Campus	Online
Availabilities	Online - 12TP2

This unit lays the foundational theories and practices of 'leadership through coaching and mentoring', and sets up the program. It provides the rationale for coaching and mentoring in complex leadership contexts. It also provides core frameworks for coaching conversational practices. Subsequent units expand from the individual to the group and to the organisation, with each providing a different frame for extending and exploring the theories and practices. The unit sets the scene for learning-by-doing through cycles of reflective practice and embeds a multi-level systems perspective of leadership development and organisational life. Each module contains one or more core theories and students use conversational models to apply theories to their organisational contexts.

GSN622 Linking Leadership and Complexity of Mind

Pre-requisites	GSN621 or GSZ621
Anti-requisites	BSN201, MGN441, MGN442
Equivalents	GSZ622
Credit Points	12
Campus	Online
Availabilities	Online - 12TP3

This unit moves from the lens of the individual to the group and collective. Coaching and mentoring are traditionally viewed as 1-1 conversational practices. However, organisations are made up of teams of people and group and team coaching are increasingly being used as powerful interventions to support

organisational change and to work across organisational silos. This unit explores how team and group dynamics work and how coaching and mentoring can be leveraged by leaders to generate change at the team level, and at the level of the organisational system. The unit also draws together knowledge about cultural differences, intercultural effectiveness and systems thinking to provide principles for using coaching approaches for leveraging advantage in diverse and messy contexts. The unit concludes by linking to the construction of coaching cultures in complex organisational contexts, and positions students to consider the organisational lens.

GSN623 Groups, Cultures and the Collective

Pre-requisites	GSN621 or GSZ621
Equivalents	GSZ623
Credit Points	12
Campus	Online
Availabilities	Online - 12TP3

This final capstone unit sharpens the organisational lens, while at the same time keeping the individual and the group in mind. It challenges students to position their learning in the service of an organisation. The emphasis in this unit is on application and it is largely project-based. Half of this unit is devoted to the final design and delivery of their Project for Positive Difference. The unit looks at coaching and mentoring in the context of organisational systems and strategies. This unit includes the integration of the latest and best of industry knowledge and practice. This occurs through accessing online knowledge and also through relevant industry conferences. Students participate in a Knowledge Incubator, which is a community of students who access and collectively explore contemporary knowledge and practice. There are two ways of developing an effective Knowledge Incubator Option 1: Study Tour A Study Tour is offered to a major industry conference. (An example of a suitable event is the annual Conference in Leadership and Healthcare Conference, run by the Institute of Coaching, McLean Hospital, Harvard Medical School.) All students are encouraged to attend the nominated event and also the two-day Executive Certificate Workshop that follows. Option 2: Group Learning Community Students who do not elect to attend the study tour can form Group Learning Commun

GSZ403 Data Analysis and Decision Making

Pre-requisites	GSZ405
Anti-requisites	EFN409
Equivalents	GSN403
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP8 (Block), 6TP5 (Block) External - 5TP6

Business leaders and managers work in complex business environments, in the era of Big Data, where mind-boggling volumes data and information is generated daily on just about every aspect of the business and the economy.

This unit provides students with the opportunity to learn how to make effective business decisions based on the application of a number of standard data analysis techniques to real world business problems. This unit provides students with the opportunity to integrate and draw upon their disciplinary knowledge in analysing data and making decisions.

GSZ404 Accounting for Decision Making

Anti-requisites	GSN202
Equivalents	GSN404
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP9 (Block), 6TP4 (Block) External - 5TP5

This unit provides students with the opportunity to develop an understanding of accounting techniques that are useful for managerial decision making. Essentially this unit concentrates on two key areas of particular importance to business managers and leaders: budgeting and cost control accounting and the analysis and interpretation of financial statements. Through the study of this unit, students will be in a better position to make informed predictions, recommendations and decisions about future directions and actions that are needed to ensure the financial stability of a particular organisation.

GSZ405 Strategic Management

Equivalents	GSN405
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP1 (Block), 6TP3 (Block) External - 5TP2

Strategy is the process of determining goals and moving towards the achievement of those goals in a business, government, or not-for-profit setting. The Strategic Management unit introduces the concept of strategy and explores the basic tenets of the strategy process, competitive advantage, and strategic management in a changing global environment. It lays the foundations for students in terms of understanding contemporary thinking in the strategy field.

GSZ406 Contemporary Human Resource Management Issues: Global Perspectives

Equivalents	GSN406
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP9 (Block) External - 5TP3

There is increasing recognition internationally of the critical contribution of effective people management in obtaining and sustaining a strategic advantage in an increasingly globally competitive business environment. This unit provides students with the opportunity to examine the challenges faced by managers and leaders in achieving effective human resource management in the complex business environments of today and tomorrow. The unit adopts an issues-based approach, designed to build awareness of the human resource management issues and build contextually specific solutions to those issues in diverse industry contexts.

GSZ407 Communicating to Influence

Anti-requisites	GSZ603
Equivalents	GSN407
Credit Points	6

Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2 (Block), 6TP4 (Block) External - 5TP3

Specialised knowledge alone is no longer enough to guarantee success in business; you must be able to effectively communicate this knowledge with a variety of audiences, in a variety of situations and using a range of communication technologies. This unit provides students the opportunity to develop highly effective and persuasive oral, written and technology enabled communication skills. The unit encourages students to develop an understanding of their audience, sensitivity to language use and to demonstrate the value and power of language as a means of persuasion in managerial and leadership contexts.

GSZ408 Marketing Strategically

Equivalents	GSN408
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP2 (Block) External - 5TP9

The Fundamentals of Marketing Management unit provides students with the opportunity to critically examine and evaluate the role of marketing and its contribution to the strategic processes of organisations operating in increasingly complex and highly competitive global business environments. A study of key marketing decisions made by real world organisations are examined including the marketing concept, the marketing mix, marketing information systems, marketing research, market segmentation, targeting and positioning, and the process of marketing planning, implementation and control.

GSZ409 Understanding and Leading Others

Anti-requisites	MGN412, BSN202
Equivalents	GSN409
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP5 (Block) External

	- 5TP8
--	--------

The Understanding and Leading Others unit will help students to be able to identify, assess and understand the factors that influence the thoughts, feelings, motivations and actions of individuals in the workplace. Students will then have the opportunity to apply these insights into human behaviour within organisations to determine the most effective strategies and courses of action for maximising the potential of individuals and to lead and build high performing face-to-face and virtual teams.

GSZ410 Entrepreneurship

Anti-requisites	MGN428
Equivalents	GSN410
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP4 (Block) External - 6TP2

The Entrepreneurship unit introduces students to the field of entrepreneurship and the management of innovation. Through the study of this unit, students will be able to develop an understanding of entrepreneurial attitudes, abilities, behaviours and culture and explore a range of issues related to opportunity recognition, viability screening for sustainable competitive advantage, risk recognition and mitigation, intellectual property protection and developing a business model for a new enterprise.

GSZ412 Business Law

Anti-requisites	AYN410 and EFN413
Equivalents	GSN412
Credit Points	6
Campus	Gardens Point, Canberra and External
Availabilities	Gardens Point - 6TP4 (Block), 6TP6 (Block) External - 5TP2, 5TP9

The Business Law unit provides managers with an overview of basic legal principles, which form the foundation of the laws of commercial transactions from the perspective of, and with particular relevance, to managers. Students will learn key elements of the rules governing business dealings by the interaction of the laws of contract, agency and franchising, property law, securities and bailment, company law and consumer law. The unit

also introduces students to the Australian legal and statutory structure and provides an overview of the legal nature of business entities.

GSZ413 Financial Management

Pre-requisites	GSZ403
Anti-requisites	EFN406
Equivalents	GSN413
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP9 (Block) External - 6TP3

It is essential for business leaders and managers who must make financial decisions, to have a fundamental understanding of the operation of financial markets and how these markets impinge on the operation of their organisation. They must know how to properly value cash flows and other assets, and understand the fundamentals of asset diversification, risk and return, and the cost of capital. This unit introduces students to the national and international financial environments in which they operate from a personal and business perspective. The unit explores the three major lessons in finance: time value, diversification and arbitrage.

GSZ415 Global Leadership and Complexity

Equivalents	GSN415
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2 (Block) External - 6TP5

In a complex society where changes are occurring with increasing speed and frequency, leadership has never had greater significance, nor has it been more challenging. The Leadership and Complexity unit is designed to improve the capacity of students to understand, communicate and influence the people they will lead in complex, rapidly changing business environments. Students will be taken through a variety of reflective activities designed to help them to shape up their own leadership philosophy that will form the foundation of their leadership style.

GSZ428 International Study Tour

Equivalents	GSN428
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP4 (Block) External - 6TP3

In recent years we have seen the rise of many emerging economies particularly in the Asia/Pacific region. Due to developments in technology, changes in government policies, Australian businesses now operate in a highly competitive, global business environment. Business leaders and managers need to have broader business perspectives, cultural and social understandings of how business is conducted in other countries outside Australia. Through the tour students will be able to study first-hand the business environment and the underlying socio-political, geographical and historical aspects of those countries visited in considerable depth. As part of the tour, the group attends organised briefings, business meetings, presentations and site visits in the host countries.

GSZ445 Special Topic 2

Equivalents	GSN445
Credit Points	6
Campus	Gardens Point
Availabilities	Gardens Point - 5TP4 (Block)

GSZ464 Systems Thinking for Managers

Equivalents	GSN464,GSZ502,GSN 502
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP3 (Block), 5TP6 (Block) External - 5TP4

Leaders and managers of organisations deal with complex problems whose resolution requires holistic approaches, sophisticated thinking and pluralist methodologies. Systems Thinking is an approach that has been successfully used by business managers and leaders to engage with and manage complex and often ambiguous business problems. This

unit provides students with foundational knowledge related to systems methodologies and their underpinning epistemologies that enable business leaders and managers to solve and manage the complex, multi-faceted business problems of today and tomorrow.

Equivalents	GSN468,GSN504,GSN 526,GSZ526,GSZ556
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP8 (Block), 6TP3 (Block) External - 5TP5

Simple problem solving approaches are no longer sufficient to solve and manage the complex and multi-faceted business problems of today and tomorrow. Instead, managers need to be skilled in new approaches such as problem reframing, creative problem solving, lateral, analogical and design thinking that support creative and innovative approaches for dealing with complex business challenges. This unit enables students to explore contemporary and creative approaches to problem framing and problem solving in complex business environments both at the individual and group level. Students will also have the opportunity to investigate how to create workplace environments that encourage and foster creativity and innovation.

GSZ473 Corporate Governance and Accountability

Pre-requisites	GSZ404 and GSZ409 and GSZ412 and GSZ491
Equivalents	GSN473
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP8 (Block) External - 5TP6

Boards of directors and managers of organisations are now legally as well as morally accountable for policies, processes, and outcomes to an increasingly vocal set of stakeholders.

This unit introduces students to the principles underlying good corporate accountability and governance and examines the roles of the board and management in implementing and monitoring a sound corporate culture, proactively identifying and dealing with risk, and safeguarding the company's assets and its place in our society and economy. Comparative models of governance are also discussed drawing on examples from many cultures and jurisdictions, as well as large and small businesses.

GSZ490 Managing Technological Innovation

Pre-requisites	GSZ405 and 42cp of EMBA units
Equivalents	GSN490
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP5 (Block) External - 5TP4

The management of technological innovation is a strategic process that supports, drives and influences the strategic management of the firm. The Managing Technological Innovation unit explores the dynamics of technological innovation, how to identify trends within their technological and competitive environments and use these insights to craft an innovation strategy and importantly strategies for operationalising the innovation.

GSZ491 Economics in Business

Anti-requisites	EFN405, GSN411 and GSN414
Equivalents	GSN491
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP8 (Block), 6TP3 (Block) External - 5TP5

For business leaders and managers to operate in the volatile global business environment of today, it is important for them to have a fundamental understanding of both macro and micro economics to guide their business decision making. This unit introduces students to an analytical framework that is needed to understand how market

conditions are determined at both the micro and macro levels and how market conditions affect business performance, including issues such as supply and demand, market structures and how they impact pricing strategies and decisions of individual firms, structure of the economy as well as some exploration of international trade.

GSZ497 Personal Leadership and Change

Equivalents	GSN497,GSN503,GSZ 503,GSZ554
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP9 (Block), 6TP4 (Block) External - 5TP7

It is widely recognised that self-awareness provides a foundation for understanding ourselves as leaders and is a key attribute that characterises truly great leaders. The Personal Leadership and Change unit it explores personal leadership in the context of cultural understanding and ethics and how students interactions with others impact on their effectiveness as leaders in a complex business environment. This unit provides students with the opportunity to look inwardly to gain a deeper understanding of themselves and to benchmark where they are currently as a leader. Students are encouraged to identify opportunities for growth and development through the development of a leadership development plan that will be revisited in GSZ415 Leadership and Complexity.

GSZ505 Communicating Effectively

Equivalents	GSN505
Credit Points	6
Campus	External
Availabilities	External - 5TP4

The successful management of a complex project needs skilled, communicatively competent managers who are capable of creating and maintaining a flexible, listening and action-oriented project environment. To achieve success, the manager, in their leadership role in a complex project, must therefore develop personal skills, including the ability to frame ideas in

retorically sophisticated ways and the ability to influence others to achieve diverse goals of the project. The project manager also needs to plan and promote effective organisational communication that supports the goals and processes embedded in the project. This unit supports the development of these two critical competencies.

GSZ509 Workplace Project 1

Equivalents	GSN509
Credit Points	6
Campus	External
Availabilities	External - 5TP4

Workplace Project 1 will be conducted using a problem-based learning approach. Each participant will identify a problem resulting from the management of a complex project in their workplace or a nominated other workplace. Working with a workplace mentor, an academic advisor, and a support team of project managers from the program, the participant will conduct research to understand the problem, identify the key dynamics and issues and develop implementation plans to improve the situation. Participants will apply key learnings from units GSZ 510-508.

GSZ512 Strategically Managing Risk

Equivalents	GSN512
Credit Points	6
Campus	External
Availabilities	External - 5TP4

Risk is an invariant feature of any project. On the one hand, risks can threaten the achievement of a project's objectives. On the other hand, risks can also create major opportunities which projects can exploit to achieve substantial organizational benefits. Indeed in some environments, the greater the uncertainty, the greater the opportunity. The complex project manager must be able to view and balance both perspectives. Unfortunately the traditional approach to risk management assumes that project environments are linear and reductionist. While this assumption may be acceptable in simple projects, it can lead to disastrous consequences in complex project environments. So the complex project manager must understand how to apply the risk management process using systems thinking as a guide. Therefore, the unit explores a range of advanced

approaches including 'systems thinking', risk analytics and real options to emphasise systemic approaches to managing risks within a complex project management environment. Moreover, judgement and decision-making in complex projects can be impaired by a range of cognitive heuristics and biases, and political factors. As a result, an infamous but perennial feature of many complex projects is gross underestimation of cost and schedule and gross overestimation of proj

GSZ513 Managing Innovation in Technology-Based Organisations

Equivalents	GSN513
Credit Points	6
Campus	External
Availabilities	External - 5TP7

Managing for Innovation in the context of complex projects in technology-based organisations is a strategic process which involves identifying key innovative opportunities, evaluating those opportunities, and driving the innovations forward. Continuous innovation with a consistent output to realise value requires: leadership; an organisational culture that embraces innovation as a core value; innovation processes as a core methodology; and people who are focused, enthusiastic and committed to generating and exploiting the best ideas. Innovation in complex projects also means understanding and dealing with technological risk. This unit will analyse case examples of technological and organisational innovations looking in particular at the dynamics of innovation and at management strategies that shape and drive innovation in complex projects. This unit will identify ways of empowering teams at the strategic and operational level to identify innovative opportunities and overcome organisational inertia.

GSZ515 Business Planning

Equivalents	GSN515
Credit Points	6
Campus	External
Availabilities	External - 5TP7

This unit offers participants the opportunity to write a formal business plan as part of the project management process. As business planning is an intensive viability screening exercise in which strategic alternatives must be

considered, participants are required to choose a preferred 'business model' and demonstrate the viability of the project. The business plan summarises the proposed strategy and provides details on the operations, financing, marketing and management of the proposed project and is designed to facilitate the implementation of the selected strategy. The business plan communicates the viability of the project to stakeholders in the project and is potentially a powerful and useful tool in the development of bid submissions.

GSZ516 Negotiation and Mediation Strategies

Equivalents	GSN516
Credit Points	6
Campus	External
Availabilities	External - 5TP7

Negotiation and alternative dispute resolution skills are essential for managers to deal effectively with conflict in all aspects of complex project management. This unit embeds the requisite knowledge, skills and reflective abilities to identify potential sources of conflict, design alternative dispute resolution systems to avoid escalation of conflict, negotiate for results, identify and deal with the impact of power on the dynamics of the negotiation process and effectively implement distributive and integrative strategies in the management of complex project negotiations. This unit provides the fundamental skills to enable managers to improve their capacity to negotiate for results in complex settings through role-play exercises and reflection on individual performance and outcomes.

GSZ517 International Study Tour

Equivalents	GSN517
Credit Points	6
Campus	External
Availabilities	External - 5TP4

In previous units and in particular the sister unit GSN 518 Implementation of Complex Projects, course members have critically studied a diverse range of approaches to complex project implementation. This unit offers a rich learning opportunity to analyse the implementation of these approaches applied in a broad range of international complex projects, and to leverage the experience of world-class complex project

leaders and managers. Similar experiences could not be obtained in Australia alone. Recognising the international nature of most complex projects, particular attention is given to managing across borders and cultures with multiple stakeholders.

GSZ518 Implementation of Complex Projects

Equivalents	GSN518
Credit Points	6
Campus	External
Availabilities	External - 5TP4

Complex projects usually demand radically different approaches to those applied to traditional projects. In stark contrast to their traditional counterparts, complex projects frequently have neither clear objectives nor a well-defined implementation approach. Project managers who fail to recognise the unique nature of complex projects, and attempt to apply only traditional development and delivery approaches will inevitably fail. Successful implementation requires that project managers be familiar with the broad range of contemporary project frameworks and approaches, and be able to synthesize development and delivery methodologies which match the unique and dynamic characteristics of complex projects. This includes the application of sophisticated project scheduling approaches and review techniques which quantify the uncertainty implicit in complex projects and enable early recognition of serious schedule anomalies including delays. Finally, in critically reviewing complex project implementation, senior program managers should be able to apply a structured forensic mindset in diagnosing potential problems, evaluating potential remediation options, and assessing the prognosis. This includes the role of forensic, as opposed to traditional design, approaches to the strategic management of complex projects, both in responding

GSZ519 Leadership for Results

Equivalents	GSN519
Credit Points	6
Campus	External
Availabilities	External - 5TP7

There can be no leaders without followers; therefore, leadership can be defined as a process of persuasion by which an individual influences others to pursue identified goals. The skills of

leadership can be identified and learned. In this unit we will explore the various ways of defining and understanding leadership. The unit builds upon the knowledge you have already gained in earlier units such as 503, Self Realisation and Personal Development, 507 Developing and Leading High Performance Teams, and 508 Understanding and Influencing Behaviour in Organisations. The focus of this unit will be to build on your growing self-awareness and improve your capacity to understand, communicate and influence the people you will lead in complex projects.

GSZ520 Planning and Implementing Change

Equivalents	GSN520
Credit Points	6
Campus	External
Availabilities	External - 5TP4

Complex projects go through many organisational changes as they progress through the project lifecycle. In addition to changes required by growth and change in the project's tasks, additional changes might be required to redirect organisational culture and values or realign with changes in strategy. This is particularly true of large projects that extend over many years and operate in changing environments. The ability to plan, organize and manage organisational change across the project lifecycle is critical to the success of a complex project manager. This unit examines the need for organisational change in a complex project, highlights barriers, challenges and resistance to change, delivers relevant theory, demonstrates diagnostic tools used in organisational redesign and presents approaches to planning for and managing change.

GSZ521 Managing Contract Relationships

Equivalents	GSN521
Credit Points	6
Campus	External
Availabilities	External - 5TP7

The business of complex global projects is dominated by concerns of jurisdiction, security, and trust. Within this operating context, the judicious attention to the social as well as technical aspects of project management becomes a core competency. This unit focuses attention

on developing, maintaining and securing the contractual relationships within and between project partners. It pays particular theoretical and pragmatic attention to identifying and building strategic relationships and embedding trust as a core social relation in contracts. The management and measurement of trust as a key indicator within relationships is a further emphasis of the unit.

GSZ522 Accountability and Governance

Equivalents	GSN522
Credit Points	6
Campus	External
Availabilities	External - 5TP4

Governance involves a set of relationships between an organisation's management, its board/governing body, its shareholders and other stakeholders. Governance provides the foundation for accountable management at all levels including corporate, portfolio, program and project levels. This unit will examine the predominant system of governance throughout the world. We concentrate on the roles and responsibilities of boards and directors within organisations, and introduce students to key theories that inform our understanding of the purpose and implementation of effective governance. Because successful management of complex projects is often contingent upon the ability to negotiate with companies in different jurisdictions, this unit will explore the sources of different governance practices and values between different cultures and jurisdictions. We will also explore the application of corporate governance to the private sector and examine the suitability of best practice governance in the domain of complex projects.

GSZ523 Stakeholder Engagement and the Media

Equivalents	GSN523, GSZ555
Credit Points	6
Campus	External
Availabilities	External - 5TP7

There is increasing recognition internationally of the need for organisations to manage strategically their relationships with various stakeholders. This is particularly true in times of crisis, as organisations face

increased scrutiny at a local and global level, where such relationships are placed at risk and the survival and success of the organisation may be in question. The ability to identify issues, negotiate with stakeholders where possible, handle effective communication, and to understand engagement practices is critical to the ongoing success of organisations. This unit provides the fundamental skills to: identify potential issues and crisis areas within organisations; establish systems to understand stakeholder expectations; to manage the crisis process from issue identification through to implementing a crisis plan and debriefing; and demonstrate the importance of integrating communication and action plans in issues management and crisis communication.

GSZ524 Capstone Integrating Workplace Project

Equivalents	GSN524
Credit Points	6
Campus	External
Availabilities	External - 5TP7

In Australia and worldwide there are increasingly large-scale, complex projects being developed as government and organisations take advantage of new technologies and replace aging infrastructure, but do so in a context of increasing public concern over the potential negative fiscal, social and environmental impacts of such projects. Identification of challenging issues, followed by data collection, analysis and synthesis into a plan of action is critical to the success of complex project managers. In this unit participants will work with the Project Complexity Manager to identify a challenging issue. The student will then prepare a Proposal for how to address the issue. After implementing the Proposal the student use these findings to write a report and present their recommendations to the Project Manager. They will then reflect and report their leanings to QUT faculty. Capstone Integrating Workplace Project will be conducted using a problem-base learning approach. Each participant will identify a complex project opportunity in their workplace or a nominated other workplace. Working with a workplace mentor, an academic advisor, and a support team of project managers from the program, the participant will conduct research to understand the problem, and identify the key dynamics and issues. This unit draws on each of the competencies as a capstone unit.

GSZ529 Intellectual Property Strategy and Management

Equivalents	GSN529
Credit Points	6
Campus	External
Availabilities	External - 5TP7

IP rights are the legal framework that applies to the creation, acquisition, management and disposal of intangible property. In particular, they facilitate commercial transactions in intangible proprietary rights, and provide a basis for rewarding intellectual effort. Developing and implementing an effective IP identification and management strategy is essential in strategic procurement projects. Senior personnel in charge of managing strategic procurement projects need to have the appropriate skills to identify IP requirements over the life of the project/requirement and to manage the IP created or acquired in order to achieve Defence's objectives over the program lifecycle. IP rights have gained increasing significance in public sector procurement, particularly in relation to complex and strategic goods and services that are technologically advanced and require constant development or support. IP is increasingly used to maximise profits in industry and therefore is also a bargaining chip when entering into contractual relationships. International conventions and arrangements also have a profound impact on the rights and obligations of contracting parties, particularly in procurements involving foreign contracting parties. Accordingly, it is important to be familiar with international IP arrangements, including as administered by WIPO and the WTO. This unit will utilise case

GSZ530 Sustainable Strategic Contracts and Suppliers

Equivalents	GSN530
Credit Points	6
Campus	External
Availabilities	External - 5TP4

Managers of Strategic Projects need to consider the capability and maturity of industry to provide solutions and how strategic projects can be used as a catalyst for long term industry development. This unit explores how to identify critical industry sectors and strategic suppliers; select and performance manage long term strategic partners throughout the project lifecycle;

and how industry development strategies shape supplier management. GSN 530 focuses on the strategic issues relevant to suppliers and contracts with the aim of establishing the content and framework for further investigation in GSN 532, Contract Risk allocation and Insurance.

GSZ531 International Contracts

Equivalents	GSN531
Credit Points	6
Campus	External
Availabilities	External - 5TP4

This unit explores the jurisdictional issues that arise in strategic procurement projects involving international commercial partners and suppliers. This unit further explores the procurement trends in Defence procurement agencies in the US, UK and elsewhere in order to understand comparative defence procurement practices and strategies. In particular, this unit examines the specific issues that arise in inter-government contracts and disputes and how these can be best managed.

GSZ532 Contract Risk Allocation and Insurance

Equivalents	GSN532, GSZ555
Credit Points	6
Campus	External
Availabilities	External - 5TP7

GSN510 Complex Projects and the Law, introduced the sources of contractual risks and how various procurement models attempt to deal with these risks as they vary across the project lifecycle. This unit further explores the sources of commercial risks and how some of these risks are addressed by insurance.

GSZ533 Financial Analysis and Decision Making

Equivalents	GSN533
Credit Points	6
Campus	External
Availabilities	External - 5TP4

-

GSZ534 Building Organisational Capability

Equivalents	GSN534
Credit Points	6
Campus	External
Availabilities	External - 5TP7

This unit develops capability to achieve high performance in dynamic and complex project based organisations (PBOs). Knowledge creating companies such as PBOs are characterised by rich expertise and concomitant dependence on experts themselves (human capital). Given this, two distinctive yet complementary bodies of work underpin the development of organisational capability in PBOs. The first body of literature centres on multi-level strategic human resource management strategies to maximise expertise development, deployment and retention in PBOs. Shaping and responding to the design features of dynamic organisational architecture and developing an appropriate organisational culture are also considered in this context. The second theoretical approach focuses on knowledge as a strategic asset and the necessity to convert individual knowledge to sustainable organisational knowledge. Commercially significant knowledge in PBOs may be fragmented, dispersed, personally held, inaccessible and at risk. Given the predictable knowledge discontinuities in PBOs, systematic transfer of know-how from, between and within projects has significant impact on the success of projects and the organisation itself. Therefore, the focus is on building organisational knowledge assets to underpin expert performance and optimise project and company results.

GSZ535 Sourcing and Contracting Strategies in a Global Environment

Equivalents	GSZ527,GSN5 27
Credit Points	6
Campus	Gardens Point and External
Availabilities	External - 5TP5, 5TP7

This unit forms part of both the Complex Project Leadership and Strategic Procurement elective strands of the EMBA program. This unit is designed to provide students with the opportunity to develop knowledge and skills relating to

Units

sourcing and contracting strategies, risks and benefits and the jurisdictional issues that arise in international strategic procurement projects.

GSZ536 Strategic Leadership of Supplier Relationships

Equivalents	GSZ521, GSN521
Credit Points	6
Campus	Gardens Point and External
Availabilities	External - 5TP7, 6TP5

This unit forms part of both the Complex Project Leadership and Strategic Procurement elective strands of the EMBA program. In the world of complex, long-term global projects, it is not possible for any organization to go it alone - they need to develop strategic partnering arrangements with other organizations. As such, this unit is designed to develop essential leadership and relationship management capabilities that will enable students to select, develop, maintain, performance manage and secure contractual relationships between project partners.

GSZ537 Strategic Alignment and Project Implementation

Equivalents	GSN518, GSZ518
Credit Points	6
Campus	External
Availabilities	External - 5TP7

This unit forms part of the Complex Project Leadership elective strand of the EMBA program. Typically complex projects have neither clear objectives nor a well-defined implementation approach and as such require radically different approaches to the project management and implementation of complex projects. This unit is designed to provide students with the knowledge and skills to ensure strategic alignment of complex projects and the ability to successfully implement complex projects using an evolutionary approach to match the peculiar mix of complexity dimensions exhibited by the complex project.

GSZ538 Strategically Managing Risk

Pre-requisites	GSZ464
Equivalents	GSZ512,G

	SN512
Credit Points	6
Campus	External
Availabilities	External - 5TP7

This unit forms part of both the Complex Project Leadership and Strategic Procurement elective strands of the EMBA. This unit is designed to provide knowledge and skills in identifying and dealing with the emergent risks associated with complex projects. It moves beyond traditional risk management approaches, which generally assume that projects are linear and reductionist, to provide a systems thinking approach to the management of risk in complex environments and large-scale procurements. The unit also develops skill in and provides strategies for recognising major opportunities that can arise from risk and how to exploit them to achieve substantial organisational benefits.

GSZ539 Intellectual Property Strategy and Management

Equivalents	GSN529,GSZ529
Credit Points	6
Campus	Gardens Point and External
Availabilities	External - 5TP7, 6TP4, 6TP5

This unit forms part of the Strategic Procurement elective strand of the EMBA program. This unit is designed to provide knowledge of IP rights and the legal framework surrounding them particularly in relation to complex and technologically advanced strategic goods and services involved in strategic procurement projects. The unit develops skill in the design and implementation of effective IP identification and management strategies both within Australian and international contexts in order to protect IP rights using recognised best practice for strategic procurement projects.

GSZ540 Contract Risk Allocation and Insurance

Pre-requisites	GSZ538
Equivalents	GSN532,GSZ532
Credit Points	6
Campus	Gardens Point and External
Availabilities	External

	- 5TP7, 6TP5
--	--------------

This unit forms part of the Strategic Procurement elective strand of the EMBA program. This unit is designed to provide knowledge of the sources of commercial risks associated with large-scale procurement and the skill in applying tools and strategies for mitigating those commercial risks over the lifecycle of the procurement. The main focus of the unit is on identifying major sources of commercial risks and their contractual treatment through liabilities, indemnities and insurance.

GSZ551 Negotiation Skills and Strategies

Equivalents	GSN551
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP8 (Block) External - 5TP9

Negotiation is an important part of everyday management, and effective negotiation skills are indispensable for successful managers operating in a globalised and complex business environment. This Negotiation Skills and Strategies unit introduces students to a conceptual framework for analysing the business negotiation process. The exploration of negotiation practices in different contexts better prepares students for negotiation in the increasingly globalised business environment. GSZ 551 forms part of the Integration and Specialisation component of the EMBA and should be undertaken by students once all the units in the Building Foundations and the majority of the Multi-Disciplinary Decision Making components of the program are complete. This unit is also important part of the preparation for the International Tour.

GSZ553 Business Leadership Practicum

Pre-requisites	GSZ415
Equivalents	GSN553
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 12TP1 (Block) External - 6TP2

Leaders in business, government and

community organisations face daily challenges and difficult decisions. How leaders make decisions in complex environments is an insight that is rarely able to be observed by students developing their own leadership and decision making skills. Students completing this highly experiential unit will be paired with a senior executive level leader from a business, government or community organisation to observe the leader in action and engage in discussions about leadership, decision making and dealing with the ethical dilemmas faced by this leader over a period of nine months. This unit is positioned to build upon the EMBA executive coaching program and the work completed in GSZ415 Leadership and Complexity unit.

GSZ558 Stakeholder Engagement and Media Principles

Equivalents	GSN558, GSZ555, GSN496, GSN523, GSZ523
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP6 (Block) External - 5TP8

In this globally connected world it has never been so important for organisations to effectively manage their public reputation portrayed in both traditional and social media. The Stakeholder Engagement and Media Principles unit develops students understanding of the role of stakeholder engagement, the importance of stakeholder analysis and the role media plays in influencing organisational issues.

GSZ560 Advanced Strategy for Global Business

Pre-requisites	GSZ405 or GSN405
Equivalents	GSN560
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP4 (Block) External - 6TP5

Business leaders today need to be multi-disciplinary strategic thinkers, who have foresight and an ability to take a big-picture, long term view of an

organisation. Additionally, the ability to make decisions, often with incomplete information, and to determine appropriate strategic responses to complex, global business problems and opportunities is seen as the key determinant of positive business outcomes and the longevity of organisations. The Advanced Strategy for Global Business unit helps students to develop a sophisticated knowledge and application of strategic analysis techniques and approaches including the dynamics of inter-firm dependencies, the nature of complex-adaptive systems, an understanding of the pivotal role of data in the strategy process and the limitations of theoretical models.

GSZ561 Conducting Business Internationally

Other requisites	MBA Director approval is required. Students are expected to have completed at least 48 credit points prior to enrolment.
Assumed Knowledge	null
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 5TP3 (Block) External - 6TP3

Today we operate in a highly-competitive globalised business environment. Those charged with leading large, medium or small business organisations or government departments or agencies must be able to identify and seize the business opportunities associated with conducting business internationally. This unit provides students with the tools and strategies to give them increased confidence and competence in their ability to conduct business internationally. Conducting Business Internationally should be studied in conjunction with GSZ428 International Study Tour. This unit forms part of the EMBA Integration and Specialisation component of the program and should be undertaken by students once all the units in the Building Foundations and the majority of units in the Multi-Disciplinary Decision Making components of the program are complete. This unit will be made available students from 2014 and replaces the Special Topic unit, Doing Business in China.

GSZ572 Integrated Workplace Project - Business Planning

Equivalents	GSZ416, GSN416
Other requisites	114 CPs of Core EMBA units as approved by MBA Director including GSZ405 and GSZ410
Assumed Knowledge	null
Credit Points	6
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP5 (Block) External - 6TP6

New ventures can originate from any organisational context. Irrespective of the context, entrepreneurs face unique challenges in planning for and designing new ventures. This capstone unit in the EMBA program, provides students with the opportunity to apply learnings from the program in an integrated manner resulting in the designing and planning of a new ventures within an existing organisation or a new start-up or a not-for-profit organisation. GSZ572 forms part of the EMBA Integration and Specialisation component of the program and should be undertaken by students once all the units in the Building Foundations and the Multi-Disciplinary Decision Making components of the program are complete. This unit will be available to students from 2014 and will replace GSZ416 Business Plans 1.

GSZ601 Leading Self and Others

Anti-requisites	GSZ554
Credit Points	12
Campus	External
Availabilities	External - 5TP6

GSZ602 Actioning Strategic Change and Innovation

Anti-requisites	GSN405
Credit Points	12
Campus	External
Availabilities	External - 6TP5

Managing the development and implementation of strategy in government organisations requires the ability to effectively develop innovative solutions for problems in complex environments

and plan for the change process through their implementation. This unit examines strategic management concepts and frameworks that will help the manager to understand the strategic context and develop business strategies aligned to government policy frameworks.

GSZ603 Communicating for Results

Anti-requisites	GSN407, GSZ407
Credit Points	12
Campus	External
Availabilities	External - 5TP8

GSZ604 Navigating Risk, Ethics and Politics

Anti-requisites	GSN456
Credit Points	12
Campus	External
Availabilities	External - 6TP3

GSZ605 Strategically Managing Public Funds

Credit Points	12
Campus	External
Availabilities	External - 6TP2

GSZ606 Leading Strategic Initiatives and Programs

Credit Points	12
Campus	Gardens Point and External
Availabilities	External - 6TP3, 6TP6

Building on the underpinning principles of established frameworks such as Managing Successful Programmes (MSP), aspiring leaders must be able to design and lead organisational transformation initiatives in complex and changing environments. The ability to lead in complex environments, having the self awareness to engage with diverse stakeholders and senior executives both within and external to the organization and manage conflicting interests, at the same time as ensuring alignment of program and organisational strategy, is critical to success.

GSZ607 Developing and Delivering Complex and Contested Policy

Credit Points	12
Campus	External
Availabilities	External - 6TP2

GSZ608 Leadership of Strategic Supplier Relationships

Credit Points	12
Campus	External
Availabilities	External - 6TP2

GSZ621 Grounding Theory and Practice

Anti-requisites	BSN201, MGN441, MGN442
Equivalents	GSN621
Credit Points	12
Campus	Online
Availabilities	Online - 12TP2

This Unit works through a framework for leadership that highlights the benefit of activating creative leadership competencies balanced across task and relationship. The lens is primarily one of the individual, while at the same time considering groups and organisational perspectives (explored as primary lenses in the next two units). Each student undertakes a 360 degree feedback process and explores their own competencies as they apply to the conduct of coaching and mentoring practices. This unit also explores the science of coaching and mentoring through the lens of positive psychology (incorporating knowledge from neuroscience) and complexity leadership.

GSZ622 Linking Leadership and Complexity of Mind

Pre-requisites	GSZ621 or GSN621
Anti-requisites	BSN201, MGN441, MGN442
Equivalents	GSN622
Credit Points	12
Campus	Online
Availabilities	Online

- 12TP3

This unit moves from the lens of the individual to the group and collective. Coaching and mentoring are traditionally viewed as 1-1 conversational practices. However, organisations are made up of teams of people and group and team coaching are increasingly being used as powerful interventions to support organisational change and to work across organisational silos. This unit explores how team and group dynamics work and how coaching and mentoring can be leveraged by leaders to generate change at the team level, and at the level of the organisational system. The unit also draws together knowledge about cultural differences, intercultural effectiveness and systems thinking to provide principles for using coaching approaches for leveraging advantage in diverse and messy contexts. The unit concludes by linking to the construction of coaching cultures in complex organisational contexts, and positions students to consider the organisational lens.

GSZ623 Groups, Cultures and the Collective

Pre-requisites	GSZ621 or GSN621
Equivalents	GSN623
Credit Points	12
Campus	Online
Availabilities	Online - 12TP3

This unit moves from the lens of the individual to the group and collective. Coaching and mentoring are traditionally viewed as 1-1 conversational practices. However, organisations are made up of teams of people and group and team coaching are increasingly being used as powerful interventions to support organisational change and to work across organisational silos. This unit explores how team and group dynamics work and how coaching and mentoring can be leveraged by leaders to generate change at the team level, and at the level of the organisational system. The unit also draws together knowledge about cultural differences, intercultural effectiveness and systems thinking to provide principles for using coaching approaches for leveraging advantage in diverse and messy contexts. The unit concludes by linking to the construction of coaching cultures in complex organisational contexts, and positions students to consider the organisational lens.

GSZ631 Managing within the Context of Government

Credit Points	12
Campus	Gardens Point, Online and External
Availabilities	Online - 12TP1, 12TP2 External - 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP2, 12TP2, 12TP2, 12TP2, 12TP3, 12TP3, 12TP3

GSZ631 provides the 'big picture' of government and the context within which public sector managers operate. It develops an understanding of the institutional frameworks and conventions which guide practice and ensure sustainable democratic processes. This unit places the business of government (policy framing and delivery) within its systemic context. Public sector and NGO managers are enabled to explore, appreciate and respond to the many institutional reforms and managerial challenges which emerge from global forces, local political concerns and increasing interconnectivity.

GSZ632 Managing Self and Others

Credit Points	12
Campus	Gardens Point, Online and External
Availabilities	Online - 12TP2 External - 12TP1, 12TP1, 12TP1, 12TP1, 12TP2, 12TP2, 12TP2, 12TP2, 12TP2, 12TP2, 12TP3, 12TP3, 12TP3, 12TP3, 12TP3

GSZ632 provides insights into key individual and group behaviours, and offers skills for communicating with and managing people and teams. By building greater personal self-awareness, participants are equipped to better manage their strengths and limitations and improve resilience. By appreciating the naturally occurring differences in others they are equipped to respond appropriately and manage performance positively. By developing and practising key communication skills, participants are able to influence more effectively (interpersonally and virtually) so that

groups and teams can work more productively.

GSZ633 Managing Outwards in a Networked Government

Credit Points	12
Campus	Gardens Point and External
Availabilities	External - 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP2, 12TP2, 12TP3, 12TP3, 12TP3, 12TP3, 12TP3

GSZ633 explores the variety of relationships that managers need to build across the public sector and outside it - with the private sector, with community and not for profit sector and with citizens and clients of government services. The unit will explore strength-based and systems approaches to equip public sector and NGO managers to build effective partnerships for policy making and delivery of government business and customer services in contestable, complex and virtual environments. In this unit participants will also identify a potential workplace project and develop a draft proposal.

GSZ634 Managing Operations for Outcomes

Credit Points	12
Campus	Gardens Point and External
Availabilities	External - 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP1, 12TP2, 12TP2, 12TP2, 12TP2, 12TP3, 12TP3

Government agencies and NGOs continually review their strategies to ensure that context is understood, stakeholders are engaged, outcomes are achieved, innovation is an organisational practice, and review and enhancement processes are embedded. Critical to the creation and delivery of public value is the effectiveness and robustness of the execution of strategy and the ability of the entity to leverage its various capabilities. As such, public sector and NGO managers plan, manage, organise and implement to ensure results are delivered and outcomes achieved. This unit is designed to build the overall operational capabilities of these managers, and provide them with highly effective and

appropriate tools, processes and diagnostic capabilities, to deliver and sustain ongoing public sector value. This is the capstone unit. This unit enables students to draw on and apply the learnings from the whole program to a relevant workplace project.

HLB001 Health Needs of Aboriginal and Torres Strait Islander Australians

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit will provide students with an introduction to a range of historical and contemporary factors that impact on the health and wellbeing of Indigenous people today. Communities require health practitioners to have the knowledge and skills to provide appropriate care for Aboriginal and Torres Strait Islander people. This is underpinned by an Indigenous defined primary healthcare framework. In this unit, an Indigenous definition of health is the basis of commencing the journey towards cultural awareness and cultural sensitivity.

HLB002 International Study Experience

Other requisites	Academic approval and successful completion of 96 credit points of study in your current course
Assumed Knowledge	null
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Within the context of an approved Outward Bound Mobility activity, this unit provides an opportunity for you to further develop your knowledge and skills for working in a globalised context through an international experience undertaken within the context of your course. It allows you to build on, and extend studies that you have completed in the earlier parts of your course. It also offers an international 'lens' through which to reflect on your current course experiences and, thus, the opportunity to broaden and deepen your repertoire of skills for working in local and/or global contexts.

HLB003 Interprofessional Learning (IPL) Elective

Other requisites	Successful completion of 96 credit points of study in your current course. To undertake assessment in this unit you must be undertaking an approved IPL activity during the semester of enrolment, or have undertaken an approved IPL activity during the preceding semester. Approved IPL activities include the Health Fusion Team Challenge, Outreach activities conducted by QUT Health Clinics, or as negotiated with your coordinator.
Assumed Knowledge	null
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an opportunity for you to further develop your knowledge and skills for interprofessional, team-based practice. It allows you to build on, and extend studies that you have completed in the earlier parts of your course. It also offers an interprofessional 'lens' through which to reflect on your current course experiences and, thus, the opportunity to broaden and deepen your repertoire of skills for working effectively within integrated, multidisciplinary contexts.

HLB300 Independent Study

Pre-requisites	Completion of 192cp
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

This unit provides the opportunity to substantively explore a topic or subject of personal academic interest within your discipline area. It enables you to extend your knowledge and understanding of a topic area that is not otherwise available as a formal unit of study within the course, and your skills in knowledge development and knowledge management.

HLB401 Advanced Research Methods

Anti-requisites	PUB416
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

An advanced knowledge of research principles and methods is an essential component of professional practice and is required to address issues which arise in practice. This unit focuses on the skills and knowledge required to design and use research in a project and builds on basic principles including biostatistics. It will prepare you to adopt a questioning and critical approach to your discipline practice and develop critical thinking and reasoning skills applied to the literature around a topic of your choice. It introduces you to systematic literature search and advanced discipline knowledge in the literature and the rewards and responsibilities of professional development. Further research skill development will be applied to analysis of research data using a statistical package and in qualitative methodologies. Communication skills will be developed by preparing a systematic literature review and a research proposal. The development of a project proposal will prepare you for the implementation of your Capstone project in your final year.

HLB403 Research Project for Honours

Pre-requisites	HLB401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The Honours research project provides the opportunity for you to develop extended, independent skills in research by partnering you with an experienced researcher to answer a practice related research question. You will explore a topic in an area of special interest and gain skills in the integration of research with practice and a potential career as a researcher and leader in your chosen field. Together, HLB403-1 and HLB403-2 comprise a 24 credit point unit that can be studied over two semesters. Assessment items are submitted and a final grade awarded only at the end of the final sub-unit, HLB403-2.

HLB403 Research Project for Honours

Pre-requisites	HLB403-1
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The Honours research project provides the opportunity for you to develop extended, independent skills in research by partnering you with an experienced researcher to answer a practice related research question. You will explore a topic in an area of special interest and gain skills in the integration of research with practice and a potential career as a researcher and leader in your chosen field. Together, HLB403-1 and HLB403-2 comprise a 24 credit point unit that can be studied over two semesters. Assessment items are submitted and a final grade awarded only at the end of the final sub-unit, HLB403-2.

HLH101 Grant Proposal

Co-requisites	HLH104, HLH105 and HLH107-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will assist you in developing your knowledge of the existing scientific literature related to your field of research, help you formulate specific research questions and provide you with the opportunity to develop a research plan that allows you to answer these questions. You will work in collaboration with your research project supervisors and other discipline area experts to prepare a grant proposal similar to those required to obtain funding from Australian competitive grant schemes. This will help you understand the background, rationale and methodologies related to your specific research project. A one day workshop in advanced information retrieval skills is included in the unit.

HLH104 Manuscript Critique

Co-requisites	HLH101 and HLH105 and HLH107-1
Equivalent	HLP104
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides the students an opportunity to critically analyse and review a manuscript that is within or outside their research topic.

HLH105 Research Strategies 1

Co-requisites	HLH101 and HLH104 and HLH107-1
Equivalents	HLP105
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In this unit you student will be actively involved in critical discussions on key aspects underlying the scientific method with senior academics in the Faculty. Students will develop and refine skills in project design and implementation, the critical analysis of methods and data, time management, information retrieval and learn how to collect, critically analyse and collate scientific literature and effectively present scientific information. Students will also actively participate in research forums external to their own research groups aimed at developing a collaborative and interactive group ethos in research.

HLH106 Research Strategies 2

Pre-requisites	HLH101 and HLH104 and HLH105 and HLH107-1
Co-requisites	HLH107-2 and HLH107-3 and HLH107-4
Equivalents	HLP106
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 5TP6, SEM-1, SEM-2

In this unit you student will be actively involved in critical discussions on key aspects underlying the scientific method with senior academics in the Faculty. Students will develop and refine skills in project design and implementation, the critical analysis of methods and data, time management, information retrieval and learn how to collect, critically analyse and collate scientific literature and effectively present scientific information. Students will also actively participate in research forums external to their own research groups aimed at developing a collaborative and interactive group ethos in research.

HLH107 Research Project 3

Pre-requisites	HLH107-2. HLH107-2 can be studied in the same teaching period as HLH107-3
Co-requisites	HLH106
Equivalents	HLP107-3
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 5TP6, SEM-1, SEM-2

This unit will assist you in developing your technical and analytical skills related to your field of research. It will provide you with the opportunity to develop a plan that allows you to, execute and evaluate a piece of research. You will work in collaboration with your research project supervisors and other discipline area experts to prepare a final manuscript outlining the results of your research following interpretation of the data collected from your research plan.

HLH107 Research Project 2

Pre-requisites	HLH107-1
Co-requisites	HLH106
Equivalents	HLP107-2
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 5TP6, SEM-1, SEM-2

This unit will assist you in developing your technical and analytical skills related to your field of research. It will provide you with the opportunity to develop a plan that allows you to, execute and evaluate a piece of research. You will work in collaboration with your research project supervisors and other discipline area experts to prepare a final manuscript outlining the results of your research following interpretation of the data collected from your research plan.

HLH107 Research Project 4

Pre-requisites	HLH107-3. HLH107-3 can be studied in the same teaching period as HLH107-4
Co-requisites	HLH106
Equivalents	HLP107-4
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 5TP6, SEM-1, SEM-2

This unit will assist you in developing your technical and analytical skills related to your field of research. It will provide you with the opportunity to develop a plan that allows you to, execute and evaluate a piece of research. You will work in collaboration with your research project supervisors and other discipline area experts to prepare a final manuscript outlining the results of your research following interpretation of the data collected from your research plan.

HLH107 Research Project 1

Co-requisites	HLH101 and HLH104 and HLH105
Equivalents	HLP107-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will assist you in developing your technical and analytical skills related to your field of research. It will provide you with the opportunity to develop a plan that allows you to, execute and evaluate a piece of research. You will work in collaboration with your research project supervisors and other discipline area experts to prepare a final manuscript outlining the results of your research following interpretation of the data collected from your research plan.

HLN004 Chronic Conditions Prevention and Management

Equivalents	PUN553
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

The unit introduces a range of factors that contribute to the development, prevention and management of chronic conditions. It has an interdisciplinary focus that addresses the continuum of care from primary health to tertiary interventions.

HLN405 Qualitative Research

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External

Units

- SEM-1, SEM-2

This unit addresses a range of qualitative methodologies and methods that present as alternative approaches to the quantitative paradigm in health science research. The predominance of the natural sciences in nursing/health research has come into question in more recent times and thus the unit introduces students to the origins of such challenges, to the knowledge bases of alternative ways of investigating the social world of health/illness and to related research methods. The unit comprises a series of lectures, seminar presentations and relevant readings.

HLN700 Dissertation

Credit Points	48
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

Through undertaking a research project in a specialised area of practice, the dissertation provides the opportunity for you to develop advanced skills in the critical evaluation, interpretation and application of research.

HLN701 Independent Study

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM External - SEM-1, SEM-2

The development of critical appraisal skills is essential for students undertaking postgraduate study. This unit provides an opportunity to investigate a relevant topic in your area of study. In the process of identifying, gathering and analysing up-to-date relevant literature, you will strengthen skills in the synthesis of information and report writing relevant to your field.

HLN703 Project

Credit Points	24
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

Through undertaking a small project in a specified area, this unit provides you with the opportunity to consolidate, extend and apply the advanced knowledge and skills you have gained through your course to date.

HLN706 Health Statistics 2

Pre-requisites	PUN105
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit further develops your knowledge, skills and application of statistical methods by building on the foundations acquired in PUN105 Health Statistics 1. It is common in health to deal with data that is not easily analysed using basic statistical techniques. This unit focuses on providing you with the skills needed to undertake advanced statistical modelling such as logistic regression, survival analysis and longitudinal data analysis. You will apply your knowledge to the analysis of data using the SPSS statistical software. The techniques covered in the unit will equip you with the skills necessary to analyse most of the data typically generated in clinical and population health settings.

HLN707 Research Methods in Health

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

HLN707 Research Methods in Health is a research planning unit. The unit will provide you with practical research skills training and takes you through the process of developing an answerable research question, to designing the study, planning the research project's implementation, and planning the analysis and dissemination of the research findings. It is highly recommended that you take this unit the semester before you are planning to undertake your project or dissertation. This unit provides opportunities to consolidate your critical analysis and problem solving skills in an autonomous way to prepare for and integrate your theoretical knowledge in a research capstone unit or whilst undertaking a research project in your clinical discipline. You will develop a research proposal which will prepare you

to undertake a 24 credit point project or a 48 credit point dissertation or as a stand-alone research unit for clinicians. Successful completion of relevant research methodology units is assumed knowledge. For those wishing to do quantitative research, completion of HLN710 (Epidemiology) and/or PUN105 (Health Statistics 1) is highly recommended. For those wishing to do qualitative research, completion of HLN405 (Qualitative Research) is highly recommended.

HLN710 Epidemiology

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit introduces you to the fundamentals of epidemiology. You will develop the skills to apply epidemiological principles to public health and clinical practice. This includes undertaking logical, scientific assessment of the health literature, with a strong emphasis on critical appraisal of health information and data.

HLN711 Advanced Qualitative Methods

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit offers you the opportunity to study, explore and understand a range of qualitative methods. The focus is on the development of rigorous qualitative research design and on planning and undertaking data collection, data analysis, interpretation and reporting of qualitative research. The aim is to advance student knowledge and skills in relation to the methods of qualitative research and to foster essential skills in collecting, coding, analysing and reporting qualitative research.

HLN712 Dissertation

Pre-requisites	HLN712-2
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

Units

- SEM-1,
SEM-2

Through undertaking a research project in a specialised area of practice, the dissertation provides the opportunity for you to develop advanced skills in the critical evaluation, interpretation and application of research. Together, HLN712-1, 2, 3 and 4 comprise a 48 credit point unit that can be studied over a number of semesters. Each semester you can enrol in one or more of its four 12 credit point sub-units. Assessment items are submitted and a final grade awarded only at the end of the final sub-unit HLN712-4.

HLN712 Dissertation

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Through undertaking a research project in a specialised area of practice, the dissertation provides the opportunity for you to develop advanced skills in the critical evaluation, interpretation and application of research. Together, HLN712-1, 2, 3 and 4 comprise a 48 credit point unit that can be studied over a number of semesters. Each semester you can enrol in one or more of its four 12 credit point sub-units. Assessment items are submitted and a final grade awarded only at the end of the final sub-unit HLN712-4.

HLN712 Dissertation

Pre-requisites	HLN712-1
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Through undertaking a research project in a specialised area of practice, the dissertation provides the opportunity for you to develop advanced skills in the critical evaluation, interpretation and application of research. Together, HLN712-1, 2, 3 and 4 comprise a 48 credit point unit that can be studied over a number of semesters. Each semester you can enrol in one or more of its four 12 credit point sub-units. Assessment items are submitted and a final grade awarded only at the end of the final sub-unit HLN712-4.

HLN712 Dissertation

Pre-requisites	HLN712-2
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Through undertaking a research project in a specialised area of practice, the dissertation provides the opportunity for you to develop advanced skills in the critical evaluation, interpretation and application of research. Together, HLN712-1, 2, 3 and 4 comprise a 48 credit point unit that can be studied over a number of semesters. Each semester you can enrol in one or more of its four 12 credit point sub-units. Assessment items are submitted and a final grade awarded only at the end of the final sub-unit HLN712-4.

HLN720 Clinical Education in Health

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit is to introduce you to principles and practices designed to facilitate learning in the clinical context. Completion of the unit will enable you to differentiate between clinical supervision and clinical education, and relate this to your own field of practice; demonstrate knowledge and understanding of models/theories of clinical education and their application within your own field of practice; demonstrate knowledge and understanding of concepts and principles related to learning, teaching and assessment in the clinical context; apply concepts and principles related to clinical learning, teaching and assessment to your field of practice; reflect critically on your learning in this unit and its implications for your future practice.

HLN750 Dissertation

Credit Points	24
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

Through undertaking a research project in a specialised area of practice, the

dissertation provides the opportunity for you to develop advanced skills in the critical evaluation, interpretation and application of research. Together, HLN750-1 and HLN750-2 comprise a 48 credit point unit that can be studied over two semesters. Assessment items are submitted and a final grade awarded only at the end of the final sub-unit HLN750-2.

HLN750 Dissertation

Credit Points	24
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

Through undertaking a research project in a specialised area of practice, the dissertation provides the opportunity for you to develop advanced skills in the critical evaluation, interpretation and application of research. Together, HLN750-1 and HLN750-2 comprise a 48 credit point unit that can be studied over two semesters. Assessment items are submitted and a final grade awarded only at the end of the final sub-unit HLN750-2.

HMB496 Health Education Curriculum Studies 3

Pre-requisites	HMB396
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit extends the principles of professional practice established in HMB292 and HMB396 and further encourages the development of a critically reflective approach to the teaching in that area. It emphasises planning and teaching in the senior secondary school and extends a student's ability to make independent judgments about curriculum decisions within syllabus guidelines and broader systems policies, while considering national and international trends in education and society. The unit also encourages exploration of current issues and emerging and future trends in subject areas.

IAB130 Databases

Anti-requisites	INN210
Equivalents	INB210, IND210, ITB004

Units

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

From banking systems, to video games, mobile and cloud apps, databases underlie most of the systems we use today. They are crucial for ensuring information is available, reliable and available to be used by other applications. This unit introduces the basic knowledge and skills required needed to design databases, retrieve information from relational databases, and use MySQL Server. The unit assists the development of critical thinking skills required to evaluate and use new types of database systems (such as graph databases). It links to the work previously undertaken in IFB104 and/or the Health Information Management course and prepares you for (1) using, designing and evaluating database systems in the workplace; (2) advanced application development units; and, (3) the data-centric computing minor.

IAB201 Modelling Information Systems

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

As an Information Systems practitioner, essential skills are modelling and abstraction which you use to understand the problem in its widest context and develop conceptual and logical representations of solution components. In this unit, you are introduced to principles of conceptual modelling of information systems, such as abstraction, aggregation, decomposition and modularization. The unit develops a both broad and detailed understanding of the relevance of modelling to the analysis and design of complex systems by examining different modelling paradigms, including complex systems modelling, data modelling, process modelling, organizational modelling, object modelling and information modelling. The modular approach allows you to undertake modelling and abstraction processes required to understand complex systems in organizational and information technology domains.

IAB202 Business of Information Technology

Pre-requisites	IFB101 or IGB181 or EGB100 or ENB100
Anti-requisites	INB301
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Whether you are launching an internet start-up or advising your company on how to embark on a successful technical direction you need to have an understanding of the basic business building blocks to enable your decision making. This unit will help you to explore these necessary commercial concepts by engaging you in planning the development of businesses which are primarily internet-based. By considering real case studies, you will be introduced to concepts which give you a practical approach to developing IT business initiatives. The concepts include internet revenue models, IT marketing, staff and capability building, IT strategy and innovative thinking.

IAB203 Business Process Modelling

Equivalents	INB320
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Building on the principles of Business Process Management (BPM), this unit will develop a deep understanding of business process modelling as the core activity in BPM initiatives. You will learn about the main components of a business process modelling language. You will also learn how to apply standard modelling languages such as BPMN to develop abstract yet relevant representations of complex business processes in a consistent and unambiguous way, and to reason about these models. Finally, you will learn how to identify relevant processes to be modelled, how to discover models from these processes and meaningfully organize the models in a process architecture. The unit will use a hands-on approach to allow you to learn the art of process modelling incrementally.

IAB204 Business Analysis

Pre-requisites	((IAB205 or INB120) and PUB208) or ((IFB103 or INB182) and IAB202)
Equivalents	INB220
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit gives you an introduction to the role, knowledge areas, and skills required of the modern business analyst. The unit focuses on the key elements of business analysis, including planning and monitoring, elicitation, requirements analysis, solution assessment and validation, and requirements management and communication. The unit will equip you with the knowledge and skills necessary to identify a business problem or opportunity and develop business cases and plans for achieving effective solutions. This unit builds on the foundational work learned in 'Business of IT'.

IAB205 Corporate Systems

Pre-requisites	IFB101 or INB101
Equivalents	INB120
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Large enterprises have many different computer applications and many different technology platforms supporting these applications. This diversity is called Corporate Systems and understanding of this landscape, and its complexity is essential in any Information Systems graduate. This Corporate Systems unit introduces you to the IT landscape of the modern enterprise. We highlight the issues faced by the enterprise in providing an integrated view and management of its business, and how corporate systems help address these issues. The unit covers three important phases of the corporate systems lifecycle: selection, implementation, and usage. Collectively, knowledge of the techniques associated with these lifecycle phases provides you the means to be an effective business analyst and change agent. This unit builds on the core first year unit, IFB101, Impact of IT and the understanding users component of IFB103 Designing IT.

IAB230 Mobile and Ubiquitous Computing

Pre-requisites	IFB104 or INB104
Equivalents	INB345
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides the opportunity for exploring new and emerging ubiquitous computing technologies, wireless, and sensor technologies. Students will critically review and understand how they can be used for current contexts such as government, business, education and social community, as well as emerging 'wilderness' environments with no power and wired communication. Students will appreciate the impacts of these devices and be inspired for the current and future opportunities in ICT usage trends, to propose solutions for solving real challenges using mobile technologies.

IAB260 Social Technologies

Pre-requisites	IFB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Social technologies are changing the way we work, learn and play. This unit takes a hands-on approach to learning and encourages you to play with social technologies. You will critically explore a range of established, new and emerging social technologies, and how they can be used in different contexts. You will explore how people experience social media and consider your own professional and personal identities and how these are related in an increasingly hyper-connected world. The unit explores the complex social, political, legal, economic and ethical issues related to use of social technologies in everyday life. It also introduces you to the role of social technologies in education, lifelong learning, business, and society more generally.

IAB270 Innovation and Disruption

Pre-requisites	IFB101 or IGB181
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

IT and business professionals are often involved in innovation with IT as a major driver and enabler of incremental changes as well as radical transformations. Innovation is seen as crucial for organizations and economies to survive and grow in dynamic environments. This unit offers you the opportunity to develop a deep understanding of innovation, in particular IT and digital innovation. This will be essential for any activity related to new ways of using IT, whether you are developing new technology or systems, improving business processes, implementing enterprise systems, managing IT projects, developing novel games or launching new ventures. Moreover, it also sets you on the path to become a thought leader on and catalyst of IT and digital innovation. This unit will introduce you to the core innovation concepts, models and theories. It will pay special attention to three core questions: What is innovation? (including different types of innovation), How to innovate? (in particular the innovation process) and Who is innovating (and why)? (e.g., start-ups and established organizations). You will demonstrate, higher-order, critical thinking by analysing and evaluating real-world cases about problems of and opportunities for (IT) innovation and developing and evaluating a conceptual solution for an innovation problem or opportunity in the form of an innovation system

IAB301 Enterprise Architecture

Pre-requisites	IAB201 and (IAB205 or INB120) and (IAB203 or INB321)
Equivalents	INB222
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides a comprehensive understanding of Enterprise Architecture (EA), the different ways it is applied in professional practice, and the key approaches and techniques for developing an EA. You will first be exposed to the principles of enterprise architecture, comparing these with the issues of modelling, design and solution architecture of individual systems. You will gain proficiency at developing different parts of an EA, based on the

widely adopted EA framework, TOGAF, using state-of-the-art techniques. This will cover organisational capabilities and the different artefacts that support these, including business services, processes, information and resources. Finally, IT implementation issues will be addressed through technical architecture standards such as Service-Oriented Architecture. This advanced unit extends your learning from previous units in Data and Information Management and Process Modelling.

IAB302 Information Systems Consulting

Pre-requisites	IAB205 or INB120
Equivalents	INB322
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This subject provides the you with a comprehensive understanding of the operations of an information systems consulting firm and skills pertaining to the consulting process. The focus of the subject is engagement; in other words, the practices that consultants use to win clients. You are professionally trained in information systems consulting skills such as proposal writing, engagement meetings, consulting presentations and negotiation. This builds on the skills developed in business analysis. A grand simulation is held at the end of semester where consulting teams compete against each other to win an information systems tender. This unit is highly regarded in industry and several large consulting firms recruit students who complete this subject.

IAB303 Business Intelligence

Pre-requisites	IFB299 or AYB341
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The market for business intelligence (BI) continues to be one of the fastest growing segments of commercial demand and requirement for BI expertise is also increasing. BI offers notable competitive advantage to the enterprise because it allows decision makers to exploit new information flows and visualising real time

data to managers and decision makers. Business Intelligence is a systematic evidence based approach that modern organisations use in corporate decision making. It is concerned with providing timely and accurate information management. In this unit, you are introduced to the key notions of Business Intelligence. The unit will cover principles of Business Intelligence through explanations of appropriate theories, methodologies, processes, architectures, and technologies. The unit will provide examples on reporting, in-memory data analytics, online analytical processing, analytics, data mining, process mining, complex event processing, business performance management, benchmarking, text mining, predictive analytics and prescriptive analytics relevant to Business Intelligence. The unit will incorporate a laboratory component using SAS and SAP so that concepts presented in class can be applied to solve problems with real-world case studies. You will also be exposed to ProM (www.processmining.org), as an open source framework for process mining and potentially also We

IAB304 Project Management

Equivalents	INB123
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces you to the concepts and practice of project management.

IAB320 Business Process Improvement

Pre-requisites	IAB203
Equivalents	INB321
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will teach you how to conduct an end-to-end organizational process improvement project, from analysis to redesign. The students will be equipped with a comprehensive set of methods, techniques and tools that can be used effectively to progress with a process improvement effort. These include quantitative and qualitative analysis techniques as well as various process redesign paradigms. You will also develop knowledge about different

process improvement methodologies such as Lean, Six Sigma and Process Reengineering. The unit will use a hands-on approach, with real-life case studies, to enable authentic learning outcomes

IAB321 Business Process Technologies

Pre-requisites	IAB203
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Whether you will be a business analyst, a process owner, a solution architect or a software engineer, it is essential that you understand the principles and value of business process automation, in order to fully realise the benefits of Business Process Management. This unit introduces the fundamentals of "business process automation". You will learn how to develop an executable business process based on a business-oriented process model. You will practice how to automate an executable process using a business process management system (BPMS) and how to monitor its progress. The unit further presents various post-execution techniques for analysing the behaviour of automated processes. The hands-on approach allows students to design, control and analyse automated business processes using a variety of well-known business process technologies.

IAB330 Mobile Application Development

Pre-requisites	IAB230 or IFB299 or CAB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Proliferation of mobile devices with everyday users have resulted in high demand for creative developers to build innovative applications, and given the variety of platforms there is a major skills shortage. Students with software and user interface design and programming skills will benefit from this project-based unit to start their portfolio in developing useful applications on emerging mobile devices.

IAB350 Enterprise Systems Configuration

Pre-requisites	IAB202 or INB301
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Configuration is a critical step of ES implementation. Configuring an Enterprise System is largely a matter of balancing the way the organisation wants the system to work with the way it was designed to work, as per the business requirements of the organisation. Configuring an Enterprise System is completed through the in-built changeable parameters that modify system operation. For example, an organisation can select the type of inventory accounting to use, whether to recognise revenue by geographical unit, product line, or distribution channel and whether to pay for shipping costs when a customer returns a purchase

IAB351 Business in the Cloud

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will address the knowledge, skills and challenges of assisting organisations in adopting cloud computing and transforming business using new cloud orchestration models. It will cover different aspects of developing a detailed digital strategy for business in the cloud, including: cloud computing concepts and principles and developing technical cloud architecture; developing a business architecture including business analysis, business case analysis and change management; and understanding legal and regulatory policy that governs the use of cloud services. Through the knowledge, skills and assessments of the unit, students will develop a sound management acumen for undertaking business, and technical roles related to cloud adoption and practice. All enquiries: iab351@qut.edu.au

IAB370 Digital Transformation

Pre-requisites	IFB103 and IAB270
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens

Point
- SEM-2

Digital technologies (e.g., social, mobile, wearable, cloud) are disrupting markets and industries creating new opportunities for new organizations (start-ups) and requiring established organizations to rethink their business. This unit will enable you to identify new digital opportunities and develop transformative digital initiatives. You will learn to analyse and assess digital transformation (e.g., technology laws, information economics, scenario planning). This will support you with identifying opportunities for new digital initiatives. You will also be introduced to the methods, models and tools that you can use when developing and undertaking a new digital initiative (e.g., value propositions, minimum viable product, business models, strategies).

IAB398 Capstone Project Part 1 - Design

Pre-requisites	IAB203 and IAB204 and IFB299 and IAB205
Anti-requisites	CAB398
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit gives you the opportunity, under close guidance appropriate to the project, to apply and extend the knowledge and skills gained in your course to date to a substantial project. You will have the opportunity to gain knowledge and skills required for careful planning, scope control and task management to ensure the success of a project.

IAB399 Capstone Project

Pre-requisites	IAB398
Anti-requisites	CAB399
Equivalents	INB302
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Building upon the unit IAB398 Capstone Project (Phase 1), this unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date to execute the completion of a planned project. In this unit you will apply your disciplinary and professional knowledge and skills to refine and extend the existing deliverable. You will use appropriate

quality assurance techniques to ensure you are meeting your stakeholders' needs. You are expected to work professionally to deliver a high quality outcome to project stakeholders. The final product is to be delivered as a professional package that can be used directly by stakeholders and, where appropriate, published for access by the broader community. In most cases you are expected to carry forward a project from IAB398 and develop it to a high level of polish. Project deliverables will be assessed at the end of the Capstone Project (Phase 1) unit for their suitability to be continued in this unit. It is your responsibility to have a suitable project plan prior to beginning this unit. In situations where you do not have a project from IAB398 to continue into this project you will need to liaise with the unit coordinator for IAB399 to find a suitable project to undertake prior to the start of the semester.

IAB450 Enterprise Systems Management

Pre-requisites	IAB350
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Enterprise System lifecycle is lengthy and complex. It involves multiple parties; both internal and external to the organisation. During the lifecycle of these complex systems developed by software vendors (e.g. SAP AG., Oracle Corp.) are implemented by software consultants (e.g. Accenture, IBM). The selection of such an application suitable to the organisation involves such activities including: detailed business requirements analysis, request for information, request for quotations, then ultimately leading to the selection of the software packaged. After selecting the ES package, the organisation then implements the software package employing several methodologies and implementation strategies. Understanding of business process improvements & change management are also vital topics of discussions for Enterprise Systems lifecycle management. Once the ES is implemented, the organisation should then monitor its performance through key performance indicators derived for the organisation.

IFB101 Impact of IT

Equivalents	INB101, IND103
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit investigates the transformational relationship between information technology (IT) and individuals, society and organisations. It focuses on determining and evaluating the impact IT can have from a range of perspectives including personal, social, ethical, organisational, political and cultural. Case studies across a variety of domains (e.g. health, education, transport, media or banking) will link theory with practice, and build your understanding of the depth and breadth of change, both positive and negative, that is driven by information technology.

IFB102 Computer Technology Fundamentals

Equivalents	INB102, IND102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit develops your knowledge and understanding of computer technology which will support your subsequent learning of IT. This unit covers certain examples of technology but does so in an integrated way which demystifies technology, providing a path to understand computer technology all the way from silicon to the web. The unit focuses on the architecture of computers, networks, and the Web, so that you will be able to understand how these components work and function now and will do so in the future.

IFB103 Designing for IT

Anti-requisites	INB103, IND103, ITD103
Equivalents	INB182
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

As emerging technologies provide increasing opportunities for innovation, design thinking is becoming a much sought after skill as it provides an effective approach to understand and

develop user centred solutions. In this unit, you will be introduced to design thinking as an approach for innovation and problem solving and how to apply this technique to develop IT solutions to real-world problems. Teamwork is introduced and assessed in this unit. You and your team members will pitch your ideas and designs using oral and visual communication skills to gain user and peer feedback. This unit lays the foundational design, communication and teamwork skills that will be integrated and practised through a design project in this unit, your second year (major) and culminating in the final year capstone project.

IFB104 Building IT Systems

Equivalents	INB104, IND104, ITB001
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This introductory unit gives you practical experience with the various kinds of computer languages used to build IT systems. Modern IT applications are built in a variety of ways ranging from "mash ups" of existing applications, to adding new mobile interfaces on top of legacy enterprise systems, to "scratch" development of entirely new applications. This is done using a wide range of computer languages: programming, scripting, querying, pattern matching, mark-up, user interface, etc. This unit uses small in-class exercises and larger practical assignments to give you hands-on experience with such languages, working both individually and collaboratively. The focus is not on the details of programming per se, but on how technologies are used by IT developers and what they can do.

IFB299 Application Design and Development

Pre-requisites	(IFB103 or INB103 or ENB150 or EGB111) and (CAB201 or IAB201 or INB270)
Equivalents	INB201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In this unit you will combine the knowledge and skills you have developed

so far to complete a significant systems development exercise in a team environment. You will extend your ability to work collaboratively and effectively with others from myriad backgrounds, leveraging the different knowledge and skills available in your team, to design and develop solutions that meet real world requirements.

IFN001 Advanced Information Research Skills

Credit Points	4
Campus	Gardens Point, Kelvin Grove and External
Availabilities	Gardens Point - SEM-1, SEM-1 (Block), SEM-2, SEM-2 (Block) Kelvin Grove - SEM-1, SEM-1 (Block), SEM-2, SEM-2 (Block) External - SEM-1, SEM-1, SEM-2, SEM-2

Advanced Information Research Skills (AIRS) provides a baseline set of research skills preparatory for higher degree research at QUT. The unit assists researchers to be more effective and efficient in the use of information resources, processes and systems. It is offered in blended learning mode via online modules, and supplemented with learning resources, on campus workshops, and Liaison Librarian consultations.

IFN500 Design Thinking for IT

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

As emerging technologies provide increasing opportunities for innovation, design thinking is becoming a much sought after skill as it provides an effective approach to understand and develop user centred solutions. In this unit, you will be introduced to design thinking as an approach for innovation and problem solving and how to apply this technique to develop IT solutions to real-world problems. This unit features a strong teamwork component. You and your team members will pitch your ideas and designs using oral and visual communication skills to gain user and peer feedback. You will then implement your design proposals, realising several design prototypes, evaluating and refining

each throughout the semester. This unit lays the foundational design skills that will be integrated and practised through a design project in this unit, as well as throughout the degree.

IFN501 Programming Fundamentals

Equivalents	INN270
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

In this unit you will learn the core theoretical underpinnings of programming and how these are applied in modern programming languages to implement software systems. You will learn how to design solutions to problems that can be implemented in a programming language. You will gain practical experience designing and implementing solutions to small problems in an appropriate programming language. Modern IT systems work in many different environments (mobile, desktop, cloud, web, ...) and are built using a range of different techniques (programming, scripting, querying, mash ups, mark up, ...). In this unit you will gain practical experience implementing solutions with a small selection of these environments and techniques. This experience will give you the foundation knowledge to work effectively as an IT professional and to go on to further programming courses in the degree.

IFN502 IT Innovation and Disruption

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides a discourse on the impact of technology across a range of contexts and then provides some guidance on how technology may be evaluated by those responsible for its conception, development and deployment. This overarching view of technology in its different contexts is operationalised in later technical subjects whereas advanced management subjects will provide greater breadth in strategizing the use of technology in context.

IFN503 Fundamentals of Computer Systems

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This transition unit assumes you have limited technical background in computer systems. You will learn the core concepts about hardware, operating systems and network environments. This will provide you with a sound foundation to take more advanced units that assume an understanding of these details. While the knowledge gained in this unit is valuable for all IT professionals it will be of particular importance in the Computer Science, Data Science, Networks, and Security majors.

IFN504 Corporate Information Systems

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Information systems form the backbone of a corporate IT landscape, which integrates software (such as Cloud-hosted application services, mobile apps, Web sites) and hardware infrastructure (like for user interactions, data storage, environmental sensing, computational number crunching, and network connectivity). Organisations deploy information systems to implement new business models, rejuvenate their product and services portfolio, answer competitive threats, and improve their environmental, financial, or social sustainability and other purposes. In this unit, students are introduced to information systems in a corporate setting. In a case-based manner, students learn how to combine and deploy information technology components to form corporate systems, supporting newly conceived business cases. This unit introduces key IT concepts, related to prevalent and emerging trends in corporate information systems.

IFN505 Analysis of Programs

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit covers some of the foundational

theory underlying the discipline of computer programming. Programming emerged from applied mathematics; computer programs have a 'semantic' basis founded in predicate logic and have predictable run-time performance. This unit explains various aspects of program semantics and how this knowledge can be used to reason about the properties of computer program code.

IFN507 Network Systems

Anti-requisites	INN350, INN251, INN351
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The advancement of information communication technology (ICT) has had an enormous impact on nearly all forms of life. The understanding and mastering of basic network communication skills and concepts is regarded as part of the core learning component for all students into all areas of studies including information technology, science, engineering, business and law. The objectives of this unit is to provide fundamental network skills and concepts associated with telecommunication network technologies, including network architectures, network protocols and services and network administration. The unit, in particular, serves as an entry point to further specialised studies in the field of computer networks, network management and information security.

IFN509 Data Manipulation

Anti-requisites	INN342, INN343
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

In the information age, with astronomical amounts of data produced and made available every minute, information retrieval, predictive models and data visualisation become a central node of decision support for individuals and businesses alike. This unit will cover the basics of data representation and data analytics methods and how they should be used by applications. Through this, you will also gain an understanding of the big data challenges and acquire the necessary skills and knowledge to pursue

Data Science related studies.

IFN511 Security Management

Anti-requisites	INN255
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Information security is about protecting information and the systems that use, store and transmit information. This unit provides a foundation for understanding the field of information security, including information security goals, the threats to information assets, the associated risks, and best-practice approaches to managing information security. This unit is important in developing an understanding of the challenges involved in providing appropriate protection for organizational information assets.

IFN515 Fundamentals of Business Process Management

Anti-requisites	INN321
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit provides an in-depth introduction towards the management of Business Processes. It walks you through the fundamental stages of a typical Business process improvement initiative, from process identification, to monitoring, covering along the way process modelling, analysis redesign and automation.

IFN600 Understanding Research

Anti-requisites	ENN541
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will introduce you to the role of research in professional settings. It will provide you with an opportunity to explore the application of research principles and methods within the context of your professional practice. In particular, the unit explores how research has a vital role to play in decision-making, problem solving, innovation and development as well as ethical and professional practice.

IFN610 Management Issues for Information Professionals

Anti-requisites	INB331
Equivalents	INN331, ITN274
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

The ability to understand and apply management principles and consider how they contribute to the operation of organisations and enterprise environments is vital for the contemporary informational professional. You will be introduced to a range of management issues such as strategic planning, leadership, change management, innovation management, and human resources planning. You will also develop an understanding of the core functions of planning, organising, directing, and controlling in the dynamic internal and external environments in which organisations operate.

IFN611 Information Retrieval

Equivalents	INN332
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

The ability to understand how people seek and use information and the skill to quickly learn and expertly use new information resources and concepts is vital for the contemporary library and information professional. You will develop an understanding of the information environment from the human perspective through information theory including information behaviour, information literacy and information experience. You will also develop an understanding of the technological perspective including through developing your skills in identifying, accessing, evaluating and retrieving information resources to meet specific needs.

IFN612 Emerging Technologies for Information Practice

Anti-requisites	INN333
Credit Points	12

Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit will introduce you to a range of emerging technologies and technology concepts. It will provide you with an opportunity to explore the applications of these in information services environments. In particular, the unit explores social technologies and how they can be used to support user participation.

IFN614 Information Programs

Anti-requisites	INN333
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit explores trends and issues in contemporary information program, product and service delivery. It provides you the opportunity to explore a range of different programs, products and services including those typically delivered in libraries (including public, academic and special libraries), other collecting institutions, information organisations, and organisational units that support the use of information in organisations.

IFN615 Information Management

Anti-requisites	INB330
Equivalents	INN330, ITN266
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The field of information management (IM) has emerged from a number of disciplines. However in a business context, the strategic management of information enables organisations to leverage value from information resources, supports the creation and sharing of knowledge; and it encourages good governance.

IFN616 Online Information Services

Equivalents	INN530, ITN278
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit introduces you to a broad range of topics related to the design, delivery and evaluation of online information services. The unit focuses on development of skills and knowledge related to creating, managing and describing web content in a variety of formats. This unit has a strong focus on developing skills related to communicating, collaborating and investigating in online environments. The unit draws on relevant theory and current practice, providing you with an opportunity to develop broad and deep knowledge about topics in web service delivery.

IFN617 Managing and Organising Collections

Equivalents	INN533
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Developing, managing and organising dynamic and relevant collections is an exciting challenge for contemporary information professionals. This unit provides students with a grounding in theory and taking a practical approach. You will undertake a user needs analysis, develop a pilot collection, and create a prototype database in which the collection is described for retrieval and access by users.

IFN620 Professional Practice

Equivalents	INN632-6, INN634, ITN280
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit has been developed as an

overarching unit in the Master of Information Science (Library and Information Studies) program, to establish meaningful links between the various units of study and to introduce you to contemporary professional practice in information agencies. The unit focuses on your own personal and professional development, enabling you to participate in industry seminars, fieldtrips, work placements and career mentoring. The development of your understanding of reflective practice will help you build your own Student ePortfolio to document your insights into and your experiences in the information profession.

IFN641 Advanced Network Management

Anti-requisites	INN650
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The aim of this unit is to provide you with a deep understanding of the advanced technical issues pertaining to the management of organisational networks of various sizes. You will use the Unix environment as the learning platform for attaining additional technical skills and for the enhancement of existing problem solving skills necessary to be a successful network administrator or manager.

IFN642 Applied Cryptography and Network Security

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

As IT systems become increasingly networked, exposure to remote attacks becomes a greater risk. This unit will examine vulnerabilities and defences for networked systems in a variety of application contexts, including IT networks, web services, and mobile and wireless systems. Particular attention will be paid to cryptographic techniques for protecting data transmitted over networks via in-depth investigation of several cryptographic protocols. This unit will provide an in-depth understanding of modern cryptographic algorithms and their applications to practical network security mechanisms.

IFN643 Computer System Security

Anti-requisites	INN550, INN651
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Computers running vast variety of operating systems, tools and applications have become indispensable ingredients of our daily lives. However, current threat reports show that there are over 100 million malwares which exploit the security vulnerabilities on these computer systems and threaten the privacy of individuals and organizations in their daily activities. The aim of this unit is to provide a broad overview of computer system security covering operating systems, applications and software development. In this unit, you will learn how to analyse, design, and build secure computer systems and secure applications to limit the availability and impact of security vulnerabilities. You will develop skills to identify and use suitable methods to detect, mitigate and perform forensic analysis on an attacked or compromised computer system.

IFN645 Data Mining Technology and Applications

Equivalents	INN342
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Data mining has been used intensively and extensively in many organizations around the globe as an efficient method of finding useful knowledge about their customers and business processes. It has been applied in many fields of business, industry and science to discover new knowledge. It is an exciting new field that combines databases, machine learning, artificial intelligence, high performance computing, and visualisation. The astronomical amount of data generated by organisations, and the application thereof, is too complex and voluminous to be processed and analyzed by traditional methods. Data mining provides the technology to transform huge amounts of data into useful information for decision making. This unit will cover the concepts necessary to understand data mining techniques and apply them in various application settings.

IFN647 Advanced Information Storage and Retrieval

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with an understanding of the principles and techniques underlying the development of information storage and retrieval (IS&R) solutions to some of the varied and complex problems that involve heterogeneity of data (structured, unstructured, text, image, speech, genomics, etc.), with very large amounts of data. Specifically, this unit introduces advanced structures for the representation of data for efficient representation, storage and retrieval that are imposed by modern very large and web-scale systems and varied interaction modes of users. The unit also provides you with practical experience of using hands-on tools to solve real-world problems using IS&R methods. Through this study, you will be able to demonstrate the knowledge and skills for developing IS&R solutions to complex IS&R tasks.

IFN650 Business Process Analytics

Pre-requisites	IFN515
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Business Process Analytics introduces you to a number of state-of-the-art business process intelligence techniques that can be used at different stages of a business process management life cycle. In particular, the unit focuses on techniques that can be applied as a prelude to process execution as well as techniques that can be used to analyse historical process data. You will be exposed to a set of tools, techniques and methods to analyse different perspectives of business processes.

IFN651 Lean Six Sigma

Pre-requisites	IFN515. IFN515 can be studied in the same semester as IFN651.
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

- SEM-2

This unit introduces the Lean Six Sigma methodology for improving Business Processes. You will learn how to combine statistical analysis techniques from Six Sigma with the principles of Lean Management, and apply these in the context of a Business Process Management (BPM) initiative. Hands-on case studies will provide you with direct exposure to common process issues that can be fixed through the application of Lean Six Sigma. The goal of this unit is to broaden and deepen your knowledge about different process improvement methodologies and their application to real-world business problems.

IFN652 Business Process Management

Equivalents	INN327
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will provide an overview about all factors that impact the enterprise-wide deployment of Business Process Management (BPM). The unit will follow the six factors of a BPM maturity model and cover the impact of emerging technologies in the design and management of business processes.

IFN660 Programming Language Theory

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces the theory underlying computer programming language implementations. It explains how human-readable computer program code is translated into machine-executable instructions, and thereby helps understand the rationale for the design of various programming language features, the commonality between such languages, and the functions and limitations of program development environments.

IFN661 Mobile and Pervasive Systems

Credit Points	12
Campus	Gardens Point

Availabilities

Gardens Point
- SEM-1

Computers of all sizes and shapes such as smartphones, tablets, sensors and embedded systems are continuously pervading our lives creating a new computing paradigm, called pervasive computing. Combined with the wireless communication and cloud computing technologies, pervasive computing enables unobtrusive and always available personalized services which gradually change the way individuals produce and consume information. This unit provides a broad overview of pervasive computing, communication and security technologies. It will follow a practical approach where you will be able to analyse real life problems (e.g., transport, health, education, security and recreation), build and apply new knowledge by synthesising a variety of pervasive technologies to develop innovative solutions. This advanced unit serves as a stepping stone to further specialised graduate studies in networks, security, data sciences, computer science and human computer interaction.

IFN662 Enterprise Systems and Applications

Equivalents	INN312
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces fundamentals of Enterprise Systems (also referred to as ERP systems) configuration. It uses the market leading SAP Enterprise System as the example to demonstrate how organizations could adopt packaged Enterprise Systems to its organizational and user requirements. It builds on your existing knowledge and skills in business information systems, organisational structures and modelling, which can be acquired through the Corporate Information Systems unit.

IFN663 Advanced Enterprise Architecture

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides an advanced understanding of Enterprise Architecture

(EA), addressing the ways in which EA is used to improve organisations through their business and IT strategy developments. You will be exposed to the principles of enterprise architecture, contrasting these with the concerns of modelling, design and solution architecture of individual systems. You will be taught the key activities of developing an EA, and how these relate to the ways in which companies undertake business and IT planning. Following from this, you will gain proficiency at developing different parts of an EA, based on The Open Group Architecture Framework (TOGAF) and state-of-the-art architecture development techniques. This will cover the capture of organisational capabilities and the different artefacts of enterprises, including business services, processes, information and resources. The EA methodology will be linked to the Blue Ocean Strategy, and students will explore different ways in which strategic planning problems can be translated into EA approaches.

IFN665 Advanced Topic 1

Pre-requisites	IFN600
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This advanced level unit offers the opportunity to undertake an in-depth examination of an advanced topic to acquire expertise in a discipline area. The skills gained in this unit are developed and refined through activities relevant to the discipline and topic. Such skills are essential to effectively take your place as an emerging expert in your discipline area.

IFN680 Advanced Topics in Artificial Intelligence

Pre-requisites	CAB201 or INB270 or INN270 or IFN501
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with an understanding of the principles and techniques underlying the development of artificial intelligence solutions to complex problems that involve uncertainty, noise or ever-changing context. It will explore selected topics such as uncertain reasoning, decision making, and machine

learning. Specifically, this unit introduces the concepts and techniques of Bayes rule and inference, probabilistic reasoning, decision networks and making complex decisions, learning from examples, and reinforcement learning. . The unit also provides you with practical experience of using hands-on tools to solve real-world problems using computational intelligence methods. Through this study, you will be able to demonstrate the knowledge and skills for developing artificial intelligence solutions to complex problems such as classification, prediction, and optimization problems.

IFN690 Advanced User Centred Design

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Theories and frameworks help us to understand how people interact with computers and devices and with other people. In particular, theories that are well grounded in studies of the contexts and cultures of human interaction give us ideas for how to design for those contexts and cultures. This unit introduces various theories and frameworks of human-computer interaction and recognizes the significance of theory for designing human-computer interaction. You will critically discuss and evaluate human-computer interaction theories. You will establish a reflective practice of observation, questioning, design intervention and evaluation. This practice will support you to use human-computer interaction theories in the workplace to support effective work and to guide effective user-centred design and research.

IFN691 Gamification and Persuasive Computing

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit builds upon theories of human-computer interaction, game design and psychology in the development of technology designed to change attitudes and behaviours through persuasion and social influence. The unit focuses on gamification (i.e. the application of game elements and game design techniques to

non-game problems) as a mechanism for addressing business and social challenges.

IFN700 Project Management

Pre-requisites	Completion of 48cp in current course or admission into IN21 or admission into IN23
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

IT projects consist of design, development and implementation of novel systems as well as the implementation of commercial, off the shelf package solutions, and the deployment of system upgrades to the technical infrastructure and the application landscape. The majority of information technology (IT) and organisational change initiatives, such as systems developments and implementations, as well as organisational restructures are introduced into organizations through projects, and the success of these projects depends on their effective management. This unit introduces you to a range of traditional and contemporary approaches and develops skills to select which approach is best suited for the particular project and its context. Agile project management will be covered in-depth, as an example of a contemporary approach to project management that is commonly employed when developing IT systems. Agile project management values, principles and practices that you learn in this unit are transferable to other project management approaches.

IFN701 Project 1

Pre-requisites	IFN600 and completion of 48cp in the current masters course including one 600 series unit in the area of the project.
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The aims of this unit are to help you apply skills previously attained in your degree to an advanced problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also expects you to prepare a well-written project report and prepare and deliver an oral presentation of the results of your

project to a technical audience.

IFN702 Project 2

Pre-requisites	IFN701 and completion of 48cp in the current course, including one other '600' series project related unit. IFN701 can be enrolled in the same teaching period as IFN702
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The aims of this unit are to help you apply skills previously attained in your degree to an advanced problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also expects you to prepare a well-written project report and prepare and deliver an oral presentation of the results of your project to a technical audience.

IFN705 Project 1

Pre-requisites	IFN600 and completion of 48cp in the current masters course including one IFN601-IFN699 unit in the area of the project.
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The aims of this unit are to help you apply skills previously attained in your degree to an advanced problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also expects you to prepare a well-written project report and prepare and deliver an oral presentation of the results of your project to a technical audience.

IFN706 Project 2

Pre-requisites	IFN705 and completion of 48cp in the current course, including one IFN601-IFN699 project related unit. IFN705 can be enrolled in the same teaching period as IFN706
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point

Units

es - SEM-2

The aims of this unit are to help you apply skills previously attained in your degree to an advanced problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also expects you to prepare a well-written project report and prepare and deliver an oral presentation of the results of your project to a technical audience.

IFT601 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT602 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT603 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT611 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFT612 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT613 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT614 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT615 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT621 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT622 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT631 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFT632 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT633 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFT634 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT635 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT636 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFT637 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT641 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT667 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT692 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT661 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT671 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT693 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT662 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFT681 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT694 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT663 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT682 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFT695 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT664 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT683 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT696 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT665 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT691 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT801 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT802 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT815 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT834 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT803 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT821 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT835 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT811 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFT822 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT836 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT812 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT831 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT837 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT813 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT832 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT841 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT814 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT833 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT861 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT862 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT881 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT894 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT863 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT882 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT895 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT864 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT883 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFT896 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT865 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT891 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFX001 Exchange Program - Science and Engineering

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFT867 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT892 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFX002 Exchange Program - Science and Engineering

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFT871 Thesis

Credit Points	0
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - R1, R2 Kelvin Grove - R1, R2

IFT893 Thesis

Credit Points	0
Campus	Kelvin Grove and Gardens Point
Availabilities	Kelvin Grove - R1, R2 Gardens Point - R1, R2

IFX003 Exchange Program - Science and Engineering

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX004 Exchange Program - Science and Engineering

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX012 Exchange Program - Information Technology

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX018 Exchange Program - Information Technology

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX005 Exchange Program - Science and Engineering

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX013 Exchange Program - Information Technology

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX021 Exchange Program - Science and Engineering (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX006 Exchange Program - Science and Engineering

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX014 Exchange Program - Information Technology

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX022 Exchange Program - Science and Engineering (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX007 Exchange Program - Science and Engineering

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX015 Exchange Program - Information Technology

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX023 Exchange Program - Science and Engineering (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX008 Exchange Program - Science and Engineering

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX016 Exchange Program - Information Technology

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX024 Exchange Program - Science and Engineering (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX011 Exchange Program - Information Technology

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX017 Exchange Program - Information Technology

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX025 Exchange Program - Science and Engineering (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX026 Exchange Program - Science and Engineering (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX104 Exchange Program - Creative Industries

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX122 Exchange Program - Creative Industries (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX027 Exchange Program - Science and Engineering (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX105 Exchange Program - Creative Industries

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX123 Exchange Program - Creative Industries (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX028 Exchange Program - Science and Engineering (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX106 Exchange Program - Creative Industries

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX124 Exchange Program - Creative Industries (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX101 Exchange Program - Creative Industries

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX107 Exchange Program - Creative Industries

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX125 Exchange Program - Creative Industries (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX102 Exchange Program - Creative Industries

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX108 Exchange Program - Creative Industries

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX126 Exchange Program - Creative Industries (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX103 Exchange Program - Creative Industries

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX121 Exchange Program - Creative Industries (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX127 Exchange Program - Creative Industries (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX128 Exchange Program - Creative Industries (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX206 Exchange Program - Health

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX224 Exchange Program - Health (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX201 Exchange Program - Health

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX324 Exchange Program - Business (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX325 Exchange Program - Business (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX326 Exchange Program - Business (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX327 Exchange Program - Business (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX328 Exchange Program - Business (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

IFX401 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX402 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX403 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

TBATHis exchange unit is only available for selection to students on an approved exchange program.

IFX404 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

TBATHis exchange unit is only available for selection to students on an approved exchange program.

IFX405 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX406 Exchange Program - Law

Credit Points	12
---------------	----

Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

TBATHis exchange unit is only available for selection to students on an approved exchange program.

IFX407 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX408 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX409 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX410 Exchange Program - Law

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX411 Exchange Program - Justice Studies

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX412 Exchange Program - Justice Studies

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX413 Exchange Program - Justice Studies

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

Unit accounts for credit for overseas exchange as part of a Justice degree.

IFX414 Exchange Program - Justice Studies

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available to students on an approved exchange program.

IFX415 Exchange Program - Justice Studies

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1,

XCH-2

This exchange unit is only available to students on an approved exchange program.

IFX416 Exchange Program - Justice Studies

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available to students on an approved exchange program.

IFX417 Exchange Program - Justice Studies

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available to students on an approved exchange program.

IFX418 Exchange Program - Justice Studies

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available to students on an approved exchange program.

IFX421 Exchange Program - Law (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX422 Exchange Program - Law (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX423 Exchange Program - Law (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX424 Exchange Program - Law (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX425 Exchange Program - Law (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

IFX426 Exchange Program - Law (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

Units

This exchange unit is only available for selection to students on an approved exchange program.

IFX427 Exchange Program - Law (PG)

Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

This exchange unit is only available for selection to students on an approved exchange program.

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

INB180 Computer Games Studies

Anti-requisites	INN180
Equivalents	ITB750
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is designed to give you a clear understanding of the socio-cultural issues that affect the computer game industry. Through critical review of games and games industry literature, playing games and actively participating in classroom discussion you will develop your capacity to join in the discourse about the design, impact and future direction of computer games in our society.

INB204 Special Topic 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Digital Communities Digital Communities are not only among the most popular destinations on the Internet but also a key feature of the future economy. Organisations are increasingly employing online communities and social networks as part of their business model and

products and services are becoming crowdsourced or co-created by self organised online communities that disintermediate existing business structures. The success of Digital Communities varies wildly with some communities struggling to become successful and others failing. This unit explores how to develop successful online communities by incorporating both a theoretical perspective (from social science and sociotechnical systems design) and an architectural perspective (from the patterns and building blocks related to the design of successful social spaces).

INB221 Technology Management

Pre-requisites	INB103 or ITB002 or INB120 or ITB360
Anti-requisites	ITN241, ITN251 and ITN366
Equivalents	ITB366, ITB241
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit presents operational, tactical and strategic insights that support the activities central to the leadership and management of technology. These insights include project management, organisational leadership, outsourcing, planning, governance and millennium technologies. Such insights are used to inform decision-making - the core skill of any manager. Technology managers must understand the factors influencing any decision point. This unit equips students for the challenges of management and to contribute to the decision-making faced by managers and the staff who advise on these issues.

INB280 Fundamentals of Game Design

Pre-requisites	INB180
Equivalents	ITB016, ITN016
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Modern games production is a complex process involving various businesses and organisations, working with budgets in the tens of millions. One of the roles within a game production team is that of the game

designer. It is crucial that a game designer understands how to create a game world, the rules that govern game play and other high level design tasks. This subject provides an introduction to game design, by starting with high level conceptual design tasks before moving to more concrete tasks.

INB281 Advanced Game Design

Pre-requisites	INB280
Equivalents	ITB017
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will provide you with theoretical and practical knowledge of advanced games design concepts; that is, specific activities undertaken by game designers and their purpose. By the end of this unit you will have the knowledge to identify problems and suggest solutions for innovative game designs, as well as understand how to carry out the process of designing a game yourself. You will possess practical and theoretical knowledge of game design issues such as: how to design a game level, how to design a task and reward a player for completing it, how to ensure that the player knows how to progress through the game and how to design characters whose behaviour and dialogue provide clues and prompts to the player.

INB282 Games Level Design

Pre-requisites	INB281
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Modern games production is a complex process involving teams in the order of a hundred people or more, working with budgets in the tens of millions. One of the roles within a game production team is that of the level designer. It is crucial that the level designer has the ability to lay out levels, construct levels within game engines, plan gameplay scenarios and place non-player characters. This unit will help students develop these abilities as well as skills such as building terrain, building architecture and spaces; balancing gameplay; integrating narrative elements and goals; playtesting and implementing iterative design improvements; designing lighting and atmospheric effects and other genre-

Units

specific level design skills.

INB302 IT Capstone Project

Pre-requisites	INB301
Equivalents	ITB010
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Students are to work together in a team of 4-5 on a project that addresses one of the following three types of problems: real business problems, real market needs, real research problems. This unit extends students' development of the professional, technical and teamwork skills required by IT professionals in practice. Students will extend their knowledge and skills in the areas of IT project management through completing professional project documentation and managing the team project. Students will also gain a greater understanding and skill level in analysis and design, and their significance in delivering successful business or research outcome. The unit also focuses on furthering students' professional skills in report writing, oral communication, and visual communication.

INB304 Special Topic 3

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit will establish your foundational knowledge in spatial science, or graphicacy. This unit covers all aspects of Spatial Thinking and its value in today's fast paced digital economy. Spatial science thinking will provide critical links to the international framework in sustainable development along with international affairs and economics and provide you with basic software skills to communicate global and local data and information through a digital earth cyber network. These skills will enable you to demonstrate and apply with words, reports, maps, and visualization web sites the key sets of fundamental spatial competences at an introductory to intermediate level on graduation.

INB305 Special Topic 4

Pre-requisites	INB311 or INB312
----------------	------------------

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Topic for Summer 2014: Customer Relationship Management Systems This unit builds on your previous knowledge of Enterprise Systems (Selection & Implementation or Application). You will investigate and explore different aspects of how corporations can employ CRM systems, covering marketing and planning, campaign management, e-marketing, customer lifecycle management, retention management, CRM service orchestration, lead management, analytics, customer segmentation, service order support and customer processing. Both conceptual and practice-based content will be critiqued in the unit. Your learning is enhanced through a combination of practical exercises, review of case studies and industry speakers. We will use the SAP CRM system for hands-on exercises as an exemplar of a CRM system.

INB306 Project 1

Pre-requisites	INB101, INB102, INB103, INB104 and INB201
Equivalents	ITB230
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB307 Project 2

Equivalents	ITB791
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-

	2
--	---

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB308 Project 3

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB309 Major Project

Pre-requisites	INB101 and INB102 and INB103 and INB104 and INB201
Equivalents	ITB844
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project over two semesters. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your

initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB309 Major Project

Pre-requisites	INB309-1 (can be enrolled in the same teaching period)
Anti-requisites	ITB844
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit gives you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial development project over two semesters. The ability to apply technical knowledge and skills to real-life situations is essential for information technology professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful project management.

INB325 Corporate Systems Management Project

Anti-requisites	ITB370
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The ability to apply knowledge and skills to real-life situations is essential for information systems professionals. A substantial project, under academic supervision, will develop your initiative and ability to apply your knowledge and skills in a professional capacity. Completing the project will also enable you to appreciate the complementary nature of the course material in total, particularly the need for careful management. This unit seeks to give you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial Information Systems development project.

INB379 Game Project Design

Pre-requisites	Completion of 144 credit points of study
Anti-requisites	ITB009
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

INB379 BGIE Game Project Design (P1) extends your work on the role, design, and plan of a computer game concept. The unit covers the conceptualisation and game design stages up to the game design pitch. If the project is given a green light by the assessment panel, it may be developed later in the P2 unit.

INB380 Games Project

Pre-requisites	INB379 or INB305
Anti-requisites	ITB020
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit seeks to give you the opportunity to apply, under appropriate guidance, the knowledge and skills gained in your course to date and to execute a substantial related project. The unit also aims to allow you to develop the critical professional skills of working within a cross-disciplinary team and, through implementation of your project, develop the understanding of the role of careful planning, scope control and task management in ensuring that the project is successful.

INB381 Modelling and Animation Techniques

Pre-requisites	INB371 or CAB301
Equivalents	ITB746
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The development of computer graphics tools is a significant application within the IT, Games and related industries, relying heavily on software engineering methodologies. These tools, such as CAD systems, 3D modelling systems and games engines, are used in such industries as advertising, engineering,

manufacturing, simulation for education and training, computer games, film special effects, etc. Modelling techniques are intrinsic to a 3D graphics system, especially one used for real time animation. With increased CPU and GPU power, the ability to animate in real time is allowing more sophisticated interaction and the merger of games/simulation and film. The unit will provide you with the knowledge and skills to use an industry standard graphics API to implement graphics applications and to develop a basic real time animation system using an industry standard language.

INB382 Real Time Rendering Techniques

Pre-requisites	(INB371 or CAB301) and (MAB281 or MZB151)
Anti-requisites	ITB648 and ITB649
Equivalents	ITB747
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will provide you with knowledge and skills in basic to advanced techniques in real-time rendering using shading languages. You will be able to implement a high-quality real-time rendering system in an industry standard API.

INB383 AI for Games

Pre-requisites	INB371 or MAB281 or MZB151
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The aim of this unit is to provide students with an intermediate to advanced level course in computer game AI, involving computational approaches to solving a wide range of problems in the interactive entertainment and game industries.

INN221 Technology Management

Anti-requisites	ITN241, ITN251, ITN366, INN221
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit presents operational, tactical and strategic insights that support the

activities central to the leadership and management of technology. These insights include project management, organisational leadership, outsourcing, planning, governance and millennium technologies. Such insights are used to inform decision-making - the core skill of any manager. Technology managers must understand the factors influencing any decision point. This unit equips students for the challenges of management and to contribute to the decision-making faced by managers and the staff who advise on these issues.

INN691 Minor Project 2

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The aims of this unit are to help you acquire necessary skills in a problem domain, and to enable you to conduct a well-defined project with specific outcomes within a precisely defined project plan. This unit also teaches you how to prepare a well written project report.

INN700 Introduction To Research

Pre-requisites	Admission into IT28 or IT29
Anti-requisites	ENN541
Equivalents	ITN100
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit is aimed at students undertaking a major research project (see corequisites above). In order to pursue such a project, you must have some insight into the range of possible approaches to research available. Before commencing the research proper, it is necessary to review related literature in depth and prepare a detailed proposal outlining the research question, design and project plan. Quality control and good project management must be exercised throughout the research project. Main items of assessment pertain to each student's unique, research project being pursued in parallel. This unit aims to give you insight into the range of possible approaches to research, to develop the skills needed to

prepare your literature review and research proposal and to assist you in planning and managing time and resources.

INN701 Advanced Research Topics

Pre-requisites	INN700 which can be studied in the same teaching period as INN701
Anti-requisites	ENN541
Equivalent s	ITN269
Other requisites	Except with special permission, this unit is restricted to and mandatory for students enrolled in Honours, Professional Doctorate and PhD courses, and is optional for Research Masters students.
Assumed Knowledge	INN700 may be waived for invited, advanced, high-performing undergraduate students
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

All research students need an appreciation of a wide variety of potential approaches to conducting research and an understanding of the key issues that bear on such approaches. INN701 is an advanced unit aimed at research students who are soon to complete a detailed, rigorous and defensible design of their intended research project (e.g. Stage 2). Research students, coursework masters students and honours students intending undertaking a major research project should pursue INN701 either subsequent to, or in parallel with INN700.

INN703 Writing IS Research Articles

Pre-requisites	INN701
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

As a research student in information systems, you are expected to contribute to the body of knowledge in this field by designing and conducting an original study and to publish your findings. In this unit, you are introduced to a variety of

seminal research articles relevant to information systems research. The unit develops both broad and detailed understanding of different strands of information systems research, relevant research methods and theories associated with the strands of research, and different composition styles of information systems research articles. The goal of this unit is to further develop your research skills and learn how to write good research articles. The unit is taught in a seminar style where we critique articles, apply what we have learned to improve and extend our own research and publications, and work together to reach a deeper understanding of Information Systems research practice.

ITD101 Impact of IT

Co-requisites	IFB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP2

This unit investigates the transformational relationship between information technology (IT) and individuals, society and organisations. It focuses on determining and evaluating the impact IT can have from a range of perspectives including personal, social, ethical, organisational, political and cultural. Case studies across a variety of domains (e.g. health, education, transport, media or banking) will link theory with practice, and build your understanding of the depth and breadth of change, both positive and negative, that is driven by information technology.

ITD102 Computer Technology Fundamentals

Equivalents	IFB102, INB102
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP2

Computers, networks and the web are ubiquitous and underpin all information technology. You need a general understanding of these technologies and their relationships in order to effectively participate in the IT industry and as basis for further learning. This unit provides a technological underpinning to subsequent computing units which cover: programming, the Web, software architecture and computer systems.

ITD103 Designing for IT

Equivalents	IFB103, INB182
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3

As emerging technologies provide increasing opportunities for innovation, design thinking is becoming a much sought after skill as it provides an effective approach to understand and develop user centred solutions. In this unit, you will be introduced to design thinking as an approach for innovation and problem solving and how to apply this technique to develop IT solutions to real-world problems. Teamwork is introduced and assessed in this unit. You and your team members will pitch your ideas and designs using oral and visual communication skills to gain user and peer feedback. This unit lays the foundational design, communication and teamwork skills that will be integrated and practised through a design project in this unit, your second year (major) and culminating in the final year capstone project.

ITD104 Building IT Systems

Equivalents	IFB104, ITB001, INB104
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

Modern IT systems are built using a wide range of technologies such as programming and scripting languages, databases, web interfaces, etc. This introductory unit gives you hands-on experience with a variety of the computer languages used to build IT systems as well as a basic understanding of the way computer language code is written. This provides a firm foundation for further study on specific kinds of programming, such as networking, embedded systems, artificial intelligence, etc. Even if you do not intend to pursue computer programming as a vocation, it is important that you are exposed to programming languages and understand how IT systems are actually built, to give you an appreciation of both the capabilities and practical limitations of the process. These concepts can be extended further in subsequent programming units in the Computer Science Major and application

design and development units in the Information Systems Major.

ITD121 Programming Principles

Pre-requisites	ITD104 or IND104
Equivalents	CAB201, INB270
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This unit gives you a positive introduction to modern programming concepts and techniques. Although some theoretical aspects of programming are covered in lectures, the overall emphasis of the unit is to learn programming concepts and related problem-solving strategies through an exploratory problem based approach. Through this means, you will be building abstractions with procedures, data and objects, thereby designing, coding and debugging programs of increasing complexity. The unit gives you the foundation for subsequent programming courses within the Computer Science major

ITD122 Modelling Information Systems

Equivalents	IAB201
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3

As an Information Systems practitioner, essential skills are modelling and abstraction which you use to understand the problem in its widest context and develop conceptual and logical representations of solution components. In this unit, you are introduced to principles of conceptual modelling of information systems, such as abstraction, aggregation, decomposition and modularization. The unit develops a both broad and detailed understanding of the relevance of modelling to the analysis and design of complex systems by examining different modelling paradigms, including complex systems modelling, data modelling, process modelling, organizational modelling, object modelling and information modelling. The modular approach allows you to undertake modelling and abstraction processes required to understand complex systems in organizational and information technology domains.

IZN001 Principles and Practices of University Learning and Teaching

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP6, SEM-1

Drawing on evidence-based research, this unit addresses the key factors of student success, strategies for engaging students in learning, and principles and approaches to effective communication across multiple mediums. It provides you with a variety of opportunities to implement targeted strategies for enhancing student learning in your professional practice. Requisite Professional Activity Because you will apply principles in practice for assessment in this unit, enrolment in it requires that you are concurrently involved in substantial teaching activity and/or support for learning activities (lecturing and/or tutoring across a unit; supervising postgraduate students; or supporting student learning in a professional capacity).

IZN002 Curriculum Design and Assessment in Contemporary Learning Environments

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Drawing on QUT's developmental, whole-of-course approach and real world learning 2020 vision, this unit provides you with opportunities to apply principles and strategies for effective curriculum design across transitional and midpoint years. You will analyse and design units, and explore innovative approaches to enhancing student learning across a range of learning environments.

IZN003 Research and Career Planning and Development

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will extend and enhance your strategic engagement with the broader University environment and prepare you for career success across research, teaching and service. You will develop

Units

and utilise knowledge, skills and resources necessary to enhance your academic/professional career planning and development and contribute to the creation of new knowledge for the advancement of your discipline.

IZN004 Scholarly Learning and Teaching Project

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Through a supported process of project design and implementation, and the presentation of outcomes, you will research, initiate and effect a scholarly project in the context of higher education. The project's rationale, aims and objectives, research methods, and evidence-based outcomes will be reported and presented as scholarly research. Through a guided process you will then participate in a scholarly peer review process.

JSB170 Introduction to Criminology and Policing

Equivalents	JSB131, JSB011, JSB101
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit will provide you with an introduction to the Criminology and Policing major before you make your choice. It will provide you with a foundation for understanding criminology and policing. It begins with an exploration of the existing explanations of crime from both an individual and social perspective and will provide you with a background of policing in Queensland, Australia and internationally. The remainder of the unit then covers topics of interest to those within the area of criminal justice, policing and criminology, for example, crimes in the home, crime in public, cyber crime, and street crime.

JSB171 Justice and Society

Equivalents	JSB131, JSB011, JSB101
Credit Points	12
Campus	Gardens Point and

	External
Availabilities	Gardens Point - SEM-1 External - SEM-1

The Justice degree seeks to produce competent justice professionals. In order to achieve this purpose, this degree combines knowledge of the criminal justice system with an understanding and appreciation of the complexities of social justice. The purpose of this unit is to introduce students to the structural parameters of social justice.

JSB172 Professional Academic Skills

Equivalents	JSB132, JSB012, JSB104
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit teaches students about being competent and ethical criminal justice professionals. It introduces professional and academic skills, such as teamwork, professional communication, and writing, to lay a successful foundation for academic achievement during the degree and for later professional achievement in the real world of criminal justice work.

JSB173 Understanding the Criminal Justice System

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The criminal justice system is a key site for the maintenance of social order in society. In Australia, the criminal justice system consists of three separate institutions and each is tasked with a specific role: the police are responsible for criminal investigations, the courts for adjudication and sentencing, corrections (e.g. prisons) for 'correcting' offenders.

JSB174 Forensic Psychology and the Law

Anti-requisites	PYB215
Equivalents	JSB136

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit develops your knowledge and skills of the discipline of forensic psychology, affording you a critical perspective on what the study of psychology and the law entails and what it has to offer across the three criminal justice domains of the police, the courts and corrections.

JSB176 Criminal Law in Context

Equivalents	JSB242, JSB024, JSB204
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Criminal Law in Context aims to provide Justice (and other) students with a broad, critical, contextual knowledge of criminal law and its administration in the Australian setting.

JSB178 Policy, Governance and Justice

Equivalents	JSB081, JSB251, JSB271
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The unit introduces students to the policy cycle and explains how policy is developed in the governmental context. It provides basic skills needed for an employment role in research and policy in government agencies.

JSB179 Crimes of Violence

Equivalents	JSB138, JSB177
Credit Points	12
Campus	External
Availabilities	External - SUM

Justice students seek to work as justice professionals in areas related to the criminal justice system or human rights. They need an understanding of fundamental principles of criminal law and of social justice issues related to criminal law. Students undertaking the Criminology and Policing major of the degree need to understand issues of criminal procedure and due process, as well as specific contexts of criminal law. Crimes of Violence provides students with an understanding of the forces that shape this area of the law and the rationales for its implementation.

JSB180 Deviance

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit provides students with a comprehensive, empirically based, theoretically informed, international, interdisciplinary overview of the study of deviance in the social sciences. It provides a critical survey of causes, interpretations and reactions to deviance, with reference to real world social issues such as drug and alcohol abuse, tobacco consumption, graffiti, body art, suicide, sexual deviance (such as nudity, pornography, paedophilia, sado-masochism, public sex), bullying, violence, and mental health.

JSB207 Punishment and Penal Policy

Pre-requisites	JSB172 or JSB173 or LLB101 or PYB007
Equivalent	JSB373
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The unit will challenge students to think critically about a range of key issues confronting the penal system and policy-makers, including the ever-increasing prison muster, the effectiveness (or not) of the various treatment programs and offender management systems, and the ongoing challenge of 'difference' within the prison population. This unit is tailored to students contemplating a career in

correctional services, the policy sector (including Department of Communities, Child Safety and Disability and Queensland Corrective Services), rehabilitation services, social and youth work, and the academy.

JSB208 Gender Crime and the Criminal Justice System

Pre-requisites	96cp of previous study
Equivalent	JSB971
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

The Justice degree aims to produce competent justice professionals. In order to achieve this purpose, this degree combines knowledge of the criminal justice system with an understanding and appreciation of the complexities of social justice. This unit explores patterns in gendered (1) offending, (2) victimisation and (3) experiences with criminal justice systems.

JSB255 Eco Crime

Pre-requisites	96cp of completed studies
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Issues pertaining to the protection of the environment continue to capture centre stage in the development of both national and international policy. The balance between 'developing' and 'harming' the environment is one often constructed in political and social discourses about trade, resources and rights. Illegal and harmful acts that damage and destroy the environment are crucial for understanding government policies of prevention, precaution, and regulation. This unit prepares future professionals from a range of disciplines who will work in an environmental capacity, schooling them in particular in theories of green criminology and environmental harm.

JSB261 Theories of Government

Pre-requisites	JSB172 or JSB178 or LLB101
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit focuses upon the major theories about the operation of governments, along with the principles of authority, legitimacy and freedom.

JSB263 Justice Institutions

Pre-requisites	JSB172 or JSB178 or LLB101
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

In this subject, students will gain a thorough understanding of Australia's political and governance system, exploring the evolution and functioning of key Australian justice institutions. Through key case studies from Australian and international political history, students will examine the democratic structures that govern policy-making.

JSB266 White Collar Crime and Official Corruption

Pre-requisites	JSB172 or JSB178 or LLB101
Anti-requisites	JSB183, JSB265
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit will cover the complementary crimes of corruption and white collar crime. Every nation in the world struggles to have its public officials act in the interest of its citizens. The study of Public Sector Ethics covers the types of actions and the methods of enforcement required to bring about performance in the public interest. This unit will introduce you in detail to the most important issues of public sector ethics, both in Queensland and the world. As most of you will end up

working for government, it is essential that you not only understand these concepts but put them into practice. White collar crime is becoming more common in Australian society. Street crime still exists but there are a larger number of people in a position to participate in white collar crime and new opportunities are presented by a more corporatised and technological society. Greater resources are being applied to detect these crimes within police services, and new agencies, such as the Australian Securities and Investment Commission, are being further developed to specialise in the oversight and prosecution of offenders. The circumstances in which the crimes occur and the technological considerations raise unique questions for investigation and prevention. This unit will provide the student with an outline of the nature of these techniques.

JSB272 Theories of Crime

Pre-requisites	JSB172 or JSB173 or LLB101 or PYB007
Anti-requisites	JSN113
Equivalents	JSB231, JSB018
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

The main aim of this unit is to introduce the student to the study of theoretical criminology. This unit will address the social context of crime but is not exclusively sociological. The study of criminology is essentially multi-disciplinary and this is reflected in the diversity of theoretical approaches. Theory is typically offered as distinct from methods of research, however, together they provide the foundation for policy and practice. The unit provides an analytical framework in order to critically assess the epistemological claims and justifications found in criminological theory. Criminological theories are viewed as embedded governmental practices aimed at ensuring the regulation and control of particular 'problem populations'.

JSB273 Crime Research Methods

Pre-requisites	JSB170 or JSB172 or JSB178 or LLB101 or PYB007
Equivalents	JSB933, JSB043

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit builds upon research skills acquired in first-year study and is thus intended to provide knowledge and skills in research design and methodology for use in the fields of criminal justice, justice administration and criminology. The aims of this unit are three-fold. First, to revisit issues central to the research process. Second, to introduce students to a variety of research design models, data collection techniques and data analyses. Third, to give students the practical skills in designing and carrying out research and reporting research results. This subject, offered as a compulsory primary major unit in both the Criminology and Policing and Policy and Governance majors, sets the foundation for research in the Justice honours program.

JSB276 Independent Study

Pre-requisites	96cp of previous study
Anti-requisites	JB976
Other requisites	96cp of previous study, minimum GPA of 5 and unit coordinator approval
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2, SUM

In the course of their study, Justice students may discover an area that is of particular interest to them, or that has specific relevance to their intended professional orientation. This unit gives students the opportunity to extend aspects of their coursework or professional interests in more depth as well as to continue the process of refining and developing research skills.

JSB277 Independent Study

Pre-requisites	96cp of previous study
Equivalents	JSB976
Other requisites	96cp of previous study, minimum GPA of 5 and requires academic approval
Assumed	null

Knowledge	
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2, SUM

In the course of their study, Justice students may discover an area that is of particular interest to them or has specific relevance to their intended professional orientation. This unit gives students the opportunity to extend aspects of their coursework or professional interests in more depth as well as to continue the process of refining and developing research skills.

JSB278 Drugs and Crime

Pre-requisites	96cp of previous study
Equivalents	JSB378
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit examines social, legal and political responses to drug use in contemporary society, with an emphasis on Australian society. The unit presents an overview to drugs and drug use, including historical perspectives on drugs and their regulation. Drug policy models, processes and strategies for responding to drugs are reviewed, including harm reduction, prevention and treatment. Drug law enforcement and supply reduction strategies are also considered. The unit concludes with an examination of future directions and emerging issues, including the impact of the internet on drug supply.

JSB284 Policing in Context

Pre-requisites	JSB170 or JSB172 or LLB101 or PYB007
Equivalents	JSB274
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit is concerned with the diverse roles, duties, powers and problems of

Units

policing in Australia. These issues are explored through a number of different themes across the semester.

JSB285 Political Violence and Terrorism

Pre-requisites	96cp of previous study
Equivalents	JSB985
Credit Points	12
Campus	External
Availabilities	External - SEM-2

In this unit, you will learn about politically motivated violence (PMV) and terrorism in a myriad of forms, the history of the issues motivated groups (IMGs), PMV and terrorism and the factors that motivate people to become involved in them. You will learn the defining characteristics of PMV and terrorism and why terrorism is described as both a political and criminal act. During the unit you will research different types of terror tactics and particular terror groups that are currently operating on a national, regional and international scale. This unit will explore the characteristics of terrorist organisations and examine how recent developments in technology and finance allow them to flourish. In the unit you will also investigate the response to terrorism through policy and more practical measures and the limitations to current counter-terrorism initiatives and evaluate their effectiveness. You will assess whether the tactics engage with the terror threat as a political or criminal one.

JSB286 Domestic Violence

Pre-requisites	96cp of previous study
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit provides students with a comprehensive, empirically based, international and interdisciplinary overview of domestic violence. It will provide a critical perspective on domestic violence research that is of interest to justice professions and arises in many other employment contexts.

JSB287 Crime in Popular Culture

Pre-requisites	96cp of previous study
Credit Points	12
Campus	External
Availabilities	External - SUM

Crime is a significant genre in popular culture, being present in literature, television, film and traditional and social media. Beyond entertainment, popular cultural representations of crime and criminality inform social responses criminal justice, including policy. This unit provides students with a comprehensive, international, interdisciplinary overview of crime in popular culture, informed by critical perspectives in the social sciences.

JSB305 Professional Placement

Pre-requisites	JSB273 or JSB207 or JSB261. These units can be studied in the same teaching period as JSB305
Equivalents	JSB980
Other requisites	at the discretion of the unit coordinator.
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit is a professional placement in which students can intern at a relevant organisation.

JSB372 Youth Justice

Pre-requisites	JSB207 or JSB273 or LLB101 or PYB007. JSB207 can be enrolled in the same teaching period as JSB372
Equivalent s	JSB232, JSB041
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit provides students with knowledge and skills for working in the contemporary youth justice system,

including knowledge about its history, how the system works, legislation, and the media and political context of youth justice. It questions ideas about young people as a 'crime problem' and challenges students to engage critically with youth crime in terms of social justice.

JSB374 Crime Prevention

Pre-requisites	JSB172 or JSB173 or LLB101 or PYB007
Anti-requisites	JSN112
Equivalents	JSB333, JSB044
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The aim of this unit is threefold. First, the unit will discuss in detail the complex relationship which exists between the crime problem, the creation of criminality and traditional responses to crime. Second, the unit will discuss crime prevention strategies that are broader than the traditional criminal justice response as well as explore the appropriateness or otherwise of blanket responses to crime. Finally, the unit will consider the issue of how the interests of victims of crime may be adequately addressed both within and outside the criminal justice system.

JSB379 Political Practice

Pre-requisites	JSB172 or JSB178 or LLB101
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit will equip students with a thorough understanding of political processes and practices. Students will examine the roles and functions of political parties, public service staff, non-government organisations and the media, while developing practical skills required in the political world.

JSB380 Critical Policy Analysis

Pre-requisites	JSB261 or JSB272. JSB261 or JSB272 can be studied in the same
----------------	---

Units

	teaching period as JSB380
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Critical Policy Analysis provides you with the essential academic and vocational tools that will allow you to critically analyse justice-related policies. You will have the opportunity to examine a number of policies in an in-depth manner using a range of vocational tools and critical frameworks. The ability to provide timely, high quality, critical analyses of justice-related policies is an essential capability of reflective and ethical justice professionals. As such, this unit offers an essential aspect of one's professional development as a justice professional.

JSB381 Indigenous Issues in Criminal Justice

Pre-requisites	JSB171 or JSB173
Equivalents	JSB371
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

All justice professionals require a sound grasp of the unique aspects of Indigenous culture and society that impact upon the interaction of Indigenous people with the criminal justice system. This unit explores the major areas of interaction between Indigenous Australians and the criminal justice system and seeks to raise awareness of those factors that inhibit the formulation of sound policy and practice.

JSB386 Death Investigation

Pre-requisites	96cp of previous study
Equivalents	JSB986
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

The investigation of death in modern society is a well regulated system, orchestrated through the coronial system

with identification of suspicious deaths undertaken by the criminal justice system. This death investigation model involves legal, medical and criminal justice personnel in order to establish both the medical cause and legal circumstance of death. The information gathered in this way is also used to inform government policy on issues such as suicide and motor vehicle accidents. However, in the wake of Harold Shipman in the United Kingdom and Dr Patel in Australia, the issue of concealed homicide has become topical, with questions asked about how the coronial system in particular can better investigate death so as to remove such concerns. This unit will examine in detail the history, ethics, processes, procedures and outcomes of death investigation in Queensland.

JSB417 Seminal Texts in Criminology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The discipline of criminology draws together a range of disciplines where some of its most poignant work emanates from scholars who do not identify themselves as 'criminologists' as such, e. g. Michel Foucault. Considering the overlap between criminology and other social science disciplines, this unit takes an historical view of the discipline and examines some of its seminal authors and key texts.

JSB418 Advanced Research Management

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Good research is characterised by establishing the parameters through which the research should operate and develop. A good research project is also marked by the development of an effective literature review of relevant literature in the chosen field. In this unit, students will source and become acquainted with a bibliography of specialised literature relevant to the nominated field of research and begin to articulate the phases of the research project.

JSB419 Honours Research Methods

Equivalents	JSN102, JSN172
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The content of this unit is based on an assumption that students have a basic knowledge of research methodologies, including an understanding of qualitative and quantitative research paradigms. This unit will build on that knowledge and provide students with an understanding of the techniques that are commonly used for Honours-level research theses.

JSB424 Thesis 3

Equivalents	JSB414-3
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-1, SEM-2

In the thesis you have the opportunity to conduct a major research project where you will identify and articulate a research problem, establish a research design, collect and analyse data, and report on the research findings. The research dissertation culminates the research training you have received through the Honours coursework, and is a salient feature of your Honours degree.

JSB424 Thesis 4

Equivalents	JSB414-4
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-1

In the thesis you have the opportunity to conduct a major research project where you will identify and articulate a research problem, establish a research design, collect and analyse data, and report on the research findings. The research dissertation culminates the research training you have received through the Honours coursework, and is a salient feature of your Honours degree.

JSB424 Thesis 2

Equivalents	JSB414-2
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-1, SEM-2

In the thesis you have the opportunity to conduct a major research project where you will identify and articulate a research problem, establish a research design, collect and analyse data, and report on the research findings. The research dissertation culminates the research training you have received through the Honours coursework, and is a salient feature of your Honours degree.

JSB424 Thesis 1

Equivalents	JSB414-1
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-1, SEM-2

In the thesis you have the opportunity to conduct a major research project where you will identify and articulate a research problem, establish a research design, collect and analyse data, and report on the research findings. The research dissertation culminates the research training you have received through the Honours coursework, and is a salient feature of your Honours degree.

JSN147 Independent Study

Equivalents	JSN117
Credit Points	12
Campus	Gardens Point and External
Availabilities	External - SEM-1, SEM-2

In the course of their study, Justice students may discover an area that is of particular interest to them, or that has specific relevance to their intended professional orientation. This unit gives you the opportunity to extend aspects of your coursework or professional interests in more depth as well as to continue the process of refining and developing research skills.

JSN165 Policy, Governance and Justice

Credit Points	12
Campus	External
Availabilities	External - SEM-1

This foundational unit is designed to develop the skills required for research and policy positions in government agencies. This unit will enhance the key vocational skills required for working in any government agency. All government agencies require similar writing, communication and consultation skills for developing policy. This unit will enhance knowledge on the policy cycle and the wider policy issues associated in government and social justice environments.

JSN166 Justice Institutions

Credit Points	12
Campus	External
Availabilities	External - SEM-1

An understanding of Australian government institutions is critical for students who wish to work effectively in or alongside the public sector. This unit will provide you with advanced knowledge of governance institutions at all levels of Australian Government, as well as the related ethical obligations of public officials in such institutions.

JSN167 Public Sector Skills, Methods and Ethics

Credit Points	12
Campus	External
Availabilities	External - SEM-2

This subject builds knowledge of public sector ethics obligations and is intended to provide knowledge and skills in research design, methodology and evaluation for use in public policy development and evaluation. The unit has a number of objectives. Firstly, to visit issues central to the research and evaluation process. Secondly, to introduce you to a variety of research and evaluation design models, data collection techniques and data analyses. Thirdly, to equip you with the practical skills to write a research and evaluation proposal, carry out a research and evaluation project, report the research results and conduct policy evaluation. The unit also seeks to build knowledge of theories and types of corruption, the psychology and sociology of ethical judgment, along with an

advanced understanding of public sector ethics.

JSN168 Critical Policy Skills

Credit Points	12
Campus	External
Availabilities	External - SEM-2

There are a number of critical policy skills required of the professional contemporary policy officer. This unit aims to develop, enhance and consolidate the skills of students to enable them to undertake sophisticated and effective policy work, both in the public and the private sector. This capstone unit will develop students' critical policy analysis skills, and build the knowledge and capacity to engage effectively with stakeholders and the ability to effectively design and oversee policy.

JSN172 Applied Research Methods for Criminal Justice

Equivalents	JSN102
Credit Points	12
Campus	External
Availabilities	External - SEM-1

The content of this unit is based on an assumption that students have a basic knowledge of research methodologies, including an understanding of qualitative and quantitative research paradigms. The unit will build on that knowledge and provide students with an understanding of the techniques that can be used to collect and analyse both quantitative and qualitative data.

JSN174 Transnational Organised Crime and Terrorism

Equivalents	JSN104
Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit is designed to further your knowledge of Transnational Organised Crime (TOC) and Terrorism. Transnational organised crime has grown exponentially throughout the world in the past decades. Criminal groups operate in almost every country and in varying capacities. Sophisticated groups adopt a business like, often entrepreneurial approach to their criminal endeavours. Similarly, terrorist organisations operate throughout the world in various forms and

Units

use various entrepreneurial ventures to raise needed funds for their activities. Both criminal groups present an ongoing problem for governments and monarchies - globally. While, TOC groups benefit from the misfortune of others within the community, terrorists on the other hand, seek to undermine the fabric of these communities.

JSN176 Independent Study

Equivalents	JSN116
Credit Points	12
Campus	Gardens Point and External
Availabilities	External - SEM-1, SEM-2

In the course of their study, Justice students may discover an area that is of particular interest to them, or that has specific relevance to their intended professional orientation. This unit gives you the opportunity to extend aspects of your coursework or professional interests in more depth as well as to continue the process of refining and developing research skills.

JSN178 National Security and Intelligence

Equivalents	JSN108
Credit Points	12
Campus	External
Availabilities	External - SEM-2

In JSN178 National Security and Intelligence you will develop knowledge of how security is understood and conceptualised, which will enable you to critically reflect on how security priorities are made in national, regional and international settings. The unit aims to encourage you to develop your knowledge of how states prioritise security threats, as well as how intelligence agencies and staff support these efforts. The unit will develop your skills in critical analysis, problem solving, research, and writing.

JSN179 Intelligence Practice 1

Equivalents	JSN109
Credit Points	12
Campus	External
Availabilities	External - SEM-1

Intelligence professionals can be 'generalists', with a broad base of skills

applicable to a range of intelligence environments, or 'specialists', working in narrow areas of responsibility, such as technical analysts or translators. Intelligence work requires proficiency in thinking strategies and skills, effective interpersonal skills, teamwork, and application of intelligence process methodologies. This unit presents the essentials of the intelligence system, the intelligence process, creative problem solving skills, and an introduction to writing in an intelligence environment.

JSN180 Intelligence Practice 2

Equivalents	JSN110
Credit Points	12
Campus	External
Availabilities	External - SEM-2

The unit considers the management of intelligence organisations, personnel and operations. It recognises the need for managers to be attuned to the context and environment in which they are operating. The unit examines organisational structures against proven principles and concentrates on applying established principles and procedures to the unique needs of intelligence organisations.

JSN201 Dynamics of Domestic Violence

Credit Points	12
Campus	External
Availabilities	External - SEM-1

This subject builds essential knowledge of the dynamics of domestic violence. The unit has a number of objectives: 1. to introduce the different types of abuse that comprise domestic violence. 2. to explain the dynamics of domestic violence including its characteristics, distribution, and contributing factors 3. to provide skills and tools for critically assessing domestic violence research 4. to review contemporary and historical developments in domestic violence policy. This background informs the content for JSN202 Children and Family Violence, JSN203 Reducing Lethal Risk, and JSN204 Working with Domestic Violence Victims.

JSN202 Children and Family Violence

Credit Points	12
Campus	External

Availabilities	External - SEM-2
----------------	----------------------------

This subject includes specialised knowledge of violence against pregnant women and the relationship between child maltreatment and domestic violence, including investigating the impact of trauma on child development. This unit expands on the content of JSN201 Dynamics of Domestic Violence and contextualises the material for JSN203 Reducing Lethal Risk and JSN204 Working with Domestic Violence Victims.

JSN203 Reducing Lethal Risk

Credit Points	12
Campus	External
Availabilities	External - SEM-1

This subject builds specialised knowledge associated with identifying, assessing and reducing the risk of lethal domestic violence and collateral killings across multiple sites of professional intervention.

JSN204 Working With Domestic Violence Victims

Credit Points	12
Campus	External
Availabilities	External - SEM-2

This subject will help students develop their professional practice by integrating research on best practices and self care with in-depth knowledge of domestic violence and local resources.

JSN600 Graduate Seminar

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The Graduate Seminar is a forum for the presentation of sections of your research in progress where you gain the opportunity to articulate the challenges and outcomes of your research and are able to benefit from the feedback and insights into your work of your peers. It is also a vehicle through which you can gain valuable experience in evaluating and critiquing the work of other researchers, as well as evaluating your own research.

KAP400 Advertising Creative: The Brief

Credit Points	12
---------------	----

Units

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit provides you with an introduction to the creative side of advertising, specifically on developing skills in interpretation and execution of the Creative Brief which is fundamental to creative advertising best practice. Strategies in idea generation, conceptual thinking and the crafting of persuasive messages, and the professional presentation of these concepts and ideas are a focus of this unit.

KAP401 Advertising Creative: Concept to Campaign

Equivalents	KIP424
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit focusses on the creative side of advertising, involving the analysis of creative advertising content, the development of creative concepts and creative strategies and the crafting of persuasive messages and ideas for creative campaigns.

KAP402 Advertising Creative: Copywriting and Art Direction

Pre-requisites	KAP401
Equivalents	KIP426
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This introductory unit teaches how copywriting and art direction are fundamental to creative advertising practice. Copywriters and art directors are integral in bringing advertising campaigns to life through the generation of ideas, concept development, persuasive messages and imagery.

KAP403 Advertising Creative: Trends in New Media

Equivalents	KIP429
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1,

	SEM-2
--	-------

This unit examines the latest strategies and emerging trends in new and interactive media, including social media, with specific relevance to creative advertising strategy, process and implementation. Students will gain an understanding of, and appropriate skills in, creating best practice creative advertising executions for new media channels with knowledge of how to integrate this new media for an effective advertising campaign.

KCB101 Media and Communication Texts

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit introduces you to foundational ideas in the study of communication. It covers key questions of textual analysis, practice, and context. Drawing extensively on examples of popular communication practice from contemporary society, the unit aims to impart an understanding of communication ecologies, processes, systems, and modes within the wider frame of radical changes occurring to the way texts are produced, read and circulated within our culture.

KCB102 Media Mythbusting

Equivalents	KCB140
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit explores a variety of key myths, controversies and debates surrounding the relationship between media and society. It investigates the historical foundations, cultural context and factual accuracy of a series of 'common sense' arguments regarding how different kinds of media have or have not affected the way our society functions.

KCB103 Strategic Speech Communication

Equivalents	KCB213, KCD103
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1,

	SEM-2
--	-------

This unit emphasises both the theory and practice of speech and interpersonal communication. It introduces theories of language, rhetoric and persuasion, which are interrelated to promote understanding and development of your communication skills. Classroom practice in simulated work situations will enhance the leadership skills you need to become articulate presenters in a range of contexts including personal presentations.

KCB104 Media and Communication: Industries

Equivalents	KCZ104
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

A contemporary understanding of the cultural and economic significance of media and communication industries is a vital foundation for scholarship and professional practice in the media and communications industries. This unit surveys the political economies of print and electronic media industries, as well as advertising and public relations. It considers the impact of regulation on these industries and explores convergence and globalisation as frameworks for understanding change. You will be supported to develop your own strategy for maintaining current awareness of media and communication industries in the process of evaluating current public and policy debates.

KCB105 Inquiry in Media and Communication

Equivalents	KCB334
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The research process (define problem, collect relevant information, analyse information, formulate conclusions/outcomes) underlies many decisions that confront media and communication professionals. This subject introduces foundational research skills and contextualises them with a number of media and communication problems. The unit will involve qualitative and quantitative research methods including content analysis, focus groups, ethnography, interviews and survey research which are studied in the context of media and communication problems

Units

and issues. You will carry out research using some of these methods, analyse the results and present your conclusions and recommendations.

KCB106 Media in a Globalised World

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Media organisations in Australia operate in a global context. Australian media content represents an important export for the country's economy, while Australian audiences consume large quantities of content produced overseas, or adapted from formats originated in other media markets. There is great value, therefore, in students of journalism, media and communication learning how the global media market functions, and the implications of cultural globalisation for professional practice. This foundation unit will introduce you to the global nature of media production and to your role as a future practitioner in a globalised media system.

KCB203 Consumption Matters: Consumer Cultures and Identity

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

A knowledge of and ability to research consumer cultures is essential to those working in the Creative Industries: it is crucial to understand the ways in which consumption actively shapes not only media and production industries, but also the value and meanings of products themselves. This unit requires you to synthesise and apply concepts and methodologies that you have learned in earlier units. This unit focuses on developing in you a broader understanding of media, communication, and production through the lens of consumer cultures. The knowledge that you gain in this unit will inform your future professional, academic, and creative practices.

KCB205 Professional Communication

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1,

SEM-2

Professional Communication aims to enhance your career prospects by developing a significant understanding of communication dynamics between individuals and groups in organisational settings. The unit will sharpen your practical and critical skills in situation analysis, project proposal development and reporting, formal document production, professional presentations, and workplace communication practices. Although there is some focus on the creative and cultural industries, the content and skills covered are applicable to a range of professions and career options. You will be encouraged to pursue a project topic in your chosen professional field.

KCB206 Social Media, Self and Society

Equivalents	KCB201, KCB295
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

From social networking sites like Facebook, Instagram and Twitter, to blogs and YouTube, the number of individuals and organisations in contemporary societies who use social media technologies to shape, (re)form and sustain their identities is on the rise. This unit introduces students to key issues, tools and considerations for contemporary media and communication professionals through facilitating critical engagement with social media in three areas: Platforms and Users, Professional Identity and Communication, Strategy and Analytics.

KCB301 Media Audiences

Equivalents	KCB349
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides you with a conceptual understanding of media audiences within industry and academic contexts. In addition, the unit introduces you to a range of practical skills that may be applied when undertaking audience research. A knowledge of and ability to research audiences is essential to a detailed and comprehensive understanding of the media. The ability to undertake quantitative and qualitative

research into various audience groupings, the use of associated analytical tools and the ability to critically analyse academic and industry based audience research are important skills for undertaking both postgraduate research in Media & Communication and those seeking employment in media industries.

KCB302 Political Communication

Equivalents	KCB311
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an overview of the theory and professional practices of political and governmental communication, especially through the media and communications industries. The unit examines contemporary and historical political issues and communications in Australia and internationally from the perspectives of democratic theory, media influence, strategic image and issue management, and popular culture.

KCB303 Brisbane Media Map 1

Pre-requisites	168cp of completed study
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This units allows final year Media and Communication students the opportunity to work on the Brisbane Media Map - an online resource for media and communication organisations based in Brisbane. Students involved in this project will work in teams to collectively update the map, and learn basic project management strategies.

KCB305 Brisbane Media Map 2

Pre-requisites	KCB303
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Networks of industry and professional associations are extremely important in media and communication industries. In this unit you will extend, apply and deepen your understanding of these networks through developing and

updating the Brisbane Media Map - an online resource that profiles media and communication industries in Brisbane. You will also refine your project planning and management skills, information analysis skills, and team leadership and membership skills.

KCB307 Making Media Connections 1

Pre-requisites	Completion of 192cp of undergraduate study
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Issues surrounding 'The Media' are a common source of interest for the media itself, and to the general public. Media and communication students should be well-positioned to make an informed contribution to these debates, but often lack the ability to communicate with a general audience. This unit will therefore assist students in this regard, helping them to become a visible part of the public discourse.

KCB308 Making Media Connections 2

Pre-requisites	KCB307
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Issues surrounding 'The Media' are a common source of interest for the media itself, and to the general public. Media and communication students should be well-positioned to make an informed contribution to these debates, but often lack the ability to communicate with a general audience. This unit will therefore assist students in this regard, helping them to become a visible part of the public discourse.

KCB310 Contemporary Investigation in Journalism, Media and Communication

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Research skills are an important element of graduate capabilities, applicable to scholarly work at Honours and higher

degree level, and also to professional practice. This unit makes available at the Bachelor level the internationally recognised expertise of world-leading research active staff within the creative industries faculty. It will enable you to explore the possibilities of academic research, design a project, and acquire data gathering, analysis and presentation skills of value to subsequent study and employment.

KCD103 Strategic Speech Communication

Equivalents	KCB213, KCB103
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP2

This unit emphasises both the theory and practice of speech and interpersonal communication. It introduces theories of language, rhetoric and persuasion, which are interrelated to promote understanding and development of your communication skills. Classroom practice in simulated work situations will enhance the leadership skills you need to become articulate presenters in a range of contexts including personal presentations.

KCP415 Co-Creative Media: Digital Storytelling

Equivalents	KKP405, KCP403, KCP353
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In this unit you will learn about the theory and practice of one particular co-creative media production technique and community media movement, known as Digital Storytelling. In the process of developing your own theoretical knowledge and practical skills in Digital Storytelling you will extend your technological literacy through creative expression. You will learn about how to facilitate and research participatory knowledge creation practices such as co-creative media production in a variety of contexts, and using various methods including ethnographic action research. You will have theoretical and practical lessons in the use of Creative Commons licensing to manage Intellectual Property. In addition to creating your own Digital

Story you will have the opportunity to either develop your own proposal for a Digital Storytelling workshop, or to participate in another Digital Storytelling workshop as a participant observer.

KDB101 Performance 1

Pre-requisites	KDB103 (can be enrolled in the same teaching period)
Equivalents	KDX111
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.

KDB102 Performance 2

Pre-requisites	(KDB101 or KDX111) and KDB104 (can be enrolled in the same teaching period)
Equivalents	KDX112
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This studio-based unit consists of a creative process through rehearsal directors and teaching staff leading to a studio and public performance.

KDB103 Dance Technique Studies 1

Equivalents	KDB180
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit involves practical dance classes.

KDB104 Dance Technique Studies 2

Pre-requisites	KDB103 or KDB180
Equivalents	KDB181
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit involves practical dance classes as on-going action research.

KDB105 Architecture of the Body

Equivalents	KDX104
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses on experiential awareness of the body, including an introduction to a working knowledge of anatomy, kinesiology and the movement potential of the body, both in theory and practice

KDB106 Dance Analysis

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit includes a study of the analysis of dance through a concentration on the dance as text and a study of various international historical and contemporary works.

KDB107 Choreographic Studies 1

Equivalents	KDX143
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces crafting skills and choreographic devices used in process of making dance work. It includes the presentation of group work.

KDB108 World Dance

Equivalents	KDB172
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit includes exposure to a range of culturally specific dance styles through practical workshops and theoretical studies which provide contextual background to the styles taught.

KDB109 Funk, Tap and all that Jazz

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

- SEM-2

American and Western European popular and music theatre dances from the late 1900s to the present form the content base of this unit, drawing on three of the following styles: funk, tap, jazz and/or hip-hop. Dance technique and style pertinent to each dance form is taught in the practical classes, while in the theory component of the unit this content is interrogated through historical and cultural perspectives.

KDB110 Deconstructing Dance in History

Equivalents	KDB125
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit includes a study of various international historical and contemporary contexts of dance as art. It focuses on romanticism, classicism, modernism and postmodernism.

KDB111 Performance in Context 1

Equivalents	KDB101, KDX111
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This studio-based unit involves the making and performing of a dance work for public performance in either a theatrical, digital or site-specific domain.

KDB120 Dance Practice 1

Equivalent s	KDB103, KDB180
Other requisites	Evidence of physical condition to undertake the unit is required. Students not in KK34(Dance) are required to pass an audition. An alternative unit will be specified if you are unsuccessful at this audition
Assumed Knowledge	null
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides the opportunity to develop skills in contemporary dance and a second dance genre. As an introductory unit in a suite of Dance Practice units, you will develop approaches to learning and reflective practice to enable you to become an effective self-directed practitioner.

KDB121 Dance Practice 2

Pre-requisites	KDB120 or KDB103
Equivalents	KDB104, KDB181
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

All professionals in the field of dance need a comprehensive grounding in the practice of dance. This unit provides further opportunities to hone skills and deepen understanding in contemporary dance and a second dance genre. As a second unit in a suite of Dance Practice units, you will continue to develop skills in learning and reflective practice to enable you to become an effective self-directed practitioner.

KDB204 Australian Dance

Equivalents	KDB114
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit includes a study of the ritual, artistic and social functions of dance in contemporary Australian society.

KDB205 Teaching Dance

Anti-requisites	KDP205
Equivalents	KDB117
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit includes a practical introduction to philosophies and practices in dance education. The areas of choreography, performance and appreciation are explored as students develop basic teaching and reflective practice skills. This unit is appropriate for students planning to teach dance in the primary, secondary, community or studio context.

KDB206 Contextualising Dance in the 21st Century

Pre-requisites	KDB106 and KDB110
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Dance has demonstrably been a leader in many of the areas that inform the globalised environment of 21st century arts practices, noticeably in the areas of interactive technologies, interdisciplinarity, international collaborations which interrogate differing cultural perspectives, and the increasing fascination of mass audiences with dance reality television shows and social network sites such as YouTube. Parallel to these practices are the growth in participation of recreational dance-related physical activities, and in an industry context the DIY artists of the independent performance scene. Common to these practices is a conscious hybridisation of traditional hierarchies between 'elite' and 'popular' culture. At the same time 21st century dance practices are engaged with pressing issues of our age in relation to health, environmental concerns, and urban mediated environments. This in turn has informed changes in contemporary aesthetic sensibilities.

KDB208 Integrated Professional Skills

Equivalents	KDB221
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is an integrated program building specific practical and psychological skills and strategies for career development and enhancement.

KDB209 Choreographic Studies 2

Pre-requisites	KDB107
Equivalents	KDB207-2
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit includes practice and performance of choreographic work employing choreographic devices and strategies in order to create a personalised movement vocabulary. The

unit will develop your ability to constructively analyse and communicate the choreographic process of your own work and the work of other choreographers.

KDB211 Performance 3

Pre-requisites	(KDB102 or KDX112) and KDB213 (can be enrolled in the same teaching period)
Equivalents	KDX141
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.

KDB212 Performance 4

Pre-requisites	(KDB211 or KDX141) and KDB214 (can be enrolled in the same teaching period)
Equivalents	KDX142
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This studio based unit consists of a creative process through rehearsals and classes with choreographers, rehearsal directors and teaching staff leading to a studio and public performance.

KDB213 Dance Technique Studies 3

Pre-requisites	KDB104 or KDB181
Equivalents	KDB182
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit involves practical dance classes.

KDB214 Dance Technique Studies 4

Pre-requisites	KDB213 or KDB182
Equivalents	KDB183
Credit Points	12
Campus	Kelvin Grove

Availabilities	Kelvin Grove - SEM-2
----------------	--------------------------------

This unit involves practical dance classes.

KDB215 Performance in Context 2

Pre-requisites	KDB111 or KDB101
Credit Points	12
Campus	Caboolture
Availabilities	Caboolture - SEM-2

This studio-based unit involves the making and performing of a dance work for public performance in either a theatrical, digital or site-specific domain.

KDB225 Music Theatre Skills

Equivalents	KSB225, KSB011
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides students with an introduction to practical skills development in acting, dance and singing for music theatre.

KDB230 Dance Practice 3

Pre-requisites	KDB121 or KDB104 or KDB181
Equivalents	KDB213, KDB182
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides further opportunities to develop skills and deepen understanding in contemporary dance and another dance genre. As a third unit in a suite of Dance Practice units, you will continue to develop skills in learning and reflective practice to enable you to become an effective self-directed practitioner. You will also investigate approaches in assisting others to learn.

KDB231 Latin Dance Party

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Latin American Dance styles make an important contribution to a Dance

Units

practitioner's skills portfolio. Further, as an enjoyable and healthy form of social interaction, knowing how to dance these styles is a broadly applicable life skill.

KDB303 Dance and Technology 1

Pre-requisites	KDB209 or KDB207-2 or KDX144-2
Equivalents	KDB158
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit includes modes of choreographic communication: discussion of aesthetic questions that have emerged out of the last major choreographic movements and collaborative practices encouraged with specific focus on digital technologies.

KDB304 Dance and Technology 2

Pre-requisites	KDB303 or KDB158
Equivalents	KDB159
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit includes a major choreographic project for public performance. It explores aesthetic and artistic values in collaborative processes of making new work with technology.

KDB305 Performance in Context 3

Pre-requisites	KDB215
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This studio-based unit involves the making and performing of a dance work for public performance in either a theatrical, digital or site-specific domain.

KDB306 Dance Project 1

Pre-requisites	KDB212 and KDB310. KDB310 can be studied in the same teaching period as KDB306
Equivalents	KDB301, KDB193

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is designed for you to investigate your practice as a dance performer and/or creator via an interdisciplinary and collaborative project. The projects may be self-devised or alternatively you may contribute to other creative projects involving new work. In addition to the project proposals and their realisation, the unit comprises a reflective practice written assignment.

KDB307 Dance Project 2

Pre-requisites	KDB306 and KDB311. KDB311 can be studied in the same teaching period as KDB307
Equivalents	KDB302, KDB199
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This capstone unit is designed to develop and showcase at a professional level your performative skills and artistry. It will allow you to connect with choreographers of national standing in order to experience the creation of professional dance work, culminating in public performances through the Dance Graduation Season.

KDB310 Professional Dance Training 1

Pre-requisites	KDB212 or KDX142
Equivalents	KDB301, KDB193
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is designed for you to develop the technical and interpretive dance skills acquired in the first two years of your course to a pre-professional level. Through embodied knowledge, emphasis is placed on specialist and alternative training methods in order to equip you with advanced technical skills; preparing you for the rapidly increasing demands placed on dance practitioners by the professional dance industry.

KDB311 Professional Dance Training 2

Pre-requisites	KDB310
Equivalents	KDB301, KDB193
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit follows on from the technical and interpretive dance skills acquired in KDB310 Professional Dance Training 1. It is designed to facilitate your continued development in advanced technical skills training pitched at a professional level. Through embodied knowledge, emphasis is placed on specialist and alternative training methods at a professional level; preparing you for the rapidly increasing demands placed on dance practitioners by the professional dance industry. Assessment associated with this unit aims to recreate a real life audition experience through unseen practical examinations.

KDP201 Dance Curriculum Studies 1

Anti-requisites	KDB201, KDB421
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

As the first of a series of three curriculum units, this unit provides introductory practical engagement with the theory, syllabi and practices of dance learning and teaching in schools. You will be encouraged to utilize your knowledge, skills and understanding of the processes of making, performing and appreciating dance in developing teaching and learning experiences. You will begin to understand and learn to manage the complex socio-cultural environments of the dance classroom and develop theoretical understandings, practical knowledge and skills necessary to be an effective Dance teacher. Each subsequent curriculum unit will then provide you with opportunities to increase your breadth and depth of understanding in these areas.

KDP202 Dance Curriculum Studies 2

Pre-requisites	KDP201
Anti-requisites	KDB202, KDB429

Units

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is the second of a series of three curriculum units, this unit builds on practical engagement with the theory, syllabi and practices of dance learning and teaching in schools. You will be encouraged to utilise your knowledge, skills and understanding of the processes of making, performing and appreciating dance in developing teaching and learning experiences with particular emphasis on Years 10-12.

KDP203 Dance Curriculum Studies 3

Pre-requisites	KDP202 (can be enrolled in the same teaching period)
Anti-requisites	KDB203
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Developing from the work undertaken in Dance Curriculum Studies 1 and 2, this unit provides you with the opportunity to continue investigating and exploring dance curriculum planning and work program design. This unit also relates current theoretical issues in assessment to the unique challenges that dance assessment provides. You will explore a range of assessment procedures, methods and strategies to support quality and equity in dance assessment at all levels.

KJB101 Computational Journalism

Credit Points	12
Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - SEM-1 Kelvin Grove - SEM-2

This unit acquaints you with the uses journalists make of computers in their work: for word-processing, personal information management, time management, and gathering information for stories and journalism assignments by searching online and CD-ROM databases, by analysing public records with spreadsheets and by using email to interview sources found on Internet bulletin boards and in newsgroups, usergroups, and listservers.

KJB102 Introduction to Journalism, Media and Communication

Equivalents	KCB110
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces you to core concepts and key knowledge essential for subsequent study in Journalism, and Media & Communication. It combines teaching about media organisations with communication theory and practitioner perspectives drawn from a range of relevant industry sectors. The unit creates a foundation on which you will build in subsequent semesters.

KJB103 Media Design and Layout

Equivalents	KCB304, KJB211
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Visual communication techniques are essential in capturing the attention of an increasingly visual literate society. Understanding how to design well is growing in importance in a society that is time poor and overloaded with competing sources of media. You will learn how to apply design theory in a variety of visual communication contexts relevant to the journalism, media and communication industries.

KJB104 Photojournalism

Equivalents	KKB020
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2 (Block)

Changing digital technologies have resulted in increased demands and expectations for journalism, media and communications professionals to have appropriate digital visual skills. They are increasingly expected to understand and apply digital visual principles and possess the ability to employ and include visual elements in their work such as photo-essays, and photojournalism projects. In this unit students will advance their fundamental digital photography

proficiency and analyse styles of visual communication and the photographic medium.

KJB120 Newswriting

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1, SEM-2

In this unit you learn to think like journalists, to evaluate events for their potential news value, to record interviews and perform other reporting tasks and to write news stories. It includes the evolution and theories of reporting.

KJB121 Journalistic Inquiry

Pre-requisites	KJB120
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit develops the basic skills learnt in Newswriting: generating story ideas; researching; conducting interviews; finding news values and news angles and applying them in a practical context. You also learn about how practical newswriting skills fit into an online environment. You are introduced to the rigours of deadlines and have opportunities to write stories related to different news rounds throughout the semester.

KJB222 Online Journalism 1

Pre-requisites	KJB121
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

As increasing volumes of news and other factual material are processed through online media, practitioners and also intending citizen journalists stand to get a secure understanding from studying the social and economic underpinnings of the format, and also from acquiring skills for using it. This unit explores the background to practice in online journalism, such as the place of the medium in contemporary mass communication; it promotes the principles of best practice in journalism, and enables students to publish reports on line, giving them instruction in a wide

range of production skills.

KJB224 Feature Writing

Pre-requisites	KJB120 or KWB107 or KWB381 or KWB116
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Students conduct interviews and other research that they use to write Internet, newspaper and/or magazine articles that profile personalities or stories or that treat processes, events and places to exploit their human-interest value.

KJB235 Radio and Television Journalism 1

Pre-requisites	KJB121
Anti-requisites	KJB232
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The unit aims to provide means to learn about broadcast media from a production-based perspective, and to begin advanced, practical preparation for working professionally in news media. The practical and theoretical aspects of radio and television media are studied and applied through the production of broadcast news programs. Students will gather, script and produce a number of news items for radio and television bulletins for broadcasting through community sector outlets. This process is facilitated through the learning and usage of broadcast style and through the evaluation of television and radio products. Strong emphasis is placed on current affairs knowledge.

KJB239 Journalism Ethics and Issues

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

QUT Journalism supports the development of socially responsible, ethical journalists. KJB239 is a core journalism unit. It begins with an overview of western and eastern moral philosophical traditions and moves on to examine current journalistic practice in

the context of Australian and international news media operations, regulatory bodies and the stance of professional journalism organisations. Students generate ethical dilemmas and work through them individually, making difficult decisions about issues such as invasion of privacy, protection of sources and conflict of interest. The impact of developing information and communication technologies is also addressed.

KJB280 International Journalism

Pre-requisites	KJB120
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit identifies, compares and analyses the diversity of journalistic practice in different countries and regions. You will look at historical conditions that have led to variations in journalism across the world, how different politico-economic systems affect journalistic activity, and how and why different news media take distinct approaches to covering world issues. You will develop the cross-cultural awareness and background knowledge required to identify story ideas, relate to sources and produce news reports in different countries and cultural environments.

KJB304 Sub-Editing

Pre-requisites	KJB120
Equivalents	KJB322
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit builds on units such as KJB120/KJP401 Newswriting and KJB103 (Media Design and Layout). It is aimed at teaching students how to prepare text for publication in the journalism industry, which is a highly sought skill for employment both within Australia and overseas, and to understand the job market for subeditors. Students will assess the text for news values, quality, adherence to style guides (generic and in-house), grammar, spelling, accuracy, legality (including defamation, contempt and sub-judice), ethics, sources and balance. Students will learn to write headlines, captions and similar types of types that accompany stories, and to subedit print-media stories for reuse in new and social media.

Students, individually and in small teams, will be given a range of copy-text from very poor to reasonable on a variety of topics and make the text which will be made publishable (i.e. production-ready) by them working with their tutor using the above processes.

KJB323 Online Journalism 2

Pre-requisites	KJB222
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

All media outlets now have a visible and increasing online news presence. This unit builds on the foundations established in Online Journalism 1 to equip students with the skills and theory needed to compete in this multimedia news world. Students will receive practical hands-on training allowing them to incorporate text, audio, video and still images into timely online news and feature reports. They will be required to consider the application other online communication tools (Blogs, wikis, Myspace, YouTube etc) in a modern journalistic environment. The praxis-based unit will see students work in rostered teams to create journalistic copy to be published online. They will also work independently to develop individual news or feature story highlighting the innovative possibilities of the online journalism medium.

KJB336 Radio and Television Journalism 2

Pre-requisites	KJB235
Equivalents	KJB338
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit includes the philosophy and formulation of radio and television news and current affairs, anchor techniques, and radio and television news production using computers.

KJB337 Investigative Reporting

Pre-requisites	KJB120
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is an advanced reporting unit stressing the watchdog role of the news media using investigative reporting

Units

approaches. In order to inform prescient news features, the class will examine, in depth two news issues that are central to the current news agenda. The unit is informed through a particular collection of research materials, which are provided as introductory information only, and through lectures particular to both the mission of investigative reporting and the salient features of the topics selected. The lecture-tutorial sequence contains a series of intensive lectures and tutorials early in the semester. These are followed in the later weeks of semester with feedback loop general sessions for discussion on feature development.

KJP400 Theories of Journalism, Media and Culture

Equivalents	KJP105
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces students to major bodies of knowledge and research about journalism, media and culture. Students will consider theories about the nature of practitioners in these fields, their relationship with audiences, their professional routines and practices, the contexts they operate in, the products they create, and their impact on society. Students will undertake substantial reading and critical inquiry to develop a comprehensive understanding of a selected theories, principles or processes relating to journalism, media and culture.

KKB101 Creative Industries: People and Practices

Equivalents	KKD101
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

KKB101 is the first of two foundation-level core units in the BCI and associated double degrees. During this unit, you will research potential creative career pathways for yourself, discover which skills you'll need to be a successful creative practitioner, and find out about career building strategies in the creative industries. You'll also learn information literacy and writing skills, which are essential for your studies and for professional practice in the Creative

Industries.

KKB102 Creative Industries: Making Connections

Equivalents	KKD102
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-2 Caboolture - SEM-2

The ability to work collaboratively and to communicate effectively is essential for all Creative Industries professionals. In this unit you will have the opportunity to acquire and apply research, collaborative practices and project management skills through the collaborative development of a Creative Industries project proposal. This unit is a complement to KKB101 Creative Industries: People and Practices and examines the practical requirements of creative entrepreneurship, and working collaboratively.

KKB341 Work Integrated Learning 1

Pre-requisites	Completion of 168 credit points of study
Anti-requisites	BEB701, BEB702, KKB343, KKB344
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

It is important that Creative Industries students gain real world work experience in order to link university study with professional practice in their chosen industry. Students need to equip themselves not only with skills and discipline knowledge gained in the classroom, but also with understandings and experience gained from work-integrated learning so that they may function and flourish when they enter the workplace. This advanced-level (capstone) unit is offered during the final years of an undergraduate degree course at which time students are able to apply transferable skills to a workplace or professional context.

KKB342 Work Integrated Learning 2

Pre-requisites	KKB341 or KKB343 or BEB701. KKB341 can be
----------------	---

	enrolled in the same teaching period as KKB342
Anti-requisites	BEB702
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

It is important that Creative Industries students gain real world work experience in order to link university study with professional practice in their chosen industry. Students need to equip themselves not only with skills and discipline knowledge gained in the classroom, but also with understandings and experience gained from work-integrated learning so that they may function and flourish when they enter the workplace. This advanced-level (capstone) unit is offered during the final year of an undergraduate degree course at which time students are able to apply transferable skills to a workplace or professional context.

KKB345 Creative Industries Project 1

Pre-requisites	Completion of 72 credit points of Creative Industries units (K% or D% units)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The Faculty of Creative Industries intends that its graduates practice as professionals in their respective discipline or disciplines. Increasingly, a major part of such practice is the instigation, management, monitoring, and reporting on Creative Industries projects. This unit offers experience at participating in an advertised project that may be offered by one or more disciplines in the Faculty. Normally projects are advertised in the preceding semester through the CIF Work Integrated Learning Blackboard Hub. For some students this unit will be taken as the first of two 'project' units related to the same project, in such cases this unit may be a prerequisite or corequisite to the second unit, KKB346 Creative Industries Project 2.

KKB346 Creative Industries Project 2

Pre-requisites	KKB345 (can be enrolled in the same

Units

	teaching period)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The Faculty of Creative Industries intends that its graduates practice as professionals in their respective discipline or disciplines. Increasingly, a major part of such practice is the instigation, management, monitoring, and reporting on Creative Industries projects. This unit offers experience at participating in an advertised project that may be offered by one or more disciplines in the Faculty. Normally projects are advertised in the preceding semester through InPlace. This unit can extend upon work undertaken in KKB345 (CI Project 1) in the case of larger, more involved projects, or can be used for a second discreet project.

KKB350 Creative Industries Study Tour

Pre-requisites	Completion of 72 credit points of Creative Industries units (K% or D% units)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit is designed for students who have completed at least one year full time study of a QUT Creative Industries Faculty course and are ready to expand their horizons by gaining experience of national or international creative industries practice in creative precincts. These creative precincts include museums, galleries, fashion houses, tourist districts and the like. The unit provides opportunities for students to interact with recognised creative artists, designers and cultural professionals in creative precincts. **IMPORTANT:** Depending on the destination, the cost of a 2-3 week international tour is estimated at between three and five thousand dollars and domestic tours can be up to two thousand dollars.

KKB351 Work Integrated Learning 3

Pre-requisites	KKB342 or BEB702
Anti-requisites	BEB703
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

- SEM-1, SEM-2

It is important that design students gain real world work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge gained in the classroom, but also with understandings and experience gained from Work Integrated Learning so that they may function and flourish when they enter the workplace. This advanced-level unit is part of a four-unit Work Integrated Learning (WIL) minor in which each WIL unit has its own specific focus and objective in respect to understanding and reflecting on the workplace. Work Integrated Learning 3 builds upon foundational knowledge of professional practice and self-directed learning acquired in Work Integrated Learning 1 and 2 by extending the focus to reflection and analysis of how individual practice relates to the collective cultural context of the workplace.

KKB352 Work Integrated Learning 4

Pre-requisites	KKB351. KKB351 can be enrolled in the same teaching period as KKB352
Anti-requisites	BEB704
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

It is important that design students gain real world work experience in order to link university study with professional practice. Students need to equip themselves not only with skills and discipline knowledge gained in the classroom, but also with understandings and experience gained from Work Integrated Learning so that they may function and flourish when they enter the workplace. This advanced-level unit is part of a four-unit Work Integrated Learning (WIL) minor in which each WIL unit has its own specific focus and objective in respect to understanding and reflecting on the workplace. Work Integrated Learning 4 builds upon foundational knowledge of professional practice and self-directed learning acquired in Work Integrated Learning 1, 2 and 3 by extending the focus to reflection and analysis of how individual practice relates to the collective cultural context of the workplace.

KKD101 Creative Industries: People and Practices

Equivalents	KKB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP2

KKD101 is the first of two foundation-level core units in the BCI and associated double degrees. During this unit, you will research potential creative career pathways for yourself, discover which skills you'll need to be a successful creative practitioner, and find out about career building strategies in the creative industries. You'll also learn information literacy and writing skills, which are essential for your studies and for professional practice in the Creative Industries.

KKD102 Creative Industries: Making Connections

Equivalents	KKB102
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3

The ability to work collaboratively and to communicate effectively is essential for all Creative Industries professionals. In this unit students will have the opportunity to acquire and apply research, collaborative practices and project management skills through the collaborative development of a Creative Industries project proposal. This unit is a complement to KKD101 Creative Industries: People and Practices and examines the practical requirements of creative entrepreneurship, and working collaboratively.

KKM001 Introduction to Personal Social Media Networking

Anti-requisites	KKP111
Credit Points	6
Campus	Online and Kelvin Grove
Availabilities	Online - 6TP2, SEM-2

Social Media are an increasingly important part of social, professional and personal communication. This unit will provide you with the knowledge and skills to build your personal online presence

effectively. As you map and analyse your personal social media presence you will apply critical social media theories of networks and influencers.

KKM002 Professional Networking Through Social Media

Anti-requisites	KKP111
Credit Points	6
Campus	Online and Kelvin Grove
Availabilities	Online - 6TP3, SEM-2

This module will provide you with the skills and knowledge needed to build effective professional networks through social media with a focus on LinkedIn as well as other platforms such as Twitter and Facebook. You will apply principles of effective social media communication and professional branding to establish and maintain an effective social media professional network.

KKN320 Advanced Workplace Learning

Pre-requisites	Completion of 36cp of study.
Equivalents	KKN330, KKN340-1, KKN340-2
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SUM

As part of a substantive postgraduate learning experience, Creative Industries students should be able to demonstrate initiative, work well in a team and on their own, and apply self-directed learning and transferable skills within the context of their professional confines. The skills and discipline knowledge gained in university contexts are given greater depth and dimension when they are acted out and experienced in a real-world environment. In this unit you will gain work-based experience that connects your university studies to practice in your chosen industry.

KKP001 Entrepreneurship in the Creative Economy

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1,

SEM-2

Entrepreneurial skills are valuable assets to both the creative practitioner and creative industries management. This unit outlines the effectiveness of an entrepreneurial education in the creative economy. This unit aims to provide the creative industries practitioner/management with an understanding of the theory and practice of entrepreneurship by integrating the concepts, definitions, skills and techniques required for an entrepreneurial approach to creative industries.

KKP002 20:20 Vision: Imagining the Creative Future

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

One condition of late modernity is rapid change and an increasing rate of change. This unit will address the drivers of change, the impact change has now, and is likely to have and how the Creative Industries formulation responds to these larger societal forces. Understanding of the dynamics of these forces is crucial for Creative Industries practitioners and professionals in order to shape a future characterised by the creation of innovative action, forms and thought.

KKP003 Project Design in the Creative Industries

Pre-requisites	Completion of 48cp in current course
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The cohesive and reflexive nature of creative practitioners permits their successful skill transfer to a variety of employment and project building opportunities. Understanding the importance of research design, collaboration and professional networking in the Creative Industries is therefore essential. This unit will help you develop and critique the relevance of research methods, collaboration and project design and management in your creative and professional practice.

KKP004 Innovation in the Creative Industries: Major Project

Pre-requisites	KKP004-2 (can be enrolled in the same teaching period)
Co-requisites	KKP004-4
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This major project is the final and culminating activity of the Master of Creative Industries. It serves to focus each candidate's learning through a specifically designed and substantial project that seeks to realise innovations in the candidate's practice or workplace. Each project will be designed to 'fit' the scale, scope and focus of 48 credit points. This unit aims to provide the creative industries worker with an opportunity to plan, implement and evaluate a major project professional project in the Creative Industries. Such a project may be located in the candidate's workplace, worked in a group, constructed as an internship with an innovative firm or company or a piece of scholarly enquiry which addresses the challenges of innovation within one of the creative industries.

KKP004 Innovation in the Creative Industries: Major Project

Co-requisites	KKP004-1
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This major project is the final and culminating activity of the Master of Creative Industries. It serves to focus each candidate's learning through a specifically designed and substantial project that seeks to realise innovations in the candidate's practice or workplace. Each project will be designed to 'fit' the scale, scope and focus of 48 credit points. This unit aims to provide the creative industries worker with an opportunity to plan, implement and evaluate a major project professional project in the Creative Industries. Such a project may be located in the candidate's workplace, worked in a group, constructed as an internship with an innovative firm or company or a piece of scholarly enquiry which addresses the challenges of innovation within one of the creative

industries.

KKP004 Innovation in the Creative Industries: Major Project

Co-requisites	KKP004-3
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This major project is the final and culminating activity of the Master of Creative Industries. It serves to focus each candidate's learning through a specifically designed and substantial project that seeks to realise innovations in the candidate's practice or workplace. Each project will be designed to 'fit' the scale, scope and focus of 48 credit points. This unit aims to provide the creative industries worker with an opportunity to plan, implement and evaluate a major project professional project in the Creative Industries. Such a project may be located in the candidate's workplace, worked in a group, constructed as an internship with an innovative firm or company or a piece of scholarly enquiry which addresses the challenges of innovation within one of the creative industries.

KKP004 Innovation in the Creative Industries: Major Project

Pre-requisites	KKP003 and completion of 96cp
Co-requisites	KKP004-2
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This major project is the final and culminating activity of the Master of Creative Industries. It serves to focus each candidate's learning through a specifically designed and substantial project that seeks to realise innovations in the candidate's practice or workplace. Each project will be designed to 'fit' the scale, scope and focus of 48 credit points. This unit aims to provide the creative industries worker with an opportunity to plan, implement and evaluate a major project professional project in the Creative Industries. Such a project may be located in the candidate's workplace, worked in a group, constructed as an

internship with an innovative firm or company or a piece of scholarly enquiry which addresses the challenges of innovation within one of the creative industries.

KKP112 Telling Stories: Narrative in Creative Industries

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Where the world's leading agencies, commercial or otherwise, increasingly employ narrative as the key component to their communication, practitioners in the Creative Industries are arguably those best placed to work with, respond and act in what has become a diverse and rapidly changing environment. It is imperative that we as designers, writers, arts managers, advertisers, and creators gain a scholarly and pragmatic understanding of storytelling across a range of social, cultural, Indigenous and ethical contexts.

KKP113 Creative Project

Pre-requisites	Completion of 36cp. The units can be studied in the same teaching period as KKP113
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit is the culminating activity of the Graduate Certificate of Creative Industries. It serves to focus your learning through a focused professional development task or activity. The unit will offer opportunities to work independently, and learn from practice in disciplines other than your own, while still focusing on current methods of approach in your own field of practice.

KKP400 Honours Project

Pre-requisites	KKP400-4 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives you the

opportunity to pursue an in-depth project over two semesters that can be a) a thesis dissertation or b) a project is made up of critical work (an exegesis) produced in association with professional or creative practice. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. KKP400 is a multi-component unit and all five components must be completed to obtain final credit points.

KKP400 Honours Project

Pre-requisites	KKP400-3 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives you the opportunity to pursue an in-depth project over two semesters that can be a) a thesis dissertation or b) a project is made up of critical work (an exegesis) produced in association with professional or creative practice. This work thus demonstrates advanced competence, skills or analytical ability in a chosen discipline and/or interdisciplinary skills or analytical ability. KKP400 is a multi-component unit and all five components must be completed to obtain final credit points.

KKP400 Honours Project

Pre-requisites	KKP400-1 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The Honours project is the major component of the Honours year in Creative Industries. As the Honours year builds upon a completed undergraduate degree, the project gives you the opportunity to pursue an in-depth project over two semesters that can be a) a thesis dissertation or b) a project is made up of critical work (an exegesis) produced in association with professional or creative practice. KKP401 Honours Graduate Seminar

Pre-requisites	KKP409
----------------	--------

Equivalents	KKN002
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is a seminar program of formal presentations and in-class workshops designed to review your progress to date and to assist in refining key areas of your project prior to submission for examination. You are expected to notify your project supervisor of your content in this unit and invite your supervisor to the oral presentation of your research findings.

KKP409 Approaches to Honours Enquiry

Co-requisites	KKP400-1
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

There are many forms of enquiry suited to the diverse range of disciplines which make up the Creative Industries. These forms of enquiry typically fall within qualitative research traditions, creative practice as research and applied commercial research. This unit plays a key role in your research degree by introducing you to the most appropriate form of enquiry for your study and providing you with the strategies, methods and protocols for designing, implementing and evaluating that study. You will be undertaking this unit with your Honours cohort and attending certain lectures in the postgraduate mode for this material, KKP601 Approaches to Enquiry in the Creative Industries, as nominated by the Honours Coordinator.

KKP414 Digital Writing: Words Under Glass

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Defining digital writing is becoming more complex in the current climate. Digital content is now developed for connected devices, for non-traditional publication platforms, for events, performances, exhibition, or other contexts. This unit will allow you to engage with and consider writing creatively for multiple digital environments. It will consider a range of methods and platforms, discuss common modes of presentation, and examine

industry-related issues and the overlaps and intersections in the increasing convergence of image, text and sound.

KKP417 The Art of Practice

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit demands a high level of artistic experience and practice and provides a bridge to transition from an undergraduate level of practice to a professional level of practice.

KKP601 Approaches to Research in the Creative Industries

Equivalents	KKP609, KKP624
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block), SEM-2 (Block)

There are many forms of enquiry suited to the diverse range of disciplines which make up the Creative Industries. These forms of enquiry typically fall within qualitative research traditions, creative practice as research and applied commercial research. This unit plays a key role in your research degree by introducing you to the most appropriate form of enquiry for your study and providing you with the strategies, methods and protocols for designing, implementing and evaluating that study.

KKP603 Project Development in the Creative Industries

Pre-requisites	KKP623
Equivalents	KKN065
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2 (Block)

This unit aims to provide Creative Industries practitioners with the means to bridge their professional practice with an understanding of the theory and practices of academic research project development through an integrated view of the concepts, skills, tools and techniques. The unit will develop capacities to develop and present an in-depth project proposal for a creative industries project.

KKP609 Approaches to Media, Communication and Cultural Research

Co-requisites	IFN001
Equivalents	KKP601, KKP624
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block), SEM-2 (Block)

This unit plays a key role in your research degree by introducing you to the fundamentals of good research and standards of presentation. The unit helps you develop the skills to manage your own research project.

KKP613 MFA Project

Pre-requisites	KKP613-1 and KKP613-2. KKP613-1 and KKP613-2 can be enrolled in the same teaching period as KKP613-4
Co-requisites	KKP613-3
Equivalents	KKN010-4
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 5TP2

This is a multi-part unit. It aims to consolidate and advance the learning of previous project units into the final iteration of your MFA project work. You will create and present your integrated original works and these will be assessed by industry peers. In order to become an active professional artist within a creative industries environment you need to develop your disciplinary skills and understandings in a broad interdisciplinary and collaborative context. Your work environment is likely to be project-based and you therefore need to develop and demonstrate effective project management skills and self-reliance in planning, producing, promoting, and managing your creative work.

KKP613 MFA Project

Pre-requisites	KKP613-1 and KKP613-2. KKP613-1 and KKP613-2 can be enrolled in the same teaching period as KKP613-3
Co-	KKP613-4

requisites	
Equivalents	KKN010-3
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 5TP2

This is a multi-part unit. It aims to consolidate and advance the learning of previous project units into the final iteration of your MFA project work. You will create and present your integrated original works and these will be assessed by industry peers. In order to become an active professional artist within a creative industries environment you need to develop your disciplinary skills and understandings in a broad interdisciplinary and collaborative context. Your work environment is likely to be project-based and you therefore need to develop and demonstrate effective project management skills and self-reliance in planning, producing, promoting, and managing your creative work.

KKP616 Postgraduate Independent Study

Equivalents	KKN006
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SUM

This unit enables students to undertake independent work of an artistic or scholarly nature which is of appropriate scope. The student devises an outline and proposal of project study and/or creative practice in consultation with a staff supervisor. Artistic outcomes would be expected to be to the standard of public showing. Written work requires a minimum of 6000 - 10000 words, or equivalent if other media/reportage is used.

KKP622 Advanced Reflective Practice

Pre-requisites	KKP603 and KKP623
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit enables deeper critical analysis of professional practice in its site and field and in relation to an appropriate academic research framework. The

reflective process and tacit knowledge made explicit should inform and influence the DCI research project work. Conceptual reference points and the analysis of practice are extended by investigating theoretical frameworks from other fields that may assist in building a more complete understanding of an individual's industry practice. The unit culminates in a public presentation of part of a larger DCI Project.

KKP623 Reflective Practice in Action

Anti-requisites	KKP620, KKP621
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces and explores the processes involved in undertaking critical, systematic reflection into professional and creative practice. While acknowledging that practice in the Creative Industries incorporates a multitude of processes and approaches across a range of disciplines in diverse contexts, this unit seeks to develop a personal and serviceable model for reflection on practice. The unit forms the basis for subsequent research in the professional practice research projects which drive the course.

KKP624 Approaches to Design Research

Pre-requisites	Admission into IF49 or KK51 or KK59 or KK60
Equivalents	KKP601, KKP609
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block), SEM-2 (Block)

As you commence your postgraduate research degree, this unit plays a key role in introducing you to appropriate forms of enquiry for your own research, and providing you with the philosophies, frameworks, methodologies and protocols for planning, implementing and evaluating that research within a Design and Creative Industries context.

KMB003 Sex Drugs Rock 'N' Roll

Equivalents	KMB640
Credit Points	12

Units

Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1, SEM-2

In this unit, you will gain an insight into the interaction between music and society by analysing the artistic, cultural, economic, and political contexts of popular music in the 20th and 21st centuries. This insight is grounded in the critical examination of your personal relationship to music, and the study of diverse and dynamic musical styles and genres.

KMB004 World Music

Equivalents	KMB631
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

You will gain an awareness and better understanding of world music, its particular significance within Australia and its impact upon contemporary music through a series of lectures, demonstrations and tutorials.

KMB107 Sound, Image, Text

Equivalents	KMB638
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This unit focuses on the rich and varied relationship between sound and image in a number of media and artforms, including film, music video, theatre, installation, mixed media performance and many more.

KMB119 Music and Sound Production 1

Equivalents	KMB108, KMB621
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces students to the fundamental principles of music and sound production through a mix of theory and practice. Students gain an understanding of sound recording, sound

production and live sound reinforcement and develop listening skills essential for music and sound production.

KMB122 Music and Sound Concepts 1

Equivalents	KMB130, KMB632
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This is the first of two units exploring and engaging with key concepts in the creation of new music. The unit focuses on understanding creative practice and draws on a wide spectrum of contemporary and historical music examples.

KMB129 Music and Sound Production 2

Equivalents	KMB105, KMB619
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit builds on Music and Sound Production 1. It introduces students to sound synthesis and signal processing and extends the students understanding of the approaches and aesthetics underpinning creative music and sound production. Students will further develop practical skills in music and sound composition and deepen their knowledge of the hardware and software commonly used in creative production.

KMB132 Music and Sound Concepts 2

Pre-requisites	KMB122
Equivalents	KMB131, KMB633
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is the second of two units exploring and engaging with key concepts in music and sound. The unit extends the critical and analytical skills developed in Music and Sounds Concepts 1 as well as developing a broader understanding of strategies for creative practice and experimentation by critically listening to a wide spectrum of contemporary and historical music and sound examples.

KMB136 Creative Studio 1

Equivalents	KMB140
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Successful musicians need to form and negotiate their creative practice within a complex professional environment. They need to develop critical skills to understand their music in context and how it can be connected to an audience. This unit establishes a platform for your practical skills in the creation and presentation of new music. As the first of six units in creative musical practice, it provides an opportunity for you to explore and present creative musical ideas with peers in a professionally engaged environment.

KMB137 Critical Listening 1

Equivalents	KMB140
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Successful musicians need to form and negotiate their creative identity within a complex field of practice. This unit helps you develop critical skills to understand music in context and how it can be connected to an audience. It builds your critical aural skills and theoretical knowledge in the recognition and understanding of a broad range of music and musical practices. As the first of four units in the development of these skills, it provides an opportunity for you to explore and analyse musical and sonic ideas with peers, at an introductory level, in a staff directed environment.

KMB138 Creative Studio 2

Pre-requisites	KMB136 or KMB140 or KMB125
Equivalents	KMB141
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Successful musicians need to form and negotiate their creative practice within a complex professional environment. They need to develop critical skills to understand their music in context and how it can be connected to an audience.

This unit further establishes a platform for your practical skills in the creation and presentation of new music. As the second of six units in creative musical practice, it builds further opportunities for you to explore and present creative musical ideas with peers in a professionally engaged environment.

KMB139 Critical Listening 2

Pre-requisites	KMB137 or KMB140 or KMB125
Equivalents	KMB141
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Successful musicians need to form and negotiate their creative identity within a complex field of practice. This unit helps you develop critical skills to understand music in context and how it can be connected to an audience. It expands your critical aural skills and theoretical knowledge in the recognition and understanding of a broad range of music and musical practices. As the second of four units in the development of these skills, it provides an opportunity for you to explore and analyse musical and sonic ideas with peers, at an intermediate level, in a staff directed environment.

KMB200 Music Scenes and Subcultures

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit will explore many of the major musical subcultural movements of the last sixty years through an interdisciplinary approach. To understand how music operates as a form of social, cultural and political communication this unit explores the various contexts in which music circulates and is made meaningful.

KMB215 The Music Industry

Equivalents	KMB301, KMB056
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit gives a working knowledge of the structural, legal and business aspects of the Australian music industry by

engaging with real world music industry professionals and formulating a number of strategies to reflect this.

KMB216 Audio / Visual Interaction

Equivalents	KKB216
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The ability to build custom audio/video performance and composition systems enables digital media artists to create unique interactive works. Graphical development environments are an ideal entry point for creating these systems as they enable rapid prototyping of ideas and do not require in depth knowledge of computer coding. This unit gives you a grounding in the concepts and processes required to build interactive media works.

KMB219 Music and Sound Production 3

Pre-requisites	KMB119 and KMB129 and KMB138
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit builds upon the first year foundation units in Music and Sound Production. It introduces students to the recording studio control room, focussing on microphone captured audio and the integration of electronic and acoustic resources and extends the student's understanding of the approaches and aesthetics underpinning creative music and sound production. Students will further develop practical skills in music and sound composition and deepen their knowledge of the hardware and software commonly used in creative production.

KMB225 Creative Studio 3

Pre-requisites	KMB135 or KMB138 or KMB141
Equivalents	KMB214-2
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Successful musicians need to establish a distinctive creative reputation within a complex professional environment. They

need to develop critical skills to understand their work in context and how it can be connected to an audience. This unit builds on and extends students' practical skills in the development and presentation of new creative works. As the third of six units in creative musical practice, it builds deeper engagement and knowledge through which students will explore and present new work with peers in a professionally engaged environment.

KMB229 Music and Sound Production 4

Pre-requisites	KMB219
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit builds upon Music and Sound Production 1, 2 and 3. It introduces students to the concept of the studio as an instrument. By developing advanced studio recording techniques and focussing on creative relationships, it extends the student's understanding of the approaches and aesthetics underpinning creative music and sound production. Students will further develop practical skills in music and sound composition and deepen their knowledge of the hardware and software commonly used in creative production.

KMB235 Creative Studio 4

Pre-requisites	KMB225
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Successful musicians need to establish a distinctive creative reputation within a complex professional environment. They need sound critical skills to understand their work in context and how it can be connected to an audience. This unit continues to build on and extend students' practical skills in the development and presentation of new creative works. As the fourth of six units in creative musical practice, it continues to build deeper engagement and knowledge through which students will explore and present new work with peers in a professionally engaged environment.

KMB237 Critical Listening 3

Pre-requisites	KMB139 or KMB141 or KMB135
----------------	----------------------------

Units

Equivalents	KMB325
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Successful musicians need to form and negotiate their creative identity within a complex field of practice. This unit helps you develop critical skills to understand music in context and how it can be connected to an audience. It further develops your critical aural skills and theoretical knowledge in the recognition and understanding of a broad range of music and musical practices. As the third of four units in the development of these skills, it provides an opportunity for you to explore and analyse musical and sonic ideas with peers, at an intermediate-advanced level, in a staff directed environment.

KMB239 Critical Listening 4

Pre-requisites	KMB237 or KMB325
Equivalents	KMB335
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Successful musicians need to form and negotiate their creative identity within a complex field of practice. This unit completes the development of your critical skills to understand music in context and how it can be connected to an audience. It develops and consolidates your critical aural skills and theoretical knowledge in the recognition and understanding of a broad range of music and musical practices. As the last of four units in the development of these skills, it provides an opportunity for you to explore and analyse musical and sonic ideas with peers, at an advanced level, in a staff directed environment.

KMB250 Creative Performer 1

Pre-requisites	KMB119 and KMB129 and KMB138
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit aims to develop the skills and understanding necessary for generating original creative work through extension and experimentation. It adds to the foundational knowledge and ideas delivered in Music and Sound Concepts 1

& 2 and draws on technical content introduced in Music and Sound Production 1 & 2.

KMB251 Creative Performer 2

Pre-requisites	KMB250
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit adds to the contextual knowledge and conceptual frameworks delivered in Creative Performer 1 and further develops the skills required to generate original creative work at a greater depth of experimentation and musical knowledge.

KMB252 Multi-Platform Sound Design

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit builds on previous sound design knowledge and uses a range of tools to design and develop sound content for multi platform television, mobile phones, web, games, virtual worlds and social networks. Students gain an understanding of a variety of working methods and delivery formats and develop practical skills essential to successful collaboration and creation.

KMB319 Music and Sound Production 5

Pre-requisites	KMB229
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit builds upon Music and Sound Production 1, 2, 3 and 4. It focuses on the skills needed for the delivery and professional presentation of developed work in a variety of creative production areas. It deepens understanding of creative relationships and extends the student's understanding of the approaches and aesthetics underpinning creative music and sound production. Students will further develop practical skills in music and sound composition and deepen their knowledge of the hardware and software commonly used in creative production.

KMB329 Music and Sound Production 6

Pre-requisites	KMB319
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This capstone unit extends and completes students' skills developed in Music and Sound Production 1, 2, 3, 4 and 5. It focuses on the skills needed for the delivery and professional presentation of developed work in a variety of creative production areas. It deepens understanding of creative relationships and extends the student's understanding of the approaches and aesthetics underpinning creative music and sound production. Students will develop further practical skills in music and sound composition and deepen their knowledge of performance direction and session management techniques commonly used in industry standard creative production.

KMB336 Creative Studio 5

Pre-requisites	KMB235
Equivalents	KMB325
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Successful musicians need to establish their professional reputation in a complex and fast changing field of practice. They need to develop critical skills to understand their practice in context and how it can be connected to multiple audiences. This unit draws on the experiences gained from the previous four creative practice units through the refinement of practical skills in the creation and presentation of new music. It assists you to consolidate your skills as an artist and collaborator within a global field of practice. As the fifth of six units in creative practice, it provides an opportunity for you to envision and begin to realise your reputation and standing within a professionally engaged environment.

KMB337 Creative Studio 6

Pre-requisites	KMB336 or KMB325
Equivalents	KMB335
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is the Capstone unit for the Bachelor of Music degree. It draws on student the experience from all five previous creative practice units. You will lead and participate in individual or collaborative projects to produce the most fully realised portfolio of work in your degree. The portfolio will demonstrate that you have developed a sophisticated and professional voice over the three years of your study. It will also demonstrate a high level of professional activity and engagement. It will be launched to a public audience, be supported by a marketing and promotional plan, and demonstrate the highest professional values and an awareness of global potentials in your chosen field.

KMB350 Creative Performer 3

Pre-requisites	KMB251
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit aims to develop the skills and understanding necessary for generating original creative work through extension and experimentation. It adds to the foundational knowledge and skills developed in Creative Performer 1 and 2.

KMB351 Creative Performer 4

Pre-requisites	KMB350
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This capstone unit builds on Creative Performer 1, 2 and 3, and examines the student's own musical practice in relation to finding a distinctive and accomplished performance profile, as well as the ability to respond well to direction.

KMP101 Music (Primary / Instrumental) Curriculum Studies 1

Anti-requisites	KMB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

A foundation study in Primary or instrumental music specialization focusing upon the fundamentals of teaching, lesson planning and developing a philosophy appropriate to music education practice.

KMP201 Music (Secondary) Curriculum Studies 1

Anti-requisites	KMB201
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

A foundation study in secondary music and sound curriculum focusing upon the fundamentals of teaching, lesson planning and developing a philosophy appropriate to music and sound education practice.

KMP202 Music (Secondary) Curriculum Studies 2

Pre-requisites	KMP201
Anti-requisites	KMB202
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Further study in classroom music and sound curriculum focusing upon more advanced teaching methods, unit planning and the development of an approach to philosophy in action appropriate to music and sound education practice in the senior secondary context.

KMP203 Music (Secondary) Curriculum Studies 3

Pre-requisites	KMP202 (can be enrolled in the same teaching period)
Anti-requisites	KMB203
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides advanced study in classroom music and sound curriculum, focusing upon innovative teaching methods and planning, whole school community cultural management and the development of an approach to inclusive philosophy which enables a holistic and integrated approach to music and sound education that responds synergistically to individual secondary school communities and facilitates meaningful and engaging music and sound environments.

KNB111 Animation Methodologies

Equivalents	KIB110, KIB220
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Animators have employed a wide range of media to create animated imagery for a variety of contexts. The broad scope of available 2D and 3D media allows images to be developed in diverse ways to display virtual reality, digital three-dimensional objects, traditional two-dimensional formats, stop-motion processes, and integrated effects within live-action motion pictures. Animation Methodologies recognises that any given production technique provides just one of many possible ways to realise an animation project whether for game development, film or television, Web or emergent media. This unit explores the varied nature of animation methods from traditional practices to approaches using digital techniques.

KNB112 Drawing for Animation 1

Equivalents	KVB105, KVB755
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit will focus on the foundation drawing skills and processes employed in the pre-production phase of visual development of a script or concept for film. It covers sets, props and character design, as well as story previsualisation techniques.

KNB122 Drawing for Animation 2

Equivalents	KVB106, KVB756
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Animation incorporates conventions and interpretations of dynamic structure in space and time. Core skills and knowledge of drawing provide an essential foundation for existing and evolving modes for construction and presenting animated kinetic images. The discipline of animation requires a diverse

Units

range of traditional drawing skills that have been introduced in the prerequisite unit and are now translated into moving images. The emphasis of this unit focuses on the conventions of dynamic animated images in kinetic applications.

KNB123 Animation and Motion Graphics

Equivalents	KIB105
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The field of motion graphics has expanded rapidly, with its application extending beyond the role of cinematic storytelling to applications for title sequences, music promotion, marketing, computer games and information design. This unit provides an introduction to animation and motion graphics concepts and practices, with an emphasis on the principles of design in motion. This unit provides an introduction to the world of animated graphics, paying particular attention to pre-production techniques, design in motion, and idea generation. Through the development of screen-based works, you will apply traditional animation principles and techniques to communicate innovative temporal and spatial design solutions.

KNB124 3D Animation 1

Equivalents	KIB111, KIB203
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

In the evolving fields of animation, games and graphical visualisation, you will require new literacies and skills to participate fully in the 3D Computer Graphics production process. By introducing you to principles, processes, methods and theories of modelling; the architecture of 3D graphics; and node based applications, you will gain a foundational understanding of 3D graphics production.

KNB211 3D Animation 2

Pre-requisites	KNB124 or KIB111 or KIB107 or KIB203
Equivalents	KIB225, KIB106, KIB807
Credit Points	12

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit further develops your knowledge and skills of 3D animation, introducing you to the methods and processes involved in animating CG characters to achieve convincing and appealing actions.

KNB212 Real-time 3D Computer Graphics

Pre-requisites	KNB124 or KIB111 or KIB107 or KIB203
Equivalents	KIB215, KIB325, KIB310, KIB821
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses on the development and application of real-time 3D assets, with the overall aim being to provide you with a strong foundation in the practices and concepts associated with real-time graphics production. This unit builds upon the fundamental 3D skills of modelling, texturing and animating obtained during KNB124 3D Animation One while laying the critical groundwork needed for more advanced practices undertaken in KNB222 Virtual Environments.

KNB221 Animation: CG Toolkit

Pre-requisites	(KNB123 or KIB105) and (KNB124 or KIB111 or KIB203)
Equivalents	KIB213, KIB221
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Every artist needs to understand their toolkit. For a successful animation career, one must be familiar and competent in the tools and the software used in the creation of animated works. In addition, it is important to understand the processes of production in which these tools are employed. Animation CG Toolkit allows you to familiarise yourself with the tools and techniques of production within a studio environment.

KNB222 Virtual Environments

Pre-requisites	KNB212 or KIB215 or KIB325
----------------	----------------------------

Equivalents	KIB226, KIB316, KIB310, KIB821
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

3D Virtual Environments are continuing to be adopted by a wide range of industries providing artists with many more creative outlets and employment opportunities. By learning how to apply their 3D skills to the development of a virtual environment, students are making themselves more versatile as future animators, designers and creative practitioners. This unit builds on the fundamental skills developed in the prerequisite unit (Real-Time 3D Computer Graphics) allowing students to develop a major work for public exhibition.

KNB311 Advanced Concepts in Computer Animation 1

Pre-requisites	(KNB221 or KIB221 or KIB213) and (KNB222 or KIB226 or KIB316 or KIB310 or KIB821)
Equivalents	KIB320, KIB312
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit consolidates your studio working practices, while supporting you to develop advanced skills and concepts in computer animation, character development, cinematic narrative and storytelling and directing. An important part of Advanced Concepts in Computer Animation is to encourage you to pitch, direct and project-manage animated works. This will bring a depth and breadth to your practice and provide you with the production management and direction skills required of an emergent animation professional.

KNB312 Contemporary Issues in the Screen Industries

Pre-requisites	KNB121 or KPB109
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Contemporary Issues in the Screen Industries recognises the diversity of screen practices in digital culture contexts; and explores theoretical and industry debates about the screen industries within the context of media

Units

globalisation. It examines screen production and consumption across a range of contemporary contexts; investigates the relationship between evolving digital technologies and existing media; and considers the effect of screen forms on the experience of visual culture.

KNB321 Advanced Concepts in Computer Animation 2

Pre-requisites	KNB311 or KIB320
Equivalents	KIB330, KIB313
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

To prepare for life outside of the academic institution, it is important to be able to showcase your work, with knowledge of the requirements of your field. As a capstone unit, Advanced Concepts in Computer Animation 2 gives you the opportunity to present yourself and your work in a portfolio and show-reel. The studio continues to develop production skills, concentrating on final output and postproduction for exhibition.

KPB101 Introduction to Film, TV and New Media Production

Equivalents	KPB150, KPB155
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1, SEM-2 Kelvin Grove - SEM-1, SEM-2

This unit introduces the principles and technologies of video production for both cinema and television. This includes the roles and responsibilities of production teams, production management, design and practice. Lecture delivery by experts in the major production areas of producing, directing, and cinematography, editing and sound informs this practice. You work in groups to produce videos which form a major part of their assessment.

KPB105 Narrative Production

Pre-requisites	KPB101
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture

- SEM-2
Kelvin Grove
- SEM-1, SEM-2

This unit builds on and advances basic understandings, skills and principles delivered in KPB101. An introduction to the skills of sound and lighting complements the earlier core skills of camera, editing, directing and production management. Assessment consists of the production of a short narrative video.

KPB109 Film, Screen and Animation Histories

Equivalents	KPB102, KIB108, KNB121
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Film, television, and animation are among the most influential forms of cultural representation and entertainment developed over the past century. An understanding of the histories and influence of narrative styles, industrial forms, and audience engagement emphasizes the important changes in technology and aesthetics that have contributed to making these media potent cultural forces. The histories of narrative forms, styles, and movements need to be considered alongside the production, distribution, and viewing of screen content as entertainment, information, and art.

KPB110 The Movie, TV and New Media Business

Equivalents	KPB106, KPB209
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The movie, TV and new media businesses are key parts of the entertainment industry, which is one of the biggest in the world. For anyone interested in working in these media an understanding of how they function as businesses is vital. This unit provides an introduction to producing, writing and theoretical aspects of the movie, TV and new media businesses.

KPB112 Film, Television and Screen Genres

Pre-requisites	KPB113. KPB113 can be studied in the same
----------------	---

	teaching period as KPB112
Equivalents	KPB103, KPB107
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Genre is an important concept for creators of film, television, and screen productions; for distributors; and for audiences. Screen genres continue to evolve in response to technological, industrial, entertainment, and cultural imperatives in the contemporary digital media environment. It is therefore important to consider similarities, differences, and connections between related screen genres.

KPB113 TV and Film Text Analysis

Equivalents	KPB108, KPB130
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Film and television production is an art-form and a business and screen practitioners, critics and educators value media literacy based on critical and informed approaches to textual analysis. Taking into account shifts in industry and audience expectations in the new media environment, textual analysis can be applied to a diverse range of popular film and television texts from blockbuster movies to cult television programs.

KPB114 Studio Approaches to Screen Projects

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The ability to research, write and conduct critical analyses are essential undergraduate skills and creative projects require the attributes of a contemporary researcher. By first familiarising students in the general skill set of academic research this unit will then apply this knowledge to specific tasks required as part of the project planning that goes into film, television and new media practices and productions.

Units

KPB115 Editing and Technical Production

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Editing and audio and vision operation for film and television requires specific technical skills. This unit provides you with an introduction to the technical dimensions supporting audio visual productions and will utilise Editing laboratories, TV Studio and Studio Control room, cameras and sound recording equipment.

KPB116 Introduction to Scriptwriting

Anti-requisites	KWP401
Equivalents	KWB102, KWB111
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1, SEM-2 Kelvin Grove - SEM-1, SEM-2

Writing scripts for a range of media formats is a learned craft and requires discipline, perseverance and an understanding of industry practice. Possessing this key knowledge will give you abilities to develop concepts through to script stage across various film, television, and new media genres.

KPB201 Experimental Production

Pre-requisites	KPB105 and KPB115
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Through exploration of the historical and theoretical underpinnings of experimental motion picture art, you have the opportunity to develop your creative potential through experimentation. Building on prior knowledge acquired in the production units KPB101 and KPB105, you are encouraged to become wilfully nonconformist in approach, drawing on a wide range of traditions from within the genre of Experimental or Avant-Garde film-making.

KPB205 Approaches to Contemporary Documentary

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The documentary filmmaking tradition has involved many crucial aesthetic, technical and ethical concerns throughout history. This unit introduces this significant tradition of documentary production. For KP25/KK34 (Film, Screen & Animation) students, the unit is a preparation for the documentary practical production unit, through learning to assimilate the principles outlined in the unit into their own documentary scripts and productions. For non-KP25/KK34 (Film & Television) students, the unit provides an opportunity to address the theoretical underpinnings of the documentary form, and the processes of documentary production.

KPB206 Global Screen Industries

Pre-requisites	KPB113
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit examines a range of national cinemas from a global perspective. Key theoretical approaches to national/transnational cinemas are covered, along with significant historical, textual, representational and ideological issues. The critical challenges posed by productions from these different cultures to Hollywood mainstream productions are also explored.

KPB207 Film and Television Scriptwriting

Equivalents	KWB105
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses on the production of a sustained script for film or television.

KPB210 Production Management for Film, TV and New Media

Pre-requisites	KPB110
Equivalents	KPB104
Credit Points	12

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit considers the role of the producer and executive producer in film and television production with a particular focus on running a production. It considers the following: preparing and running a budget, achieving balance in above-the-line, below-the-line and marketing costs, casting and crewing a production, and legal and copyright issues.

KPB211 Writing Dialogue

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Dialogue is a vital part of any script. It must fit the characters; it must advance the story; it should be interesting, colourful or funny; and it should avoid exposition. In this unit you will learn the skills for writing good dialogue for television, film and new media projects.

KPB213 Multi-Camera TV Studio Production

Pre-requisites	KPB105 and KPB115
Equivalents	KPB204
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Students seeking employment in the media production industries require knowledge, skill and experience in a wide variety of production styles, including multi-camera TV studio production. This unit builds on skills and knowledge developed in previous units and provides an understanding of the workings of multi-camera TV studio production and practical production skills as crew members.

KPB214 Single Camera TV Production

Pre-requisites	KPB201
Equivalents	KPB204
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Students seeking employment in the Film and Television industry require

Units

knowledge and experience in a wide variety of production styles, including single-camera TV production. This unit builds on skills and knowledge already developed in previous units and provides an understanding of the workings of single-camera TV production and practical production skills as crew members.

KPB302 Project Development for Film, TV and New Media

Pre-requisites	KPB114
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

A key part of the television and film industries is the large amount of time devoted to the development of projects. Substantial resources are devoted to identifying ideas, developing them, script editing and re-writing and market testing. In this unit you will go through this process as you develop a project for production.

KPB320 Advanced Production 1

Pre-requisites	Completion of 120 credit points of KPB coded units
Equivalents	KPB301
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Designed for students in their final year of study, this unit involves short film, television and new media production primarily in the communication of non-fictional events. Students work in groups and independently under supervision. It provides opportunities for students to specialise in directing, producing, cinematography, sound, vision editing, screenwriting and new media applications at an advanced level.

KPB321 Advanced Production 2

Pre-requisites	KPB320
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Designed for students in their final year of study, this unit involves short film, television and new media production primarily in the communication of fictional events. Students work in groups and

independently under supervision. It provides opportunities for students to specialise in directing, producing, cinematography, sound, vision editing, screenwriting and new media applications at an advanced level.

KPP201 Film and Media Curriculum Studies 1

Equivalents	CRP416, CLP422
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The aim of this unit is to provide you with principles and practices about (i) the nature of Media Arts Curriculum in specific discipline areas and across the curriculum (ii) how lower secondary students learn about Media Arts, and the curriculum documents that are used to support this, and (iii) how to provide quality planned experiences and supportive environments for learning.

KPP202 Film and Media Curriculum Studies 2

Pre-requisites	KPP201 or CRP416 or CLP422
Equivalents	CLP423, CRP417
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

New Media literacies are essential for successful participation in contemporary societies. In this unit you will be introduced to principles and practices related to (i) the nature of Film and Media Curriculum in specific discipline areas (ii) how senior secondary students learn about Film, Television and New Media, and the curriculum documents that are used to support this, and (iii) providing quality planned experiences and supportive environments for learning.

KPP203 Film and Media Curriculum Studies 3

Pre-requisites	KPP202 or CRP417 or CLP423. KPP202 can be enrolled in the same teaching period as KPP203
Equivalents	CLP424, CRP418
Credit Points	12

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of this unit is to provide you with principles and practices related to (i) video and media production from pre to post production and strategies for teaching media production in a school context, (ii) secondary school media production and the challenges students face, and (iii) strategies for successful group collaborative learning and project work.

KRB101 Production Practice 1

Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Production Practice 1 is an introduction to the Production Arts in a theatrical environment. This unit is taught through a combination of theoretical and practical approaches, laying the foundations for future engagement in the specialised fields of live theatre production.

KRB104 Production Practice 2

Pre-requisites	KRB101
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Production Practice 2 builds on the foundations laid in Production Practice 1, expanding on your knowledge of the Production Arts in a theatrical environment. This unit is taught through a combination of theoretical and practical approaches, further advancing your engagement in the specialised fields of live theatre production.

KRB111 Stage Management 1

Equivalents	KSB111
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces the coordination of a live theatre production including theatre layout and terminology, role of the stage manager, duties and responsibilities from pre-rehearsal to close of season, communication procedures and rehearsal room procedures.

KRB120 Scenography and the Art of Technical Theatre

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces students to theoretical concepts and principles associated with scenography, historical trends in technical theatre and the background associated with the broad vocabulary of technical theatre terminology.

KRB121 Visual Theatre

Pre-requisites	KRB120
Equivalents	KSB215
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces students to the concepts and processes associated with design for performance. It combines studio-based practical investigations, with in-depth lectures on the role of the contemporary live-performance designer, the design process, skills and techniques. This unit furthers the students exploration into scenography by applying learnt theories from prior units into a practical setting.

KRB211 Stage Management 2

Pre-requisites	KRB111
Equivalents	KSB211
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces the management issues in areas of stage mechanics, flying, props and wardrobe and preparation of students to undertake performance crew roles in these departments. It provides an introduction into stage management for Dance, Opera and Musicals.

KRB217 Production Practice 3

Pre-requisites	KRB104 and KRB211
Equivalents	KSB217
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Production Practice 3 further advances the concepts and skills presented in the Production Practice foundation units, and expands your knowledge of the Production Arts in a theatrical environment. This unit consolidates managerial and technical skills and encourages students to start exploring their own independent creative practice.

KRB218 Production Practice 4

Pre-requisites	KRB217
Equivalents	KSB218
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Production Practice 4 builds on previous units and advances student's knowledge and practice to prepare them for industry work placements in their final year of study. This unit provides ongoing support for students as they continue to develop their technical, managerial and creative practice.

KRB220 The Scenographic Divide

Pre-requisites	KRB120
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit challenges students to undertake a detailed interrogation of the tensions between the practice of traditional stage design and the theoretical concepts and principles associated with scenography.

KRB221 Intermedial Applications for the Theatre

Pre-requisites	KRB121 and KRB220
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces students to the concepts and principles associated with intermedial applications in the theatre. It is a studio-based unit comprised predominantly of ongoing practical work that students complete under the close guidance and instruction of QUT academic staff and external industry professionals.

KRB303 Advanced Technical Production Practice A

Pre-requisites	KRB218
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit exposes students to the rigours of industry-standard production processes by providing opportunities in creative, technical and/or managerial capacities with the professional workplace. Students will undertake an Industry Secondment with an established production partner/project. This unit encourages students to be pro-active in seeking opportunities for professional exposure and development.

KRB304 Advanced Technical Production Practice B

Pre-requisites	KRB218
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the second unit in the Advanced Technical Production Practice minor and exposes students to the rigours of industry-standard production processes by providing opportunities in creative, technical and/or managerial capacities with the professional workplace. Students will undertake an Industry Secondment with an established production partner/project. This unit encourages students to be pro-active in seeking opportunities for professional exposure and development.

KRB305 Production Practice 5

Pre-requisites	KRB218
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Production Practice 5 exposes you to the rigours of public performance and production processes by providing you with practical opportunities. This unit provides students senior positions in creative, technical or management capacities on QUT Creative Industries productions.

KRB306 Production Practice 6

Pre-requisites	KRB305
Credit Points	12

Units

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Production Practice 6 exposes you to the rigours of public performance and production processes by providing you with practical opportunities. This unit provides students senior positions in creative, technical or management capacities on QUT Creative Industries productions. This is the final Production Practice unit and students are expected to demonstrate a highly-developed level of specialist practice in anticipation of their entry into the professional sphere.

KSB103 Voice and Movement 1

Co-requisites	KSB107
Equivalents	KSB204
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This introductory unit begins with the fundamentals of movement and voice production for actors, focusing on instrumental skills and ensemble development.

KSB104 Voice and Movement 2

Pre-requisites	KSB103 or KSB204
Equivalents	KSB205
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit builds upon voice and movement skills acquired in KSB103, and applies them to studio performance outcomes. It provides an opportunity for students to explore how developing instrumental skills can be effectively applied into acting contexts.

KSB106 Acting Fundamentals

Anti-requisites	KKFAMJR-ACTING
Equivalents	KTB103
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Acting Fundamentals is a studio-based exploration of foundational acting principles, providing practical performance skills, including physical and

vocal awareness and expression, improvisation and scene analysis.

KSB107 Acting 1

Co-requisites	KSB103
Anti-requisites	KSB101, KSB202
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces you to the fundamentals of acting, focusing on instrumental skills, text analysis and ensemble development.

KSB108 Acting 2

Pre-requisites	KSB107 or KSB101 or KSB202
Anti-requisites	KSB102
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit further develops your knowledge, understanding and skills in the fundamentals of acting applied to different dramaturgical and staging contexts. It builds on KSB107 Acting 1, and prepares you for performing in projects for stage and screen in your second year.

KSB223 Voice and Movement 3

Pre-requisites	KSB104 or KSB205
Co-requisites	KSB229
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This second year unit continues the development of skills in movement and voice production for actors, aligning them to the needs generated by specific acting projects and the performance venues they are located in.

KSB224 Voice and Movement 4

Pre-requisites	KSB223 or KSB233
Equivalents	KSB234
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

- SEM-2

This second year unit advances movement and voice skills by applying them to more complex physical and vocal texts designed to stretch the actor's range and capability.

KSB229 Acting 3

Pre-requisites	KSB108 or KSB203
Co-requisites	KSB223
Equivalents	KSB221, KSB247
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces practical opportunities to apply your developing knowledge, understanding and skills in acting to a variety of dramaturgical and staging contexts in live theatre or film.

KSB230 Acting 4

Pre-requisites	KSB229 or KSB221 or KSB247
Equivalents	KSB222, KSB248
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides practical opportunities to extend your developing knowledge, understanding and skills in acting to a variety of dramaturgical and staging contexts in live theatre or film.

KSB301 Theatre Project 1

Pre-requisites	KSB230 or KSB222 or KSB248
Equivalents	KSB255
Credit Points	48
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides practical opportunities to extend your developing knowledge, understanding and skills in acting within a variety of dramaturgical and staging contexts in theatre or in film.

KSB302 Theatre Project 2

Pre-requisites	KSB301 or KSB255
----------------	------------------

Units

Equivalents	KSB256
Credit Points	48
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Through practical opportunities to demonstrate your knowledge, understanding and skills in acting within a variety of dramaturgical and staging contexts, this unit aims to showcase your ability to participate as an emerging artist in the theatre and film industry.

KTB101 Understanding Theatre

Equivalents	KTB251
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In this unit you will investigate the major artistic movements in European theatre history, fields of performance practice dominant in European theatre history and key plays associated with these artistic movements and practices.

KTB102 Process Drama

Equivalents	KTB214
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit examines the structural forms and dramatic conventions used in a specific genre of drama - process drama. It moves from examining effective drama workshop design to consider the artistic application of these workshop techniques.

KTB103 Performing Skills 1: Character and Scene

Equivalents	KTB257
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides you with essential understanding of how to combine practical performance skills (involving body/voice/role) with analytical, research and group skills, into an overall methodology for creating performance, within a professional ethos.

KTB104 Performance Innovation

Equivalents	KTB271
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of this unit is to give you an appreciation and understanding of innovations in the delivery and reception of theatre in both historical and contemporary contexts.

KTB105 Production 1

Pre-requisites	KTB107 or KTB206 or KTB277
Equivalents	KTB273
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces a clearly defined rehearsal ethic through extended performance project. It includes text analysis, formal group discussion, role creation and intensive rehearsal, and live performance of a scripted drama before an audience.

KTB106 Performing Skills 2: Style and Form

Equivalents	KTB258
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is designed to be of benefit to anyone seeking to extend their understanding through workshop, rehearsal, performance, and the application of dramaturgical skills, of theatrical styles and forms other than realism.

KTB107 The Creating Body

Equivalents	KTB206, KTB277
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

An understanding of innovative contemporary performance would be incomplete without an appreciation of the role that investigations into physical expressivity have played in the

development of a range of new performance forms, including Physical Theatre, and of a range of training techniques that focus on releasing the performer's physical creativity.

KTB108 Applied Theatre

Pre-requisites	KTB102 or KTB214
Equivalents	KTB209, KTB280, KTB272
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

It is important for students of performance to push beyond the walls of the designated theatre space and examine performance in a range of forms and contexts for its transformative powers and as it is applied to social action. To consider performance as it is applied within diverse communities for a range of purposes is key to a full understanding of contemporary performance in the twenty-first century.

KTB205 Production 2

Pre-requisites	KTB105
Equivalents	KTB308
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses on the collaborative devising of a performance with professional guidance.

KTB207 Staging Australia

Equivalents	KTB253
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces key concepts and practices pertaining to Australian theatre and drama of the twentieth and twenty-first centuries. Theatre practices are explored in relation to broader social and political concerns.

KTB210 Creative Industries Management

Pre-requisites	Completion of 72 credit points of study
----------------	---

Units

Equivalents	KTB061
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces management techniques within the Australian creative industries environment including company structures, cultural policy, strategic management and leadership in the arts, legal, ethical, economical and social requirements of arts, boards, and entrepreneurial activity.

KTB211 Creative Industries Events and Festivals

Pre-requisites	Completion of 72 credit points of study
Anti-requisites	KTP406
Equivalents	KTB062
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Combination of practical and theoretical investigation into how strategy and mission work in arts agencies in arts, events, promotion and public relations in Australia.

KTB212 Theatre and Community

Pre-requisites	KTB108
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Australia has a strong record of excellence in the expanding field of theatre and drama in communities. Knowledge of the ethos, values and processes of working with communities in a responsive and consultative fashion is thus an essential component of any comprehensive preparation for a career in Drama and provides major career opportunities particularly for emerging artists. This is a 2nd year unit that articulates with and builds upon previous knowledge gained in KTB102 (Process Drama) and KTB108 (Applied Theatre).

KTB213 Directing Theatre

Pre-requisites	KTB101
Equivalents	KTB306
Credit Points	12
Campus	Kelvin Grove

Availabilities	Kelvin Grove - SEM-2
----------------	--------------------------------

Directing text-based performance events, whether within a subscription season of 'traditional' theatre, or as a stand-alone event within the independent theatre sector, or within a festival context, requires highly developed creative skills and sound managerial and organisational abilities. This second year undergraduate unit examining the artistic processes and project-management responsibilities that a drama director must fulfil, is essential for students wishing to further their practice as directors, or as performance-makers within educational settings or within the creative industries. It builds on skills and perspectives acquired in units such as Performing Skills 1&2, Performance Innovation, Production 1&2, and Understanding Theatre.

KTB302 Postdramatic Theatre

Equivalents	KTB204, KTB275
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The elements of drama and the conventions of various periods have provided the pivot around which genres and forms of theatre can be studied. However, in recent decades a fresh species of drama has emerged called postdramatic theatre that challenges many of the traditional terms we use to define and make theatre. This unit examines postdramatic theatre that was heralded by the emergence of postmodernism. The unit will investigate the challenges postdramatic theatre makes to traditional notions of unitary art form, character, audience, site, time and narrative. The unit will investigate the postmodern aesthetics inherent in interdisciplinary, transdisciplinary and inter-media practices.

KTB303 Production 3

Pre-requisites	KTB205
Equivalents	KTB310
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Production 3 will provide you, as a third year student, with the opportunity to consolidate theoretical understandings and practical skills in performance making with particular application to adaptation,

interpretation and the creation of innovative performance forms.

KTB305 The Entrepreneurial Artist

Pre-requisites	Completion of 168 credit points of study
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is taken in the final semester of the Bachelor of Fine Arts (Drama) degree. The program is designed to cover a range of artistic and economic areas, including: aesthetics, creativity, regulatory, administrative, legal and ethical issues related to the practice and business of the creative industries.

KTB313 Production 4

Pre-requisites	KTB303
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

When a work that has undergone creative development moves into production, a whole new set of challenges, imperatives and creative ethos come into play. Understanding and managing this complex transition is a vital skill for the emerging collaborative ensemble. This 3rd year capstone unit prepares you for entry into the performance/education industry and/or postgraduate study by building upon skills and knowledge from KTB105 Production 1, KTB205 Production 2 and KTB303 Production 3.

KTD101 The Successful Creative Life

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP2

This unit introduces international students studying at QUTIC to the important role creativity can play in their personal and professional lives. Focussing on creative decision making you will develop your own personal creative capacities before reviewing how artists make creative decisions to produce works which engage audiences in the visual and performing arts. You will apply your knowledge of creativity to investigate how creative

Units

decisions are made by successful entrepreneurs in the modern creative economy. The ability to understand the dynamics of creativity personally, artistically and in business lies at the core of building a rich and successful creative life.

KTP201 Drama Curriculum Studies 1

Anti-requisites	KTB201, KTB414
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an introduction to key syllabus documents and to key skills and strategies of drama teaching.

KTP202 Drama Curriculum Studies 2

Pre-requisites	KTP201
Anti-requisites	KTB202, KTB415
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

In this unit, you develop planning and teaching skills for aesthetic learning and assessment and develop as a critically reflective practitioner and teacher artist.

KTP203 Drama Curriculum Studies 3

Pre-requisites	KTP202 (can be enrolled in the same teaching period)
Anti-requisites	KTB203
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the final drama curriculum unit for you as a graduating drama teacher. In this third curriculum unit you will expand on the knowledge and understandings gained from Drama Curriculum Studies 1 and 2. It provides you with the opportunity to articulate a wide range of teaching skills that are essential for interpreting and managing in a variety of arts contexts in school and industry.

KVB102 Modernism

Equivalents	KVB701
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an overview of the key concepts and movements that comprise twentieth-century modernism in the period 1900-1945. Beginning with cubism, the unit provides an understanding of terms, such as avant-garde, modernism and modernity. It explains how modernism focuses upon the issue of representation and how this approach led to inter-disciplinary work, which engaged with film, photography, design, architecture and installation as well as the traditional visual arts.

KVB103 Australian Art

Equivalents	KVB702
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit focuses on Australian art over the course of the twentieth century, including the contemporary period. It gives you an understanding of the national, cultural and social frameworks within which this art has been produced and introduces a number of artists, artistic movements and issues within Australian art. It also considers the nature of indigenous art and its contribution to the complexity of Australian cultural identity. All of these issues are presented in order to help you understand the important role of Australian art as an expression of our cultural values throughout the twentieth century.

KVB104 Photomedia and Artistic Practice

Equivalents	KVB509, KVD104, KVP402
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1, SEM-2 Kelvin Grove - SEM-1, SEM-2

This unit aims to provide you with an understanding of the aesthetic aspects of various concepts and processes that have been part of the history of photography and are still in use in contemporary photomedia. The unit also

aims to give you proficiency in alternative and experimental uses of photographic processes, establishing an understanding of investigative and creative research. By including a range of photographic processes as part of the photographic artist's repertoire, this unit aims to give you a broad range of choices and approaches to creating images. The unit encourages you to engage with photography as a medium for visual and artistic expression in order to extend your own photographic practice.

KVB108 Contemporary Asian Visual Culture

Equivalents	KVB444
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit considers the influences of historical visual arts, backgrounds, philosophical beliefs and trade on the symbolism, forms, techniques and uses of various artifacts in contemporary Asian visual art practice.

KVB109 Visual Arts Foundation

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Careers in the visual arts are diverse and dynamic and the sector encompasses a range of roles and employment possibilities for you to pursue. The skills and abilities of articulation are common to all of these potential destinations. Successful artists, art teachers and arts professionals benefit from rigorous research, writing and visual analysis skills as well as a broad knowledge of the industry as a whole. In this unit, you will be introduced to these skills in order to contextualise and maximise your learning throughout your degree. You will be actively involved in real world settings for visual arts to connect core academic skills and the professional environment.

KVB110 2D Media and Processes

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This introductory unit is a studio course enabling you to explore, construct, analyse and interpret visual data through

the 2D graphic modes of drawing, painting and printmaking.

KVB111 3D Media and Processes

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This first year unit introduces you to current contemporary art practices and concepts to assist you in making, analysing and critiquing three dimensional artworks. As a second semester unit, this unit will develop foundational skills in 3D media and processes to complement and augment understandings and knowledge of 2D media and processes.

KVB114 Digital Media

Equivalents	KIB104, KIB808
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit examines the audio-visual conventions of digital media. It focuses specifically on analysing and creating moving images.

KVB120 Studio Art Practice 1

Equivalents	KVB740
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit includes the following: development of an enquiry-based, self-sustaining art practice; fostering of appropriate research skills; encouragement of open flexible independent approach to formulating resolutions to conceptual and visual concerns; development of safe workshop practices, safe studio work habits and appropriate professional skills. It includes introductions to technological artforms.

KVB121 Studio Art Practice 2

Pre-requisites	KVB120 or KVB740
Equivalents	KVB741
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Contemporary cultural conditions and artistic practices are very diverse and complex. Consequently, this unit introduces aspects of artistic practice that will actively support self-motivation, self-reliance, as well as a sense of inquiry and openness to new ideas and experiences. It therefore comes in the first year of your course and provides foundational learning for future studio practice. As an active contributor in the cultural and creative industries, it is important that you learn to formulate personal conceptual and visual interests, as well as develop an understanding of your individual body of art work that is based on the application of knowledge of contemporary visual arts practices. It is an important concern of this unit that you understand that the media employed in visual art are not neutral but actively contribute to the form and content of work produced.

KVB200 Exhibition and Display in the Visual Arts

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit addresses the development of the Museum in Western cultures and how that tradition manifests in current arts practices, such as in contemporary exhibitions, the display of collections, installation and site-specificity, audience interaction, curatorial activities such as didactic panels and virtual galleries. This unit will assist you in displaying objects and images from your own arts practice and/or the artwork of others in effective and appropriate ways.

KVB211 Post 1945 Art

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces the historical, philosophical, economic, political, social, cultural, artistic and formal issues related to the production of art since 1945 and into the post-modern era. Major topics that are examined include the neo-avant-garde and art's engagement with consumerism. This unit is intended as a foundation skill-base for all students in Creative Industries applicable to all disciplines and cultural industries including art criticism, arts practice, architecture, landscape architecture, fashion and music.

KVB212 Australian Art, Architecture and Design

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit aims to examine the impact of modernism upon the fields of visual art, architecture and design in Australia during the period between 1917 and 1967. It will also examine debates about modernism and provide a detailed historical background to the development of these three fields in Australia in response to the idea of modernism. It will build upon the background provided in units such as KVB102 Modernism and KVB103 Australian Art by providing more in-depth analysis of modernism in the Australian context. It will also develop the practical application of such principals in design exercises.

KVB213 Graphic Investigation

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The interface between the graphic design, print and art environments is dynamic and pervasive. An awareness of contemporary practices through conceptual and hands-on cross-media investigations will allow you to interpret and engage more creatively in these environments.

KVB220 Studio Art Practice 3

Pre-requisites	KVB120 or KVB740 or KVB121 or KVB741
Equivalents	KVB742
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In consultation with studio staff, you formulate a program of work for the semester which allows you to investigate your own personal artistic direction, formulate and develop self-generated enquiry and acquire working methods, resources, skills and knowledge necessary to realise concepts.

KVB221 Studio Art Practice 4

Pre-requisites	KVB220 or KVB742
Equivalents	KVB743
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The conditions of current cultural practice, their production, reception and contribution to society are extremely diverse, increasingly complex and multi-layered. In this unit sustained critical involvement and an increasing commitment to artistic conceptual pursuits is underpinned by contemporary theoretical reference which includes investigation into a broad range of artists' practices. You are required to articulate a personal position in these issues.

KVB304 Contemporary Art Issues

Equivalents	KVB712
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is intended as a foundation skill-base for students in Creative Industries applicable to all disciplines and cultural industries including art criticism, arts practice, architecture and fashion. The unit introduces the economic, political, social, cultural, artistic and formal issues related to the production of art since 1990 in the contemporary era. By means of lectures, discussions and analysis of artworks and readings, the students' awareness of the conceptual, historical and philosophical contexts concerning artists and the artworks is heightened.

KVB306 Video Art and Culture

Equivalents	KVB703
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Existing Visual Arts units examine a broad range of subjects addressing artistic media such as painting, sculpture and installation. The 'Video Art and Culture' unit supplements these by instituting a specialised study of artistic and cultural practice that focuses on new mass media technology. The unit therefore enhances, extends and updates knowledge of recent art strategies in contemporary society.

KVB307 Theories of Spatial Culture

Equivalents	KVB704
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides the necessary critical evaluation of issues and practices that relate to considerations of space in modern and contemporary art, new media and culture in general. It provides a historical overview of key art practices that have focused their critical attention to the issue of space and the built environment. In order to function as an informed practitioner in the environment of public space you must acquire such knowledge because it will form the critical-analytical background to current debates and theories in the field of spatial culture and public art.

KVB320 Studio Project 1

Pre-requisites	KVB221 or KVB743
Equivalents	KVB744
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In consultation with studio staff students at this level are expected to undertake individual projects that lead to the development of a professional organised and articulated body of work. Substantial research is expected in support of these projects.

KVB321 Studio Project 2

Pre-requisites	KVB320 or KVB744
Equivalents	KVB745
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

In consultation with studio staff, at this level you are expected to undertake individual projects that lead to the development of a professionally organised and articulated body of work. Substantial research is expected in support of these projects.

KVD104 Photomedia and Artistic Practice

Equivalents	KVB104
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3

This unit aims to provide you with an understanding of the aesthetic aspects of various concepts and processes that have been part of the history of photography and are still in use in contemporary photomedia. The unit also aims to give you proficiency in alternative and experimental uses of photographic processes, establishing an understanding of investigative and creative research. By including a range of photographic processes as part of the photographic artist's repertoire, this unit aims to give you a broad range of choices and approaches to creating images. The unit encourages you to engage with photography as a medium for visual and artistic expression in order to extend your own photographic practice.

KVP301 Visual Arts Curriculum Studies 1

Anti-requisites	KVB301, KVB412
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The aim of this unit is to enable you to begin to design and sequence Visual Arts activities that address learning experiences for successful planning, teaching and classroom management. The skills and knowledge of this unit will assist you in creating appropriate learning outcomes and assessments as well as address syllabus requirements. The content and processes of this unit are based on your previous required studies and experiences in Visual Arts theory and practice.

KVP302 Visual Arts Curriculum Studies 2

Pre-requisites	KVP301
Anti-requisites	KVB302, KVB413
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Units

The aim of this unit is to have you establish capabilities in the design, sequencing and delivery of visual arts studies that address the learner as well as the requirements of syllabus documents. This unit will address issues of both unit and whole program structures as well as classroom management and teaching in the visual arts.

KVP303 Visual Arts Curriculum Studies 3

Pre-requisites	KVP302 (can be enrolled in the same teaching period)
Anti-requisites	KVB303
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to prepare you for the complexity of secondary visual arts teaching. With a particular emphasis on professional preparedness, this unit aims to support your development as a competent, confident, skilled curriculum developer and reflective practitioner.

KVP400 Contemporary Aesthetic Debates

Anti-requisites	KVB004
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses upon aesthetic debates that inform contemporary art practice. The unit concentrates on developing historical, critical and analytical skills in evaluating modern and contemporary critical issues in the visual arts as well as contemporary culture in general. For this reason, it examines the status of art today, asking what type of knowledge does art give us, whether it remains important today and how art is it best comprehended.

KVP402 Photomedia and Creative Practice

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides you with an understanding of conceptual, technical and aesthetic perspectives as encountered in a number of contemporary photographic genres. The unit teaches you strategies for developing and

applying advanced processes and concepts in Photomedia to the creation of your own personal work. It also encourages critical understanding of contexts that will contribute to your ability to work in a variety of creative and industry settings.

KWB104 Creative Writing: the Short Story

Equivalents	KWB350
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The unit covers the writing of the short story in detail.

KWB108 Introduction To Literary Studies

Equivalents	KWB001, KWB716
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

"The 'textualisation' of the world has been an important development in twentieth century theory in the West," (Fuery:57). What are texts? What do they mean?

This unit addresses these issues by providing you with an introduction to conceptual frameworks derived from some of the major critical discourses that have impacted on our world.

KWB109 Writing Australia

Equivalents	KWB002, KWB710
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides you with opportunities to read, explore, discuss and evaluate a number of Australian texts written and published over the last twenty-five years. Upon completing this unit, you are able to understand and critically interrogate texts pertinent to contemporary Australian society and culture.

KWB110 Writing Fundamentals

Equivalents	KKB009, KKB618
Credit Points	12
Campus	Kelvin Grove

Availabilities	Kelvin Grove - SEM-1
----------------	--------------------------------

Academic writing is an essential skill that all students need to succeed in their university degree programme, as academic writing underpins assessment tasks in all university degrees. This unit is placed in the first semester of your first year to ensure that you have the necessary writing skills to complete assessment at a high standard.

KWB112 Youth and Children's Writing

Equivalents	KWB206, KWB712
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit includes children's and adolescent novels within the cultural context of nineteenth and twentieth century Australia, England and America. It focuses on textual analysis of major generic types and considers issues such as race, gender, class and regionalism in fiction for young Australians.

KWB113 Introduction to Creative Writing

Equivalents	KWB101, KWB250
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This course develops creative, critical and analytical skills in reading and writing a variety of creative textual forms. You acquire an understanding and some practice in crafting various forms of poetry and short fiction.

KWB114 Scientific and Technical Writing

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit will provide foundational skills and concepts for written communication in scientific and technical environments. Students will be introduced to the principles of writing clearly in a science-based context, and to the discursive frameworks that inform scientific and technical writing.

KWB115 Persuasive Writing

Equivalents	KWB103, KWB315
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Persuasive writing is an integral (if often unconscious) element of both professional and creative writing. Therefore, practitioners in these fields should be able to understand the principles of persuasion, use the vocabulary of persuasion, and evaluate the efficacy of different persuasive strategies. This unit introduces you to the theory and practice of writing persuasively across a number of genres to enhance your writing skills.

KWB116 Creative Non-Fiction

Equivalents	KWB107, KWB381
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit covers the acquisition of practical and analytical skills in creative non-fiction writing in particular review writing on books, film, music, visual arts, fashion and food, as well as travel, scientific, essay, humorous and sports writing. The unit provides examples, techniques and practical exercises in non-fiction creative writing and editing, and the opportunity to develop individual work in the supportive context of in-class and small workshop groups. Potential publishing areas will be explored.

KWB207 Great Books: Creative Writing Classics

Equivalents	KWB301
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an overview of the enduring classic literary works. It will give you a better knowledge and understanding of the craft of storytelling and stimulate you to develop your own critical and creative writing as well as an understanding of yourself and others. The unit aims to make such works accessible to students from all disciplines in the university, and provides valuable

historical context and analysis of the writing craft in each case.

KWB208 Modern Times (Literature and Culture in the 20th Century)

Equivalents	KWB003, KWB321
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The twentieth century is a time of significant developments and major transformations in writing and culture. This unit focuses on a number of twentieth century writers from Europe, England, Africa, Asia, Australia the Americas, from modern to postmodern times, and explores the connections between texts, language, culture and society.

KWB209 Shakespeare, Then and Now

Equivalents	KWB004, KWB729
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is designed to introduce students to Shakespearean studies and the ongoing cultural importance of Shakespearean material.

KWB210 Imagining the Americas: Contemporary American Literature and Culture

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Imagining Americas is a literature-based unit which will explore a selection of contemporary written texts from the North and South American continents. The unit will focus on issues of place, nationality, regional and ethnic identity and will encourage an examination of these and the variety of writing styles from intercultural and international perspectives.

KWB211 Stylistics

Equivalents	KWB370,
-------------	---------

	KWB201
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit allows students to significantly advance their writing practice and associated critical and editorial skills through close analysis of language-level literary style, as opposed to story-level or narrative concerns. In creative writing advanced stylistics, students will work on unpacking, theorising and then replicating literary techniques used by a wide range of exemplary authors. This unit gives students a unique opportunity to consider and manipulate very specific aspects of their authorial voices, drawing on the field of literary stylistics, the Oulipo movement, reader response theorists, and other author-based literary theories and schools. Intensive studio-based work, self-directed creative practice, guided critical analysis and asynchronous on-line activities characterise the teaching and learning in this unit.

KWB212 Writing Poetry

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The unit covers one of the major genres in creative writing, and is designed for those who are interested in language and the use of words in precise, innovative, concentrated and musical ways. It would also be useful to lyricists. The unit provides important creative and critical skills in writing verse and cultivating an understanding and appreciation of poetry and occurs at the mid-point of the creative writing major, building on KWB211 Stylistics and preparing students for the advanced work of third year.

KWB213 Corporate Writing and Editing

Equivalents	KWB106, KWB314
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit deals with both the fundamentals of language (grammar, punctuation, style) and the dominant corporate writing genres (manuals, report, speeches, brochures).

KWB232 Creative Writing Advanced Practice 1

Equivalent s	KWB331, KWB305, KWB396
Other requisites	Students undertaking the Advanced Writing Practice Minor must have a GPA of 5 or above at the end of semester 3. Students undertaking the Creative Writing and Literary Studies Research Minor must have a GPA of 5.5 or above at the end of semester 3
Assumed Knowledge	null
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the first in a series of three advanced practice units in creative writing. These units allow students to significantly advance their writing practice and associated critical and editorial skills. In creative writing advanced practice 1 students will work on a sustained work of fiction in the genre/s of their choice including poetry, short fiction, long-form fiction (e.g.: elements of a novel length work) and non-fiction with a specific emphasis on conceptualising, planning and beginning sustained pieces. With the ability to articulate into the other advanced practice units, this unit gives students a unique opportunity to work on a sustained piece of fiction for up to a year and a half. Intensive studio-based work, professionally-conducted mentorship opportunities, self-directed creative practice and critical peer evaluation characterise the teaching and learning in this unit.

KWB302 Novel and Genre

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is a key advanced Creative Writing unit in the Advanced Writing Practice package. This unit enables you to develop a sustained and coherent piece of work, and develop the analytical, practical and professional skills needed to work within this unique form. The focus is on the longer narrative form and across various genres. The unit is also designed to enable you to begin to develop a critical understanding of your own and others approaches to the writing life. This

unit includes face-to-face and electronic learning environments designed to facilitate the development of professional reading, editing and writing skills.

KWB303 Writing and Publishing Industry

Equivalents	KWB399
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an introduction to the function and structure of the writing and publishing industry.

KWB306 Creative Writing Project 1

Equivalents	KWB205, KWB395
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides the opportunity for you to write a sustained piece of creative work, within the genre of your choice, including short fiction, poetry, creative non-fiction and hypertext, under supervision. Such work will be written to a standard commensurate with being suitable to submit for publication to print or electronic journals. Your final submission is written after familiarisation with industry demands, niches and marketing possibilities.

KWB308 Wonderlands: Literature and Culture in the 19th Century

Equivalents	KWB005, KWB724
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit considers important contemporary cultural and social questions by way of readings in science fiction, fantasy fiction and fiction, class ideologies and revolutionary politics from a selection of novels and poetry of the nineteenth century. The novels and poems examine political and social change in Europe between 1790 and 1900, with a view to making critical links between current ideologies and literary forms and their formulation in a nineteenth century text. As such, works

ranging from Frankenstein to Alice in Wonderland are deployed to consider the textual representations of important cultural, social, and sexual issues.

KWB310 Editing and Developing the Manuscript

Equivalents	KWB301, KWB304
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit develops your understanding of the editing process - in particular, the developmental intervention required to bring a creative manuscript to a publishable standard. These skills are crucial to those of you intending to work in the publishing industry, and of great benefit to professional creative writers. You will receive the opportunity to learn to edit the work of others with insight, understanding and technical skill.

KWB311 Popular Fictions, Popular Culture

Equivalents	KWB006, KWB309, KWB725
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The unit is designed to provide you with skills in understanding popular culture/s. It addresses the production of popular culture via a range of texts and mediums, and provides you with a framework by which they can critique the operations of popular cultures.

KWB313 Novel and Memoir

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit allows students to significantly advance their writing practice and associated critical and editorial skills through close analysis of the novel and memoir, with an emphasis on story-level and narrative concerns. In Novel and Memoir, students will engage in detailed analysis from a writer's point of view of how a novel is made - the problem-solving process, which includes overall and chapter structure, character development, and other key narrative

elements. This unit also gives students a unique opportunity to consider the synergies and differences between writing novels and longer forms of life writing, with extended analysis of the conventions of memoir writing. Lectures, intensive workshop activities, self-directed creative practice, guided critical analysis, and on-line collaboration characterise the teaching and learning in this unit.

KWB332 Creative Writing Advanced Practice 2

Pre-requisites	KWB331 or KWB232
Equivalents	KWB305, KWB396
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is the second in a series of three advanced practice units in creative writing. These units allow students to significantly advance their writing practice and associated critical and editorial skills. In creative writing advanced practice 2 students will work on an already-conceived, sustained work of fiction in the genre/s of their choice including poetry, short fiction, long-form fiction (eg: elements of a novel length work) and non-fiction with a specific emphasis on developing, structuring and modulating sustained pieces. With the ability to articulate into and out of the other advanced practice units, this unit gives students a unique opportunity to work on a sustained piece of fiction for up to a year and a half. Intensive studio-based work, professionally-conducted mentorship opportunities, self-directed creative practice and critical peer evaluation characterise the teaching and learning in this unit.

KWB333 Creative Writing Advanced Practice 3

Pre-requisites	KWB332
Equivalents	KWB305, KWB396
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is the third in a series of three advanced practice units in creative writing. These units allow students to significantly advance their writing practice and associated critical and editorial skills. In this unit, students will work on an

already-commenced, sustained work of fiction in the genre/s of their choice including poetry, short fiction, long-form fiction (eg: elements of a novel length work) and non-fiction with a specific emphasis on structural editing, redrafting, concluding and marketing sustained pieces – including contemporary writing and publishing industry issues. With the ability to articulate out of the other advanced practice units, this unit gives students a unique opportunity to work on a sustained piece of fiction for up to a year and a half. Intensive studio-based work, professionally-conducted mentorship opportunities, self-directed creative practice and critical peer evaluation characterise the teaching and learning in this unit.

KWP415 Theory and Practice in Creative Writing and Literary Studies

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is specifically designed for those students doing Honours in either Creative Writing or Literary Studies. It aims to acquaint you with theories relevant to your selected research project(s) and help you develop practical, professional, critical and analytical skills relevant to these.

KWP420 Transmedia Storytelling: From Interviewing to Multi-Platform

Equivalents	KKP403
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Advanced level research and creative practice in the Creative Industries frequently draws upon the expertise of leading national and international researchers who visit the Creative Industries Faculty, as well as innovative creative projects. Through a Special Topic unit, Masters, PhD and Professional Doctorate students at the postgraduate level can systematically engage with these initiatives through a structured program of attendance at key events, reading and investigation, and working in creative teams to develop project deliverables.

KXB101 Introduction to Entertainment

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

The entertainment economy is projected to generate \$2.15 trillion globally, \$632 billion in the USA and \$22.6 billion in Australia by the end of 2017 (PWC, 2013). The major sub-industries of the entertainment economy include motion pictures, television, music, theme and amusement parks, video games, sports, theatre, casinos, books and cruise shipping. In KXB101 Introduction to Entertainment you will learn about the nature of entertainment and how the entertainment economy operates. This unit will focus on understanding entertainment content, audiences, and producing.

KXB102 Global Entertainment

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

Entertainment and entertainment industries are a global phenomenon. In this unit you will learn about the trends and issues that are shaping entertainment around the globe. In addition, it is important to understand the important genres of entertainment such as television, theme parks, sport as entertainment, cruise shipping, gaming and music and how they are influenced by different cultures around the world.

KXB201 Entertainment Practice: Balancing Creativity and Business

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In order to work in the entertainment industries you need to understand how creativity and business can work together to complement each other. Successful entertainment industry professionals know how creative processes and projects work, as well as how businesses

Units

work; they combine and balance the two to produce effective entertainment. This unit aims to equip you with this ability to combine understandings of entertainment industries and business in the context of the entertainment industries. In practical terms, this unit aims to provide you with an understanding of the different stages of the entrepreneurial process in the particular context of the Entertainment Industries.

KXB202 Project Management for Entertainment

Pre-requisites	Completion of 72 credit points of study
Anti-requisites	MGB335, MGX335
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of this unit is to provide you with the skills to oversee the production of an entertainment project by providing you with a mid-course level understanding of, and ability to employ, project management skills for entertainment.

KXB301 Entertainment Industries Map

Pre-requisites	KXB101 and (36 credit points from AMB200, AMB207, BSB126, KPB101, KPB116, KXB102, KXB201, LWS008 and LWS009)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Industry networks are of key importance in Entertainment. In this unit you will extend and apply your critical knowledge of entertainment industries to the 'real-world' task of creating and updating an online directory of entertainment industries. The online directory will be a public product.

KXB302 Entertainment Project 1: Preproduction

Pre-requisites	KXB101 and KXB102 and KXB201 and KXB202
Credit Points	12

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The aim of this unit is to enable you to take responsibility at an advanced level as part of a group for the delivery of a real world entertainment project. The advanced experience and skills gained from this project build upon the skills and knowledges developed in your course, and are designed to contribute towards your increased confidence as a professional producer in the Entertainment Industries.

KXB303 Entertainment Project 2: Production

Pre-requisites	KXB302
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of this unit is to enable you to take responsibility at an advanced level as part of a group for the delivery of a real world entertainment project. The advanced experience and skills gained from this project build upon the skills and knowledge developed in your course, and are designed to contribute towards your increased confidence as a professional producer in the Entertainment Industries.

KXP406 Creative Industries: Events and Festivals

Anti-requisites	KT211
Equivalents	KTP406
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Combination of a practical and theoretical investigation into how strategy and mission work in arts agencies in arts, events, promotion and public relations in Australia.

KXP408 Marketing Arts and Culture

Equivalents	GSN228, KKP408, KTP408
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit examines and applies theories

of arts marketing for arts cultural organisations. The focus is on audience development, but product and service development models in the mission driven arts environment provide the context for you to develop marketing strategies, marketing plans and campaigns for arts and cultural management.

KXP409 Arts and Cultural Management

Equivalents	GSN227, KTP409
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides students of arts and cultural management with an investigation and analysis of the management function of the not-for-profit arts organisation. It examines the strategic management approaches and operational procedures of arts organisations, including their relationships with the legal system, the media, business, the public, and the industrial provisions and human resources of the organisation.

KXP411 Advanced Practice in Creative Production and Arts Management

Pre-requisites	KK86MJR-CPARTMG - Creative Production and Arts Management Major
Equivalents	KTP411
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The growth of arts festivals and cultural centres across Australia and internationally is driving a demand for new and appealing arts programs. To meet this demand, cultural producers require a comprehensive suite of skills including creative entrepreneurship, programming, commissioning, management and leadership.

KXP413 Managing Money in the Arts

Equivalents	GSN225, KKP402, KTP413
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Units

Arts managers, event managers and creative producers play a critical role in taking great ideas to market. In this unit, you will examine the entrepreneurial strategies arts leaders use to implement their ideas in the current policy and economic climate. You will consider the role of corporate development, fundraising, grants, sponsorship and philanthropy.

KXP414 Arts and Cultural Policy

Equivalents	KCP018, KCP401, KKP404, KTP414
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In this unit, you will consider arts and creative industries policy initiatives in Australia, at Federal, state and local government levels, and internationally. You will examine the way in which policy impacts on the work of creative producers, arts managers, and members of arts boards, and the role the arts manager plays in issues of governance, planning, advocacy, and accountability.

LCB001 Assessment 2: Using Data to Inform Teaching

Equivalents	LCB337
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - 6TP4 Kelvin Grove - 6TP4

This unit further develops your knowledge, skills and application for using assessment data to make informed decisions about teaching. The unit focuses on ensuring graduating students have the necessary statistical skills to analyse and interpret high-stakes assessment data. The unit partially draws on previous units in the socio-cultural, assessment and pedagogical areas.

LCB002 Child and Adolescent Development and Learning

Equivalents	EDB002
Credit Points	12
Campus	Caboolture and Kelvin Grove

Availabilities

Caboolture
- SEM-1
Kelvin Grove
- SEM-1

This unit develops your knowledge of child development and learning. It is aimed at developing an understanding of both in relation to the Primary and Secondary school contexts. This unit links the theoretical base of child development and learning to the practical application of both to teaching. This unit requires you to participate in all the related topics and to support your fellow students in presenting these topics for assessment and discussion. This subject will serve as a basis for future work in EDB170 Creating Positive Learning Environments.

LCB003 Education and Society 1

Equivalents	EDB001
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

Education and Society 1 begins the process of introducing students to the complex relationship between our education system, and the social and cultural contexts from which it emerges. Students will use socio-cultural theory to better understand those they will come to teach, as well as how their pupils' diverse backgrounds shape their experiences with the modern school often in very different ways. This introductory unit challenges students in the early stages of their course to develop a sound fundamental knowledge of such factors as socio-economic circumstances, gender and ethnicity, contemporary culture, and social governance, and their various impacts upon education, so that they may respond to these issues in an informed, ethical and professional manner.

LCB004 Culture Studies 2: Indigenous Education (English as an Additional Language/Dialect)

Pre-requisites	EDB171
Credit Points	12
Campus	Caboolture, Kelvin Grove and External
Availabilities	Caboolture - SEM-2 Kelvin Grove

- SEM-2
External
- SEM-2

This unit further develops your knowledge, skills and application for addressing the needs of learners who are from Aboriginal and Torres Strait Islander backgrounds, and learners from other culturally and linguistically diverse backgrounds. The unit focuses on practical application of key principles of teaching and learning, curriculum design and assessment. It links to the work previously undertaken in EDB171 - Culture Studies 1 -and will allow you to demonstrate two Course Learning Outcomes at the Achieved level.

LCB005 Inclusive Education

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This unit further develops your knowledge, skills and application for designing and implementing inclusive learning environments. The unit focuses on curriculum planning for the wide range of learners in classrooms including those with disabilities, gifts and talents, diverse linguistic needs and diverse cultural backgrounds.

LCB006 Inclusive Education: Service Learning

Equivalents	EDB004
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit aims to develop students' understanding and appreciation of the contributions that diversity, belonging and trust make towards a quality learning environment for all learners. Students will learn to engage in teaching a broad range of students in diverse and inclusive ways utilising pedagogies and curriculum practices that enhance learning for all students and generate inclusive cultures within the school and classroom settings. Desired outcomes are achieved through descriptive, interpretative, analytic and expressive processes to share learning with fellow students and staff.

LCB320 Studies in Language

Equivalents	CLB320
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit addresses the following topics: the language basis in current approaches to the teaching of English; nature and function of language; the dynamics involved in classroom interaction; the educational implications of linguistic diversity within the community; sociocultural variables, including gender and class, and their impact on language use; an introduction to traditional and functional grammar.

LCB322 Literature in Secondary Teaching

Equivalents	CLB322
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit covers the following topics: literature teaching in historical perspective; recent developments in theory; poetry in the senior school; teaching drama in the senior school; teaching the novel in the senior school; shorter works (novellas, short stories) and their use in the English curriculum.

LCB323 Teaching Adolescent Literature

Equivalents	CLB323
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit addresses the following topics: scope and nature of young adult literature; strategies for evaluation and selection; recent research into adolescents' reading needs, interests and responses; using young adult books in the curriculum.

LCB325 Gender and Sexuality Issues for Teachers

Equivalents	CLB403
Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit addresses the following topics: gender and sexualities in cultural and school contexts; historical overview of gender relations; theoretical frameworks for gender and current debates in Australia about gender and equity; femininity and masculinity as social constructs; sexuality and the body; violence and gender; debates about boys' behaviour and performance in Australian schools.

LCB326 Children's Literature

Equivalents	CLB441
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides students with the opportunity to extend their knowledge of children's literature written by both Australian and overseas writers. It examines traditional and emerging genres, develops critical approaches to texts, and considers ways of using children's literature in the classroom.

LCB327 The Global Teacher

Equivalents	CLB049
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit enhances the skills of educators to design curriculum and pedagogy in ways that address global citizenship and educational and human rights.

LCB329 Movies and Popular Culture

Equivalents	CLB050
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit aims to equip students with an understanding of key concepts in socio-cultural theory and to increase their knowledge of the corpus of fictional film and television narrative. It also aims to provide students with the tools to critically analyse the way in which fictional film and television as cultural products, both perpetuate and help to shape ways of thinking and acting in the social and physical world and in institutions such as schools.

LCB330 Teaching Students with Learning Difficulties

Equivalents	SPB004
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit integrates an understanding of learning difficulties and learning support for education settings. A child experiencing delays in learning and requiring additional educational provisions can be identified as having a learning difficulty, learning disability, a specific learning disability, special educational needs or as a student with diverse learning needs depending upon the country or state the child is situated in. These learning difficulties can cause difficulties in reading, writing, spelling, and maths. For many individuals with a specific learning disability, these problems in learning cannot be explained by low intellectual ability or by a person's lack of education, or visual or hearing impairments. Each individual experiencing a learning disability is unique and will present with varying degrees of difficulty.

LCB331 Educational Counselling

Equivalents	SPB006
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2 (Block)

This unit includes the following: the nature of counselling/helping in educational contexts; the educator as counsellor; characteristics of effective helpers; practical development of communications skills; building an empathic relationship; structuring the counselling process; application of some counselling theories to the educational contexts; practical sessions using educationally based role plays to demonstrate effective use of the skills learned. The unit includes a compulsory study school for external students. It is incompatible with studies in Counselling or equivalent at Diploma of Teaching level.

LCB333 Classroom and Behaviour Management

Equivalents	SPB012
Credit Points	12
Campus	Kelvin Grove and

Units

	External
Availabilities	Kelvin Grove - SEM-1
	External - 6TP4, SEM-1

This unit integrates concepts of behaviour development, management and discipline within a defensible pattern of classroom management and appropriate curricula processes.

LCB334 Teaching Strategies

Equivalents	SPB018
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit includes: evaluation of the students' teaching strategies; the literature on teaching strategies; critical evaluation of strategies/models of teaching available.

LCB336 Middle Years Curriculum, Pedagogy and Assessment

Equivalents	SPB022
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This unit introduces pre-service primary students to the emerging curriculum, pedagogy and assessment approaches within Junior Secondary contexts. It explores the alignment between the established middle years literature and Junior Secondary in a Queensland context. This unit establishes an understanding of various Junior Secondary students experiences of schooling and how teachers can respond to this range of learning needs through curriculum, pedagogy and assessment.

LCB337 Assessment: Using Educational Data

Equivalents	SPB036
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - 6TP4 Kelvin Grove - 6TP4

Monitoring individual and group development and designing appropriate intervention programs/units to meet individual needs is the work of all teachers. Thus, the unit provides opportunities for the educator to devise ways to monitor student and group development and to engage with current international, national and state developments that require systemic evaluation of all key learning areas.

LCB338 Understanding Reading Difficulties

Equivalents	SPB038
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The aims of this unit are to provide pre-service teachers (Prep to Year 12) with opportunities to deepen their knowledge of the reading process and to develop their skills in identifying and supporting struggling readers in an inclusive setting. An emphasis will be placed on classroom-based assessment practices and explicit evidence-based instructional practices that can be incorporated into rich literacy activities.

LCB344 Differentiation for Gifted Children

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops your knowledge about gifted students and their education, and skills for identifying, planning and implementing a challenging, appropriate and inclusive curriculum and learning environment. The unit focuses on the diversity of learners who are gifted, their unique characteristics and needs, and curriculum planning to meet their needs and support students to reach their full potential.

LCB902 English as a Second Language Curriculum Studies 3

Pre-requisites	LCB901 or CLB022
Equivalents	CLB023
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces the theoretical and

practical knowledge and skills required by an effective practitioner in the complex social environment of the classroom.

LCB905 LOTE Curriculum Studies 3

Pre-requisites	LCB904 or CLB037
Equivalents	CLB038
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit builds on the two previous units and explores in greater depth a range of practical and theoretical issues in the area of LOTE curriculum development and implementation.

LCN600 Connected Learning

Equivalents	CLN601
Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit introduces the principles and practices of connected learning, a contemporary pedagogical approach that connects people, learning technologies and information (Ito et al 2013). It promotes connected learning in a variety of formal and informal learning contexts, including: school libraries; public and academic libraries; schools and universities; workplace and community. As members of the unit's connected learning community, you will experience the socially situated, production-centered and interest-driven nature of connected learning. You will explore and learn to use a range of social media to create, curate and share your learning. You will undertake virtual team and individual connected learning design projects. The products are directly applicable to your professional practice as educators.

LCN601 Designing Spaces for Learning

Equivalents	CLN603
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit develops a theoretically-based, participatory, problem-solving approach to

learning space design that responds to the voices, values, attributes and needs of particular learning communities and includes all stakeholders. The web-based design portfolio that you create through this unit will be relevant to professional educational and design practice.

LCN604 Second Language Curriculum Design

Equivalents	CLN613
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit introduces the factors that influence teachers in the development of language programs. It includes analysis of the following areas: learner profiles and needs; aims and objectives; processes and criteria for selecting methodology; content selection and sequencing; choice and evaluation of materials and resources and processes involved in developing courses.

LCN606 Second Language Assessment

Equivalents	CLN616
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit introduces the theories and practices in second language assessment. It examines and evaluates both classroom based assessment tasks and standardised tests used to assess the proficiency of second language speakers.

LCN612 Sociolinguistics

Equivalents	CLN640
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit is an introduction to sociolinguistics, that is, understandings of language use in relation to social factors.

The topics covered emphasise the ways that language use is differentiated and dynamic across social groups and the implications for TESOL and second language teaching and learning. Topics include languages and dialects, pidgins and creoles, speech communities, and language policy and planning.

LCN614 Grammar for Second Language Teaching

Equivalents	CLN642
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit assists language teachers develop a better understanding of grammar and its place in the teaching and learning of a second language. Participants will develop their own language awareness and explore a range of strategies and techniques for the effective integration of grammar instruction into language programs.

LCN615 Learning Hubs

Equivalents	CLN646
Credit Points	12
Campus	External
Availabilities	External - SEM-1

The unit provides a research based, theoretical and practical context for exploring organisational, pedagogical, technological and professional dimensions of school libraries and other information services for prospective teacher-librarians information professionals and other educators.

LCN616 Inquiry Learning

Equivalents	CLN650
Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit supports the critical, ethical and creative engagement of teacher-librarians, educators and information professionals with a diverse array of information, concepts, technologies, social networks, resources and practices pertinent to contemporary information-learning environments. The unit develops conceptual and strategic approaches to

enable independent and connected learning via libraries and other information-rich learning sites.

LCN617 Children's Literature: Criticism and Practice

Equivalents	CLN659
Credit Points	12
Campus	External
Availabilities	External - SEM-1

School libraries and classrooms are spaces where multi-literacies and multi-modal textualities are constant and ever-increasing presences in the daily and educational lives of students and staff. This unit provides teachers and teacher-librarians with a range of tools, strategies, and approaches for the critical analysis of children's literature, which in turn will enable them to communicate critically with students and stakeholders in classrooms and libraries.

LCN618 Advanced Educational Counselling

Pre-requisites	LCN636 or SPN651
Equivalents	SPN610
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2 (Block)

This unit provides you with an overview of major theories of counselling and assist in the development of a framework using one of these approaches that may be used as a basis for your own counselling.

LCN619 Educational Guidance and Counselling: Professional Practice

Pre-requisites	(LCN636 or SPN651) and (LCN620 or SPN612). LCN620 can be studied in the same teaching period as LCN619
Equivalent s	SPN611
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2 (Block)

This unit looks at: professional practices of educational counsellors working in the P-12 context; intervention, prevention,

Units

affective, and developmental programs; adolescent issues and career counselling; consultation models, theories and practices; self-management skills, time management, program evaluation, accountability and decision-making discussed.

LCN620 Psychoeducational Assessment

Equivalents	SPN612
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1 (Block)

In this unit students gain a broad understanding of the various types of assessment techniques and strategies used in the educational context to develop understandings and capacities that advance learners from basic competence in professional practice to confident and ethical leadership in learning innovation in school guidance and counselling.

LCN621 Career Development and Professional Practice

Equivalents	SPN618
Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit encourages learners to engage in lifelong learning and within the context of career development practice, lead innovations in the delivery of career development programs to a wide range of audience throughout the community.

LCN622 Career Counselling

Pre-requisites	(LCN636 or SPN651) or (LCN618 or SPN610)
Equivalents	SPN620
Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit encourages learners to critically evaluate the perspectives to formulate a personal position with respect to their career counselling practice. Students have the opportunity to gain experience in the application of traditional and emerging career counselling processes, and to contribute to innovation in supporting the

role of career counselling in a new career guidance context of career self-management.

LCN623 Leadership Concepts, Theories and Issues

Equivalents	SPN625
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

The overall aim of this unit is to enhance the leadership understanding and capabilities for both current leaders and those aspiring to such positions in organisations today and in the future. This aim is set in a broader understanding of notions of shared and multiple leadership concepts.

LCN624 Leading and Managing People

Equivalents	SPN626
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit enhances the understandings and capabilities of leaders and aspiring leaders to manage their organisation's human resources in rapidly changing and challenging contexts.

LCN625 Developmental and Educational Assessment

Equivalents	SPN640
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides students with an opportunity for foundation study of principles and methods for assessing individual development and personal characteristics. Underlying this unit is the assumption that the purpose of assessment is to collect information that will be used to design interventions.

LCN626 Interventions in Educational and Developmental Psychology

Equivalents	SPN641
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit aims to equip students with a range of applied strategies for evidence-based prevention and intervention within educational and developmental contexts. Practical skills need to be founded on a deep conceptual understanding of the links between assessment and intervention.

LCN627 Learning Difficulties: Assessment and Intervention

Pre-requisites	LCN625 or SPN640
Equivalents	SPN642
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of the unit is to provide students with a sound knowledge of learning processes, and methods for assessing individuals with learning difficulties. It also introduces students to a variety of appropriate interventions for individuals with learning difficulties and associated impairments.

LCN628 Developmental Processes and Disability

Equivalents	SPN643
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit aims to equip students with a sound framework on which to base their professional practice. Working effectively with individuals with a range of disabilities, their families, schools and communities requires knowledge about the ways in which development may be compromised by disability, and the ways in which contextual influences contribute to developmental outcomes.

LCN629 Inclusive Education: Theory, Policy and Practice

Equivalents	SPN644
Credit Points	12

Units

Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

Schools are a reflection of diversity within global and local education communities. An inclusive approach to education involves a critique of social values, priorities and the structures and institutions which they support. It involves the politics of recognition and is concerned with the serious issue of who is included and who is excluded within education and society generally.

LCN630 Leadership, Policy and Change in Action

Anti-requisites	SPN627, SPN628
Equivalents	SPN645
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

The unit presents the theories and processes of educational change; organizational cultures and values and their influence on change; policy processes (development, implementation and evaluation); policy trends and change in educational contexts. The content around these topics will add to your understanding of the dynamics between leadership, culture and change, and the challenges for leaders. You will develop skills to make sense of and constructively respond to policies within organisational contexts.

LCN631 Strategic Management

Anti-requisites	SPN637
Equivalents	SPN646
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

Since 2000, there have been increasing demands from statutory bodies and other stakeholders for all organizations, whether schools, educational institutions, voluntary organizations, businesses or government departments, to be effective, efficient and transparently responsible. This unit will take a complex systems

view using general systems theory, chaos theory and synergistics to analyse the processes educational organisations and other organisational settings use to maintain their strategic intent and to harness both continuous and discontinuous innovation.

LCN632 Understanding Reading and Writing Difficulties

Anti-requisites	SPN614
Equivalents	SPN647
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

While the understanding and application of learning theory is essential to the teaching of all students, there will always be some for whom specialised approaches are required in order to maximise their potential. Accordingly, it is vitally important for teachers to develop their knowledge and skills so that they can meet the needs of diverse literacy learners in a flexible, problem-solving manner using evidence-based approaches to instruction.

LCN633 School Guidance and Counselling Practicum

Pre-requisites	(LCN636 or SPN651) and (LCN619 or SPN611). LCN619 and LCN636 can be studied in the same teaching period as LCN633
Equivalents	SPN648
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	External - SEM-1, SEM-2

As well as developing a sound knowledge base, studying school guidance and counselling needs you to develop the skills to apply this knowledge in the practical setting of a school. In the Practicum, you will be given the opportunity to observe, participate in and critically evaluate a range of practice activities.

LCN634 Supporting Students with Social, Emotional and Behavioural Needs

Equivalents	SPN649
Credit Points	12
Campus	External
Availabilities	External - SEM-2

Teachers' concerns about classroom management are intensified by the inclusion of students with additional needs. Behaviours associated with low engagement, learning difficulties, attention and activity disorders, autism spectrum disorders, and moderate to severe disabilities present major challenges for classroom teachers. Accordingly, sound knowledge of effective classroom management practices and the ability to work collaboratively with support personnel to plan and provide appropriate behaviour management programs are essential.

LCN635 Supporting Students with an Autism Spectrum Disorder

Equivalents	SPN650
Credit Points	12
Campus	External
Availabilities	External - SEM-1

The aims of this unit are to assist you as classroom and specialist teachers, school counsellors and guidance officers to deepen your knowledge in the area of Autism Spectrum Disorders and to develop your skills in identifying and supporting this group of students in an inclusive educational setting.

LCN636 Introductory Educational Counselling

Equivalents	SPN651
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1 (Block), SEM-1, SEM-2 (Block)

Perhaps the most potent message that can be extracted from many branches of applied psychology is that people of all ages yearn to be personally effective. Be they classroom teachers with discipline problems, failing students, or those who are dissatisfied in their work situation - unhappy people are seeking to satisfy unfulfilled hopes and aspirations. More

Units

importantly, perhaps, they seek happiness and a sense of being able to direct their own destinies. This unit focuses on issues and topics implicit in the above.

LCN637 Career Development: Policy and Process Context

Equivalents	SPN654
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	External - SEM-1, SEM-2

This unit introduces students to the broad areas of career development policy, career counselling, and career development programs. It is based on Component 3 of the Australian Career Development Studies (reproduced and modified with the approval of the Federal Department of Education Employment and Workplace Relations).

LCN638 Theory and Practice of Second Language Teaching and Learning

Anti-requisites	CLN608, CLN612
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit focuses on the theory and practice of second language teaching and learning. It introduces you to foundational concepts and second language teaching approaches, methods and techniques. It links to work undertaken in LCN612 Sociolinguistics; LCN606 Second Language Assessment; LCN604 Second Language Curriculum Design; and LCN614 Grammar for second language teaching.

LCN639 Youth, Popular Culture, and Texts

Equivalents	CLN647, CRN600
Credit Points	12
Campus	External
Availabilities	External - SEM-2

In the diverse terrain of popular culture, youth find the resources and means for identity formation, social relations and

pleasure, and develop a range of knowledge, skills, values and attitudes. Educators need to understand the ways popular cultural texts (literary, mass media, computer-based and digital) form the cultural capital of youth and give meaning to their lived experiences.

LCN650 Education and Society

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

Education and Society introduces students to the complex relationship between our education system, and the social and cultural milieu from which it emerges. Students will use evidence-informed socio-cultural theory to better understand those they will come to teach, as well as how their pupils' diverse backgrounds shape their experiences with the modern school, often in very different ways. The unit challenges students at the commencement of their course to develop a sound knowledge of factors impacting on education such as socio-economic conditions, gender and ethnicity, contemporary culture, and social governance, as well as of socially-just responses to these circumstances such as those centring on equity, inclusion and ethical practice. The knowledge and understanding developed in the unit will assist students to respond to these issues and endeavours in an informed, ethical and professional manner.

LCN651 Mini Action Research Project: ESL and Inclusion

Pre-requisites	CRN654 and EDN672
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit further develops your knowledge, understandings and practice of research. It links to the units EDN672 Teachers as Researchers and CRN654 Practitioner Enquiry and provides you with the experience of conducting a small scale action research project for the purpose of informing and improving your teaching. The project will be directed at the issues of English as a Second Language (ESL) and inclusion that are increasingly characterising our

classrooms.

LCP410 Classroom and Behaviour Management

Equivalents	SPP400
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit investigates a range of classroom management strategies, including preventative, supportive and corrective approaches, that are aimed at developing collaborative and inclusive learning environments in a range of educational settings.

LCP414 Enhancing Your Teaching Practice

Equivalents	SPP403
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

In this unit, you will gain knowledge and understanding of theoretical and practical pedagogic frameworks that can be applied to your classroom practices. As such, this unit will assist you to develop the knowledge and skills necessary to become effective classroom practitioners.

LLB101 Introduction to Law

Equivalents	LWB145
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

Introduction to Law introduces students to the development of the Australian legal system. This includes a focus on the major sources of law in Australia and the institutions that create, interpret and administer the law.

LLB102 Torts

Pre-requisites	LLB101. LLB101 can be studied in the same teaching period as LLB102
Equivalents	LWB148

Units

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

Torts law is the law of civil wrongs and has developed to provide a private remedy for those who suffer loss due to the acts or omissions of another.

LLB103 Dispute Resolution

Anti-requisites	LWB150, LWB498
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Dispute Resolution is an umbrella term that represents a number of processes used to resolve conflict and disputes. This unit introduces students to the spectrum of dispute resolution forums commonly used in legal practice and the role of lawyers within those forums.

LLB104 Contemporary Law and Justice

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Contemporary Law and Justice provides an overview of the operation of the rule of law and the philosophical, cultural, social, economic and global contexts in which the Australian legal system operates. The unit also considers the role of lawyers in a dynamic and changing world. This unit gives emphasis to the impact of the Australian legal system on Australia's first peoples and introduces students to Aboriginal and Torres Strait Islander legal knowledges and perspectives of law.

LLB105 Legal Problems and Communication

Pre-requisites	LLB101
Anti-requisites	LWB146
Credit Points	12
Campus	Gardens Point and External

Availabilities	Gardens Point - SEM-2, SUM (Block) External - SEM-2, SUM
----------------	---

Legal Problems and Communication continues the development of legal problem-solving, and written and oral communication skills in a variety of professional contexts.

LLB106 Criminal Law

Pre-requisites	LLB101 or LWB145
Equivalents	LWB239, LWB238
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Criminal Law provides knowledge of the doctrines of criminal law and procedure, with a focus on offences against the person and property. Defences, excuses and fundamental elements of criminal responsibility and complicity are also covered.

LLB140 Human Rights Law

Pre-requisites	LLB101. LLB101 can be studied in the same teaching period in LLB140
Anti-requisites	LWB496
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Human Rights Law focuses on the theory and practice of international human rights law. In particular, it provides an overview of the history and origins of human rights and international rights and obligations while remaining grounded in the contemporary events and challenges to the protection of human rights.

LLB141 Introduction to International Law

Pre-requisites	LLB101. LLB101 can be studied in the same teaching period as LLB141
Anti-requisites	LWB142, LWB144
Credit Points	12

Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

There are many ways in which the law operates in an international context. Issues of global concern such as climate change, terrorism and economic development require cooperation between nations through agreements and treaties. The increased internationalisation of communication, financial interests and business transactions means that individuals and companies are increasingly required to engage with the laws of other countries and that domestic legal systems must operate in an international context.

LLB142 Regulation of Business

Pre-requisites	LLB101 or LWB145
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This elective unit commences the process in educating legal students in matters of business and commercial law. It is intended to provide an overview of a number of critical areas in the study of business law. Further, this subject will provide theoretical and critical analysis skills for the students through the design of the learning experience.

LLB202 Contract Law

Pre-requisites	LLB105 or LWB146. LLB105 can be studied in the same teaching period as LLB202
Anti-requisites	LWB136, LWB137
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Legally binding promises pervade society, from uncomplicated bargains like riding on a bus to complex multi-million dollar transactions. The law of contract provides an understanding of promises which are legally binding, how contractual promises may be characterised and the

Units

significance of that characterisation, and how contractual promises may be discharged or invalidated.

LLB203 Constitutional Law

Pre-requisites	LLB105 or LWB146
Equivalents	LWB242
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SUM (Block) External - SEM-1, SUM

Constitutional Law examines the constitutional arrangements effected by the Commonwealth and State Constitutions and the division of power between the Commonwealth and States and the relations between the different levels of government.

LLB204 Commercial and Personal Property Law

Pre-requisites	LLB202 or LWB137
Anti-requisites	LWB244
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

In this unit, concepts of property are introduced and legal principles relevant to personal property and commercial law are considered.

LLB205 Equity and Trusts

Pre-requisites	LLB202 or LWB137
Anti-requisites	LWB241
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2, SUM (Block) External - SEM-2, SUM

Equity & Trusts provides an understanding of the principles of equity and the law relating to trusts as required for admission to practice.

LLB241 Discrimination and Equal Opportunity Law

Pre-requisites	LLB105 or LWB146. LLB105 can be studied in the same teaching period as LLB241
Anti-requisites	LWB313
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit is an examination of law and policy with respect to discrimination and equal opportunity in Australia. It covers both relevant international treaties and Australian domestic anti-discrimination and equal opportunity law.

LLB243 Family Law

Pre-requisites	LLB105 or LWB146. LLB105 can be studied in the same teaching period as LLB243
Anti-requisites	LWB302
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2, SUM-2 (Block) External - SEM-2, SUM-2

Legal professionals assisting clients who are entering into relationships or experiencing relationship breakdown are involved in helping them plan their future financial and parenting arrangements. Their role, when assisting clients after separation, is to help their clients find the most appropriate forms of dispute resolution and to minimise conflict experienced by family members, particularly where there are children. Family lawyers are most often engaged in matters involving future arrangements for children and financial issues, such as property settlement, spousal maintenance and child support. They also assist clients in applications to seek protection for family violence. This unit aims to provide you, as a potential family law professional, with an understanding of the family law system, the various options for resolution of disputes, and the relevant legislation and case law and how it is applied in practice.

LLB244 Criminal Law Sentencing

Pre-requisites	LLB106 or LWB239
Anti-requisites	LWB494
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This General Law Elective builds on the knowledge gained in LLB106 Criminal Law to examine the principles and practices of sentencing offenders who have been found guilty. Criminal law can be a significant part of general practice, even specialisation, and knowledge of the legal principles and the criminological theories of punishment of offenders is an important part of that practice.

LLB245 Sports Law

Pre-requisites	LLB102 or (LWB137 and LWB148)
Anti-requisites	LWB260, LWB460
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

LLB245 Sports Law is a 'general elective' unit. It covers the application of a wide range of legal principles to a sporting context. Students will have studied some of the principles at a general level in core units, allowing them to consolidate their knowledge, while other areas of the unit will be new to them. Sport-specific legal principles (for example, regarding doping) will also be covered.

LLB301 Real Property Law

Pre-requisites	(LLB204 and LLB205) or LWB241
Anti-requisites	LWB243, LWB244
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SUM (Block) External - SEM-1, SUM

This unit considers the law of real property, including property rights in

Units

Australia and the Torrens system.

LLB303 Evidence

Pre-requisites	LLB106 or LWB239
Equivalents	LWB432
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2, SUM (Block) External - SEM-2, SUM

Evidence examines the rules and procedures relating to the reception of evidence, in courts and tribunals, concerning facts which are either disputed or yet to be established before the commencement of proceedings.

LLB304 Commercial Remedies

Pre-requisites	(LLB204 and LLB205) or LWB241
Anti-requisites	LWB136, LWB137
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

A remedy is the means by which a wrong or a breach of contract or statute may be compensated or redressed. Remedies include damages, restitution and equitable remedies. The law of remedies is closely associated with the areas of private law, in particular contracts and torts.

LLB306 Civil Procedure

Pre-requisites	192cp of Law units
Anti-requisites	LWB431
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2, SUM (Block) External - SEM-2, SUM

Civil Procedure provides an understanding of procedural law and the skills to resolve disputes, when necessary, through the process of litigation.

LLB342 Immigration and Refugee Law

Pre-requisites	LLH201 or LWB146. LLH201 can be studied in the same teaching period as LLB342
Anti-requisites	LWB463
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The transnational movement of people across the globe has shaped nations around the world in many ways. All modern democratic countries have systems in place to allow for the movement of people for a variety of purposes. Historical, social and political forces shape the policy dialogue and legal infrastructure concerning immigration and refugee law. This unit considers the application of key principles of international, constitutional and administrative law to this area of law, and critically examines immigration and refugee laws, policy considerations and procedures.

LLB343 Indigenous Cultural Heritage Law

Pre-requisites	LLB104 or LLB105 or LWB146
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit continues the education of students in Aboriginal and Torres Strait Islander knowledges and the impact of the law on Aboriginal and Torres Strait Islander peoples. This subject will provide both theoretical and practical perspectives on Indigenous legal issues and will enable students to develop crucial skills and knowledge necessary to enable a legal career in this field.

LLB344 Intellectual Property Law

Pre-requisites	LLH201 or LWB146. LLH201 can be studied in the same teaching period as LLB344
----------------	--

Anti-requisites	LWB486
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1, SUM

Intellectual property law has become fundamentally important to our modern, connected society. This unit will provide an introduction to those areas of intellectual property law that commercial legal practitioners are likely to encounter in their everyday practice. It will also examine the current policy debates in the field of intellectual property as the law adapts to the digital age.

LLB345 Internet Law

Pre-requisites	LLH201 or LWB146. LLH201 can be studied in the same teaching period as LLB345
Anti-requisites	LWB482
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

As the Internet continues to become an integrated part of business, government and social life, difficult legal and policy questions arise. Internet Law addresses the most pressing practical legal issues that arise when people and businesses interact online, and examines the theoretical principles that are likely to underpin public and private regulatory efforts in the future.

LLB346 Succession Law

Pre-requisites	LWB241 or LLB205
Anti-requisites	LWB309
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit includes the following: examination of the law with respect to wills and probate; a study of the formalities required to execute a valid will; the intestacy provisions where someone

Units

dies without having made a will; the rights of a testator's family when they have not been named as a beneficiary in the deceased's will; and a detailed examination of the provisions of the Succession Act 1981 (Qld).

LLB347 Taxation Law

Anti-requisites	AYB325, AYB219, LWB364
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SUM (Block) External - SEM-1, SUM

In this unit you will attain an overview of the Australian taxation system.

LLB348 Socio-Legal Research Methods

Pre-requisites	LLH201 or LWB146. LLH201 can be studied in the same teaching period as LLB348
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit further develops your research skills in law and the other disciplines that you have studied at tertiary level by introducing you to socio-legal research and to the key empirical research methods used by socio-legal researchers. The unit focuses on the intellectual frameworks within which socio-legal researchers conduct their research, on the design and implementation of socio-legal research projects, and on skills to critically evaluate socio-legal research projects conducted by others.

LLB440 Environmental Law

Pre-requisites	LLH206 or LWB335
Anti-requisites	LWB485
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Environmental Law is relevant for those

interested in gaining an understanding of the ways in which the law seeks to protect the environment whilst enabling industry to operate and contribute to the Australian economy. The unit examines the key features of the environmental legal system and critically analyses environmental laws at the state (Queensland), federal and international environmental laws.

LLB445 International Commercial Arbitration

Pre-requisites	LLB204 or LWB243
Anti-requisites	LWB407
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Globalisation is contributing to the ever increasing movements of people, goods, services and investments across national borders. Along with this increased mobility has been an increase in legal disputes that have a trans-border dimension. International Commercial Arbitration examines the private internal law relevant to trans-border disputes and commercial arbitration which is a process of dispute resolution governed by federal legislation.

LLB460 Competition Moots A

Pre-requisites	LLH201 or LWB146
Anti-requisites	LWB418
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SUM

If students have completed the foundation units in first year, perform well under pressure and have participated in at least one internal moot as counsel, they may, when expressions of interest are called for, apply for a place on a team for a moot competition for which academic credit is granted. Places are very limited, but if students are successful, they can take their skills to the national and international arena and experience mooting at the highest level. International and national moots require significant preparation and attention to detail, with a very high level of commitment, research, writing and

discipline knowledge. Because of the timetabling of international moots throughout the year, students may be required to work on the competition moot for extended periods, including between November and February. The number of moots offered will vary from year to year. Academic credit for this unit is restricted to registered members of official QUT teams in designated competitions.

LLB461 Competition Moots B

Pre-requisites	LLH201 or LWB146
Anti-requisites	LWB419
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SUM

If students have completed the foundation units in first year, perform well under pressure and have participated in at least one internal moot as counsel, they may, when expressions of interest are called for, apply for a place on a team for a moot competition for which academic credit is granted. LLB462 Learning in Professional Practice

Pre-requisites	192cp toward LLB completed (LLB, LLH, LWB units)
Equivalents	LWB421
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2

Units

External
- SUM

This unit provides students with the experience of working in a professional legal environment. Students can either apply for one of the advertised placement opportunities or organise their own placement in a legal work place. Students will perform legal work (similar to that of a graduate solicitor) for a minimum of 60 hours, supervised by a lawyer qualified to practice in that jurisdiction. Once enrolled in the unit, students must either apply for an advertised placement opportunity or submit details of their self-organised placement to be approved by the Unit Coordinator. Students will reflect upon and learn from their experience through keeping a reflective journal, sharing their experiences with other students and using the student ePortfolio. Integral to each student's experience will be reflection and the identification and consideration of the theory/practice nexus.

LLB463 Legal Clinic (Organised Program)

Pre-requisites	192cp toward LLB completed (LLB, LLH, LWB units)
Anti-requisites	LWB456
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

In this unit, students are provided with the opportunity to see law in action through being involved in the delivery of community legal services, support and information. Students work with community legal centres and community support agencies in a variety of areas such as refugee, environmental, family violence and public interest law. Students' placement learning is supplemented with a weekly seminar program that deals with topics such as cultural competence, professional identity, client care, legal interviewing, and community education. Entry to this unit is via a successful application only.

LLB464 Legal Clinic (International)

Pre-requisites	192cp toward LLB completed (LLB, LLH, LWB units)
Credit Points	12
Campus	Gardens Point

Availabilities

Gardens Point
- SEM-2, SUM

In this unit students are provided with the opportunity to see law in action through participation in an overseas placement or study tour. Students' work in their placements is supplemented with a program that deals with such topics as pre-trip preparation, intercultural capabilities, global perspectives, and career planning. Entry to this unit is via a successful application only.

LLH201 Legal Research

Pre-requisites	LLB105 or LWB146
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

Legal research is an integral part of legal practice. This unit develops the problem solving, legal research and communication skills developed in the first year units in new contexts.

LLH206 Administrative Law

Pre-requisites	(LLB203 and LLH201) or LWB242
Anti-requisites	LWB335
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Administrative law concerns the legal relationship between government and individuals and businesses. This unit considers the way in which decisions of government bodies and public officials may be challenged or reviewed.

LLH302 Ethics and the Legal Profession

Pre-requisites	LLH201 or LWB146. LLH201 can be studied in the same teaching period as LLH302
Anti-requisites	LWB433
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point

- SEM-1, SUM-2 (Block)
External
- SEM-1, SUM-2

Ethics and the Legal Profession examines the legal and ethical responsibilities of a legal practitioner and develops in students the skills required to deal with the pressures that legal practitioners may face in their career.

LLH305 Corporate Law

Pre-requisites	(LLB204 and LLH201) or LWB244
Anti-requisites	LWB334
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2, SUM (Block) External - SEM-2, SUM

Corporate law examines the laws and regulations relevant to registered companies. Knowledge of corporate law is required for admission to legal practice.

LLH401 Legal Research Capstone

Pre-requisites	LLH201 and LLH302
Credit Points	24
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This is the capstone unit in the LLB with Honours. The unit consolidates and builds on the legal research, reasoning, communication, and critical and creative thinking skills introduced at a foundation level in the first-year units and developed in the second and third year units. The unit equips students with sophisticated skills necessary to respond efficiently and effectively to complex, real-world legal problems.

LLH470 Commercial Contracts in Practice

Pre-requisites	LLH401 or LWB335. LLH401 can be studied in the same teaching period as LLH470
Anti-requisites	LLB441
Credit Points	12
Campus	Gardens Point and

Units

	External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This Advanced Law Elective unit provides an opportunity for students to study the interaction of common law principles of contract, equity and property law and the impact of statute in the context of several common commercial transactions. Students will examine key aspects of contracts such as risk allocation performance, dispositions and dispute resolution in the context of commercial sales, leases and share sales. A case study approach will be used to expose students to practical issues related to the negotiation, drafting and interpretation of common clauses within these agreements.

LLH471 Health Law and Practice

Pre-requisites	LLH401 or LWB335. LLH401 can be studied in the same teaching period as LLH471
Anti-requisites	LWB483
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Advances in medical science have yielded almost imponderable questions concerning the rights of patients, the obligations of health care providers and the extent to which the state should intervene in the relationship. As an Advanced Law Elective, Health Law & Practice examines contemporary issues that arise in the modern health care context, including competing public policies. Students will develop advanced knowledge and appreciate the relationship between the law, medicine and ethics and develop research and critical analysis skills within the law and medicine paradigm.

LLH472 Public International Law

Pre-requisites	LLH401 or LWB335. LLH401 can be studied in the same study period as LLH472
Anti-	LWB406

requisites	
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Public international law is a body of rules that governs the relations between nation states and between nation states and individuals. As Australian legal practitioners can increasingly expect to work within a global context, an understanding of this area of law is important for all practitioners. A good understanding of public international law is also essential for anyone wishing to work with an international organisation. As an advanced law elective, Public International Law will develop advanced knowledge of how international law is created and develops, and how it is applied by governments, legislatures, courts and international agencies.

LLH473 Independent Research Project

Pre-requisites	LLH401 or LWB335. LLH401 can be studied in the same teaching period as LLH473
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

Advanced research, writing, analytical and legal reasoning skills are essential to legal professionals for the purposes of the preparation of legal advice, opinions and arguments, proposals for law reform, reference and policy documents, teaching materials, and scholarly publications. This unit provides students with the advanced research and writing skills needed for enrolment in higher degree research programs and for the legal profession. The unit is available only to final-year law students, as it serves as a foundation for students to enhance their academic research experience and skills prior to post-graduate study or entry into the legal profession. It is highly recommended that students undertake LLB348 Legal Research Methodologies prior to this unit.

LLH474 Insolvency Law

Pre-requisites	LLH401 and (LLH305 or LWB334). LLH401 and LLH305 can be studied in the same teaching period as LLH474
Anti-requisites	LWB307
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

This unit examines the legal issues associated with insolvency for both individuals and corporations. Insolvency Law provides students with an opportunity to develop advanced knowledge, building on their knowledge of corporate law, and skills relevant for this specialised area of the law.

LLH475 Theories of Law

Pre-requisites	LLH401 or LWB335. LLH401 can be studied in the same teaching period as LLH475
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit fosters and develops an appreciation of the major theoretical and philosophical approaches that have guided the law in all stages of its development. As an Advanced Law Elective, Theories of Law builds on existing attributes, skills and substantive knowledge, developing these to a higher level.

LPP111 Lawyers' Skills

Anti-requisites	LPZ111
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP1, 6TP2, SEM-2 External - 6TP1, 6TP2, SEM-2

This unit introduces you to a range of lawyering skills that will enable you to apply the knowledge, skills and values that you acquired in your law degree to the practice of law. Specifically, this unit

enables you to start or to consolidate your acquisition of skills in legal letter writing, legal drafting, legal interviewing, negotiation and advocacy skills. The unit will provide you with the opportunity to apply your knowledge of various areas of the law, your legal research and analysis skills, and your fact analysis skills, for such purposes as advising clients orally in and in writing in complex legal matters; achieving desired client outcomes when drafting legal documents; and representing clients effectively in negotiations and before courts.

LPP112 Work Skills

Anti-requisites	LPZ112
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP1, 6TP2, SEM-2 External - 6TP1, 6TP2, SEM-2

The Law Admissions Consultative Committee considers that an entry-level lawyer should be able to demonstrate competence in ethical understanding and knowledge of solicitors' trust accounting and file and risk management at the level required for admission as a legal practitioner in Australia.

LPP113 Civil Litigation

Anti-requisites	LPZ113
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2, 6TP5 External - 6TP1, 6TP2, 6TP3, 6TP5

This unit builds on your undergraduate knowledge of civil litigation, torts and contract law by providing you with an understanding of the practices and procedures involved in resolving client disputes using civil litigation. It will provide you with the opportunity to apply your legal research and analysis skills, and your fact analysis skills, for the purpose of finding solutions to client problems. It will enable you to further develop and apply your letter-writing and legal drafting skills. It provides you with an opportunity to demonstrate some of the knowledge, skills and ethical values that a competent legal practitioner is expected to apply when conducting litigation.

LPP114 Commercial

Anti-requisites	LPZ114
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2, 6TP4, 6TP5 External - 6TP2, 6TP4, 6TP5

This unit builds on your undergraduate knowledge of corporate law principles and commercial law by providing you with an understanding of the practices and procedures involved in utilising corporations for client purposes and an understanding of practices and procedures involved in the sale of a business. It will provide you with the opportunity to apply your knowledge of corporate, commercial and revenue law, your legal research and analysis skills, and your fact analysis skills, for the purpose of finding solutions to client problems involving commercial transactions. It will enable you to further develop and apply your letter-writing and legal drafting skills. It further provides you with an opportunity to demonstrate some of knowledge, skills and ethical values that a competent legal practitioner is expected to apply to complex commercial transactions and problems.

LPP115 Property

Anti-requisites	LPZ115
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2, 6TP5 External - 6TP1, 6TP2, 6TP3, 6TP5

This unit builds on your undergraduate knowledge of property law by providing you with an understanding of the practices and procedures involved in property transactions such as transfers, mortgages and leases. It will provide you with the opportunity to apply your knowledge of property, planning and revenue law, your legal research and analysis skills, and your fact analysis skills, for the purpose of finding solutions to client problems. It will enable you to further develop and apply your letter-writing and legal drafting skills. The unit will further provide you with an opportunity to demonstrate some of knowledge, skills and ethical values that a competent legal practitioner is expected to apply to complex commercial transactions and problems.

LPP116 Electives

Anti-requisites	LPZ116
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2, 6TP4, 6TP5 External - 6TP2, 6TP4, 6TP5

This unit extends your knowledge of the substantive law and the practices and procedures on two areas of practice that you choose from the list below. You must choose two from the list below to satisfy professional admission requirements and unit requirements. The unit will provide you with the opportunity to build and apply your substantive law knowledge, your procedural knowledge, your fact analysis skills and your legal research and analysis skills.

• Administrative law practice
• Criminal law practice
• Family law practice
• Banking and finance law practice
• Consumer law practice
• Employment and industrial law practice
• Planning and environment law practice
• Wills and estates practice

LPP117 Interaction

Anti-requisites	LPZ117
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - 6TP2, 6TP5 External - 6TP1, 6TP2, 6TP3, 6TP5

This unit complements your study in LPP113 Civil Litigation and LPP115 Property. It provides you with an opportunity to build further your legal and fact research and analysis skills, your communication skills and your ability to manage complex legal work in a professional manner. It provides you further opportunities to exercise your professional judgement within an ethical framework appropriate for a legal profession and to apply risk management tools in legal professional work.

LPP118 Placement

Anti-requisites	LPZ118
Credit Points	12

Units

Campus	Gardens Point and External
Availabilities	External - 6TP3, 6TP4, 6TP6

This unit provides a capstone to your practical legal training for admission to the legal profession. It enables you to spend the equivalent of four working weeks in a law office in Australia, in which you can observe legal practitioners delivering legal services. It enables you to observe firsthand legal professionalism in action and to conduct professional reflection on this activity.

LPZ111 Lawyers' Skills

Anti-requisites	LPP111
Credit Points	12
Campus	Gardens Point and External
Availabilities	External - 6TP1, 6TP2, 6TP4

This unit introduces you to a range of lawyering skills that will enable you to apply the knowledge, skills and values, which you acquired in your law degree, to the practice of law. Specifically this unit enables you to start, or to consolidate your acquisition of skills in legal letter writing, legal drafting, legal interviewing, negotiation and advocacy skills. The unit will provide you with the opportunity to apply your knowledge of various areas of the law, your legal research and analysis skills, and your fact analysis skills, for such purposes as: advising clients orally in and in writing in complex legal matters; achieving desired client outcomes when drafting legal documents; and representing clients effectively in negotiations and before courts.

LPZ112 Work Skills

Anti-requisites	LPP112
Credit Points	12
Campus	Gardens Point and External
Availabilities	External - 6TP1, 6TP2, 6TP4

The Law Admissions Consultative Committee considers that an entry-level lawyer should be able to demonstrate competence in ethical understanding and knowledge of solicitors' trust accounting and file and risk management at the level required for admission as a legal practitioner in Australia.

LPZ113 Civil Litigation

Anti-requisites	LPP113
Credit Points	12
Campus	Gardens Point and External
Availabilities	External - 6TP2, 6TP3

This unit builds on your undergraduate knowledge of civil litigation, torts and contract law by providing you with an understanding of the practices and procedures involved in resolving client disputes using civil litigation. It will provide you with the opportunity to apply your knowledge of litigation practice, your legal research and analysis skills, and your fact analysis skills for the purpose of finding solutions to client problems. It will enable you to further develop and apply your letter-writing and legal drafting skills. It provides you with an opportunity to demonstrate some of the knowledge, skills and ethical values that a competent legal practitioner is expected to apply when conducting litigation.

LPZ114 Commercial

Anti-requisites	LPP114
Credit Points	12
Campus	Gardens Point and External
Availabilities	External - 6TP4, 6TP5

This unit builds on your undergraduate knowledge of corporate law principles and commercial law by providing you with an understanding of the practices and procedures involved in utilising corporations for client purposes and an understanding of practices and procedures involved in the sale of a business. It will provide you with the opportunity to apply your knowledge of corporate, commercial and revenue law, your legal research and analysis skills, and your fact analysis skills, for the purpose of finding solutions to client problems involving commercial transactions. It will enable you to further develop and apply your letter writing and legal drafting skills. It further provides you with an opportunity to demonstrate some of knowledge, skills and ethical values that a competent legal practitioner is expected to apply to complex commercial transactions and problems.

LPZ115 Property

Anti-requisites	LPP115
-----------------	--------

Credit Points	12
Campus	Gardens Point and External
Availabilities	External - 6TP2, 6TP3

This unit builds on your undergraduate knowledge of property law by providing you with an understanding of the practices and procedures involved in property transactions such as transfers, mortgages and leases. It enables you to spend the equivalent of four working weeks in a law office in Australia, in which you can observe legal practitioners delivering legal services. It enables you to observe firsthand legal professionalism in action and to conduct professional reflection on this activity.

LQB180 Biomolecules and Life Processes

Anti-requisites	CVB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The composition and function of biomolecules in the cell and the body is important in understanding the relationships between health and disease. This unit introduces foundational knowledge and skills relevant to understanding the fundamental bioelements, their structural organisation in biological molecules and their functional roles in the central life processes of cells, organs and tissues.

LQB181 Introduction to Medical Laboratory Science

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Medical laboratory scientists have a vital role in the diagnosis of disease and ongoing management of patient care. It is estimated that up to 70% of all medical treatments are based on a pathology diagnosis. This first year unit introduces you to the clinical practice of diagnostic pathology, the role of medical laboratory scientists in healthcare, medical research and the profession of medical laboratory science in a local, national and international context. Foundation knowledge in the core diagnostic pathology disciplines will be introduced using clinical case studies and scenarios in conjunction with basic practical bench-skills required in the laboratory to prepare you for later units of your course.

LQB182 Cell and Molecular Biology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Cell and Molecular Biology equips you with a comprehensive understanding of the molecular structure and function of the cell. This unit introduces the basic principles and concepts of cell structure, function, specialisation, maintenance and replication, and introduces you to fundamental molecular mechanisms important to the organisation of the cell. You will be shown how macromolecular interactions are crucial to information flow and heredity. You are taught the relationships between chromosomes, genes and cellular function and ultimately how these may determine an organism's phenotype.

LQB183 Human Systematic Anatomy

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit concentrates on the acquisition and application of appropriate anatomical terminology, understanding of basic

tissue structure and a detailed understanding of the major anatomical concepts of each of the organ systems within the human body. A focus on language development will underpin the learning in this unit, where you will develop the ability to communicate medical cases effectively to a range of audiences.

LQB184 Biomedical Skills 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is designed for first year students studying biomedical science and health courses. You will be introduced to a range of academic and professional skills which are required for all biomedical scientists. The unit will provide you with an appreciation of the career opportunities and pathways available for biomedical scientists. This introductory unit is designed to give students a strong foundation for continuing studies in biomedical science and related areas of study.

LQB281 Human Health & Disease Concepts

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit develops an understanding of the causes and pathogenesis of human diseases including those of a genetic, microbial, immunologic and traumatic aetiology. Students are introduced to the language and terminology used within the discipline and are provided opportunities to understand and apply the way in which pathology is measured, diagnosed and treated.

LQB284 Biomedical Skills 2

Pre-requisites	LQB184
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will extend your knowledge and skills around scientific communication, data analysis and interpretation through statistical methodology, as well as continue the development of effective

interpersonal skills. The unit will help develop a range of academic and professional skills that are required for all biomedical scientists by extending and applying biostatistics approaches to a practical project. The unit also develops teamwork skills through collaborative work approaches to projects and presentations.

LQB301 Medical Microbiology and Infection Control

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This foundation unit builds upon your fundamental knowledge of the human body and explores the role of microorganisms on human health. In this unit, you will (i) explore the diversity of microorganisms found in the human body; (ii) examine the relationship between infection and disease through the different organ systems of the human body; and (iii) study the mechanisms by which the human body naturally controls infections but also how we can use antimicrobials and a range of infection control procedures to reduce the threat of infectious diseases. This knowledge and understanding will then be further developed and applied in your subsequent clinical studies in your chosen health care profession discipline.

LQB362 Microbiology: Principles and Practice

Pre-requisites	LQB281 or BVB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides foundation knowledge and understanding of human infectious disease microbiology and topics including the spectrum of disease, diagnosis, aetiology, treatment, prevention, control and epidemiology. You will also learn about the laboratory processing of patient specimens with infectious diseases and how to work safely and competently in a PC2 diagnostic laboratory context.

LQB381 Biochemistry

Pre-requisites	PQB105 or (SCB121 and SCB122) or (SCB111 and
----------------	--

	SCB121) or SCB113 or (CVB101 & CVB102) or CZB190 or LQB180
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The study of biochemistry and cell biology, along with anatomy and physiology, provides students with the knowledge required for the proper understanding of the structure and function of the human body and its organ systems in health and disease, as a preparation for their clinical studies.

LQB382 Developmental Anatomy and Tissue Adaptation

Pre-requisites	LQB183 or LSB255 or LSB182
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The human body is very responsive to its environment, both in terms of genetic cues during embryological development and hormonal and mechanical signals during post-natal ageing. This unit will explore a number of key embryological processes where tissue patterning results in the formation of the nervous, muscular, skeletal and cardiovascular organ systems. Furthermore the ability of tissues to adapt to their environment will be discussed through development of an understanding of tissue biomechanics and the effects of trauma and ageing on the human body. Concepts including strength determinants and the effects of loading and disuse will be explored.

LQB385 Molecular Biology and Bioinformatics

Pre-requisites	LQB182 or (SCB112 and SCB122)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Modern human biology is largely focused on unraveling and manipulating the genetic information stored in DNA to understand health and treat disease. Genetic information and associated technologies underpin medical advances

that span disease diagnostics, vaccines, drugs, forensics, biomaterials, foodstuffs, environmental rehabilitation and even bioterrorism. This unit provides an introduction to the approaches of interrogating genome sequence data and simple genetic engineering technologies used to manipulate DNA sequences.

LQB387 Principles of Immunology

Pre-requisites	LQB281 and LSB250
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Immunology is the study of the physiological systems used to defend the body from invasion by foreign organisms and the pathologies associated with inappropriate immune responses. This unit is in the course to provide you with knowledge relating to the immune system and application of basic immunological procedures in the laboratory. It assumes knowledge from previous semesters and will provide you with critical foundation knowledge for studies in subsequent semesters.

LQB388 Medical Physiology 1

Pre-requisites	LSB258 or LSB111 or LSB131 or LSB142 or LSB255 or SCB120 or LSB182
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit deals specifically with the physiological systems that are responsible for the maintenance of health in humans. In the course of the semester students will investigate half the systems that constitute the human body (with the remainder dealt with in the second semester unit Physiology 2 [LQB488]). The unit offers a useful frame of reference for students enrolled in courses such as animal biology, biochemistry, microbiology, molecular biology, nutrition and human movements. Together with Physiology 2 [LQB488] this unit is a prerequisite to the third level unit, Applied Physiology [LQB588] and will be of particular interest to students considering medicine as a postgraduate career option.

LQB389 Regional and Sectional Anatomy for Radiation Therapy

Pre-requisites	LSB142
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The aims of this unit are to apply accurate anatomical language to identify and describe macroscopic structures of the human body using regional and sectional anatomy approaches, and develop skills in anatomical communication, teamwork and self-management.

LQB390 Regional and Sectional Anatomy for Medical Imaging

Pre-requisites	LSB142
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The aims of this unit are to apply accurate anatomical language to identify and describe macroscopic structures of the human body using regional and sectional anatomy approaches, and develop skills in anatomical communication, teamwork and self-management.

LQB462 Microbial Diagnostics

Pre-requisites	LQB362
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

As you prepare for a career as a medical scientist, in this unit you will investigate and research microorganisms that are found in the human host as normal regional flora and also those that cause human infectious diseases. In this unit you will develop; expertise in the laboratory techniques applied in the diagnostic microbiology laboratory, the ability to interpret the significance of diagnostic testing results, and to communicate these results and your recommendations to medical professionals.

LQB481 Biochemical Pathways and Metabolism

Pre-requisites	LQB381 or LSB308
----------------	------------------

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The study of biochemistry and cell biology, along with molecular biology, provides students with the knowledge required for the proper understanding of the structure and function of living organisms at the molecular level. As such, this unit extends the studies begun in the unit LQB381 Biochemistry into the metabolic processes occurring in living cells, and provides students with a basis for further studies in biochemistry as well as support for other units in the third year of the course.

LQB482 Anatomical Imaging

Pre-requisites	LQB183 or LSB131 or LSB255 or LSB182
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The ability to image the human body allows a non-invasive investigation to determine health status and diagnose pathologies in patients. This unit will introduce you to a number of key image modalities including plain and contrast radiography, computed tomography and magnetic resonance imaging. You will be given the opportunity to develop analytical skills to identify typical anatomical patterns and appreciate human variability through medical imaging technologies. An understanding of the rationale for each technology will be developed. These skills are highly relevant to future career paths in Medicine, Allied Health fields and biomedical research.

LQB485 Cell Biology

Pre-requisites	LQB182 or SCB122
Equivalents	LQB584
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on your knowledge of cellular components to examine how these come together structurally and functionally to build cells and tissues that function as part of a whole organism capable of surviving and protecting itself from disease and trauma. It will help you

to develop an understanding of individual structural organelles and components in the cell in the context of cell biology and disease processes essential for higher units in cell and molecular biology.

LQB488 Medical Physiology 2

Pre-requisites	LQB388
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

An appreciation of how the human body works is an essential prerequisite to understanding the basis of health, disease, diagnostic technologies and treatment strategies. This unit deals specifically with the physiological systems that are responsible for the maintenance of health in humans. It therefore provides a useful frame of reference for students enrolled in biomedical science, pharmacy, human movement studies, nutrition and dietetics or any of the life science majors. The aim of this unit is to introduce you to the normal physiology of the human body in order to facilitate an understanding of how injury or disease affect health as well as the mechanism of action of drugs and other therapeutic interventions.

LQB490 Cytogenetic and Molecular Pathology

Pre-requisites	(LSB325 or LQB381) and LSB365
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will provide you with fundamental knowledge and technical skills to you prepare you for your career as a medical scientist. This unit will introduce you to the role of genetic testing in pathology, which is becoming increasingly important in a number of pathology disciplines, and is thus an area of growth and increasingly a potential graduate employment destination. This unit will develop concepts and laboratory skills fundamental to the understanding and application of the techniques applied across the various pathology disciplines.

LQB494 Pathogen Biology and Pathogenesis

Pre-requisites	LQB362
Credit Points	12

Units

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is in the developmental stage of your course, building on concepts you learnt in LQB362. This unit will provide you with a fundamental understanding of the structural, molecular, and metabolic components of microorganisms and how they are regulated, providing you with opportunities to practice your analysis and problem solving skills in the area of infectious diseases. Specifically, upon completing this unit you will be able to provide evidence of skills in recognising and describe: 1. the structural components of microbes, 2. the molecular assembly processes involved in building these components, 3. the growth and metabolic processes of different microbes, and 4. the means of regulation of each of these factors.

LQB502 Biomedical Work Integrated Learning A

Anti-requisites	LQB501, LQB504-3
Other requisites	Completion of 144 credit points in LS40 and approval of LS40 course coordinator
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit provides you with the opportunity to gain industry-based experience through a supervised work placement. Within the workplace (normally a minimum of 120 hours [equivalent to 3 weeks full-time] and maximum of 240 hours) you will apply knowledge and skills developed during your course of study. Practising workplace related skills such as team work, ethical behaviour, safe workplace practices and reflective practice as well as building on your industry networks will support you in your transition to professional practice. Your placement should be relevant to your course of study and must be approved by the course co-ordinator and the unit co-ordinator before you commence. The learning in this unit can be extended into a second unit LQB503.

LQB503 Biomedical Work Integrated Learning B

Pre-requisites	LQB502
Anti-requisites	LQB501, LQB504-3
Other requisites	Completion of 144 credit points in LS40 and approval of LS40 course coordinator
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit provides you with the opportunity to extend industry-based experience through a supervised work placement. Within the workplace (normally a minimum of 120 hours [equivalent to 3 weeks full-time] and maximum of 240 hours) you will apply knowledge and skills developed during your course of study. Practising workplace related skills such as team work, ethical behaviour, safe workplace practices and reflective practice as well as building on your industry networks will support you in your transition to professional practice. Your placement should be relevant to your course of study and must be approved by the course co-ordinator and the unit co-ordinator before you commence. This unit extends your learning from LQB502.

LQB504 Clinical Physiology Professional Internship

Pre-requisites	LQB388 and LQB488
Equivalents	LQB501
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

Clinical physiologists work in multidisciplinary teams and with patients in the health care system in disciplines including: cardiac sciences, neurophysiology, respiratory sciences, sleep science and multidisciplinary practice. This 36 credit point work-integrated learning unit is the core element of the clinical physiology minor and consists of a full-time, intensive placement during which you will develop and apply communication skills, demonstrate professional and ethical practice and ensure patient confidentiality

and privacy. This unit is designed for students who are aiming for careers in clinical physiology and completion of this unit provides students with the skills and experience required to apply for graduate positions in clinical physiology.

LQB504 Clinical Physiology Professional Internship

Pre-requisites	LQB504-1. LQB504-1 can be studied in the same teaching period as LQB504-2
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

Clinical physiologists work in multidisciplinary teams and with patients in the health care system in disciplines including: cardiac sciences, neurophysiology, respiratory sciences, sleep science and multidisciplinary practice. This 36 credit point work-integrated learning unit is the core element of the clinical physiology minor and consists of a full-time, intensive placement during which you will develop and apply communication skills, demonstrate professional and ethical practice and ensure patient confidentiality and privacy. This unit is designed for students who are aiming for careers in clinical physiology and completion of this unit provides students with the skills and experience required to apply for graduate positions in clinical physiology.

LQB504 Clinical Physiology Professional Internship

Pre-requisites	LQB504-2. LQB504-2 can be studied in the same teaching period as LQB504-3
Anti-requisites	LQB502, LQB503
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

Clinical physiologists work in multidisciplinary teams and with patients in the health care system in disciplines including: cardiac sciences, neurophysiology, respiratory sciences, sleep science and multidisciplinary practice. This 36 credit point work-integrated learning unit is the core element of the clinical physiology minor and consists of a full-time, intensive placement during which you will develop

Units

and apply communication skills, demonstrate professional and ethical practice and ensure patient confidentiality and privacy. This unit is designed for students who are aiming for careers in clinical physiology and completion of this unit provides students with the skills and experience required to apply for graduate positions in clinical physiology.

LQB508 Clinical Physiology and Pathophysiology

Pre-requisites	LQB488
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-1

Clinical physiology is a rapidly growing area of employment of biomedical scientists, particularly as the Australian population ages, putting increasing pressure on the healthcare system. This advanced unit focuses on understanding the pathophysiology of major disorders through the critically analysis of complex clinical case studies. The unit also involves the development of practical skills through the use of clinical physiology instrumentation and interpretation of physiological data. Thus, this unit is specifically designed to prepare you for your future professional careers or further studies in biomedical research.

LQB562 Advanced Microbial Diagnostics

Pre-requisites	LQB462
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

LQB570 Forensic Anatomy

Pre-requisites	LQB382
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This advanced unit explores the field of forensic anthropology and taphonomy, from understanding the process of tissue decomposition, to recovery and identification of unidentified human remains. You will apply traditional and

contemporary methodologies to interpret skeletal material to construct a biological profile and probabilistic data suitable in the Queensland Judicial system. Through critical analysis you will gain a deep understanding of patterns of variability in the human body.

LQB571 Neuroscience

Pre-requisites	LQB388 or LQB482
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The human nervous system is the most complex and adaptive achievement of the process of evolution. This unit studies the structure and function of the nervous system to understand complex brain behaviours. It expands and combines knowledge of the physiology of the nervous system obtained in Medical Physiology 1 (LQB388) and regional and imaging anatomy of the nervous system gained in Anatomical Imaging (LQB482). This unit advances your understanding in the field of neurobiology and through an introduction to current research topics and methodologies, allows you to explore current research questions, laboratory methodologies and technical skills, and career directions in Neuroscience.

LQB581 Functional Biochemistry

Pre-requisites	LQB481
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will study advanced biochemical concepts with a focus on metabolism, signalling pathways, systems and networks that coordinate and regulate the functional behaviour of cells and tissues.

LQB582 Biomedical Research Technologies

Pre-requisites	LQB481 or LQB381
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will study the technical principles

and practical techniques that are essential for advancing research and development in biochemistry and biotechnology.

LQB583 Molecular Systems Biology

Pre-requisites	LQB385 or LQB485 or LQB494
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Molecular systems biology deals with the integration of information from individual biological datasets (e.g. transcriptomics, metabolomics, proteomics and other 'omics'). This is key to understanding how related molecules interact and produce a state of interest, across many biological disciplines including human health, as well as animal and plant biology. In this unit we review examples of contemporary approaches to 'omics' data generation and analysis, and the role they play in biomedical sciences.

LQB594 Diagnosis and Therapeutics

Pre-requisites	LQB494
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This advanced level unit follows on from the LQB494 Pathogen Biology and Pathogenesis, and builds upon your fundamental knowledge and understanding of the structural, molecular and metabolic components of microorganisms and how they are regulated. Specifically, this unit will increase your understanding of: (i) host-pathogen interactions, (ii) how the immune system responds to microbial pathogens, and (iii) molecular detection, characterisation of pathogens as well as their resistance mechanisms to antibiotics.

LQB595 Cellular Engineering

Pre-requisites	LQB485
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Units

The ability to manipulate cell behaviour and engineer novel tissue scaffolds and matrix-based culture systems has provided significant advances in the field of tissue therapeutics and regenerative medicine. This unit explores the theoretical underpinnings of stem cells and cell niches; and provides current research examples of how cellular engineering is able to generate in vitro and in vivo biological models to facilitate biomedical research as well as providing applications for human therapies.

LQB600 Physiological Basis of Pharmacology

Pre-requisites	LQB388 and LQB488
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will provide a systems approach to pharmacology, giving you an understanding of the principles of drug action, how endogenous compounds and drugs interact with receptors to produce an effect in major organs of the body and how this information has led to the identification of drug targets and the development of medicines for therapeutic use.

LQB601 Cancer Biology

Pre-requisites	LQB182 and LQB281
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit uses your knowledge of cellular and molecular biology to explore how molecular changes in cells lead to the spectrum of diseases described as cancer and how this knowledge informs the development of new therapeutic agents. A large component of this unit is the laboratory practicals in which you will develop skills to determine the contribution of a gene of your choice and its protein product to oncogenesis.

LQB608 Extreme Physiology

Pre-requisites	LQB488
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

	Point - SEM-2
--	-------------------------

TBC

LQB670 Anatomical Dissection

Pre-requisites	LQB482
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The ability to navigate the human body and its composite tissues is strengthened through the dissection of human cadavers. In teams, you will conduct a whole body dissection of a human cadaver and prepare an anatomical prosection that you will use to communicate a specific anatomical concept. The knowledge and skills you have developed throughout your course will be put to practise in this advanced unit, unique to the Anatomical Sciences major, in the final semester of your course.

LQB671 Histological Research Techniques

Pre-requisites	LQB382
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Histological techniques underpin a large proportion of current biomedical research, allowing critical analysis of cellular and tissue morphology and behaviour. This unit allows you to develop the necessary practical skills to perform basic and specialised histological analyses relevant to research contexts including tissue preparation, sectioning and staining of a range of organ samples; and build the theoretical underpinnings to troubleshoot and optimise histological analyses. This highly practical emphasis will provide excellent preparation for future studies in biomedical research.

LQB681 Biochemical Research Skills

Pre-requisites	LQB381 or LSB308. Students with equivalent study can apply for a requisite waiver
Equivalents	LSB607
Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-2
----------------	---------------------------------

In the real world, the design and completion of successful research and/or business projects demand that individuals gather information, solve problems, work effectively as a part of a team and analyse and communicate results in a critical manner. This unit offers opportunities for you to develop these skills that are valued highly by potential employers and research project leaders. The aim of this unit is to assist you to demonstrate and strengthen a number of generic research skills in a mentored problem-based learning environment that mirrors a real-world research team and the challenges that they face.

LQB682 Protein Biochemistry and Bioengineering

Pre-requisites	LQB381 or (LSN101 and LSN102)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is designed to give you the essential concepts and techniques driving research and industrial biotechnology so that you will be equipped for multiple careers in the biological sciences. The skills you develop will allow you to enter a practical laboratory environment or to apply your knowledge in related areas of evaluations of technologies and intellectual property.

LQB683 Cytopathology

Pre-requisites	LSB566
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Cytopathology is an important diagnostic tool for obtaining a morphological diagnosis of disease processes that is rapid, economical and minimally invasive. It also plays an important role in cancer diagnosis, monitoring and, in the case of cervical screening, prevention. This unit prepares you for employment in a diagnostic cytopathology laboratory and introduces the types of specimens reported, methods of processing applied and the cytological features used to diagnose tumours and benign conditions.

LQB684 Medical Biotechnology

Pre-requisites	LQB385 and LQB485
Equivalents	LSB609
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This advanced level unit will enable you to understand the challenges and possibilities of modern biotechnology. Students will utilise their existing critical analysis and problem solving skills to examine the development of diagnostics and therapeutics for safe and effective clinical use in a complicated commercial environment. The unit has a strong focus on the further development of your scientific research skills through a semester long research project conducted in QUT laboratories. It will prepare you for subsequent involvement in medical research and/or employment in medical laboratories.

LQB693 Perspectives in Immunology

Pre-requisites	LQB594
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This advanced level unit is the capstone unit in the infectious diseases learning progression. Upon completing this unit, you will have: (i) acquired skills relevant to immunological research and diagnostic settings laboratories; (ii) extended your knowledge of immunology in infectious disease, cancer and wound management setting; (iii) developed an appreciation and understanding of the use of in vitro and in vivo immunological techniques; (iv) knowledge of strategies for retrieval and analysis of immunological data.

LQB694 Infectious Diseases Outbreaks

Pre-requisites	LQB362
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This advanced level unit is the capstone unit in the Infectious Diseases learning progression. Upon completing this unit, you will have: (i) acquired skills in

advanced molecular microbiology (ii) extended knowledge of host-pathogen interactions (iii) an understanding of the challenges faced in the diagnosis, treatment and prevention of emerging pathogens (iv) developed strategies and research priorities for the control and prevention of outbreak scenarios.

LQB783 Work Integrated Learning Internship 1

Pre-requisites	Completion of 288cp in LS47
Co-requisites	LQB784 and LQB785
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is the first of two work integrated learning internship units (LQB783 and LQB784) positioned in the final year of LS47. Over four (4) weeks you will have the opportunity to apply and demonstrate your learning and skills in the workplace. The internship units combined with your clinical units in second and third year, and your remaining units in your final Semester, will prepare you for work in a diagnostic pathology laboratory, and must be completed for you to meet the professional course accreditation workplace integrated learning requirements to graduate from this course. It will also place you in direct contact with prospective employers and allow you to interact, network and learn from experienced medical laboratory scientists.

LQB784 Work Integrated Learning Internship 2

Pre-requisites	LQB783 and Completion of 288cp in LS47. LQB783 can be enrolled in the same teaching period as LQB784
Co-requisites	LQB785
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is the second of two work integrated learning internship units (LQB783 and LQB784) positioned in the final year of LS47. Over eight (8) weeks you will have the opportunity to apply and demonstrate your learning and skills in the workplace. The internship units combined with your clinical units in second and third year, and

your remaining units in your final Semester, will prepare you for work in a diagnostic pathology laboratory, and must be completed for you to meet the professional course accreditation workplace integrated learning requirements to graduate from this course. It will also place you in direct contact with prospective employers and allow you to interact, network and learn from experienced medical laboratory scientists.

LQB881 Professional Development for Medical Laboratory Scientists

Pre-requisites	LQB784
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In this Capstone unit you will explore a range of academic, technical and professional development themes (or course learning outcomes) which have featured throughout your studies, and will reflect on how they inform your career plans and are synthesised for transition into the workplace. You will also submit the final version of your Course Learning Portfolio as evidence that you have met and achieved the expected course learning outcomes of a LS47 graduate medical laboratory scientist. This unit will allow you to reflect on, and refine your personal and professional skills and attributes with confidence to navigate the recruitment process and seek employment after graduating from the course.

LQB882 Contemporary Issues in Medical Laboratory Science

Pre-requisites	LQB784 and PUB358
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Medical science is a dynamic, rapidly changing field and profession. With new and emerging technologies, testing platforms and approaches to service provision and healthcare, it is critical you are aware of how this influences the provision of pathology testing, results generated and overall operation of the laboratory. It is also essential that you understand, and are aware of the

Units

changing patterns seen in disease frequency, distribution and the impact this has at the local, national and global level, and on your future career as a medical laboratory scientist.

LQB883 Intercultural Health in Clinical Practice

Pre-requisites	LQB784 and PUB358
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Medical laboratory scientists, like all health professionals, are increasingly required to work in a range of environments and communities. This requires knowledge of the types and applications of pathology testing, as well as skills that enable culturally safe interactions with diverse cultures, and with the diversity within each group. This final semester unit builds on your knowledge, skills and experiences gained in your clinically focused units and workplace internship, and will provide you with interpersonal and communication skills and knowledge applicable to the variety of healthcare settings you may be exposed to in your future career as medical laboratory scientists.

LSB111 Understanding Disease Concepts

Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-1 Gardens Point - SEM-1, SEM-2

This unit introduces the structure and function of the body, reviews the body systems and links those to mechanisms of disease. Systems and topics covered are: integumentary, skeletal, muscular, nervous, endocrine, blood, heart and circulation, lymphatic, respiratory, digestive (including nutrition and metabolism), urinary, reproductive. Examples of diseases introduced are: heart disease and hypertension, cancers (lung, breast, skin, colon, prostate), diabetes, depression, asthma and chronic obstructive lung diseases.

LSB131 Anatomy

Equivalents	LSB145
-------------	--------

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes basic concepts of anatomy: an overview of the structure of cells, body tissues, and body systems; aspects of surface anatomy which are relevant to human movement; musculoskeletal systems.

LSB142 Human Anatomy and Physiology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The aim of this unit is to provide grounding in the principles of human anatomy and physiology. Following an introduction to the structure of the cell and the organisation of tissues, each of the major systems that constitute the human body are examined by the integrated study of their anatomy and physiology.

LSB182 Bioscience 1

Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1, SEM-2

The aims of this unit are to provide you with a clear understanding of anatomical terminology used in the health profession as well as provide you with a strong background enabling you to apply concepts of anatomy, physiology, and introductory microbiology and pharmacology to your future studies of diseases and their treatment.

LSB231 Physiology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit covers the general physiological principles such as homeostasis and how all systems in the body contribute to it. Topics include cells, transport processes, cardiovascular system, cardiac electrical activity, cardiac output, regulation of blood pressure, respiratory system, endocrine system, pulmonary ventilation

and its function.

LSB235 Anatomy of the Lower Limb

Pre-requisites	LSB131
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Clinical practice in Podiatry requires a detailed understanding and knowledge of the systematic and regional anatomy of the lower limb. This unit introduces you to the theoretical and practical concepts of these two areas of anatomy. It builds on LSB131 Anatomy and prepares you for your clinical studies.

LSB250 Human Physiology

Pre-requisites	SCB112 or LSB118 or LSB131 or LQB182 or LSB142
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

A foundation in human physiology is crucial for students in optometry, podiatry, pharmacy, medical science, nutrition and other areas of allied health. This unit will provide you with the knowledge and practical skills to enable your subsequent study in physiology, pathophysiology, pathology, endocrinology or pharmacology units in the later years of your course. You will also develop your communication, critical thinking and problem solving skills.

LSB255 Foundations of Anatomy and Histology

Pre-requisites	SCB112 or LQB182
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

A detailed understanding of human anatomy is fundamental to the knowledge base of the medically orientated biological scientist. This unit introduces you to both theoretical and practical aspects of gross, systemic and microscopic anatomy of the human body with emphasis on the microscopic anatomy. The unit builds upon knowledge gained in previous units which introduced you to basic principles

Units

of cell structure and function. Knowledge gained in this unit provides a basis for more advanced studies in cellular pathology, histochemistry and cytology.

LSB258 Principles of Human Physiology

Pre-requisites	LQB183 or LSB131
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This course provides a foundation in the fundamental aspects of human physiology. It is focused on understanding the function and regulation of the main physiological systems of the body. Through this course, students will also gain laboratory skills and knowledge of interpreting experimental data. This course will provide a platform for ongoing and more advanced studies in other disciplines of biomedical science.

LSB282 Bioscience 2

Pre-requisites	LSB182 or (LSB131 and LSB231)
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

The aims of this unit are to provide you with a clear understanding of the pathophysiological processes resulting in altered health and disease states, particularly those conditions which you are most likely to encounter within your future professional practice. You will also be introduced to pathophysiological changes across the lifespan.

LSB365 Pathology

Pre-requisites	(LQB281 and LSB255 and LSB250) or (LQB281 and LQB183 and LSB258)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The aim of this unit is to introduce you to the study of disease processes underlying the major diseases of human organ systems. The first part of the unit will

introduce you to aspects of general pathology including cell adaptation, inflammation, immune disorders, infectious diseases and cancer. Systemic pathology will be covered in the second part of the unit during which the general pathologic processes will be applied to the major organ systems of the body. In addition, you will expand and further develop your practical skills along with your understanding of how they relate to laboratory investigation and diagnosis of disease.

LSB382 Bioscience 3

Pre-requisites	LSB182 or LSB131
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

The aim of the unit is to provide knowledge of the pathophysiological changes that result in altered health and disease states of the body. We will focus on diseases of most significance to Australia.

LSB384 Pharmacology For Health Professionals

Pre-requisites	(LSB111 or LSB282 or LSB382 (NS40) or (LSB475 or CSB520 (OP45) or LQB281 (CS43)) or (LSB235 and LSB250 (PU43 Podiatry))
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-1, SEM-2

Health professionals such as Nurses, Paramedics, Podiatrists and Optometrists require a detailed understanding of the pharmacological properties of the medicines that are used daily in the treatment of patients under their care. This unit introduces students to the discipline of pharmacology by examining the interaction of drugs with biological systems. An understanding of pharmacology is fundamental to a student's understanding of pharmaceutical products in terms of efficacy and safety and provides a rationale for their therapeutic use.

LSB425 Quality and Analysis in Clinical Pathology

Pre-requisites	(LQB381 or LSB325) and MAB141
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Medical laboratory scientists play a vital role in patient care. Pathology test results are used for diagnosis of disease, treatment decisions, monitoring and prognosis and screening and it is important that the results are the 'right' result for the patients concerned. With an emphasis on the discipline of clinical biochemistry, this second year unit explores the major analytical techniques used in the pathology laboratory and the quality assurance practices that are in place in real world laboratories to ensure the accuracy and precision of the patients' results. This unit prepares students for the specialised clinical biochemistry units undertaken in third year.

LSB466 Histological Techniques

Pre-requisites	LSB365 and (CVB101 or PQB105)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Histology is the study of cells and tissues at the microscopic level; histological techniques are the procedures used in the laboratory to prepare them. This second year unit is designed to provide you with the essential knowledge and practical skills to work in a histopathology laboratory and interpret basic histopathological tests. To develop your knowledge of these techniques, ability to apply your learning and practical skills it is critical you have an understanding of the principle and rationale of these tests. LSB466 incorporates and builds on your learning in LSB255 and LSB365, and prepares you for LSB566 in the third year of your course.

LSB480 Professional Practice

Pre-requisites	LSB425 and (LSB435 or LQB462) and (LSB465 or LSB466)
Credit Points	12

Units

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2, SUM

Six weeks of professional practice is undertaken at the end of the second year full time of the medical science course, during the summer vacation. This experience provides you with a supervised introduction to the pathology workplace and prepares you for the clinical units in the third year of the course. During this time you will be given limited supervised experience working at the bench, and you will gain a greater appreciation of the role of the laboratory scientist in a paramedical team. It will reinforce the importance of quality standards, and health and safety issues, as stressed at QUT, and it will place you in direct contact with prospective employers in the pathology industry. The professional practice unit aims to provide you with a supervised introduction to the pathology workplace.

LSB492 Microbiology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit will provide you with foundation knowledge and an understanding of the diversity of microorganisms, the host's immune response to infection, and methods of control of microorganisms. You will: (i) study relevant infectious disease states, (ii) research the importance of microbial pathogens as aetiological agents of disease, and (iii) reinforce your knowledge of microorganisms and methods of control of microorganisms by performing experiments within the microbiology laboratory.

LSB525 Chemical Pathology

Pre-requisites	LSB425
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is designed to provide you with the knowledge and practical skills to work competently as a medical scientist in a diagnostic chemical pathology (clinical biochemistry) laboratory. In developing these skill sets it is essential that you have an in-depth understanding of the aetiology, physiology, pathology, and laboratory investigations relating to

different biochemical markers and disorders. This is a third year unit that builds on the theoretical aspects of biochemistry dealt with in LSB325 and the practical and analytical skills developed in LSB425.

LSB555 Principles and Practice of Clinical Haematology

Pre-requisites	LQB490 and (LSB438 or LQB387)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Haematology is the study of blood and investigates pathologies associated that can lead to disease or an increased risk of bleeding or thrombosis. This third year unit is designed to provide you with the essential knowledge and practical skills to work in a clinical (diagnostic) haematology laboratory. To develop those skills it is critical you have an in-depth understanding of the aetiology and pathophysiology of the most frequently encountered dyscrasias, and the principle and rationale of laboratory investigations used to identify and diagnose them and/or monitor patient therapy in the clinical setting. LSB555 incorporates and builds on your learning and practical skill development from second year, and prepares you for LSB655 and LSB665 next Semester.

LSB566 Histopathology

Pre-requisites	(LSB465 or LSB466) and LQB490
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Histopathology is the study of cells and tissues and investigates the pathologies associated. This third year unit is designed to provide you with knowledge and practical skills to work in a histopathology laboratory and interpret advanced histopathological tests. To develop your knowledge of these techniques, ability to apply your learning and practical skills it is critical you have an understanding of the principle and rationale of these tests. LSB566 incorporates and builds on your learning in LSB466 and LQB490 and prepares you for LQB683 in the next Semester of your course.

LSB625 Diagnostic Endocrinology

Pre-requisites	LSB525
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Endocrinology is a specialised area of study in clinical chemistry and investigates pathologies associated with the hormonal control mechanisms that regulate metabolism and growth within the body. It is a third year unit that builds on the theoretical aspects of biochemistry in LSB325, the study of biochemistry, the practical skills developed in LSB425, the study of quantitative medical science, and the theoretical and practical elements of LSB525, the study of chemical pathology.

LSB655 Applied Clinical Haematology

Pre-requisites	LSB555
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This third year haematology unit builds on the knowledge and skills you acquired in LSB555 to explore the less common and more complex haematological disorders, malignancies and haemostatic defects encountered in day-to-day practice. This unit will develop your ability to identify and recognise these disorders, and explores the aetiology, pathophysiology and laboratory tests used to investigate and diagnose them, and/or monitor treatment in the clinical setting. This unit, combined with LSB555, prepares you for employment as a medical scientist in a diagnostic haematology laboratory.

LSB658 Clinical Physiology

Pre-requisites	(LSB142 and LQB281) OR (LSB282 and LSB382)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

To operate successfully in the clinical environment, Allied Health professionals require an integrated understanding of the systems of the human body and the

Units

impacts of diseases and trauma. This advanced unit focuses on understanding the pathophysiology of major disorders through critical analysis of clinical case studies and interpretation of physiological data. The unit also incorporates clinical simulations of emergency cases and the practical application of clinical physiology methods. Thus, the unit is designed to give you an in-depth understanding of disease processes and practical application of clinical physiology that prepares you for your future career.

LSB665 Transfusion and Transplantation Science

Pre-requisites	LSB555
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Transfusion and Transplantation Science is a specialised field within Medical Science, primarily involving the testing of blood for antigen and antibody compatibility for the safe transfusion of blood components. The immunological concepts are extended to histocompatibility testing for tissue transplantation in a theoretical context. Prior learning of fundamental immunology and haematology is required to undertake this unit.

LSN104 Advancing Anatomy and Physiology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds and integrates knowledge of the structure and function of the human body to understand the complexity and spatial relationships of cells, tissues and organs; and their specific roles in maintaining human health. You will have the opportunity to explore real and virtual anatomical models, physiological instrumentation and advanced pathological and imaging case studies, to demonstrate higher order cognitive skills in anatomy and physiology. There is a strong emphasis on developing and applying expertise in anatomical terminology to facilitate effective communication in professional practice in health and scientific fields.

LSN710 Project

Credit Points	48
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

LSN711 Project 1

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

LSN712 Project 2

Pre-requisites	LSN711 (can be enrolled in the same teaching period)
Credit Points	24
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-2

LSP127 Business Aspects of Biotechnology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

LWB431 Civil Procedure

Pre-requisites	192cp in Law units
Credit Points	12
Campus	External
Availabilities	External - SEM-1

This core unit focuses on developing basic litigation skills. The following issues are examined: the adversarial system and alternative methods of dispute resolution, obligations to the client, the structures and processes of litigation conducted in the Supreme, District and Magistrates Courts, jurisdiction, originating process, notice of intention to defend, parties, service, ending proceedings early, pleading, disclosure, subpoenas, trial, appeals, costs and enforcement.

LWN025 Research Project 1A

Pre-requisites	LWN304. LWN304 can be studied in the same teaching period as LWN025
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

In this unit, students undertake a supervised research project of about 10,000 words over one semester approved by the Director, Graduate Programs.

LWN050 Competition Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The unit provides an overview of the anti-competitive practices, including cartel conduct, that are proscribed by the Competition and Consumer Act 2010 (Cth).

LWN051 Consumer Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

The rationale for the unit Consumer Law is to provide an overview of the consumer protection provisions of the Competition and Consumer Act 2010 (Cth).

LWN053 Research Project 1B

Pre-requisites	LWN304. LWN304 can be studied in the same teaching period as LWN053
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

In this unit, students undertake a supervised research project of about

Units

10,000 words over one semester approved by the Director of Graduate Programs.

LWN056 Research Project 1C

Pre-requisites	LWN304. LWN304 can be studied in the same teaching period as LWN056
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

In this unit, students undertake a supervised research project of about 10,000 words over one semester approved by the Director of Graduate Programs.

LWN057 Research Project 1D

Pre-requisites	LWN304. LWN304 can be studied in the same teaching period as LWN057
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

In this unit, students undertake a supervised research project of about 10,000 words over one semester approved by the Director, Graduate Programs.

LWN065 Construction and Engineering Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

Preparation of construction and engineering contracts has now become a distinct area of legal practice with many firms having established sections which specialise in this area. A sound knowledge of the standard forms used in the industries and the special principles of law applicable to this area is essential for those wishing to practise in the area. This unit provides the knowledge sought by current and future practitioners and those

considering embarking upon research in this area.

LWN075 International Commercial Transactions

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 (Block), SEM-2 (Block) External - SEM-1, SEM-2

This unit deals with the legal problems arising from the formation and operation of international, commercial transactions. Understanding the law and practice regarding international commercial transactions is a prerequisite for the development of trade with Australian businesses.

LWN083 Estate Planning

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-2 External - SEM-2

The ageing population, increasing incidences of mentally disabling conditions such as dementia, the effects of familial breakdown, minimising taxation, and providing for family members have all led to the growing need for effective planning for the future. In addition, people are increasingly concerned with protecting, growing and transferring wealth. Estate planning strategies enable people to achieve these aims. This can be done through a variety of mechanisms including wills, enduring powers of attorney, advance health directives, trusts, companies and superannuation. This unit seeks to conceptualise a framework in which the issues that arise in estate planning can be critically considered.

LWN099 Intellectual Property Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit includes a study of the concept

of Intellectual Property and the principles and policies of intellectual property law. Topics covered include copyright, designs, patents, innovation patents, trade marks, passing off, and breach of confidence.

LWN119 Employment Law

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2 (Block)

Employment law is a foundation unit that allows students to survey at an advanced level the sources, components and relationships of employment law in Australia. Successful completion of this unit provides students with the necessary background to continue on to undertake further advanced courses in more specialised areas of labour law.

LWN129 Contemporary Issues in Sentencing Law

Credit Points	12
Campus	External
Availabilities	External - SEM-1

Sentencing law has become a specialised area of research and practice for criminal law practitioners in Australia. A distinct High Court sentencing jurisprudence has emerged which continues to impact on sentencing legislation and common law across jurisdictions. All Australian jurisdictions have now enacted specialised sentencing legislation, creating discrete principles and thereby ensuring that the separate discipline area of sentencing law continues to evolve, complete with its own discourse. In recent years, the influence of both restorative and therapeutic jurisprudence agendas have seen significant and far reaching reforms to how the law deals with those convicted of certain offences. It is therefore essential that criminal law practitioners and those who study the criminal law, have a sound understanding of this developing discourse and are able to critically analyse the impact of recent innovations.

LWN150 Death, Decisions and the Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point

Units

- SEM-2 (Block)
External
- SEM-2

As people near the end of their lives, their medical treatment and other care needs raise complex medical, legal and ethical decisions. Choices about whether particular treatment should be provided or refused may have to be made, and this is complicated by the fact that many people may not have the competence at this stage in their life to be able to make these decisions. Although a competent adult may refuse treatment, another choice demanded by some is the right to end their own life and to be assisted by others to achieve this. This unit examines the legal aspects of these choices.

LWN158 Public International Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

Public international law is the foundational law that governs the rules operating as between States. It establishes, for instance, the contexts in which force may be used, how new States come into being, what environmental obligations States owe to one another, and the immunities States and their representatives may enjoy from prosecution. It is pursuant to international law that international courts and tribunals have been established to prosecute war criminals. Furthermore, doctrines of international law underpin arguments concerning the appropriate maritime boundaries between states or the competence of international forces to intervene in situations of humanitarian crisis or conflict. Not only is international law vital to understanding many high-profile world events, increasingly Australian law is being shaped by norms of international law such as international human rights law.

LWN164 Health Care Law and Ethics

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 (Block), SEM-2 (Block) External

- SEM-1, SEM-2

The relationship between law and ethics in healthcare is critical but at times contested. This unit explores that relationship, aiming to lay the foundations of an advanced understanding of law and ethics as they relate to healthcare.

LWN166 Consent To Treatment and Clinical Negligence

Credit Points	12
Campus	External
Availabilities	External - SEM-1

This unit develops an understanding of the law and the major ethical and policy issues relating to consent to treatment and medical negligence, including medical trespass and select contemporary aspects of medico-legal practice and procedure.

LWN194 Select Issues in Medical Law and Ethics

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 External - SEM-1

This unit develops an understanding of the major conceptual issues underpinning contemporary debates and proposals for law reform in the following main areas of health law: withholding and withdrawing medical treatment and euthanasia; organ donation; embryonic stem cell research; and genetic engineering. It then aims to develop an understanding of the role such a clarification can play in contributing to, and resolving, some of the more intractable issues in the debates.

LWN203 Commercial Contracts - Construction and Enforcement

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP3 (Block)

A comprehensive understanding of the principles of contract law and how they are applied in a commercial context is essential to practice as a lawyer in any field. This unit will give you an opportunity to undertake further study of contract law at an advanced level and enhance your knowledge of contract interpretation and

enforcement in the context of commercial contracts. The unit forms part of the Commercial Law specialist stream of the LL.M.

LWN204 Family Dispute Resolution

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2 (Block)

In Australian family law, litigation is an option of last resort and parties in parenting cases are required to attempt resolution of their disputes before filing applications in courts, unless their case falls within the exceptions, such as where there are issues of family violence or urgency. It is essential that professionals working in family law have a knowledge and understanding of the family dispute resolution system. Future family dispute resolution practitioners (FDRPs) require a knowledge and understanding of the family dispute resolution (FDR) system, communication skills and an understanding of how to effectively facilitate FDR using the facilitative mediation model. They also need to understand the legislative and ethical obligations of FDRPs.

LWN206 Mediation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1 (Block)

The legal system is increasingly using dispute resolution processes such as mediation to assist in the resolution of disputes. Parties can attend mediation prior to filing an application in court or may be ordered to attend mediation by a judicial officer once their case is in court. The increasing use of mediation has led to a high level of regulation of this profession and an accreditation process being implemented and maintained by the Australian Mediator Standards Board. Mediators can now become nationally accredited under the National Mediator Accreditation System, and this ensures that they have the ability to conduct a facilitative mediation process and that they maintain their knowledge and skills by participating in ongoing professional development and conducting a certain number of hours of mediation in each two-year cycle.

LWN301 Principles of Australian Contract Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 (Block), SEM-2 (Block) External - SEM-1, SEM-2

Although grounded in principles of English common law, Australian contract law has, like many other areas of Australian law, developed a distinctly Australian slant, particularly in the last 20 years. These emerging principles, as well as the more fundamental contract law concepts, will be explored in this unit. Where appropriate, emphasis will be placed on the legal principles applicable in Queensland.

LWN304 Legal Research Methodologies

Anti-requisites	LWN048
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 (Block), SEM-2 (Block) External - SEM-1, SEM-2

This unit is the foundation unit in which students undertaking a post-graduate course work program in the discipline of law begin to deepen their knowledge of approaches to legal research, including quantitative and qualitative research frameworks and methods, and develop advanced research skills. While completing this unit, you will develop a research proposal on a law-related issue chosen by you. If you are completing the Master of Laws or Master of Applied Law, you will complete this unit in preparation for the capstone legal research and writing project unit (LWN600 Professional Research and Writing for Law).

LWN305 Australian Applied Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External

- SEM-1, SEM-2

The unit is core for all students completing the Graduate Certificate in Applied Law (LW76) and the Master of Applied Law (LW75). It is also core for international students completing the Master of Laws (LW71) and the Graduate Certificate in Law (LW72). This unit will assist students' transition into these courses by developing a solid foundation in the Australian common law system with particular emphasis on the Australian legal and constitutional framework. Students in this unit will also acquire skills in scholarly legal writing and doctrinal research, which are necessary to the application of law.

LWN401 General Introduction To Intellectual Property Law

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1 (Block)

The unit serves as an overview of the principal areas of intellectual property in contemporary society and introduces the principles of intellectual property law through a study of the concepts, principles and policies of intellectual property law.

LWN402 Patents and Biotechnological Inventions

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN402
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP2 (Block)

The unit introduces the role of patent law in protecting creative activities in diverse fields of industry and notably in biotechnology and information technology. It focuses upon the workings of the patent system in the contemporary context.

LWN403 Copyright and Related Rights

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN403
Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - 5TP3 (Block)
----------------	--

This unit analyses the complexities of copyright law in the digital age. It introduces the concepts of copyright law and the principles and policies of copyright law. It especially focuses on intermediary liability, the remix and reuse culture, digital rights management and technological protection measures, parody, satire rights and open content licensing.

LWN404 Trade Marks, Domain Names and Geographical Indications

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN404
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 5TP4 (Block)

This unit details the legal protection provided to trade marks under legislation and the common law, introducing the principles of law required for obtaining, maintaining, managing and exploiting a registered trademark under the Trade Marks Act 1995 (Cth).

LWN405 Industrial Designs and Plant Variety Protection

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN405
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP4 (Block)

This unit examines the legal protection provided to industrial designs and new plant varieties under both national and international legislation. It focuses on the increasing economical importance of industrial designs and investigates the various national and international principles of law required for obtaining, maintaining, managing and exploiting industrial designs, and enforcing their protection.

LWN406 Traditional Knowledge and other emerging issues; Interface between Antitrust and IP Rights

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN406
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2 (Block)

The unit details the relationship between intellectual property and competition laws and critically analyses topical issues currently presenting challenges in IP law.

LWN407 Intellectual Property Management

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN407
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - 6TP5 (Block)

This unit examines the principles of IP management and their application in its commercialisation. In examining the concepts of research and development and the principles and policies of technology transfer, focus will be placed on how to best deal with the IP.

LWN408 Research Project

Pre-requisites	LWN401. LWN401 can be studied in the same teaching period as LWN408
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-2

The capstone research project exposes you to a real world intellectual property question and assists you to develop skills in original research, critical analysis and the application of intellectual property law in professional practice.

LWN600 Professional Research and Writing for Law

Pre-requisites	LWN304
Credit Points	24

Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 (Block), SEM-2 (Block) External - SEM-1, SEM-2

This unit is the final semester Capstone unit for the Master of Laws, in which students undertake the research project proposed as part of the foundation unit LWN304 Legal Research Methodologies. The advanced knowledge and research skills developed in previous units are consolidated in this unit. While research projects are individual, students also work collaboratively with their supervisor and other students and develop skills in peer review of research.

LWN801 Insolvency Law and Professional Practice

Anti-requisites	LWN097
Equivalents	LWN184
Credit Points	12
Campus	External
Availabilities	External - 5TP3

This unit covers personal and corporate insolvency, in particular the legal implications of insolvency. It introduces the context of insolvency regulation and discusses what is meant by the word 'insolvent'. It goes on to deal with personal insolvency procedures and liquidation and also addresses the role of secured creditors.

LWN802 Corporate Restructuring Law

Equivalents	LWN185
Credit Points	12
Campus	External
Availabilities	External - SEM-2

The unit will cover areas of insolvency law and practice relating to corporate rescue and restructuring law and practice. It will provide you with both a theoretical and practical perspective of topics relevant to this area of professional practice.

LWN803 Cross Border Insolvency

Equivalents	LWN205
Credit Points	12
Campus	External
Availabilities	External

	- 5TP7
--	--------

The aim of this unit is to introduce insolvency specialists to the essential features of select major insolvency systems and cross-border insolvency regulation, including the UNCITRAL Model Law on Cross-border Insolvency and the European Insolvency Regulation; as well as to enable insolvency specialists to understand Australia's cross-border insolvency law, including the workings of the UNCITRAL Model Law on Cross-border Insolvency as it has been adopted in Australia and selected jurisdictions with which Australia trades, such as the United States, the United Kingdom and New Zealand.

LWN804 Regulatory Issues Impacting Insolvency Practice

Credit Points	12
Campus	External
Availabilities	External - SEM-2

Insolvency practice will invariably be impacted on by a range of other regulatory frameworks. As such, insolvency practitioners need to be aware of the broader legal context in which insolvency laws operate. This unit addresses some key issues that are typical for a range of business and insolvency activities. The aim of this unit is to consider areas of law that intersect with insolvency practice. Specifically, the unit considers the obligations that arise in insolvency in relation to employment law, family law, taxation law and other areas of commercial law.

LWN805 Restructuring, Professionalism and Ethics in Insolvency Practice

Credit Points	12
Campus	External
Availabilities	External - SEM-1

The current trend in insolvency practice is increasingly focused on rescuing the insolvent entity where possible. This unit will provide a detailed discussion of restructuring and turnaround concepts, and a general framework for regulation of the conduct of insolvency practitioners, including ethical frameworks and decision-making.

LWS008 Entertainment Law

Pre-requisites	LWS009 or BSB111 or
----------------	---------------------

Units

	LWB145 or LLB101
Anti-requisites	LWS011
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The entertainment industry involves a myriad of transactions and interactions that are governed by a wide range of laws. A basic understanding of the laws most commonly encountered in the entertainment industry should assist those involved in the industry to have a better understanding of the legal context in which they are operating. This in turn may assist them in avoiding problems, or to have a better appreciation of when they should seek professional legal assistance.

LWS009 Introduction to Law

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is designed for students in disciplines other than law. It provides those students with a solid foundation in the Australian common law system, introducing students to the Australian legal environment and exposing those students to the legal framework in which industry operates. It will also address specific legal issues such as contract law, consumer law, torts and property law.

LWS011 Journalism Law

Anti-requisites	LWS008
Equivalents	KKB175, KKB275
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

It is important that all professionals have a sound working knowledge of the legal considerations that apply to their professional practice. This is especially true for journalists who provide information and commentary for the public good and in the public interest. As such, the study of law is important for you for two reasons. First, the important role journalists play in a democratic society means that journalists are endowed with a public responsibility to engage in sound legal and ethical in practice. Second, the public role journalists play in society means that there is a high level of scrutiny on their actions. Legal transgressions by journalists can prove

costly and painful for journalists, their families, friends, colleagues and employers.

LWS012 Urban Development Law

Equivalents	UDB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides an overview of Australian law as it relates to the disciplines of Construction Management, Urban and Regional Planning and Property Economics. In particular, the unit will introduce students to the Australian legal system with a particular focus on contracts, consumer law, the law of torts, business entities, and property law. This unit will provide the foundation for the study of contracts, planning, management and property transactions in the Urban Development courses.

LWS075 International Business and Law

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1 (Block), SEM-2 (Block) External - SEM-2

This unit deals with the legal problems arising from the formation and operation of international, commercial transactions. Understanding the law and practice regarding international commercial transactions is a prerequisite for the development of Australian export activity.

LWS101 Ethics Law and Health Care

Anti-requisites	LWB145
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1, SEM-2

Nursing practice involves making decisions for, and with, others. An important requirement of such decisions is that they are consistent with nurses' public and professional responsibilities

and that they serve to promote the needs of patient/clients. In short, nursing practice is guided by normative requirements. The basic requirements and considerations are established by law, ethics and professional values. The unit explores the relationship between law and ethics to lay the foundations of understanding of both law and ethics as they relate to healthcare and to your professional practice.

MAB141 Mathematics and Statistics for Medical Science

Anti-requisites	MAN101, MAB101
Equivalents	MAB140
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides you with the essential grounding in mathematical and statistical concepts, methods and analysis of data used in units you will encounter later in your course, and relevant to medical science laboratory data and situations in pharmacy, vision science, biomedical science and medical science.

MAB314 Probability and Stochastic Modelling 2

Pre-requisites	(MAB122 or MXB105) and (MAB210 or MXB101) and Admission into ED59
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes: models for stochastic processes and statistical methods, which have applications in engineering, information technology, finance, and physical and life sciences. Markov chains; random walks; branching processes; queueing processes; long-term behaviour of processes; use of generating functions; bivariate and conditional distributions; transformations of random variables; beta and gamma distributions; mixture distributions; order statistics, minimum and maximum.

MAN200 Advanced Topics in Mathematical Sciences 1

Other requisites	Unit coordinator approval is required to enrol
------------------	--

Units

Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit, which is available to students majoring in Mathematics in the SC60 Bachelor of Applied Science Honours course and the postgraduate MA65, MA75 and MA85 courses, aims to provide a framework for you to undertake advanced level coursework in a specialised topic in the mathematical sciences. You will gain expertise in problem formulation, problem solving, critical thinking, and written and oral communication in an advanced mathematical context.

MAN201 Advanced Topics in Mathematical Sciences 2

Other requisites	Unit coordinator approval is required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit, which is available to students majoring in Mathematics in the SC60 Bachelor of Applied Science Honours course and the postgraduate MA65, MA75 and MA85 courses, aims to provide a framework for you to undertake advanced level coursework in a specialised topic in the mathematical sciences. You will gain expertise in problem formulation, problem solving, critical thinking, and written and oral communication in an advanced mathematical context.

MAN700 Project

Other requisites	Unit coordinator approval is required to enrol
Assumed Knowledge	null
Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit aims to provide a framework for you to apply the mathematically-founded

analytical methods and quantitative techniques learned in other units in the course to real world problems relevant to you. You will gain expertise in problem formulation, problem solving and communication, involving mathematical techniques. Permission to enrol in this unit must be obtained from the Course Coordinator.

MAN717 Minor Project

Other requisites	Unit coordinator approval is required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

Research in the Mathematical and Statistical Sciences can be intellectually challenging and rewarding and generally requires a knowledge base and a range of generic capabilities to be developed to a level that is not normally achieved in a bachelor degree of three years duration. This unit offers you the opportunity to acquire this knowledge and these capabilities. By undertaking a minor research project in a field which is of interest to you, undertaking advanced level coursework in a discipline related to your area of Mathematical interest, or both. Permission to enrol in this unit must be obtained from the Course Coordinator.

MAN765 Bayesian Data Analysis

Pre-requisites	MAB524 or MAN524
Other requisites	Unit coordinator approval is required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This subject builds on the foundations of Bayesian analysis laid in MAN524 to extend modelling and computational approaches to real world problems. Skills in using statistical computing platforms for Bayesian analysis, model development and comparison, and extending computational approaches will be developed. You are encouraged to apply skills to data modelling tasks motivated by

their work or research areas.

MAN771 Computational Mathematics 4

Pre-requisites	(MAB522 or MAN522) and (MAB613 or MAN613)
Other requisites	Unit coordinator approval is required to enrol
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

An essential skill for practicing applied mathematicians and engineers is the derivation and implementation of computational models for solving the equations that govern many of the physical processes encountered in research and industry. Through the investigation of specific case studies developed in Matlab, the derivation of numerical techniques, the implementation of efficient algorithms and the visualisation of the simulation results, students undertaking this unit will develop an understanding of the value of computational mathematics. This unit provides students with the opportunity to employ a number of the skills that they have developed in the discipline of computational mathematics, combining them in a coherent manner for solving topical and relevant real world problems.

MGB200 Leading Organisations

Pre-requisites	BSB115 or CTB115
Equivalents	MGX200
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-1 Gardens Point - SEM-1, SEM-2, SUM

This unit introduces you to a range of perspectives in understanding human behaviour and its context within organisations. The unit enables you to interpret, analyse, evaluate and explain conditions and consequences of work in organisations with a view to understanding and appreciating complex management issues.

MGB201 Contemporary Employment Relations

Pre-requisites	BSB115 or CTB115
Equivalents	MGX201
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit will develop your skills in understanding the effects of both domestic and international legal environments relating to employment relationships. This is important for developing practical, workable business strategies and HRM interventions.

MGB207 Human Resource Issues and Strategy

Pre-requisites	BSB115 or CTB115
Equivalents	CTB207, MGX207
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit provides a broad overview of the role and functions of human resource management (HRM) and explores the contribution of HRM to business performance and quality of work life. This unit gives you a foundation for professional practice in HRM and a practical introduction to the ways that organisations go about aligning the contributions of their people with business goals.

MGB210 Managing Operations

Pre-requisites	BSB115 or CTB115
Equivalents	CTB234, MGX210
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-1 Gardens Point - SEM-1, SEM-2

This unit extends general management approaches to the production operations subsystems of service and manufacturing organisations. The unit focuses on the deployment of productive resources in order to maximise the added value of services and products. Issues of quality and efficiency are considered analytically

in terms of broader strategies and constraints. It considers the opportunities that new technology brings to operational strategies in both manufacturing and service. Project management principles are considered in relation to resource deployment and continuous improvement.

MGB220 Human Resource Decision Making

Pre-requisites	BSB123 or BSB122
Anti-requisites	AMB201
Equivalents	MGX220
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit will develop your knowledge and skills that are necessary for diagnosing problems at work, gathering data and information about these problems, and analysing the data and information to derive solutions and inform decision making.

MGB223 Entrepreneurship and Innovation

Pre-requisites	BSB115 or CTB115
Equivalents	CTB223, MGX223
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-2 Gardens Point - SEM-1, SEM-2

This unit introduces students to the nature and characteristics of entrepreneurship and innovation and explores the inter-relationship between the two within contemporary economies from a managerial perspective. Learning will be directed towards developing the theoretical and applied knowledge, skills, and attitudes that will support and enhance innovation and enterprise creation activity, through the development of a business plan. The unit is designed for those individuals interested in creating a new venture or working in industries as employees of venture owners or those that serve this sector. Students will have opportunity to build a comprehensive plan of their business concept.

MGB225 Intercultural Communication and Negotiation Skills

Pre-requisites	BSB115 or BSB119
Equivalents	IBB205, MGX225
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-1 Gardens Point - SEM-1, SEM-2

The course develops students' abilities to identify and resolve problems in cross-cultural communication or negotiation situations where cultural differences have created misunderstandings or undesirable or unexpected outcomes. It first explores the concept of 'national culture' by considering the work of major theorists of cultural value dimensions - from Hall to Schwartz. Students are encouraged to analyse communication/negotiation process issues in terms of these value dimensions and to practise managing the process of communication/negotiation to improve their outcomes.

MGB305 HRM Strategy and Policy

Pre-requisites	MGB314
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is the capstone of the HRM extended major. The primary objective is to integrate HR concepts and issues into the wider business and environmental context; a range of historical features, professional and ethical matters are considered; policy development and evaluation is examined; an experiential approach based in cases and/or simulations is adopted.

MGB306 Independent Study

Other requisites	Subject to Unit Coordinator Approval. Students must complete at least 96 credit points of approved study to be considered for enrolment in this unit.
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point

Units

Availabilities	Gardens Point - SEM-1, SEM-2, SUM
----------------	---

This unit enables students to demonstrate an ability to direct their own learning, a key competence for professionals who must keep themselves up-to-date in their area of expertise. Either individually or in small groups, students undertake one or several learning activities with the approval of a supervisor and the unit coordinator. Appropriate activities include extended literature review, research paper, practical project and report, practicum (work placement) and report, or an alternative deemed acceptable by the supervisor and unit coordinator.

MGB309 Strategic Management

Pre-requisites	MGB200, MGB211, CTB211, MGB222, or CTB232
Anti-requisites	MIB314
Equivalents	MGX309
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture - SEM-2 Gardens Point - SEM-1, SEM-2

In this unit fundamental elements of strategy, which can be used in the decision making process, are placed in a framework that is developed within the particular context of Australia's economic development position. The emphasis is upon process and content issues that affect the strategic performance and positioning of the organisation. This involves creating an understanding of the universal building blocks of competitive advantage at the business, corporate and international levels. By understanding the nature and determinants of competitive and strategic advantages, students should enhance their professional competences to be able to take a more strategic and critical perspective.

MGB310 Sustainability in A Changing Environment

Pre-requisites	MGB200, MGB211, CTB211, MGB222, or CTB232
Anti-requisites	MGB334, CTB334, MGB212
Equivalents	MGX310
Credit Points	12
Campus	Caboolture and Gardens Point
Availabilities	Caboolture

This information is correct as at 30/11/2016. For the most up-to-date course information, visit <http://www.student.qut.edu.au/study/units/>. CRICOS No.00213J

- SEM-2 Gardens Point - SEM-1, SEM-2

This unit provides participants with an opportunity to investigate selected and critical issues in the relationship between business activity and the imperative of creating sustainable futures. The unit draws on interdisciplinary sources to encourage the development of a systemic view that incorporates global, corporate, and personal levels of analysis. The unit prepares participants to make a significant contribution to the sustainable development of organisations and society. The unit will be of value to business and non-business students seeking careers in private, public, and not-for-profit sectors.

MGB314 Organisational Consulting and Change

Pre-requisites	MGB200
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Managing change is a fundamental skill required by prospective managers and professionals. This unit provides opportunities for students to develop a theory in practice orientation to consulting to individuals, groups, and organisations. Hence content theory and process theory is addressed. The focus of this unit is on human process issues and change. The unit examines a range of human process interventions designed to improve organisational effectiveness. Attention is also given to change strategies that are socially and culturally inclusive. Graduates of this unit should be able to be productive members of organisational change teams.

MGB320 Recruitment and Selection

Pre-requisites	MGB339
Equivalents	MGX320
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit examines the most effective techniques for recruiting and selecting the best people for organisations, in the context of current pressures on attracting and keeping skilled, talented people in the workforce. Commonly used recruitment

and selection techniques are covered, emphasising the validity and reliability of each technique, to enable the best strategies to be developed.

MGB324 Managing Business Growth

Pre-requisites	MGB223 or MGB227
Equivalents	MGB218, MGX324
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1 Caboolture - SEM-1

This unit is designed to provide skills in the analysis, solutions and implementation of the general management issues that SME owners have to manage in their growing operations. The unit brings together the different functional aspects of managing an established SME and how they are best managed from the owner's (general manager's) point of view. It also provides opportunity to bring students into contact with real world SME owners and their venture management issues.

MGB331 Learning and Development in Organisations

Pre-requisites	MGB200
Equivalents	MGX331
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit is designed to equip you with the skills and knowledge to meet strategic organisational human resource development requirements. The unit explores learning and development concepts and approaches and the role of learning and development as a strategic partner to management. You will learn how to design, implement and evaluate systems for learning in organisations as part of a strategic approach to human resource development.

MGB335 Project Management

Pre-requisites	(MGB210 and MGB309) or (MGB210 and AMB303)
Anti-requisites	KXB202

Units

Equivalents	MGX335
Credit Points	12
Campus	Gardens Point and Caboolture
Availabilities	Gardens Point - SEM-1, SEM-2 Caboolture - SEM-2

This unit develops knowledge in the areas relating to effective management of projects (as distinct processes). This knowledge is gained by focusing on the central issues of project selection, modelling, planning, control and evaluation. Case study projects are used throughout the unit and are mainly from the services industry sector. The unit seeks to develop the technical skills (tools and techniques) as well as the people (behavioural) skills needed for effective management of projects.

MGB338 Workplace Learning

Other requisites	An application, interview and subsequent approval by the unit coordinator is required to enrol, in addition to the completion of a minimum of 192 credit points of study and a GPA of 4.0 or higher
Assumed Knowledge	null
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit entails a structured program of workplace learning in which you are exposed to a variety of organisational issues. For the duration of your placement, you will work on a specific HRM or Management project of relevance to the host organisation. Building upon knowledge acquired in the relevant major, students' exposure to HRM/Management in an actual organisational setting will enhance understanding of the links between theory and practice and develop skills and abilities through a professional learning experience.

MGB339 Performance and Reward

Pre-requisites	MGB201 or MGB207
Equivalents	MGB221, MGX339
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will provide you with the basic competencies expected of HR practitioners in managing performance and reward/compensation systems, which are among the most important strategies used by organisations to support competitive advantage. Performance and Reward Management is a key functional area of HRM and it is imperative that you understand the strategic framework within which these decisions are made.

MGB340 International Business in the Asia-Pacific

Pre-requisites	MGB225
Equivalents	MGX340
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Australia is situated in the fastest growing region in the world - the Pan-Pacific rim. The aim of this unit is to meet the needs of future business professionals working internationally and particularly within the Pan-Pacific region, to understand the nature of this region's business environment.

MGB341 Operational Risk Management

Pre-requisites	MGB210 or MGB309
Anti-requisites	IBB306
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit aims to develop student competencies in analysing risk management issues in national and international contexts and build a strong appreciation of managing organisational uncertainty in the current global environment. It introduces conceptual and practical applications of risk management techniques used in private and public organisations by combining lectures with practical 'hands-on' workshops. The unit examines: conceptual bases of risk management; international, national and sub-national regulatory frameworks; corporate risk management in international firms; business continuity

planning; security risk management; emergency response planning; managing crises in organisations; participatory 'desktop' simulations of crisis decision making.

MGB355 Managing Technology, Innovation and Commercialisation

Pre-requisites	MGB223 or LSP127
Anti-requisites	BSB311
Equivalents	MGX355
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit focuses on managing technology, knowledge and innovation within organisations and how to build innovative capabilities. Students study strategies and approaches used in technology and knowledge intensive industries and government organisations for the research, development and commercialisation of innovations. The unit offers the opportunity to develop knowledge and skills to manage and commercialise technologies and innovations.

MGB370 Personal and Professional Development

Pre-requisites	MGB331 and BSB124
Equivalents	MGB315, MGX370
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit develops personal, interpersonal and team skills that distinguish outstanding human resource, management and other professionals. Recent literature has identified the need for professionals to acquire knowledge in the areas of self management and the management of others to contribute to organisational performance. To achieve this, Personal and Professional Development is positioned at the conclusion of the course to build upon concepts learned in introductory and intermediate units with a strong focus on the application of theory to practice.

MGN409 Management Theory and Practice

Anti-requisites	GSN401 and GSZ401
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit examines the following: the functions and roles of managers; concepts and principles and their practical applications; the key management functions; areas of planning, organising, staffing, directing and controlling; production/operations management and the management of quality; entrepreneurship and business planning; and important problems, opportunities and trends facing managers in Australia analysed from the viewpoint of relevant academic disciplines.

MGN410 Employment Relations

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit looks at the following: employment relations; employee and union action; the role of governments and industrial tribunals; alternative methods and pressures to change traditional Australian systems; the Australian system of labour management relations; systems of regulation in the employment area; negotiating skills; and the resources required for mobilising change in this area.

MGN412 Organisational Behaviour

Anti-requisites	GSN409, GSN419 and GSZ409
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit provides a broad understanding of organisational behaviour as a base for future study and practice of management. It moves from a micro-perspective on individual behaviour through the interface between the individual and the organisation to overall characteristics of

organisations which shape the behaviour of their members. The aim is to provide an understanding of why employees feel and act the way they do in organisations and considers methods for enhancing positive employee attitudes and behaviours and organisational effectiveness. The emphasis is on understanding basic assumptions and models, major theoretical issues, methods of measurement and practical implications.

MGN421 Strategic HRM

Pre-requisites	MGN506 and 84cp of other MGN units
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

HRM is concerned with the relationship between people management strategies and organisational goals and objectives. This capstone unit provides HRM students with the opportunity to apply their learning to this relationship in a systematic way. It requires them to produce high quality HRM advice that provides direction for practicing line managers consistent with organisational goals and objectives. The learning strategies in the unit challenge students to identify contemporary issues of organisation and management and to interpret these using the paradigms of HRM.

MGN423 Contemporary Strategic Analysis

Anti-requisites	BSN407 and MGN504
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit focuses upon developing managers' understanding of the strategy concept and placing the fundamental elements of strategy in a framework for use in the decision making process. Taking the perspective that many managers make decisions that can have strategic implications, the emphasis is upon studying those issues that can affect the strategic positioning of the organisation. This involves creating an understanding of the universal building blocks of competitive advantage at the business, corporate and international levels. By understanding the nature and

determinants of competitive and comparative advantages, students will be well positioned to take a more strategic perspective in their organisational activities.

MGN428 Creating New Ventures

Anti-requisites	GSN410, GSZ410, MGN534
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

Creating New Ventures is designed to introduce postgraduate students to the field of entrepreneurship and the development of new business. Students will acquire an integrated understanding of the dimensions of business for the purposes of opportunity recognition and viability screening to promote sustainable competitive advantage, and develop a sound business model for a new enterprise.

MGN431 Strategic Human Resource Development

Pre-requisites	MGN440
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Strategic HRD provides a theoretical and practical framework for planning and implementing HRD within today's organisations. It examines the critical theoretical approaches underpinning learning and skills development and relates these in a practical way to the HRD challenges faced by organisations. This unit also provides exposure to contemporary international HRD ideas and practices to develop an understanding of the contribution of HRD to the broader economic context.

MGN433 Managing High-Performance Organisations

Pre-requisites	MGN409
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Managing High-Performance

Organisations is designed to provide a bridge between HRM-discipline specific and strategic/general management perspectives. The unit is therefore a centrepiece of the postgraduate HRM program. The unit serves the vitally important role of locating HRM in to its broader organisational and general management context. It also aims to develop advanced level business knowledge and skill and develop conceptual frameworks for integration and high level impact of HRM with business success and performance.

MGN440 HRM Theory and Practice

Anti-requisites	MGN427
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit examines the interplay between human resource management policies and processes and their contribution to sustainable competitive advantage and organisational effectiveness. HRM is considered from stakeholder, strategic and functional perspectives and an open systems model is used to introduce key processes and practices. The unit fosters discipline knowledge, analytical and action taking competencies and prepares students for advanced study in the field.

MGN441 Leadership and Executive Coaching

Anti-requisites	GSN620, GSN621, GSZ620, GSZ621
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

One-to-one executive coaching has emerged as a popular and powerful intervention for improving the performance and satisfaction of individual executives. More recently, its use has been expanded into a variety of related organisational interventions. Human resource professionals are often responsible for making decisions about how coaching is used in organisations, particularly in relation to leadership development. This unit will equip students with expertise in understanding how leadership and executive coaching intersect in organisations. It will cover the theoretical foundations and models of

evidence-based executive coaching, give opportunities to acquire and practice foundational coaching skills, as well as provide feedback for self-development.

MGN442 Self Leadership

Anti-requisites	BSN201, GSN620, GSN621, GSZ620, GSZ621
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

In the contemporary business environment professionals are empowered to manage their own growth and development in order to facilitate meaningfulness in organisational life. The unit on Self-leadership is an elective in the HRM major and is delivered predominately in an 'on-line' mode to enable an 'anytime' and 'anywhere' approach to your self-development work. This approach invites you to take the necessary time to reflect and develop greater insight into your own thinking and behaviour.

MGN443 Talent Management

Anti-requisites	MGN429
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Australia's growing skills shortage and the prospect of an ageing workforce threaten the sustainability, productivity and growth of many industry sectors. These pressures have made talent management a strategic priority for many organisations. At its heart, talent management is simply a matter of anticipating the need for human capital and then developing a plan to meet it. However, the adaptive capacity of traditional workforce planning methods appears inadequate for today's uncertain business environment. This unit examines talent management as an alternative to traditional HR planning practices. It focuses on developing both a theoretical framework to guide talent management initiatives and applied skills (e.g. identification of critical roles, workforce analysis) required to develop a talent management plan.

MGN444 Business in Asia

Equivalents	MGX444
-------------	--------

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The aim of this unit is to enable an intensive study of business and markets in Asia. The development of the major industries is examined, together with major intra-regional patterns of trade, commerce and finance. Significant economic, political and social factors determining developments are focused on, as well as regulatory restraints governing market access. Students are required to undertake a project that requires the application of knowledge of the region to a business issue.

MGN445 Business in Europe

Equivalents	MGX445
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit enables a more intensive study of business and markets in Europe. The development of the major industries will be examined, together with intra-regional patterns of trade, commerce and finance. A particular focus will be the development of a single European market and its international implications. Significant economic, political and social factors determining developments will be focussed upon, as well as regulatory restraints governing market access. The student will be required to undertake a project which requires the application of knowledge of the region to a business issue.

MGN446 Business in Australia

Equivalents	MGX446
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit introduces international students to the business environment in Australia. Students examine the geographical, historical, socio-cultural, political, regulatory, demographic, economic, legal, locational and other factors that have influenced, or still impinge upon, doing business in Australia in the current international environment.

MGN447 Managing in a Globalised Economy

Equivalents	MGX447
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This core unit examines the forces of globalisation, the diversity of international environments and their impact on business functions at the operational level. It examines the processes and challenges of internationalising the business operation as firms strive to compete successfully in the global marketplaces. Areas of study include the growth of international business and globalisation, international business motives and forms, the nature and challenges of the diversity of environments, and managing and controlling business operations.

MGN448 Negotiating Across Borders

Anti-requisites	GSN462
Equivalents	MGX448
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit develops students' skills in negotiating intra- and inter-culturally. It provides students with a tool-box of negotiation skills and then explores the relationship between cultural value dimensions and negotiating behaviours. Students practise their negotiating skills with members of their own culture, in cross-cultural dyads and in multi-cultural teams to build confidence and capability in negotiating and influencing.

MGN505 Consulting and Change Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit considers the origins, nature and effect of social change on individuals, organisations and communities. Theories and models of change are used to explore planned and unplanned changes currently occurring, particularly as these

relate to possible futures. Emphasis is on the strategies and skills required to initiate and participate in effective change management.

MGN506 Contemporary Issues in Human Resource Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The main objectives of this unit are to identify, analyse and report on contemporary issues in HRM and to research information relevant to identified topics. The content may vary according to which issues are current or predictably important in the future. Special expertise of staff, visiting scholars or distinguished HRM professionals may be utilised.

MGN509 HRM Project 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of human resource management.

MGN510 HRM Project 2

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit provides the opportunity for students to undertake an approved project to develop and enhance learning associated with the coursework elements of human resource management.

MGN534 Contemporary Issues in Entrepreneurship

Anti-requisites	MGN428
Equivalents	GSN234
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit introduces the students to the

field of entrepreneurship research and the problems, theories and methods that are prevalent in (empirical) research on entrepreneurship. Students learn to "know the field" including its historical development; its "infrastructure" of journals, conferences and research centres, and its contemporary research questions and approaches. The students will develop an ability to assess the strengths and weaknesses of the field and gain insights into where and how they can contribute to its research frontier.

MGX200 Leading Organisations (Outbound Exchange)

Equivalents	MGB200
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX201 Contemporary Employment Relations (Outbound Exchange)

Equivalents	MGB201
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX207 Human Resource Issues and Strategy (Outbound Exchange)

Equivalents	MGB207
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX210 Managing Operations (Outbound Exchange)

Equivalents	MGB210
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX220 Human Resource Decision Making (Outbound Exchange)

Equivalents	MGB220
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX223 Entrepreneurship and Innovation (Outbound Exchange)

Equivalents	MGB223
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX225 Intercultural Communication and Negotiation Skills (Outbound Exchange)

Equivalents	MGB225
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX309 Strategic Management (Outbound Exchange)

Equivalents	MGB309
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX310 Sustainability in a Changing Environment (Outbound Exchange)

Equivalents	MGB310
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX320 Recruitment and Selection (Outbound Exchange)

Equivalents	MGB320
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX324 Managing Business Growth (Outbound Exchange)

Equivalents	MGB324
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX331 Learning and Development in Organisations (Outbound Exchange)

Equivalents	MGB331
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX335 Project Management (Outbound Exchange)

Pre-requisites	(MGB210 and MGB309) or (MGB210 and AMB303)
Anti-requisites	KXB202
Equivalents	MGB335
Credit Points	12
Campus	External
Availabilities	External - XCH-2

MGX339 Performance and Reward (Outbound Exchange)

Equivalents	MGB339
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX340 International Business in the Asia-Pacific (Outbound Exchange)

Equivalents	MGB340
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX341 Operational Risk Management (Outbound Exchange)

Pre-requisites	MGB309
Anti-requisites	IBB306
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX355 Managing Technology, Innovation and Commercialisation (Outbound Exchange)

Pre-requisites	MGB223 or LSP127
Anti-requisites	BSB311
Equivalents	MGB355
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX370 Personal and Professional Development (Outbound Exchange)

Equivalents	MGB370
Credit Points	12
Campus	EXCHANGE and External
Availabilities	External - XCH-1, XCH-2

MGX444 Business in Asia (Outbound Exchange)

Equivalents	MGN444

Availabilities	External - XCH-1, XCH-2

MXB100 Introductory Calculus and Algebra

Anti-requisites	MAB125,MZB125
Equivalents	MAB100,MAB120,MAB180

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit extends high school calculus as well as introducing concepts and skills in matrices, vectors and complex numbers. This unit addresses the need of some students for additional preparation in their transition from high school to university, particularly those who have not studied Queensland Senior Mathematics C or equivalent. Students completing the Bachelor of Mathematics may choose to study this unit as an "Option unit" only.

MXB101 Probability and Stochastic Modelling 1

Equivalents	MAB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides you with an introduction to probability and shows you how to apply its concepts to solve practical problems. The unit will lay the foundations for further studies in statistics, operations research and other areas of mathematics and help you to develop your problem-solving and modelling skills. The topics covered include: basic probability rules, conditional probability and independence, discrete and continuous random variables, bivariate distributions, central limit theorem, goodness-of-fit tests, introduction to Markov chains.

MXB102 Abstract Mathematical Reasoning

Equivalents	MAB461
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit establishes the foundations of abstract mathematical reasoning. It introduces the view of mathematics as axiomatic and emphasizes the role of proof in mathematics. The unit explains foundational tools such as logic and sets to develop number systems, elementary number theory, and algebra. The importance of these techniques is demonstrated with applications in algorithmic analysis and public key cryptography. The tools established in this unit will serve as a foundation

throughout your mathematics studies.

MXB103 Introductory Computational Mathematics

Equivalents	MAB220
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops your knowledge, skills and application of computational methods and techniques for solving real world problems using computers. The units focuses on both theoretical development of computational methods and their practical implementation using the world-leading computational software MATLAB. The fundamental skills you acquire will be essential throughout your degree. More advanced study in this area is provided in the Applied and Computational Mathematics major.

MXB104 Symmetry, Chaos and Fractals

Pre-requisites	MXB103 or MAB220. MXB103 can be studied in the same teaching period as MXB104
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces advanced topics to first year mathematics students. The emphasis is on discovering the beauty and wonder of mathematics without high level calculus. Discrete dynamical systems are used to illustrate key features of mathematical modelling and to unlock the mysteries of chaos and fractals. Complexity and pattern formation will be explored with the use of the mathematical programming language Matlab. Students may choose to study this unit as an "Option unit" in the Bachelor of Mathematics.

MXB105 Calculus of One and Two Variables

Equivalents	MAB111, MAB121, MAB131, MAB182
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

Units

- SEM-2

This unit introduces you to university level single variable calculus and simple multivariable calculus, building on prior assumed knowledge equivalent to high school differential and integral calculus. Topics include continuity and differentiability of functions, differential calculus (single and multi variable), Taylor series, integral calculus (single and multi variable). Multivariable and vector-valued functions are introduced and explored and natural extensions of the concepts of differentiation and integration to such functions are developed and investigated. This unit builds fundamental skills for you to transition to second year units and the majors, including applications of interest in each Major area of study.

MXB106 Linear Algebra and Differential Equations

Anti-requisites	PVB202
Equivalents	MAB112, MAB122, MAB132
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to university level linear algebra and ordinary differential equations. Linear algebra, assumed knowledge for this unit, is extended with you investigating non-square linear systems of equations and the Eigenvalue problem. Differential equations, also assumed knowledge for the unit, are investigated in more detail including exposure to second order equations. This unit builds fundamental skills for you to transition to second year units and the Majors of the Bachelor of Mathematics, including applications of interest in each major area of study.

MXB107 Statistical Models for Data: Relationships and Effects

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Describing and understanding relationships in data is important in both scientific exploration and understanding. Building on methodology from prior studies in probability and stochastic modelling, this unit focuses on the statistical modelling of data with an emphasis on relationships and effects for

purposes of statistical inference, prediction and validation. Attention is also given to the challenges that analysing real-world datasets pose with alternative statistical techniques which yield the valid inference. This unit provides an introduction to some of the advanced material covered in the latter parts of the Statistical Science major.

MXB161 Computational Explorations

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with a practical understanding of computer-based solutions to scientific problems from a wide range of interdisciplinary application areas. You will have the opportunity to develop computing and visualisation skills and apply these to solve real problems involving topics such as image and sound processing, fractals and random walk simulations. These skills are developed further in later semesters, where there are opportunities to study MXB262 (Visualising Data), MXB362 (Advanced Visualisation and Data Science), and MXB261 (Modelling and Simulation Science).

MXB201 Advanced Linear Algebra

Pre-requisites	(MXB102 or MAB461) and (MXB106 or MAB112 or MAB122)
Equivalents	MAB312
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The main aim of this unit, which is intended for students majoring in mathematics and students in other courses who require the foundations of linear algebra, is to develop the theory of linear algebra and to provide you with the necessary skills to apply this theory in science, technology, engineering and mathematics. It seeks to foster an appreciation of the historical development and the value of the principles and methods presented. You will also be well prepared for later studies in computational mathematics.

MXB202 Advanced Calculus

Pre-requisites	(MXB105 or MAB111 or MAB121) and (MXB106 or MAB112 or MAB122)
Equivalents	MAB311
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Studying this unit will allow you to develop further the ideas and techniques that were studied in first year calculus. Advanced calculus allows you to consider more realistic applied mathematics problems that are set in the context of our multivariable world. The unit prepares you for later studies in applied and computational mathematics such as partial differential equations, transport theory and fluid dynamics. This unit covers topics including multivariable functions and coordinate systems, vector-valued functions, differential and integral calculus of multivariable functions, and related applications.

MXB221 Ordinary Differential Equations

Pre-requisites	MXB105
Equivalents	MAB413
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Differential Equations are essential tools for developing real world mathematical models. This unit extends the knowledge and skills related to differential equations that you have already acquired in introductory calculus, differential equations and linear algebra. You will develop the ability to model real world phenomena using ordinary differential equations. You will also acquire a wide range of methods and techniques for solving these equations, and interpreting the results. This unit also provides a framework for studying partial differential equations in later years.

MXB222 Computational Linear Algebra

Pre-requisites	MXB103 and MXB201
Equivalents	MAB420
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens

Point
- SEM-2

This unit combines and extends your knowledge and skills acquired in introductory computational mathematics and earlier studies in linear algebra. The focus is on deriving, solving and analysing structured linear systems of equations, such as those that arise from the discretisation of boundary value problems in one and two spatial dimensions. Algorithms and data structures that facilitate the efficient solution of such systems are developed and implemented in MATLAB. This unit develops your computational skills to the level required for the final semester capstone project.

MXB231 Financial Mathematics

1

Equivalents	MAB313
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Finance is an area in which mathematics is heavily utilised. Understanding the fundamental principles involved will provide an essential tool for those who intend to pursue further studies or careers in the financial area. The finance sector, which includes banks, insurance companies and investment houses, is currently a growing area of employment for graduates with a financial mathematics background. The aim of this undergraduate unit is therefore to provide you with an introduction to the methods used in obtaining relevant solutions to financial and business problems. In this unit, you will apply tools from calculus and algebra in financial contexts. Topics covered include: Compound, nominal and effective interest rates; valuation of immediate annuities and their applications; valuation of money and fixed interest market securities; project evaluation using quantitative techniques in economics and finance.

MXB232 Operations Research 1

Pre-requisites	MXB101 and MXB106
Equivalents	MAB315
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Operations research (OR) techniques are used in industries that apply scientific methods in decision making, especially for the allocation of limited resources. These industries need graduates who can apply techniques from mathematical modelling, statistical analysis, and mathematical optimization to decide how to best solve a particular problem using appropriate computer software packages. Building on earlier studies in mathematical modelling, this unit develops a number of basic OR techniques to solve generic problems and studies the theoretical foundations of these techniques. You will learn to apply various OR methods, algorithms and techniques in the solution of practical, real-world problems. This unit leads to study of more advanced OR problem solving techniques in 3rd year. Topics covered include: The general nature of OR, fundamentals of linear programming, network analysis, project scheduling, transportation problems, transshipment problems and assignment problems.

MXB241 Probability and Stochastic Modelling 2

Pre-requisites	MXB101 and MXB105
Equivalents	MAB314
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

It is important to develop skills and knowledge in both statistics and mathematics. Building on the methodology and skills developed in previous studies in probability and stochastic modelling, this unit provides formal statistical tools such as stochastic process models and statistical methods for theoretical and applied development in a wide range of areas, from communication systems and networks to traffic to law to biology to financial analysis linking with other modern areas of mathematics. The skills developed in mathematical statistics will be integral in the understanding of material throughout the student's studies in statistics and mathematical modelling.

MXB242 Regression and Design

Pre-requisites	MXB107
Equivalents	MAB414
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is intended for students who have completed foundation studies in statistics and who wish to develop further skills in applied information analysis. Its exploration of regression, including consideration of covariates, model selection, sampling theory and experimental design will be of interest to students undertaking the mathematics course as well as students in other disciplines who need to quantitatively summarise and analyse data and/or collect data through controlled experiments. The focus is on the application of the theoretical building blocks that are constructed as part of the unit and this is enhanced by the introduction to and extensive use of mathematical and statistical software packages such as the R-package. The unit leads to further study for students who wish to obtain a strong background in applied information analysis.

MXB251 Number Theory and Abstract Algebra

Pre-requisites	MXB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Number theory is one of the oldest areas of mathematics and remains among its most important. Not only does number theory underlie most further study in pure mathematics, it has in recent years become an essential tool for securing and modelling communication in our digital world. As the understanding of number theory advanced over the centuries, many of its ideas were abstracted into various types of algebraic structures that have surprising applications throughout mathematics, physics, and computer sciences. This unit will investigate advanced ideas, methodologies, and techniques in number theory and algebra and apply these ideas to information security via cryptography. This unit will build upon the algebra content and proof skills from earlier studies in abstract mathematical reasoning and can lead to future study in other areas of discrete mathematics and cryptography.

MXB261 Modelling and Simulation Science

Equivalents	INB360, MAB480
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit aims to provide you with the knowledge to apply computational techniques used for simulations (and visualisation) in a selection of application areas where the scientific problems are characterised by widely varying scales, both in space and time. Through this study you will be able to demonstrate knowledge of the development and implementation of simulation algorithms. You can further develop your knowledge of visualisation through units MXB262 (Visualising Data) and MXB362 (Advanced Visualisation and Data Science), as well as extending your knowledge of computational science through the unit MXB361 (Aspects of Computational Science).

MXB262 Visualising Data

Pre-requisites	MXB161 or MXB261 or MZB126
Equivalents	MAB481
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces students to data visualisation concepts and techniques, along with practical experience in the use of modern day data visualisation software tools to allow students to explore complex systems and dynamically visualise simulations. These skills can be developed further in a later semester through an advanced visualisation unit (MXB362 Advanced Visualisation and Data Science).

MXB321 Applied Transport Theory

Pre-requisites	MXB202 or MAB311
Co-requisites	MXB322
Equivalents	MAB521
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

- SEM-1

Applied Transport Theory is the study of the exchange of mass, momentum and energy in physical systems. An understanding of the equations that govern these transport phenomena is fundamental to understanding how the physical world behaves. This unit builds upon knowledge you will have developed in studies of advanced calculus. You will learn how to derive equations from fundamental conservation laws and develop an understanding of the commonality between the equations. Furthermore, in deriving analytical solution techniques for these equations you will develop further skills in calculus and differential equations. Completion of this unit will prepare you for the final semester capstone project.

MXB322 Partial Differential Equations

Pre-requisites	MXB221 or MAB413
Equivalents	MAB613
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Previously you have discovered the power of differential equations for modelling real world processes. In this unit you will extend your capabilities to problems that simultaneously exhibit both spatial and temporal variation. Such problems can be described by partial differential equations. You will learn a variety of analytical solution techniques for these equations, which bring together many of the skills you have learned in earlier study of advanced calculus and ordinary differential equations. You will also learn the techniques of Fourier and complex analysis, which have applications far beyond the realm of differential equations.

MXB323 Dynamical Systems

Pre-requisites	MXB221 or MAB413
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

"Dynamical Systems" is a descriptive term used to represent the analysis of time varying systems. Such systems exhibit a variety of behaviours including

exponential approaches to equilibrium states, periodic or oscillatory solutions, or unpredictable chaotic responses to simple inputs. The study of dynamical systems employs topological and function space concepts to provide the analytic structure to systems of nonlinear (and linear) ordinary differential equations, and as such forms the basis for the mathematical interpretation and understanding of numerous real world systems. This unit is an exploration of the more technical aspects of the theory of solutions to systems of ordinary differential equations and as such builds on your prior understanding of such equations while providing the support for the exploration of an exciting area of modern mathematics.

MXB324 Computational Fluid Dynamics

Pre-requisites	MXB222 or MAB420
Equivalents	MAB522
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This capstone unit provides students with the opportunity to apply their knowledge and skills in applied and computational mathematics to simulate complex real-world problems. Students will be presented with several real-world case studies, which will involve model formulation, examining the impact of varying model parameters, and formulating and presenting recommendations for the best course of action to take based on model predictions. Your previous learning in deriving and solving partial differential equations that describe transport phenomena will be extended to include numerical methods of solution. Combined with the computational expertise you have acquired over your degree, you will be able to formulate and solve these complex mathematical models using MATLAB.

MXB332 Operations Research 2

Pre-requisites	MXB232 or MAB315
Equivalents	MAB525
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

Point
- SEM-1

Operations research techniques are used in numerous industries and are critical for decision making. These industries need graduates who can apply techniques of mathematical modelling, statistical analysis, mathematical optimization and simulation and can implement these techniques using appropriate computer software packages. This unit will build upon the content of MXB232 by introducing more advanced "intermediate" level operations research methods and techniques. The topics addressed in this subject are vital in this field and are critical for advanced applications and studies in this field. Topics covered include: model building in mathematical programming, modelling language - OPL, integer programming and branch-and-bound method, introduction to inventory theory, dynamic programming; and computer solutions of advanced linear programming problems and their analysis.

MXB334 Operations Research 3

Pre-requisites	MXB232 or MAB315
Equivalents	MAB625
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds upon the content of MXB232 and introduces stochastic operations research techniques and other more advanced techniques. This unit will develop and manipulate mathematical and computer models of complex systems composed of people, machines, money and their operating procedures. You will also look at the applications of operations research techniques to solve real-world problems using computer software packages. The topics addressed in this subject are vital in this field and are critical for advanced applications and post-graduate studies in this field. Topics covered include: decision analysis; queuing theory; simulation and real life case studies; implementation of heuristic techniques; meta-heuristics; recent developments in stochastics for operations research.

MXB335 Operations Research 4

Pre-requisites	MXB232
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens

Point
- SEM-2

Operations research techniques are used in numerous industries and are critical for solving the complex decision problems that companies face. This unit introduces both theoretical concepts and their applications to tackling practical problems. It will cover advanced operations research methods and techniques.

MXB341 Statistical Inference

Pre-requisites	MXB241 or MAB314
Equivalents	MAB524
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces advanced statistical inference techniques that are important tools in describing data and developing models. Indeed, such methods are essential when drawing conclusions from a data generation process that is subject to random variability. The theoretical and computational inferential methodology will be developed through software packages such as MATLAB and the R-package. This unit provides the statistical basis for the honours and postgraduate units in statistics.

MXB342 Statistical Techniques

Pre-requisites	(MXB101 or MAB210) and (MXB242 or MAB414)
Equivalents	MAB533
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

In an information society there is an increasing range and variety of workplaces in which data and statistical analyses are important in enabling good management and decision-making. This unit will introduce a range of statistical techniques in usage in a variety of disciplines including how to plan experiments, how to model survival data and also how to manage large data sets. This will provide you with the skills to analyse data sets from a variety of areas in industry and government, such as health science and marketing research, and to also critically evaluate procedures, methods and

inferences. You will be exposed to a range of computing packages such as MATLAB and the R-package.

MXB343 Modelling Dependent Data

Pre-requisites	(MXB242 or MAB414) and (MXB341 or MAB524)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

For data that arise in business, economics, engineering, agriculture and health it is often unreasonable to assume independence of values. Data collected in clusters, or spatially or through time or a combination of these often show strong dependence that cannot be ignored for efficient inference. The ability to understand, model and make inferences about such data is therefore of great practical importance. Further, such skills are integral in the precise prediction of future observations and in the understanding of causal relationships between variables. This unit extends methodology from earlier studies in statistics through building statistical models for dependent data for practical applications such as optimal forecasting, simulation, causality analysis and in understanding spatial and temporal trends and dependencies.

MXB344 Modelling Non-Normal Data with Generalised Linear Models

Pre-requisites	MXB242 or MAB414
Equivalents	MAB624
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This capstone unit for the Statistical Sciences major provides methods for investigating relationships between variables that arise in data from a variety of areas including science, technology and commerce. You will partake in independent and guided learning exercises to tackle common challenges encountered in applied data analysis. The unit is designed such that it provides you with the opportunity to integrate knowledge and skills from their entire course in preparation for a career in

statistics. There is also a focus on the clear communication and reporting of results and conclusions from statistical analyses. You will undertake this learning experience through the use of the SAS computing environment.

MXB351 Coding Theory and Graph Theory

Pre-requisites	MXB102 and MXB106
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Discrete mathematical structures play an important role in a variety of applications. This unit focuses on two related areas of discrete mathematics: coding theory and graph theory. Coding theory applies algebraic techniques to ensure reliable communication of digital information. Graph theory models relationships between discrete objects. It is useful for analysing networks in communication, transportation, and computation, and is a starting point for tackling a large number of optimization problems. This unit will introduce and investigate the theory of these two areas, and examine their applications to a variety of computational problems. This unit builds on the basic structures and techniques from abstract mathematical reasoning and linear algebra. Techniques from graph theory support combinatorial optimization algorithms in operations research and decision science.

MXB361 Aspects of Computational Science

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit comprises a number of computational science modules from a variety of disciplines within the Science and Engineering Faculty. It allows students to develop computational techniques applied to a selection of application areas such as computational statistics, computational chemistry, computational physics, computational biology, environmental science and machine-learning. This unit further develops your skills in computational problem-solving, building on work that may have been previously undertaken in

MXB161 "Computational Explorations", MXB261 "Modelling and Simulation Science", and MXB262 "Visualising Data".

MXB381 Research Project

Pre-requisites	MXB381-1, MXB381-1 can be studied in the same teaching period as MXB381-2
Equivalents	MAB687-2
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit provides you with an opportunity to undertake a research project under the supervision of either an academic staff member or an industry partner (or both). You will apply your mathematical and statistical training to contribute to the advancement of knowledge in a problem of contemporary and/or industrial interest. This unit provides an excellent preparation for, and introduction to, the type of research undertaken in Honours and Higher Degree Research studies.

MXB381 Research Project

Equivalents	MAB687-1
Other requisites	Unit coordinator approval and a minimum GPA of 5.5 in the Bachelor of Mathematics
Assumed Knowledge	Must complete both MXB381-1 and MXB381-2
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit provides you with an opportunity to undertake a research project under the supervision of either an academic staff member or an industry partner (or both). You will apply your mathematical and statistical training to contribute to the advancement of knowledge in a problem of contemporary and/or industrial interest. This unit provides an excellent preparation for, and introduction to, the type of research undertaken in Honours and Higher Degree Research studies.

MZB101 Modelling with Introductory Calculus

Equivalents	MAB105
Credit Points	12
Campus	Kelvin Grove and Gardens Point

Availabilities	Kelvin Grove - SEM-1 Gardens Point - SEM-1
----------------	---

This unit develops the learner's understanding of a range of foundational mathematical concepts related to number systems, algebra and calculus, including a range of additional function types. The development of these concepts is done in context through their application to a range of life-related problems, in particular the physical world. Throughout the unit, technology will play a prominent role in developing conceptual understanding and the solution of problems. The knowledge developed in this unit provides a foundation for the units MZB201 and MZB202.

MZB102 Trigonometry, Geometry and Space

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops the learner's understanding of space, geometry and trigonometry. The development of these concepts is done in context through their application to a range of life-related problems, in particular those from the physical world. Throughout the unit, technology will play a prominent role in developing conceptual understanding and the solution of problems. The knowledge developed in this unit will be further extended and applied in MZB202.

MZB125 Introductory Engineering Mathematics

Anti-requisites	MXB100
Equivalents	MAB125, MAB100, MAB120
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces to you the foundational mathematical concepts of function, matrix and vector algebra, together with the operations of differentiation and integration. Through the exploration and solution of contextualised problems you will develop an understanding of these mathematical concepts as well as competency in appropriate solution methods.

MZB126 Engineering Computation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The rational solution of real-world engineering problems often requires the combination of multiple skill sets across multiple disciplines. In this unit you will develop key skills in mathematics, statistics, modelling and programming that will equip you with a set of fundamental tools for problem solving in the engineering context.

MZB151 Mathematical Tools for Computing

Anti-requisites	MXB100, MZB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Many application areas within Computer Science use standard mathematical methods as tools for analysis and processing of information. This unit provides an introduction to some basic mathematical methods that will be useful to you in your further studies in Computer Science, including basic matrix and vector operations, introductory probability and statistics and basic concepts in differentiation and integration.

MZB190 Mathematics for Exercise Science

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is intended to cater for the quantitative skills and mathematics needs of students undertaking studies in Exercise and Movement Science and in Clinical Exercise Physiology. It is intended to provide mathematical concepts and quantitative skills needed for successful study of those courses. The aim of this unit is to develop your mathematical skills in and understanding of algebra, functions and graphing, some data analysis and to interpret and solve simple, real world problems using these skills.

MZB201 Modelling with Statistics and Probability

Pre-requisites	MZB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit develops the learner's understanding of a range of mathematical concepts related to probability and statistics. The development of these concepts is done in context through their application to a range of life-related problems. Throughout the unit, technology will play a prominent role in developing conceptual understanding and the solution of problems.

MZB202 Extending Mathematics to the Real World

Pre-requisites	MZB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit extends learner's understanding of mathematical concepts through their application to a range of more complex problems. Throughout the unit, technology will play a prominent role in developing conceptual understanding and the solution of problems.

NRN100 Readings in Natural Resource Sciences 1

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit includes a review of literature in an area of direct relevance to the research project. The review should be designed in conjunction with the supervisor and demonstrate a broad appreciation of the literature, a critical appraisal of research to date, and the relevance of the research project within the framework of current understanding. Reviews should normally be approximately 5000 words.

NRN101 Readings in Natural Resource Sciences 2

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is a companion unit to NRN100 that allows students to (a) prepare a review of a second area relevant to the research project or (b) consider a wider subject area in greater depth. If option (b) is chosen, a single review can qualify as total assessment for both NRN100 and NRN101. In this case, the review should be approximately 10,000 words and be a critical analysis of a substantial research area.

NRN102 Confirmation of Candidature Seminar

Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit includes a public seminar plus an extensive discussion period designed to provide positive feedback from staff and students on the proposed research project. The presentation should be designed in conjunction with the supervisor and include background to the project area, specific objectives of the proposed project, methodology to be followed and possible outcomes. The seminar should normally be presented after the project outline has been developed and before any significant amount of research has been undertaken.

NRN103 Final Seminar

Pre-requisites	NRN102
Credit Points	12
Campus	Gardens Point and External
Availabilities	Gardens Point - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit includes a public seminar plus an extensive discussion period designed to provide positive feedback from staff and students on the progress of the research project. The presentation should be designed in conjunction with the supervisor and include project objectives, progress to date, preliminary data and

problems for discussion. The seminar should normally be presented within 12 months (full-time) or 24 months (part-time) of commencement of the postgraduate program.

NRN104 Advanced Topics in Natural Resource Sciences 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Students develop an advanced understanding of a topic in the natural resource sciences that is highly relevant to the general area of their proposed research project. The structure and content is variable and can be tailored to the specific requirement of each project and the background of the student. A formal outline of the unit including objectives, content and assessment relevant to the individual course of study will be developed by the supervisor and approved by the Head of School. Content may include active participation in tutorials, workshops, laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not exceed 70% of the total assessment.

NRN105 Advanced Topics in Natural Resource Sciences 2

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Material presented in this unit must be distinct from that covered in NRN104. Students develop an advanced understanding of a topic in the natural resource sciences relevant to the area of their proposed research project. A formal outline of the unit outlining objectives, content and assessment relevant to the individual course of study will be developed by the supervisor and approved by the Head of School. Content may include active participation in tutorials, workshops and laboratory/field techniques and components of advanced level undergraduate units. If components of advanced level undergraduate units are included, they should not exceed 70% of the total assessment.

NSB010 Introduction to Clinical Practice

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This is the first clinical unit in the graduate entry program (NS40) and serves as the basis for a series of clinical units that will assist you to develop knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level registered nurse. Learning outcomes from this unit form a foundation that will be successively built upon as you progress through the course.

NSB011 Clinical Practice 1

Anti-requisites	NSB010
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1, SEM-2

This is the first in a series of six clinical practice units that will assist you to develop knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level registered nurse. Learning outcomes from this unit form a foundation that will be successively built upon as you progress through the course.

NSB012 Clinical Practice 2

Pre-requisites	NSB011 and (NSB021 or NSB118 or PUB280 or CSB332). (NSB021 or CSB332) can be studied in the same teaching period as NSB012
Anti-requisites	NSB010
Equivalent s	NSB122
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This is the second in a series of six clinical practice units that will assist you to develop knowledge, skills and attributes

required for safe, competent practice in the health workplace as a beginning level registered nurse. Learning outcomes of this unit form a foundation that will be successively built upon as you progress through the course. This is a designated unit. Designated units include professional experience units, units requiring the development of particular skills, and units requiring the demonstration of certain personal qualities, and are deemed to be critical to progress in your course. Failure to successfully complete the requirements of this unit may lead to a period of probation or exclusion from this course.

NSB013 Clinical Practice 3

Pre-requisites	(NSB012 or NSB122) or NSB010. NSB010 can be enrolled in the same study period as NSB013
Equivalents	NSB212
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This is the third in a series of six clinical practice units that will assist you to further develop knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level registered nurse. Learning outcomes of this unit support your ongoing development of nursing attributes as you progress through the course. This is a designated unit. Designated units include professional experience units, units requiring the development of particular skills, and units requiring the demonstration of certain personal qualities, and are deemed to be critical to progress in your course. Failure to successfully complete the requirements of this unit may lead to a period of probation or exclusion from this course.

NSB014 Clinical Practice 4

Pre-requisites	(NSB013 or NSB212) and (LSB182 or LSB111)
Equivalents	NSB222
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-2

Units

Caboolture - SEM-2

This is the fourth in a series of six clinical practice units that will assist you to develop knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level registered nurse. Learning outcomes of this unit build on your past clinical experiences and inform your future development and progression through the course. This is a designated unit. Designated units include professional experience units, units requiring the development of particular skills, and units requiring the demonstration of certain personal qualities, and are deemed to be critical to progress in your course. Failure to successfully complete the requirements of this unit may lead to a period of probation or exclusion from this course.

NSB015 Clinical Practice 5

Pre-requisites	(NSB014 or NSB222) and (LSB282 or LSB382 or LSB111)
Equivalents	NSB322
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SUM Kelvin Grove - SEM-1, SEM-2, SUM

This is the fifth unit in the series of clinical practice units that provide you with the opportunity to consolidate the knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level registered nurse. Learning outcomes of this unit build on previous clinical units and draw upon concepts, principles and theories that have been developed through your studies in nursing and related sciences. Learning outcomes in this unit contribute to your transition into the registered nurse role.

NSB016 Clinical Practice Capstone

Pre-requisites	(Completion of 168cp of Nursing Units (NS%) inc NSB015 and Completion of 48cp of Life Sc units (LS%) and Completion of LWS101) or (PYB304 for HL47 students)
Equivalents	NSB335
Credit	24

Points	
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-1, SEM-2

This is the final unit in the series of clinical practice units that provide you with the opportunity to consolidate the knowledge, skills and attributes required for safe, competent practice in the health workplace as a beginning level registered nurse. Learning outcomes of this unit build on previous clinical units and draw upon concepts, principles and theories that have been developed through your studies in nursing and related sciences. This capstone unit informs your transition toward the registered nurse role.

NSB017 Diversity and Health: Cultural Safety, Indigenous Perspectives

Equivalents	NSB113
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

The culture of our health care system is based on the western scientific world view of the dominant Anglo-Australian culture. An understanding of the impact of culture on all of us is essential to the provision of culturally safe nursing care across all practice settings. Australia is a culturally diverse nation and respecting and valuing diversity is an essential aspect of living and working here as is knowledge about the historical and socio-political issues that influence the health and wellness of Aboriginal people, Torres Strait Islanders and other Australians. To be effective health care providers, nurses need knowledge, skills and values which enable them to provide person-centered, holistic nursing care to clients from all backgrounds and lifestyles. The conceptual and critical frameworks developed in this unit carry over into the learning you do throughout your program of study.

NSB018 Professional Studies 1: Introduction to the Profession of Nursing

Equivalents	NSB117
Credit Points	12

Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

This is the first in a series of three Professional Studies units that will enable you to develop knowledge, skills and attributes expected of professional practice as a registered nurse. Learning outcomes of this unit form a foundation that will be successively built upon as you progress through the course.

NSB019 Professional Studies 2: Research, Evidence and Nursing Practice

Pre-requisites	((NSB018 or NSB117) and (NSB118 or NSB021)) or (PUB251 or CSB111)
Equivalents	NSB224
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-1 Kelvin Grove - SEM-1

This is the second in a series of three Professional Studies units that will assist you to develop knowledge, skills and attributes expected of professional practice as a registered nurse. Learning outcomes of this unit will be built upon as you progress through the course.

NSB020 Professional Studies 3: Transitioning to RN Practice

Pre-requisites	((NSB018 or NSB117) and (NSB019 or NSB224)) or (PYB110 or PYB210 or PUB384 or PUB461 or PUB561)
Equivalent s	NSB321
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

This is the third in a series of Professional Studies units that will assist you to develop knowledge, skills and attributes expected of professional practice as a registered nurse. Learning outcomes of

Units

this unit will be applied throughout your studies in this final year of the course.

NSB021 Nursing Practice in Context 1

Anti-requisites	NSB118
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-2 Caboolture - SEM-2

This unit is the first in a series of six, Nursing Practice in Context, units. This suite of units introduces you to health, wellness and illness and the contexts where these occur and are promoted or treated. Considering global and social impacts on health, and Australian national health priorities, this suite of units examines common disease processes, health assessments, nursing interventions, along with health promotion and nursing therapeutics. Nursing Practice in Context 1 focuses on developing your understanding of a core professional attribute; clinical judgement, and beginning your learning journey of understanding the nurse's role in healthcare. This unit focuses on activities of daily living, contexts of practice in caring for people across the lifespan and collecting and documenting health information. This will facilitate your acquisition of the required knowledge and skills to deliver sound, holistic nursing care in a multitude of clinical settings.

NSB022 Nursing Practice in Context 2

Equivalents	NSB324
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

This unit is the second in a series of six, Nursing Practice in Context, units. This suite of units develops your knowledge of health, wellness and illness and the contexts where these occur and are promoted or treated. Nursing Practice in Context 2 focuses on continuing the development of your understanding of a core professional attribute; clinical judgement, and furthering your learning journey through knowledge related to the patient journey, primary health care,

chronic disease and acute care settings and also cardiovascular and respiratory health. This will facilitate your acquisition of the required knowledge and skills to deliver sound, holistic nursing care in a multitude of clinical settings.

NSB023 Nursing Practice in Context 3

Pre-requisites	NSB021 or NSB118 or NSB022
Equivalents	NSB223
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This unit is the third in a series of six, Nursing Practice in Context, units. This suite of units introduces you to health, wellness and illness and the contexts where these occur and are promoted or treated. Nursing Practice in Context 3 focuses on the continuing the developments of your understanding of a core professional attribute; clinical judgement, and furthering your learning journey through knowledge related to a key national health priority, mental health. This will facilitate your acquisition of the required knowledge and skills to deliver sound, holistic nursing care of clients with mental health issues in a multitude of clinical settings.

NSB024 Nursing Practice in Context 4

Pre-requisites	NSB021 or NSB118 or NSB022
Equivalents	NSB423
Credit Points	12
Campus	Caboolture and Kelvin Grove
Availabilities	Caboolture - SEM-2 Kelvin Grove - SEM-2

This unit is the fourth in a series of six, Nursing Practice in Context, units. This suite of units introduces you to health, wellness and illness and the contexts where these occur and are promoted or treated. Nursing Practice in Context 4 focuses on continuing the development of your understanding of a core professional attribute; clinical judgement, and furthering your learning journey through knowledge related to endocrine, gastrointestinal, genitourinary and

musculoskeletal health. This will facilitate your acquisition of knowledge and skills to deliver sound, holistic nursing care in a multitude of clinical settings.

NSB025 Nursing Practice in Context 5

Pre-requisites	((NSB021 or NSB118) and (NSB022 or NSB324)) or (CSB342)
Equivalents	NSB500
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

This unit is the fifth in a series of six, Nursing Practice in Context, units. This suite of units introduces you to health, wellness and illness and the contexts where these occur and are promoted or treated. Nursing Practice in Context 5 focuses on continuing the development of your understanding of a core professional attribute; clinical judgement, and furthering your learning journey through knowledge related to neurological, renal healthcare and cancer and palliative care contexts. This will facilitate your acquisition of the required knowledge and skills to deliver sound, holistic nursing care in a multitude of clinical settings.

NSB026 Nursing Practice Capstone

Pre-requisites	(Completion of 168cp of Nursing Units (NS%) inc NSB015 and Completion of 48cp of Life Sc units (LS%) and Completion of LWS101) or (Completion of CSB342)
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1, SEM-2 Caboolture - SEM-2

This unit is the final in a series of six, Nursing Practice in Context, units. This suite of units develops your understanding of health, wellness and illness and the contexts where these occur and are promoted or treated. The Nursing Practice Capstone unit informs your transition toward the beginning registered nurse role through focussing

Units

on the integration of knowledge and skills that you have acquired throughout your studies. This will facilitate the consolidation of knowledge and skills required for the delivery of safe, competent, holistic nursing care in a variety of clinical settings.

NSB412 Clinical Elective

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-1, SEM-1, SEM-2, SEM-2, SEM-2

This unit aims to enhance final year students' ability to practice competently in a range of clinical situations. Students are provided with the opportunity to consolidate and extend their knowledge and skills by undertaking a series of self-directed, problem-based learning packages. The areas covered in the unit are advanced life support, respiratory therapies, health promotion, pain management, epidural analgesia and advanced wound care management. A variety of teaching-learning strategies will be used which include case scenarios, small group unilabs, computer-based and other related activities.

NSB600 Introduction to Nursing Children and Childbearing Families

Pre-requisites	(NSB103 or NSB011) and (NSB131 or NSB012) and (NSB132 or NSB021)
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 (Block) External - SEM-1

This unit provides an overview of the theoretical concepts and clinical application principles for practice in the areas in providing nursing and midwifery care for children and childbearing families. The emphasis is upon the childbearing process and the developmental stages of childhood and family dynamics. This is viewed as a normal process of growth and development, which will be affected by social, economic, legal and cultural factors. The focus will be on the promotion and maintenance of health.

NSB602 Pain Management and Nursing Practice

Pre-requisites	(NSB103 or NSB011) and (NSB131 or NSB012) and (NSB132 or NSB021)
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 (Block) External - SEM-2

Making decisions about patient's pain and its management is a key component of nursing practice across a wide variety of patient groups and clinical settings. This unit examines the concept of pain and explores aspects of the nurse's role in relation to pain relief. It builds on introductory concepts that have been addressed earlier in the program through more detailed exploration of, and reflection upon selected concepts.

NSB603 Introduction to Cardiothoracic Nursing

Pre-requisites	NSB500 or NSB025 or NSB303
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Cardiovascular disorders are commonly encountered by nurses practicing a variety of clinical settings. This unit provides an overview of cardiothoracic nursing and encompasses theoretical concepts specific to this specialty as well as related clinical skills. It builds on introductory concepts that have been addressed earlier in the program through more detailed exploration of and reflection upon selected concepts.

NSB604 Nursing Practice and the Older Person

Pre-requisites	NSB500 or NSB025 or NSB303
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Nurses have an important role in promoting, maintaining and restoring the health of older people and their families across a diversity of settings. Students will be encouraged to examine the

independent role of the nurse and their role as a member of multidisciplinary teams. The unit focuses on the role of the nurse in assessing and identifying problems relevant to older people and making clinical decisions about care practices and outcomes. This unit will extend the understandings that you have developed in other theoretical studies and experiences in clinical practice.

NSB606 Palliative Care Nursing

Pre-requisites	NSB500 or NSB025 or NSB303
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The health and support needs of individuals who are dying are diverse and often change over time. To respond effectively to these needs, nurses require knowledge and skills to provide a palliative approach to care. In this unit, you will extend your knowledge of the needs of individuals diagnosed with various life-limiting illnesses. The unit will enable you to develop further your understanding of the core components of a palliative approach to care for these individuals. This unit will extend the understandings that you have developed in other theoretical studies and experiences in clinical practice.

NSN001 Contemporary Nursing Practice with Children and Families

Equivalents	NSN006
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit provides an opportunity for you to develop your specialist knowledge and skills in child and family health nursing by exploring and addressing an issue relevant to your area of practice.

NSN007 Advanced Chronic Care Nursing Practice

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove

Units

	- SEM-2 External - SEM-2
--	---------------------------------------

This unit further develops registered nurses' capability to manage co-morbid chronic health conditions within an effective interdisciplinary healthcare team environment.

NSN008 Specialisation in Chronic Care Nursing

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit further develops registered nurses' capability to provide contemporary nursing interventions for people with chronic health conditions.

NSN009 Specialisation in Caring for Children and Families

Anti-requisites	NSN004, NSN005
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit will develop your specialist knowledge and skills in paediatric, community child and youth health nursing.

NSN100 Contexts of Women's Health

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit explores a selection of sociocultural, political, geographical and clinical trends and issues that influence women's health in Australia and internationally.

NSN126 Clinical Endoscopy Practicum 2

Pre-requisites	NSN125
----------------	--------

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	External - SEM-1, SEM-2

This unit connects structured and supervised clinical skills training and advanced theoretical knowledge to perform colonoscopy safely within a supported environment. Exposure and immersion for the acquisition of technical and psychomotor skills through supervised training in the field, scaffolds the student to achieve the expected standard of proficient practice to perform safe colonoscopy procedures. Aligned capabilities of critical enquiry and application of evidence-based practice to synthesise advanced knowledge are extended when applied to gastrointestinal disease management. This unit builds on assumed knowledge gained from previous postgraduate studies in gastroenterology.

NSN421 Assessment and Diagnosis in Extended Practice

Pre-requisites	Admission into NS86. NS85 students should apply for a waiver
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit focuses on the scientific basis, processes and procedures for advanced concepts in clinical decision making. It covers the skills and principles of health assessment with specific focus on pattern recognition and diagnostics; ordering and interpreting laboratory tests; ordering and interpreting imaging investigations. The unit also explores the activities and processes for making and accepting referrals with other health professionals.

NSN422 Pharmacology and Therapeutics in Extended Nursing Practice

Pre-requisites	Admission into NS86. NS85 students should apply for a waiver
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1

	External - SEM-1
--	----------------------------

This unit relates to the planning and management of therapeutic interventions in health care with a major focus on pharmacology and therapeutics. The content includes the study of pharmacology and pharmacokinetics related to treatment in a wide range of diseases. This will provide the basis for expansion into in-depth knowledge of pharmacology in a specialty field in the unit titled: NSN426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice.

NSN423 Nurse Practitioner Role Development

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit equips students with the skills and knowledge necessary for the development of the nurse practitioner role and scope of practice. Scope of practice refers to, and includes the extent of clinical practice activities available to the nurse practitioner in their speciality field of practice. Content includes requirements and attributes in clinical leadership, influence and advocacy at all levels of health care. Model development will be explored, scope of practice designed and clinical protocols and treatment formulary developed.

NSN424 Research, Evidence Based Practice and Clinical Inquiry

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

On successful completion of this unit you will be able to critically appraise systematic reviews of evidence and design projects for the implementation of evidence into practice. Content includes evidence-based terminology, principles and processes; incorporating evidence into practice; comparing and contrasting current practice with the most current evidence; modifying policies and procedures to be consistent with the

evidence; use of audit results to identify areas of practice that are consistent with the evidence and those needing revision; and formulating strategies for promoting the uptake of evidence-based practice.

NSN425 Nurse Practitioner Internship

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit provides extended, supervised and supported clinical practice exposure to consolidate and apply coursework learning, enabling students to meet the competency and capability standards for the nurse practitioner. Content is determined by the context of practice and the candidate's own learning objectives. Students will explore the extent of extended clinical practice available to them in the specialty in which they are undertaking the internship. Complementary to the unit objectives, and in consultation with their clinical support teams, students will develop personal learning objectives that reflect the knowledge and skills required in this extended scope of practice.

NSN425 Nurse Practitioner Internship

Pre-requisites	NSN425-1
Co-requisites	NSN428
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit continues on from NSN425-1 and provides extended, supervised and supported clinical practice exposure to consolidate and apply coursework learning, enabling students to meet the competency and capability standards for the nurse practitioner. Content is determined by the context of practice and the candidate's own learning objectives. Students will explore the extent of extended clinical practice available to them in the specialty in which they are undertaking the internship. Complementary to the unit objectives, and in consultation with their clinical support teams, students will

develop personal learning objectives that reflect the knowledge and skills required in this extended scope of practice.

NSN426 Advanced Pharmacology and Therapeutics in Speciality Nursing Practice

Pre-requisites	NSN422
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit follows on from NSN422 Pharmacology and Therapeutics in Extended Nursing Practice and includes development of the scope of pharmacological and therapeutic practice in a student's specialty field of practice, designing and developing protocols and medication formulary. It also includes a focus on skills in development of treatment plans that incorporate a creative, efficacious, patient-centred and sustainable management of symptom/disease states that are based on best evidence.

NSN428 Transition to Nurse Practitioner

Pre-requisites	NSN421, NSN422, NSN423, and NSN425-1
Co-requisites	NSN425-2
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit is undertaken in the last semester of the course to enhance the transition from the course into practice. Nurse practitioners must understand and negotiate the contemporary discipline- and speciality-specific trends and issues that affect their roles. This unit enables students to synthesise prior knowledge and learning across the nurse practitioner course through undertaking an inquiry-based project which consolidate specialist and discipline-specific knowledge and apply learning to contemporary social, cultural, professional and political contexts, with a view to developing a coherent overview of the achievements, competencies and capabilities of the

nurse practitioner and prepare students for the role as clinical leader.

NSN508 Thesis Preparation

Pre-requisites	Completion of 48cp in NSN% units
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

This unit provides the opportunity for students to access and review a body of literature relevant to an area of individual interest in nursing. This will enable students to extend their knowledge and understanding of a topic which is not specifically addressed elsewhere in the course. In addition, students undertaking this unit will have the opportunity to develop advanced skills information retrieval, critical analysis and writing for publication.

NSN515 Leadership and Management in Nursing

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

All health care organisations are facing important challenges in terms of their growing complexity and the ever-increasing rate of change. To survive and thrive within this context, effective nursing leadership and management is required at all levels to ensure that organisations are successful in meeting their goals and strategic objectives, and realising their vision for the future.

NSN523 Transitioning to Advanced Practice

Other requisites	Students must be working as a registered nurse in a clinical setting in Australia
Assumed Knowledge	null
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2

Units

External
- SEM-2

This unit provides an opportunity for you to build upon your specialist knowledge and skills to transition towards the advanced practice nurse roles afforded within the registered nurse scope of practice.

NSN701 Advanced Health Assessment

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - 13TP1, SEM-1

This unit provides an opportunity for you to develop your specialist knowledge and skills in advanced health assessment. There are two streams offered in the unit, an adult focused and a paediatric stream.

NSN721 Key Issues in Emergency and Intensive Care Nursing

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit provides an opportunity for you to develop your specialist knowledge and skills in either emergency or intensive care nursing. The unit links to learning in NSN723 Specialisation in Emergency Nursing and NSN722 Principles of Intensive Care Nursing. You will develop insight into life threatening health care situations involving trauma and respiratory disorders requiring assisted ventilation.

NSN722 Principles of Intensive Care Nursing

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit provides an opportunity for you to acquire specialist knowledge and skills in intensive care nursing across the life span. The unit links to learning in

NSN721 Key Issues in Emergency and Intensive Care Nursing. You will develop insight into a range of life threatening patient situations involving multiple organ dysfunction, sepsis, cardiovascular, renal and liver disorders.

NSN723 Specialisation in Emergency Nursing

Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit provides an opportunity for you to develop your specialist knowledge and skills in emergency nursing. The unit links to NSN721 Key Issues in Emergency and Intensive Care Nursing. You will develop an understanding of triage, contemporary management of patients across the lifespan, and emergency presentations frequently encountered.

NSN724 Specialisation in Acute or Cancer Nursing

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit is designed to present a foundation of theoretical and practice concepts required for registered nurses to provide effective, consumer focused nursing care within a variety of clinical contexts in a range of practice settings. The unit provides a framework from which students can develop an understanding of the impact of selected health problems on individuals, families, and communities. This will include practice concepts (philosophies, evidence based practice, competencies and continuity of care); physiological, pathophysiological and psychosocial underpinnings of advanced speciality or generalist practice; planning of appropriate strategies/interventions for client care; and development of selected technical skills.

NSN726 Symptom Management in Specialist Acute or Cancer Nursing Practice

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2

External
- SEM-2

In this unit you will advance your knowledge of evidence-based principles and practices appropriate to the management of common symptoms and experiences of people who require nursing intervention in acute or cancer settings.

NSN728 Trends and Issues in Specialty Nursing Practice

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit explores a selection of political, social and clinical trends and issues that influence specialty nursing practice. These trends and issues not only play a key role in the way nursing care is currently delivered-understanding their origin and direction will help you shape the future of nursing in your particular field. This unit is a core unit in NS32 Graduate Certificate of Nursing and NS85 Master of Nursing.

NSN821 Promoting Healthy Ageing

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit explores a range of the psychosocial, cultural, political, and clinical issues that are related to healthy ageing in Australia and internationally.

OPB351 Visual Science 3

Pre-requisites	OPB352 and OPB353
Co-requisites	OPB452 and OPB453
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit includes a study of the basic visual sciences that underpins the practice of optometry. It covers the optics of the eye, including its basic design, dimensions and retinal quality as well as

Units

the psychophysical principles of vision.

OPB352 Ocular Anatomy and Physiology 3

Pre-requisites	LSB250 and LSB255
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides information on the ocular anatomy and physiology that underlies the functional measurements made in optometry and their interpretation. It includes the structure and function of the anterior eye and orbit.

OPB353 Ophthalmic Optics 3

Pre-requisites	(MAB141 or MAB233) and PCB150
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Ophthalmic Optics is a fundamental area of Vision Science and Optometry, as a majority of problems deal with in these fields require optical solutions. It provides much of the optical basis for other units in the Optometry and Vision Science course dealing with optics, and thus is placed early in the course.

OPB451 Visual Science 4

Pre-requisites	OPB351 and OPB452
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This subject continues studies commenced in OPB351, and provides students with an understanding of spatial, temporal, colour and binocular vision, and their influence on visual performance.

OPB452 Ocular Anatomy and Physiology 4

Pre-requisites	OPB352
Co-requisites	OPB351
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is a continuation of OPB352. The

unit covers the posterior eye, orbit, neural pathways, eye movements, neurophysiology of vision and an introduction to electrophysiological techniques.

OPB453 Ophthalmic Optics 4

Pre-requisites	PCB240 and OPB353
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides information on the ocular anatomy and physiology that underlies the functional measurements made in optometry and their interpretation. It includes the structure and function of the anterior eye and orbit.

OPB550 Diseases of the Eye 5

Pre-requisites	(CSB520 or LSB475) and OPB452
Co-requisites	OPB654
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides students with a knowledge and understanding of relevant general diseases and those that affect the eye. It includes general disease principles and processes, referral procedures, genetics, congenital, dystrophic and degenerative eye disease, and the ocular manifestation of general disease. [Designated Unit]

OPB556 Assessment of Vision 5

Pre-requisites	OPB351 and OPB453 and PYB007
Co-requisites	OPB451
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit addresses the theory and practice of a number of clinical procedures which are used in eye examination: visual acuity measurement, external and internal examination of the eyes, subjective refraction, and tonometry. Students are also introduced to communication with patients, and the communication principles and skills in taking a case history.

OPB557 Binocular Vision

Pre-requisites	OPB451 and OPB556
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit covers the different types of refractive errors and what to expect in different age groups, and the types of binocular vision and accommodation anomalies frequently found in the population. A suite of procedures to investigate binocular and accommodation anomalies is covered.

OPB650 Diseases of the Eye 6

Pre-requisites	OPB451 and OPB550 and OPB556
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is a continuation of OPB550 and covers the ocular manifestations of general disease, neuro-ophthalmology, glaucoma, inflammations/infections, tumours and trauma.

OPB654 Ocular Pharmacology

Pre-requisites	OPB452 and LSB384
Co-requisites	OPB550
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides students with the appropriate knowledge of pharmaceutical agents used to examine the eye and to treat eye diseases.

OPB656 Assessment of Vision 6

Pre-requisites	OPB451 and OPB556
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces the student to the theory and practice of further core clinical techniques of vision assessment. The integration of these core clinical techniques with the basic techniques

Units

learned previously gives students a thorough knowledge of all aspects of routine patient management.

OPN161 Optometry in Special Needs Groups

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is designed to provide an understanding of the fundamentals of low vision rehabilitation and paediatric optometry. Students will build on their existing knowledge of ocular anatomy and physiology, ocular disease, the development of binocular vision and the assessment and management of paediatric and geriatric patients. Clinical skills relating to paediatrics and low vision are further developed in the specialist clinic units (OPN262, OPN362 & OPN462).

OPN162 Contact Lens Practice

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an introduction to contact lens clinical practice. Contact lenses provide an important method for correcting the optical errors of the eye. Topics covered include the basic clinical skills, knowledge about contact lenses and the skills to manage contact lens patients.

OPN163 Primary Care Clinic 7

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

-

OPN164 Research Methods in Optometry and Vision Science

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

-

OPN261 Therapeutic Management of Eye Disease

Pre-requisites	OPN163
----------------	--------

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Optometric practice allows appropriately trained optometrists to provide therapeutic pharmacological management of a range of eye diseases. It is important for optometrists to have a comprehensive knowledge of prescription drugs used in the management of eye disease, be able to develop treatment plans, and assess the outcomes of treatment. This unit aims to integrate your knowledge of eye disease and ocular pharmaceutical agents to allow you to safely and effectively develop treatment plans for your patients in optometric practice.

OPN262 Specialist Clinic 8

Pre-requisites	OPN161, OPN162, and OPN163
Co-requisites	OPN263
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit begins clinical practice in the specialist areas of contact lens practice and binocular vision and low vision. Through feedback from clinicians, students will begin development of clinical case management and problem solving strategies in these specialist areas of clinical practice. They will also develop higher level clinical examination techniques, reinforcing and refining clinical skills developed in the previous specialist clinical units in these areas.

OPN263 Primary Care Clinic 8

Pre-requisites	OPN163
Co-requisites	OPN261, OPN262
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

-

OPN264 Research Project

Pre-requisites	OPN164
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Optometrists in clinical practice are required to reflect upon and modify their practice to incorporate knowledge of the most recent research evidence into the evidence base for their mode of practice. This requires skills in the critical evaluation, interpretation and application of research in both fundamental and applied aspects of optometry and vision science.

OPN361 Research and Evidence Based Optometry

Pre-requisites	OPN262 and OPN263 and OPN264
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is designed to provide an understanding of the relationships between research and clinical practice in the development of evidence based practice for a growing profession. Current clinical issues of significance will also be reviewed.

OPN362 Specialist Clinic 9

Pre-requisites	OPN261 and OPN262 and OPN263
Co-requisites	OPN363 and OPN364
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit continues clinical practice in the specialist areas of binocular vision, paediatric optometry and vision rehabilitation to broaden their clinical experience. Through clinical practice in these areas, students will refine their specific problem solving strategies for these areas of clinical practice, and develop problem specific examination techniques, reinforcing and refining clinical skills developed in the previous units in these areas. Specialist Clinical Practice in contact lenses is continued from the previous semester (Specialist Clinic 8).

OPN363 Primary Care Clinic 9

Pre-requisites	OPN261 and OPN262 and OPN263
Co-requisites	OPN362 and OPN364

Units

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit continues clinical optometric practice in the primary care area within the Optometry Clinic of the School of Optometry. Through further clinical practice, students will refine specific problem solving strategies in clinical practice, and problem specific examination techniques, reinforcing and refining clinical skills developed in the previous units. Students will take on a greater responsibility for clinical decision making and management, demonstrating early independence and responsibility in decision making and problem solving, beginning the transition to professional practice.

OPN364 Clinical Externship 9

Pre-requisites	OPN261 and OPN262 and OPN263
Co-requisites	OPN362 and OPN363
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces clinical optometric practice in real world clinical learning environment by clinical placement in optometric practices, ophthalmology practices and other health care settings. Through clinical practice, students will develop specific problem solving strategies in clinical practice, and develop problem specific examination techniques, reinforcing and refining clinical skills developed in the previous units. Students will take on increasing responsibility for clinical decision making and management, demonstrating beginning independence in decision making and problem solving. This unit additionally fosters the transition to professional practice by placing the student in the real world environment of optometry and ophthalmology practices.

OPN461 Optometry in Professional Practice

Co-requisites	OPN463 and OPN464
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Most optometry graduates aspire to enter

private practice, either as an employee or associate of another practitioner or firm of optometrists. In the latter case, they are frequently required to manage the practice. They must therefore be prepared in the areas of business, finance and practice management as they relate to optometry. The practice of Optometry is also regulated by several State and Federal Acts of Parliament and optometrists have moral and ethical responsibilities to their patients.

OPN462 Specialist Clinic 10

Pre-requisites	OPN363 and OPN362
Co-requisites	OPN463
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit continues the clinical practice of specialist areas within optometry: contact lens practice, binocular vision, paediatric optometry and vision rehabilitation. Through further clinical practice in these areas, students will increase their knowledge and skill base in specialized clinical practice to allow a transition to independent practice.

OPN463 Primary Care Clinic 10

Pre-requisites	OPN363
Co-requisites	OPN462
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit completes clinical optometric practice in the primary care area within the Optometry Clinic of the School of Optometry. Through clinical practice, students will exhibit specific problem solving strategies in clinical practice, and problem specific examination techniques, illustrating a consolidation and integration of their theoretical knowledge base and clinical skills developed through the previous units. Students will demonstrate significant responsibility for clinical decision making and management, demonstrating independence in decision making and problem solving as final preparation for their transition to professional practice.

OPN464 Clinical Externship 10

Pre-requisites	OPN362, OPN363 and OPN364
----------------	---------------------------

Co-requisites	OPN462 and OPN463
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit further allows clinical optometric practice in real world clinical learning environment by clinical placement in optometric practices, ophthalmology practices and other health care settings. Through clinical practice, students will develop specific problem solving strategies in clinical practice, and develop problem specific examination techniques, reinforcing and refining clinical skills developed in the previous units. Students will take on the primary responsibility for clinical decision making and management, demonstrating independence in decision making and problem solving. This unit further consolidates the students transition to professional practice.

OPP001 Ocular Therapeutics 1

Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

OPP001 is the major theory and knowledge component of OP43 Graduate Certificate in Ocular Therapeutics. Students will learn the major general and specific principles of management and treatment of eye disease in a manner compatible with quality use of medicines, with a special consideration of ocular topical preparations. The unit is also intended to prepare students for the clinical practicum unit of the course, OPP002.

OPP002 Ocular Therapeutics 2

Pre-requisites	OPP001
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

OPP002 is the major clinical component of OP43 Graduate Certificate in Ocular Therapeutics. In it, students will apply the clinical principles learned in OPP001 by observation in clinical placement, by contributing to case series presentations and by written case reports. Student are also expected to develop and demonstrate clinical decision making skills to the level appropriate for registration as an Endorsed

Units

Optometrist registered with the Australian Optometry Board.

OUB100 Yatdjuligin - Cultural Safety in Indigenous Australian context

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Cultural Safety in an Indigenous Australian Context is an Indigenous knowledge developed by Maori Nurse Irihapiti Ramsden. Culturally Safe practice is an essential element in a profession's ability to work as a holistic and accountable professional with Indigenous Australian peoples and their communities. Whilst Cultural Safety commenced as a nursing and midwifery specific response, the need for a much wider discipline approach to educating culturally safe professionals is essential. An understanding of your own cultures and their potential impacts underpins the journey of becoming a culturally safe practitioner.

OUB110 Am I black enough? Indigenous Australian Representations

Anti-requisites	EDB039
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Aboriginal and Torres Strait Islander peoples, images and cultures, have been represented in a variety of media since colonisation. The purpose of this unit is to deconstruct these representations from Indigenous standpoints. You will develop understandings and skills to critically analyse media representations.

OUB120 Smash the Act - Indigenous Australian Politics

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit investigates the distinctive feature of Indigenous knowledges and perspectives as the philosophical underpinning of Indigenous Australian politics. This unit is delivered through authentic experiences and individualized instruction, and learning through enjoyment, including learning by

observation, doing and being in a shared learning environment. Indigenous pedagogy supports students' cognitive search for learning and processes where they can internalize, reflect, deconstruct and reconstruct contemporary Indigenous Australian politics. Indigenous knowledges are both empirical (that is, based on experience) and normative (that is, based on social values). This unit embraces both the circumstances people find themselves in and their beliefs about those circumstances in a way that is unfamiliar to Eurocentric knowledge systems.

OUB130 Indigenous Knowledge: Research Ethics and Protocols

Anti-requisites	EDB040
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit critically analyses and articulates culturally safe research that reflects decolonising methodologies as an underpinning framework for Indigenous Australian research. The need for culturally safe research is supported by the obvious gaps in knowledge of the ongoing life differentials and social determinants that impact on Indigenous Australians. This in part is due to a profound lack of culturally safe research which has effectively neglected historical and Indigenous knowledges that can address the outstanding social determinants influencing Indigenous Australians and their communities.

PCB121 Vision, Colour and Photometry

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is the first unit in the lighting suite of courses and aims to prepare students with the necessary grounding for future units in the course. All lectures in units that follow this will assume a good knowledge and understanding of the concepts and principles presented in this unit.

PCB122 Lighting Design

Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-2
----------------	---------------------------------

This unit aims to introduce students to the basics of lighting design, taking into account both the requirements for lighting a space, as well as the practical issues. Both indoor and outdoor spaces are included. The software packages used are easily understood, as the aim of the unit is to teach students about lighting design, not how to use a lighting package.

PCB123 Sustainability and Human Factors

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In this unit you should develop an understanding of the performance issues of lamps and luminaires, both from a energy point of view and the human issues – does it meet the needs of the people working or at leisure in the space.

PCB124 Lamps and Luminaires

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This is an important unit in the lighting suite of courses because it describes the basic equipment that people working in any area of the lighting industry have to know and understand – the lights themselves. Understanding how a lamp works and how it performs helps people make informed decisions about the choices they have in choosing lamps for particular applications. All lectures in units that follow this will assume a good knowledge and understanding of the principles, properties and performances of light sources, including the emerging LED products.

PCB150 Biomedical Physics

Anti-requisites	PVB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Professionals in the applied sciences require an understanding of the processes of making and recording measurements and an understanding of

Units

the physical principles that govern the behaviour of both the physical parameters being measured and the instrument being used to make the measurement. The aim of this unit is to introduce you to the processes of making measurements and estimating, processing and interpreting the uncertainties involved with these measurements. To enable you to understand the physical parameters being measured and also the limits of the measuring instrument; the physics of mechanics, heat, sound and light will be introduced and explained.

PCB240 Optics 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes a study of selected topics in optics particularly related to aspects of optometry. Topics include geometrical optics in mirrors and lenses, including thick lenses, cylindrical, spherical and toric lenses, colour and colour measurement, photometry, lens aberrations and optical instruments.

PCB272 Radiation Physics

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Radiographers require a basic knowledge of general physics and more detailed theoretical background to the physical basis behind the equipment design, construction and materials and the increasing technological support for developing modalities. The aim of this unit is to provide students with an understanding of radiation physics related to x-ray production and radiographic practice and how radiation interacts with matter.

PCB593 Digital Image Processing

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides students with a basic understanding of the computer techniques used in image processing and reconstruction. Specific

areas of study include the following: the structure of a digital image; image display techniques; grey scale palettes and look-up tables; Fourier transform theory; convolution theory; image processing hardware; image processing techniques, eg analysis, enhancement and restoration; spatial filtering; Fourier space filtering; methods of image reconstruction; 3D volume and surface rendering; applications of image processing in medicine, astronomy and remote sensing, etc.

PCB605 Biomedical Instrumentation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Instrumentation plays an increasingly important role in the life of a scientist. This unit is designed to give you a working knowledge in instrumentations and the principles of circuit theory and electronics that underlie instrumentation. It is offered at this stage of the program since it relies on work developed in the earlier advanced-level units and provides a basis for experimental work in later units. This unit aims to introduce you to the role of instrumentation in modern scientific work. It will provide you with experience in the use of standard electronic laboratory instrumentation and with an opportunity to develop skills in constructing and testing circuits. This unit will also show you how to access and interpret information on various electronic components and enhance your group interaction skills.

PCB675 Radiation Safety and Biology

Pre-requisites	PCB272
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Medical radiations procedures are the principal cause of non background radiation exposure. It is therefore important that you understand potential hazards of exposure to ionising radiation and techniques of protection. An understanding of relevant codes of practice is also required. The aim of this unit is to provide you with a basic understanding of aspects of radiation biology and radiation safety relevant to

your future employment as a Medical radiation technologist.

PCN112 Medical Imaging Science

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

PCN113 Radiation Physics

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes the following: radioactivity and the interaction of ionising radiation with matter; applied radiation counting techniques; radiation detectors; radiation dosimetry.

PCN114 Microprocessors and Instrumentation

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes the capabilities and limitations of a given instrument; design of interfaces between microcomputers and transducers; signal conditioning and signal conversion circuits for data acquisition.

PCN211 Physics of Medical Imaging

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Most medical imaging modalities now produce images in digital form. These digital images frequently undergo processing such as enhancement, registration, fusion and 3D reconstruction. Digital image processing and 3D image visualisation techniques are also extensively used in nuclear medicine and radiotherapy planning. Consequently, computing, numerical methods and digital image processing are necessary skills of a practising medical physicist. This unit is designed to make the student familiar

Units

with image visualisation methods and imaging in nuclear medicine, and to develop skills in digital image processing.

PCN212 Radiotherapy

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides an overview of the application of physics to radiotherapy including theoretical and practical aspects of the major topics in radiotherapy physics. The unit builds on your previous knowledge of radiation physics and applies it to radiotherapy.

PCN214 Health and Occupational Physics

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces the philosophy, protocols and practices of safety in the medical and industrial physics fields and the minimisation of hazards associated with radiation, and laser techniques.

PCN218 Research Methodology and Professional Studies

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

In the rapidly changing technological environment of medical physics and medical ultrasound it is essential that students develop basic research skills, data interpretation skills and written communication skills. Topics include the research process, data collection and analysis techniques, and writing and evaluating research reports. Students also require knowledge of the professional, basic management, legal and ethical issues involved in their particular speciality area. Topics include the role and purpose of professional bodies, professional communication, legal and ethical issues, and basic professional management techniques and issues.

PCN520 Project (Full-time)

Credit Points	48
---------------	----

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

New and exciting technologies are playing an increasingly important role in everyday life. Modern healthcare is a good example of a field where technology has had a huge impact in the way patients are diagnosed and treated. Graduates are increasingly involved in the research and development of new technologies and also in its translation and implementation into clinical use. This unit aims to develop further the students skills for carrying out such work in the form of a research project. The project may be carried out in collaboration with a hospital or industry. This unit aims to introduce and improve the students skills in carrying out research work in the form of a short research project.

PCN540 Project (Part-time)

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

New and exciting technologies are playing an increasingly important role in everyday life. Modern healthcare is a good example of a field where technology has had a huge impact in the way patients are diagnosed and treated. Graduates are increasingly involved in the research and development of new technologies and also in its translation and implementation into clinical use. This unit aims to develop further the student's skills for carrying out such work in the form of a research project. The project may be carried out in collaboration with hospitals or industry. This unit aims to introduce and improve the students skills in carrying out research work in the form of a short research project. (48 credit points achieved at completion of PCN540-1 and PCN540-2.)

PCN540 Project (Part-time)

Credit Points	24
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

New and exciting technologies are playing an increasingly important role in everyday life. Modern healthcare is a good example of a field where technology has had a huge impact in the way patients are diagnosed and treated.

Graduates are increasingly involved in the research and development of new technologies and also in its translation and implementation into clinical use. This unit aims to develop further the student's skills for carrying out such work in the form of a research project. The project may be carried out in collaboration with hospitals or industry. This unit aims to introduce and improve the students skills in carrying out research work in the form of a short research project. (48 credit points achieved at completion of PCN540-1 and PCN540-2.)

PCN701 Topics in Advanced Chemistry 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The complexity of the chemical systems studied in a research program and the sophistication of the instrumentation used demand that deeper theoretical understanding than that acquired in an undergraduate program. The aims of this unit are to teach and extend knowledge and comprehension of Advanced Chemical Techniques and assess application of knowledge; and to provide the candidate with the appropriate theoretical and practical background, at an advanced level, necessary for the completion of a research program.

PCN801 Topics in Advanced Chemistry 2

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

The complexity of the chemical systems studied in a research program and the sophistication of the instrumentation used demand that deeper theoretical understanding than that acquired in an undergraduate program. The aims of this unit are to extend and deepen the theoretical and practical background required for undertaking a research program and to provide the candidate with the appropriate theoretical and practical background, at an advanced level, necessary for the completion of a research program.

PMN501 Project Management Essentials 1

Anti-requisites	BEN610
Credit Points	12
Campus	Online and Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit will furnish you with an appreciation of the nature and role of project management as a professional discipline. With a specific focus on aspects of project planning and project development, the unit will describe, clarify, and formalise project management of the front end of projects to prepare you for further postgraduate study or bring new knowledge and skills to your professional endeavours.

PMN502 Project Management Essentials 2

Anti-requisites	BEN610
Credit Points	12
Campus	Online and Gardens Point
Availabilities	Gardens Point - 6TP3, 6TP5 Online - 6TP3, 6TP5

This unit will furnish you with an appreciation of the nature and role of project management as a professional discipline. With a particular focus on the final two phases of project management; project delivery and handover, this unit will prepare you for further postgraduate study or bring new knowledge and skills to your professional endeavours.

PMN503 Systems in Project Management

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit focuses on the skills and knowledge required for a Systems Thinking and Integration approach to project management as it relates to scope management, schedule management, quality management and risk management. Other concepts and techniques covered as part of this unit include the interface with other

organisational systems, innovation and multiple business environments, health and safety and environmental management.

PMN504 People and Projects

Credit Points	12
Campus	Gardens Point and Online
Availabilities	Gardens Point - SEM-1, SEM-2 Online - SEM-1, SEM-2

This unit will provide you with the fundamental skills and knowledge to appreciate the nature and role of human resources required to achieve outcomes critical for the success of a project. The unit will specifically focus on theoretical aspects of effectively managing individuals within project teams, leadership, motivation, conflict resolution, individual and cultural differences, communication and negotiation skills; and human resource legislation and ethics.

PMN601 Projects and Performance

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Focusing on the context and principles of performance management issues in projects, this unit examines the specific methods and tools that can be applied to improve key performance targets in projects will then be presented. Through reflective learning, the unit will also focus on developing your ability to gather information, apply the most appropriate methods, and make holistic and integrated decisions

PMN602 Organisations and Projects

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit will provide you with advanced skills and knowledge to manage human resources issues required to achieve outcomes critical for the success of a project. The unit will focus on aspects of effectively managing human resources at an organisational level, including project organisational structures, human

resource planning, stakeholder management, high performance teams and organisational development.

PMN603 Project Investigation 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Modern Project Managers are required to gather the best available evidence to make informed decisions, solve problems, establish best practice as well as innovate and develop. This unit will equip you with the applied research skills and knowledge to solve discipline specific real world problems and effectively communicate processes and solutions verbally and in writing within the context of your professional practice.

PMN604 Strategy and Projects

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit shows how your project or program grows out of the business lifecycle and also feeds into that lifecycle. The unit shows how the project or program adds value to both the client and provider organisations and that value can be sustained for a long periods if managed appropriately. It details contemporary program and portfolio management approaches and practically relates them to organization dynamics and project benefits realisation.

PMN605 Strategic Project Procurement

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit shows the value of identifying and evaluating the procurement options for your project or program. It further details contemporary market options and the preparations both client and tenderers must make to effectively manage the engagement phase and delivery phase of procurement strategy and contract form chosen.

PMN606 Project Investigation 2

Pre-requisites	PMN603
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Problems that confront project managers are ill-defined and complex. Problem identification and the collection and analysis of relevant information using appropriate research methods are essential to professional practice. From a learning perspective, one of the most effective ways of achieving this is to consolidate and extend previously gained research skills through an activity that is relevant to industry and, where possible, is associated with a specific workplace. This unit will help you apply skills previously attained in your degree to an advanced project management problem domain, and to enable you to conduct a well-defined project of relevance to your profession and industry, with specific outcomes within a precisely defined project plan.

PMN607 Strategic Risk Management

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit shows how to identify, evaluate, both qualitatively and quantitatively, the risk and opportunities for your project or program. You will then allocate and effectively manage the risks. It further details contemporary risk treatments available for both client and tenderers/contractors to effectively manage their project or program.

PMN608 Managing the Project

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

In Managing the Project you will implement the knowledge, skills and tools developed throughout the Master's program. This will assist you to apply your learnings to a real world project from inception to closeout.

PQB360 Global Energy Balance and Climate Change

Equivalents	PCB563
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Modern societies are becoming increasingly aware of potential environmental problems associated with conventional energy production technologies. Application of alternative technologies is therefore increasing, with ambitious targets and plans to support research and development for reducing energy related environmental consequences. This unit is designed to offer science and engineering students an opportunity to gain awareness about the expanding field of alternative energy technologies and to understand relationships between use of energy and its impact on local and global environment.

PUB100 Medical Terminology, Anatomy and Physiology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The main aim of this unit is to provide students with an in-depth knowledge of the language of medical terminology and an understanding of anatomy and physiology that can be competently applied in a health care setting.

PUB101 Introduction to Clinical Classification

Pre-requisites	PUB100
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Clinical classification (clinical coding) is one of the major speciality tasks of a health information management service in a hospital. This unit will introduce you to the skills required to become entry-level coding practitioners. Through some practical application of the principles and techniques to code diagnoses and procedures, you will learn how clinical classification relates to medical science and its purpose and application in the health care environment.

PUB104 Australian Health Care Systems

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This is an important unit for students who are intending to enter the health industry. It is designed to give a broad overview of the system of health care in Australia and its methods of operation. This unit outlines the structure of the Australian health care system, examines the roles and responsibilities of members of the health care team. It also helps identify the key issues confronting the provision of health care.

PUB202 Advanced Clinical Classification

Pre-requisites	PUB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit will allow you to build on your skills in the application and rules for classification of diseases and health interventions using the International Classification of Diseases 10th revision Australian modification (ICD-10-AM), the Australian Classification of Health Interventions and the Australian Coding Standards. You will refine skills in abstraction of data from source documents and understand the need to access feeder information systems to support coding. You will also apply coding quality assessment techniques.

PUB204 Resourcing and Managing Health Budgets

Anti-requisites	PUB480, PUB609
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit consolidates knowledge about health resource allocation and management at the macro (health system) and micro (health service) level. At the macro level you will learn about the context and drivers of health resource allocation to benefit the health of groups and populations and the means of determining priorities in the face of competing demands for scarce

Units

resources. Australian and international case studies are used to compare and contrast resource allocation policy positions based on the principles of efficiency, effectiveness and equity. You will learn about historical and contemporary Australian health care financing and funding models that determine health budget allocation at the micro (health service) level and develop a sound understanding of the principles, processes and practice of financial management, including governance, costing, budgeting, financial performance reporting and analysis.

PUB208 Understanding Health Information

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit gives an introductory overview to public health professionals of the uses and applications of health information in the health industry. Understanding information will assist public health professionals to recognise the potential of health information as a valuable resource. The unit provides context to the quality and accessibility of health information.

PUB209 Health, Culture and Society

Equivalents	NSB017
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is concerned with the social and cultural dimensions of health and illness and how they relate to health status and patterns of behaviour. The unit introduces students to thinking about health from sociological and anthropological perspectives, drawing on relevant concepts and theory to examine selected public health issues. Identifying and addressing social and cultural factors that shape people's health experiences of health, illness and health systems are integral parts of public health practice in terms of reducing health inequalities, delivering appropriate services, and ultimately improving population health outcomes.

PUB215 Public Health Practice

Credit Points	12
---------------	----

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces you to the values, frameworks, principles, and skills which underpin Public Health. It focuses on what public health professionals do and how their work makes a difference in the world in which we live. The unit uses a topic-based approach so that you can learn and apply the core Public Health skills to a real world Public Health issue.

PUB326 Introduction to Epidemiology

Anti-requisites	HLN710
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Epidemiology is the basic scientific method of public health. It is the study of the distribution and determinants of diseases, health conditions, or events among populations and the application of interventions to control health problems. Epidemiological methods are used to generate the evidence base for clinicians, health promotion specialists, health educators, nutritionists, and health service managers.

PUB332 Sustainable Environments For Health

Anti-requisites	PUB107
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an overview of environmental health and introduces the importance of achieving environments that are able to sustain human health. In particular, the unit covers the practice of environmental health, its scientific foundations, and its integral place in the overarching discipline of public health.

PUB336 Women's Health

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit explores the data and current health issues related to women's health and critically evaluates health related policies, systems and practices in terms of their impact on women's health, internationally and in Australia. The

social, economic, cultural and political influences on women's health, and the specific needs of sub-populations of women are examined.

PUB358 eHealth Concepts

Pre-requisites	(PUB208 and PUB202) or 192cp
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit will provide the student with an understanding of contemporary health information technologies and their application in the health sector. Students will have the opportunity to explore the technical requirements and processes surrounding the introduction of electronic health records, including privacy, person and provider identification, hybrid EHRs, interoperability, terminologies, EHR structures, decision support systems, internet applications and management of transition to EHRs and legacy systems.

PUB359 Health Information Management

Pre-requisites	PUB208 and PUB202
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit will provide the student with an understanding of the management and operating principles of health information services.

PUB364 Transition to Professional Health Information Management Practice

Pre-requisites	PUB359
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit recognises that you are about to transition from university to health information management practice and that you will need to sustain your professional and educational development. Accordingly, this final semester unit provides a dual platform for transition to practice and independent professional development

PUB368 Integrated Health Information Management Practice

Pre-requisites	PUB359
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The aim of this unit is to develop high level, practical Health Information Management skills in a range of health care settings. Increased understanding of the various roles that health information managers play in the health care system is emphasised through work integrated learning experiences. Students will undertake project work as negotiated with their placement supervisor.

PUB370 Practical Clinical Classification

Pre-requisites	PUB359
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit will provide students with greater competence and confidence in the use of the International Classification of Disease 10th revision Australian modification, the Australian classification of Health Interventions and the Australian Coding Standards. Through hospital based placements, students will code from actual medical records and utilise IT feeder systems to support their coding decisions. Advanced clinical coding for high cost Diagnosis Related Groups, complex cases and adverse events will be a focus for this unit. Students will achieve also competencies for clinical coding auditing for data quality control and coding practice management.

PUB380 Casemix and Activity Based Funding

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

The focus of this unit is to introduce current national and state-based initiatives relating to casemix and Activity Based Funding for acute, subacute and non acute services. Included will be the

relationship between clinical classification and financial management, peer group cost weights, cost modelling, inlier and outlier payments, co payments and use of ABF and casemix data to predict activity and costs.

PUB406 Health Promotion Practice

Pre-requisites	PUB215 or PUB530 or PUB251
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit ties together the fundamental health promotion knowledge covered in earlier units in the public health subject area to introduce students to the range of strategies available to a health promotion practitioner. The unit promotes an appreciation of the strengths and weaknesses of different approaches, as well as related administrative factors. Students undertake a small health promotion project in groups of 3-4. This is an essential field of study for those students who wish to work in a health promotion or related field.

PUB416 Research Methods

Pre-requisites	PUB561
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

An understanding of research methods is essential in the training of all public health professionals. This unit explores quantitative methods in a variety of health research projects, examining conceptualisation of research questions and hypotheses, core elements of experimental and quasi-experimental designs, and various approaches to the collection, management and analysis of quantitative data. The unit has a practical focus for students who are considering conducting research as well as those interested in deeper appreciation of implementation behind published research results.

PUB461 Qualitative Inquiry in Public Health

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Qualitative methods are essential to generate knowledge of people's lived experiences, the meanings they ascribe to them, and to the social dimension of health. The nature and complexities of many public health problems require a mix of research methods and the contributions of qualitative inquiry are increasingly recognised. The practical skills acquired in this unit can be applied to a wide range of public health works, including community based program evaluation, international health and health social science research.

PUB490 Quality Management in Health

Pre-requisites	Completion of 96cp
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit provides you with the necessary knowledge and skills to develop a quality management program, perform quality improvement activities, and expand outcomes into process improvements and organisational change. Methods of health care performance measurement are explored, and a clinical quality framework model is introduced. Issues relating to administrative and clinical data quality, safety and privacy in an increasingly electronic health care environment are also considered.

PUB514 Contract/Project Management

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1, SEM-1

This is an important unit for students entering the health industry as your efficient management associated with the delivery of health services is enhanced by knowledge and exposure to the principles of formalised project and contract management. This unit is designed to provide advanced undergraduate students with an outline of some of the generally accepted processes and procedures for Contract/Project Management.

PUB530 Health Education and Behaviour Change

Anti-requisites	PUB329, PUB341
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit gives students the skills to bring about change in health-related behaviours through educational interventions. Topics covered include key health education and behaviour change theories, frameworks, strategies; approaches to bring about change in different contexts; research and design of educational interventions to suit different target populations in different settings, using evidence-based practice; and health literacy as a function of health education.

PUB545 Health Policy, Planning and Advocacy

Pre-requisites	Completion of 192cp
Anti-requisites	PUB511
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit consolidates knowledge of health policy development and reform and the processes that translate policy into public health practice. Topics covered include translating a health policy into a plan for professional practice; critical examination of advocacy processes and the impact on policies; planning and evaluating the impact of programs; and policy strategies in collaborative teams.

PUB561 Statistical Methods in Health

Anti-requisites	PUN105, MAB141
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit introduces the foundation concepts required to competently apply and interpret common statistical methods for the analysis of health data. Rather than superficially covering a wide variety

of statistical tests, this unit will focus on achieving competency of the most common fundamental tests that analyse non-repeated data. Statistical analysis is inextricably linked to research design, which drives the choice of descriptive summary of data, choice of statistical test, and interpretation of the statistical analysis. You will be provided with substantial practical experience in the application and interpretation of the most common statistical methods.

PUB565 International Health

Pre-requisites	PUB215 or PUB251
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

International health will broaden student's understanding of global health systems and programs, providing an advanced level analysis that explores systems and methods that have been devised to address population health problems in developing and developed countries. Students examine the historic context of the international health movement from the early 1900s to recent changes in global health systems, explore the diversity of services between and within countries, and consider issues of globalisation, economic reform, health equity and ethics. This unit is particularly relevant to students who are interested in international health development work.

PUB875 Professional Practice

Pre-requisites	(Completion of 240 cp including PUB514) or (Completion of 240cp including SWB401 and SWB312)
Anti-requisites	PUB645, PUB821
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is undertaken by students in the public health, and nutrition and dietetics strands of the BHlthSc. It provides students with the opportunity of working in one or a number of placements in a professional capacity in an area of interest to the student. It provides an opportunity for students to apply the knowledge and skills acquired through their course to a practical problem or workplace situation.

PUN001 Contemporary Risk Management

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit examines how a risk management program adds value to an organisation. As an integral part of the management process, risk management underpins the approaches taken in a wide variety of discipline areas whether their primary focus be health care, occupational health and safety or management generally. The principles of risk management underpin many of the concepts that you will explore as part of your course.

PUN015 Environmental Management and Sustainability

Pre-requisites	PUN465
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit supports students develop advanced skills and knowledge necessary to manage environmental and sustainability issues in a wide range of organisations. Topics covered in this unit include: sustainability; energy, water and waste minimisation; environmental auditing; compliance monitoring and corporate reporting; rehabilitation and remediation processes; heritage conservation; and environmental economics, policy and policy change.

PUN016 Risk Assessment

Anti-requisites	PUN008 and PUN467
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

Environmental health, OHS and environmental management professionals are required to plan/conduct/oversee/evaluate risk assessments as part of their work. It is

becoming increasingly important for organisations to undertake risk assessments to meet compliance obligations and to work towards longer term sustainability goals. This Unit explores a range of risk assessment methods available for the assessment of occupational safety, occupational health and environmental health risks.

PUN017 Health Planning and Evaluation

Pre-requisites	PUN640 and PUN106
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit is an introduction to the principles and practice of integrated health planning and the evaluation of the effectiveness of health policies and services. This unit will cover the spectrum of planning including the identification of the planning context, data to inform planning, the planning process, articulation of the plan into action and post implementation evaluation.

PUN103 Advanced Epidemiology

Pre-requisites	PUB326 or HLN710
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit's aim is the mastery of key principles and concepts of research design. There has been an increasing demand for evidence based health research, and an increasing trend towards research that considers complex biological, environmental and societal inter-relationships. Recent developments in epidemiology have contributed novel research designs and statistical methods to complement these needs. Throughout this unit, students are exposed to these more sophisticated designs and analytical methods. Such knowledge is mandatory for critical evaluation of the current research literature, for design of efficient research studies, and to inform appropriate interpretation of research results at a 'best practice' level.

PUN105 Health Statistics 1

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

Beyond a common core of statistical concepts, each discipline area emphasises its own set of descriptive and inferential statistical methods and even terminology. The content of this unit emphasises both core and health specific statistical methods in the health sciences. Students are provided with substantial practical experience in the application and interpretation of the most common statistical methods to health data, and are also made aware of data management principles in preparation for analysis. There is a strong emphasis on applying concepts through critical reading and discussion of the literature and worked examples from a range of topic areas.

PUN106 Population Health

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

Current and future national and international challenges for optimising population health are examined within a social determinants framework, and public health approaches to population health challenges are examined. This unit is a foundation unit for graduate public health, environmental health and health safety and environment students, and is taken in the first year of a full-time postgraduate degree.

PUN210 Contemporary Health Management

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2 External - SEM-1, SEM-2

This is a core unit in the Graduate Diploma and Master of Health Management programs. The unit explores the principles and practice of management in health to inform your role as a health manager. The unit focuses on

core health management activities: organisational management; strategic management; resource management including financial and human resource management; information management; project management and change management. The focus of this unit is on the development of the analytical, evaluative and political skills required by health managers who must work in complex systems and organisations characterised by constant change.

PUN212 Health Information Management Perspectives

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit gives an introductory overview of the field of health information and its uses and applications in the health industry. The unit provides a context for the study of contemporary health information and data management practice. The use of information as a strategic, organisational and management resource is discussed, and a broad appreciation of health information and data management procedures and philosophy is provided. Demands on the users of health information occasioned by advances in information technology are highlighted.

PUN213 Quality Management in Health

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

Current and future national and international approaches to improving health care quality and patient safety are examined using a synthesis of theory, research and real world experience to promote students' development of the necessary knowledge and skills required to design and implement a quality management program, perform quality improvement activities and translate the outcomes of these into process improvements and organisational change. This unit is the foundation unit in the Quality and Patient Safety major. It provides the underpinning content knowledge and context required for more

in depth study of quality and patient safety systems and leadership offered in PUN214 Systems of Quality and Safety in Health and PUN219 Leadership of Quality and Safety in Health.

PUN214 Systems of Quality and Safety in Health

Pre-requisites	PUN213. PUN213 may be enrolled in the same teaching period as PUN214
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit provides a critical in depth examination of the theory behind and application of quality and safety systems to health services. It covers legal and regulatory systems, quality certification and accreditation systems, safety systems and models, performance management including performance frameworks for the measurement, monitoring and reporting on quality and safety. The value of these, their breadth of coverage and their application to different health care settings are analysed using case studies from both successful systems and systems experiencing failure evidenced by patient safety and quality issues.

PUN219 Leadership of Quality and Safety in Health

Pre-requisites	PUN213
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

The unit provides you with advanced knowledge of leadership theories and frameworks critical to the development and maintenance of an effective quality and safety culture in health care organisations and builds on your understanding of the principles and practice of quality management and improvement gained through PUN213 Quality Management in Health. The unit provides health managers, aspiring quality managers and leaders with in-depth knowledge about the systems that underpin governance of quality and safety

in health care. You will learn about contemporary national and international approaches to building a culture of high performance, innovation and reform in health care.

PUN301 Occupational Health and Safety Law and Policy

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

Occupational Health and Safety involves the whole organisation, with particular roles attributed to employees and management, the latter bearing responsibility for the development, instigation, maintenance and control of workplace health and safety programs with a preventative emphasis. Advanced knowledge of essential elements of the Occupational Health and Safety legislative and management framework forms an important part of modern management practice.

PUN363 Environmental Health Law

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

Legal frameworks, such as the Public Health Act 2005, the Environmental Protection Act 1994, the Sustainable Planning Act 2009, local laws and other State and local legislation, provide the basis for environmental health and environmental management practice. A thorough understanding of this legislation, the prosecution process and other legal frameworks is vitally important to the practice of an environmental health professional. Major topics covered include: an introduction to law and government, public health law, planning and environmental law, local laws, administrative law and investigation processes.

PUN364 Food Safety

Credit Points	12
Campus	Kelvin Grove and External

Availabilities	Kelvin Grove - SEM-2 External - SEM-2
----------------	--

Food is a fundamental human need and a prerequisite to good health. Ensuring that the food we eat is safe is a major function of both government and industry. The food sector is one of the largest industries in Australia, with over 20 billion meals provided each year. Even though the food supply in Australia is one of the safest in the world, government data indicates that each year over 5 million cases of gastroenteritis are believed to be caused by contaminated food (most of these being unreported to health authorities). To ensure the safety of the food supply in Australia and to help minimise the incidence of food-borne illness, a system of nationally uniform food safety standards has been developed and is now in place. All levels of Government are involved in food safety management, with much of the administration of food safety legislation undertaken by local governments and State health agencies. Topics explored in this unit include food contaminants, food safety principles, food-borne illness, food-borne illness investigation, food safety law, compliance inspections of food businesses, food safety auditing, risk management including the implementation of food safety programs (FSPs) and HACCP, food premises design, food standards and labelling, and the training of food handlers.

PUN451 Disaster Management

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit elaborates the principles and practice of disaster management for health. The unit will develop your knowledge and understanding of the principles and practice of disaster health management and your ability to evaluate the effectiveness of current arrangements and your ability to apply those principles to system preparedness. This will equip you to contribute significantly to improving health service's ability to effectively prepare for and manage such incidents

PUN452 Disaster Planning and Preparedness

Pre-requisites	PUN451. PUN451 may be enrolled in the same teaching period as PUN452
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit seeks to develop your in depth understanding and ability to evaluate the systems, structures and processes required to ensure health services and the communities they serve are prepared for disasters that threaten the health and wellbeing of the community.

PUN453 Disaster Response and Recovery

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit seeks to develop your ability to manage the response to disasters that threaten the health and wellbeing of the community as well as the strategies required to affect the recovery of the community and the maintenance and restoration of health services following disasters.

PUN454 Leadership in Disaster Management

Pre-requisites	PUN451
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit develops your capacity to lead and manage a health service that is prepared and capable of managing a major incident. It is intended for those who are likely to be responsible for designing response arrangements, instructing others in those arrangements and for managing the health service strategically throughout a major incident.

PUN465 Environmental Protection

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

A pollutant is defined as 'a particular chemical or form of energy that can adversely affect the health, survival, or activities of humans or other living organisms' (Miller 2000). Pollutants in the form of solids, liquids, gases or energy emissions enter our environment by natural or anthropogenic means. With the potential for pollution to severely impact the life support system of humans and other organisms, it is necessary to implement a variety of approaches to protect the environment and ensure its sustainability. Major topics covered include: an introduction to environmental protection and sustainability, air pollution, noise pollution, water pollution, contaminated land, waste management, acid sulphate soils, assessing environmental and development applications, an introduction to environmental auditing, environmental management systems and corporate environmental compliance.

PUN466 Communicable Diseases

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

Public health practice originated from the study and prevention of communicable diseases. Whilst public health practice has widened in scope, reducing the incidence of both existing and emerging communicable diseases (nationally and internationally) remains one of the greatest challenges to public health practitioners. Relevant activities undertaken by local/state health agencies include public health surveillance and outbreak investigation measures, immunisation programs, monitoring and enforcing infection control standards, and vector control programs. Topics included in this unit include: communicable disease processes and principles; epidemiological characteristics of key infectious diseases; principles and practice of epidemiology for

communicable disease control; disease surveillance; outbreak investigation and management; immunisation; infection control; and vector control.

PUN500 Occupational Health and Safety Management

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit explores legislative and practical requirements for managing safety at a workplace. It will provide you with the knowledge necessary to make recommendations that prevent occupational injury and disease. You will apply your knowledge of specific physical, chemical, biological and psychosocial hazards and your skills acquired in safety management systems and safety systems auditing to evaluate current or prospective hazardous situations. You will learn how to design appropriate safety systems that eliminate or control hazards and comply with the legislation, and investigate and report on any injuries or exposures that do occur.

PUN617 Environmental Health Management

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

In Australia environmental health hazards are predominantly managed by government agencies using education, policy, legislation and funding. To successfully manage environmental health hazards, the practitioner needs to be able to communicate effectively and select and implement appropriate tools and management strategies. This unit is therefore designed to integrate the theory and practice covered in other environmental health units, and equip students with management and communication tools and strategies that can be applied in a range of contexts. Topics covered in this unit include community public health planning, program evaluation, project management, environmental health research, management tools, professional communication and professional

development.

PUN620 Concepts of Environmental Health

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

There is increasing evidence that the integrity of the environments in which we live is under substantial pressure, particularly from the way we live. The end result of such pressure is that the basic and fundamental pre-requisites for human health are threatened. The science of Environmental Health has always been concerned with the study of the human - environment interface, and now even more than ever, practitioners are needed who understand this link and the strategies available to control and minimize the risks associated with environmental health hazards. Topics covered include: an introduction to environmental health, ecosystems and sustainability; environmental health issues (e.g. air pollution, water and sanitation, waste and contaminated land, communicable diseases and food safety, physical agents, disaster management); and environmental health settings including the built environment.

PUN632 Leadership in Health Management

Anti-requisites	PUN610
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit is an in depth study of the strategic leadership and management of health services. Theoretical approaches to leadership together with several practical examples are presented to develop competencies to deal effectively with organisational and system wide complexities and change. The content has particular links with PUN106 Population Health and the Master of Public Health course in its examination of health system issues and the needs of diverse populations and communities. The unit further develops skills in addressing contemporary problems in public health related to the management

of health services and prepares students to consider the strategic importance of leadership throughout all public health areas.

PUN640 Health Care Delivery and Reform

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

The aim of this unit is for you to explore systems of health care both in Australia and internationally and the factors that influence the design and functioning of those systems so that you may contribute to the future development of health systems. The unit will use the Australian Health Care system as a case study but seek to draw from our examination of that system the concepts and analytical principles that may apply to all systems of health care. This unit introduces conceptual frameworks fundamental to the organization of health systems. Issues covered include the structure, operations, funding and evaluation of health systems and the evaluation of health system reform.

PUN688 International Health Policy and Management

Pre-requisites	PUN640
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit focuses on the international political and social context of health policy development. Drawing on case studies globally, several key concepts in health and challenges are critically examined to highlight the complexities involved in policy making. This unit will also cover how to evaluate a health program and the importance of using approaches and methods that are appropriate for diverse populations and health areas.

PUN704 Health Management Internship

Pre-requisites	HLN707 or PUN105 or HLN710 or HLN405 or HLN706 or PUN103
----------------	--

Credit Points	24
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM External - SEM-1, SEM-2, SUM

This unit takes an experiential approach to synthesise your knowledge of health care systems and skills of investigation and analysis of complex information, problems to contribute to professional practice and scholarship. This unit involves placement in a health service or health policy organisation and the planning and execution of a substantial research-based project or equivalent capstone experience. Students will be expected to volunteer to work within the service during the period of the internship. QUT staff will provide every endeavour to locate a suitable placement. Students may arrange their own placement although the placement should ideally be an institution different from one where the student may be normally employed. The placement may be undertaken with the employer of the student, provided that a clearly defined different experience is involved to that which is the normal employment of the student.

PUP032 Health Promotion 2: Theories

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

The unit examines the complexity of factors that influence change within individuals, groups, communities and organisations to improve the public's health. You are introduced to health promotion theories and their use for understanding determinants of health behaviours and for the development of health promotion programming.

PUP034 Health Promotion 3: Program Planning

Pre-requisites	PUP032
Anti-requisites	PUN613, PUP023
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External

- SEM-2

This unit further develops your knowledge, skills, and application of health promotion programming principles. In the unit you will build upon your work in PUP032 and PUP038 to create a comprehensive health promotion program proposal based on a health promotion planning framework. With a large portion of health promotion work involving the development of health promotion programs, the unit allows you to develop the skills that are essential for a health promotion practitioner.

PUP037 Health Promotion 4: Program Evaluation

Pre-requisites	PUP032 and PUP034. PUP034 can be studied in the same semester as PUP037
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

This unit further develops your knowledge, skills, and application of health promotion programming principles. In the unit you will build upon your work in PUP032, PUP038 and PUP034 to create a health program evaluation proposal using an internationally recognised evaluation framework. Evaluation is a crucial aspect of health promotion and public health work. Within the health sector there is strong competition for funding from the government and non-government sectors. The need to use evidence upon which to make judgments about programs and influence policy rests increasingly on robust evaluations. This unit will advance your knowledge and application of evaluation techniques.

PUP038 Health Promotion 1: Paradigms

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

As the health policy agenda shifts to embrace prevention, health promotion is an important area of study for health professionals interested in population health. The evolution of health promotion

methodologies and policies reflect changing physical, social and political environments and health issues, as well as new research findings. This unit focuses on developments in health promotion which have emerged from the interaction of theoretical frameworks, the changing physical, social and political environments and the growing evidence base. This shift includes a focus on the health impact of biological, physical and social conditions throughout the life of an individual (life course perspective), a settings approach and the expansion of new technologies. You will examine the relationship between these and recent developments, the evidence and contribution to the ongoing effectiveness of health promotion.

PUP116 Ergonomics

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

Ergonomics is the scientific discipline concerned with the fundamental understanding of interactions among humans and other elements of a system and the application of appropriate methods, theory and data to improve human well-being and overall system performance. Ergonomics promotes a holistic approach such that considerations of physical, social, organisational, environmental and other relevant factors are taken into account. Knowledge of current methods and techniques commonly used in ergonomics is essential for the occupational health and safety professional.

PUP250 Toxicology and Occupational Hygiene

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-2 External - SEM-2

Occupational hygiene involves the anticipation, recognition, evaluation and control of hazards in the working environment. Workplaces contain numerous hazards which are potentially harmful to the human health of workers, other occupants and the public. The role of the occupational health and safety

professional is to develop and /or assist in the development of management strategies to identify these potential hazards, evaluate the risk they pose to persons, property and equipment and to recommend control measures which will manage the risks involved.

PUP415 Occupational Health

Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1 External - SEM-1

This unit concentrates on the various agents in the workplace capable of adversely affecting the health of workers, as well as human response to toxic and imperilling environments. Occupational health covers identification, prevention and management of risks to health in the workplace, the disease process, occupational rehabilitation and health & wellbeing surveillance and management in the workplace.

PUZ104 Leadership in Disaster Management

Pre-requisites	PUZ101
Credit Points	12
Campus	External
Availabilities	External - SEM-1

Leaders in disaster management require the knowledge and skills to lead and facilitate collaborating organisations and communities in preparing for, responding to, and recovering from events and their impacts. This unit synthesises knowledge of the principles of disaster management, the disaster management arrangements required in place locally, jurisdictionally, nationally and internationally and the high level communication skills, critical to leadership roles in emergency management before, during and after such events. This unit is intended for those who are likely to be responsible for providing strategic or operational leadership in one or more stages of planning, response or recovery.

PVB101 Physics of the Very Large

Anti-requisites	EGB113, ENB130, PCB150
Credit Points	12

Units

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces you to the physics that affects the universe on a large scale, stretching from the edge of the observable universe down to the Earth's atmosphere, and addresses the underlying physics of some of the big questions of our time, for example dark energy and global warming. The topics presented include gravity, special relativity, thermodynamics, and fluid mechanics and form a foundation for a degree in physics. Theory will be complemented by practical exercises.

PVB102 Physics of the Very Small

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces physics which affects the universe on a microscopic scale. The concepts and phenomena studied here, such as atomic and nuclear physics, physical optics and waves are fundamental to later studies. Theory will be complemented by practical exercises.

PVB200 Computational and Mathematical Physics

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Strong computational skills are important attributes of any physicist, whether working in research or industry, experimental or theoretical. This unit is designed to provide an introduction to computations in physics and build on your mathematical knowledge. It builds on prior maths study in Maths C or equivalent.

PVB202 Mathematical Methods in Physics

Pre-requisites	PVB101 or PQB250
Anti-requisites	MAB112, MAB132, MAN122, MXB106
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The development of mathematical skills is fundamental to understanding many of the advanced topics that a physicist might encounter. This unit continues on from Maths C to develop the mathematical techniques required of a physicist, and is applied to physical problems of the type that a physicist might encounter. It provides skills for ongoing study and scientific work as physicist.

PVB203 Experimental Physics

Pre-requisites	PVB101
Equivalents	PQB451
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Strong experimental design and execution skills are some of the most important attributes of any physicist, whether working in research or industry, experimental or theoretical. This unit aims to develop your skills in project planning, time management, experimental setup, and reporting. You will undertake several self-managed experiments along with supervised practicals using research equipment.

PVB204 Electromagnetism

Pre-requisites	PVB200 or MXB105 or MZB125
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Electromagnetism is one of the fundamental forces in the universe and is present in almost all aspects of modern technology. In this unit you will develop theoretical knowledge and understanding of electromagnetism from electric charge to more advanced topics such as electrostatics, Maxwell's equations, electromagnetic waves and applications such as waveguides. It will extend your mathematical knowledge and techniques from earlier units to explore and analyse these advanced physics concepts.

PVB210 Stellar Astrophysics

Equivalents	PQB460
Credit Points	12

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Astrophysics is the application of physics to the study of the heavens from above atmosphere to the furthest reaches of the universe. This unit is one of the units in the astrophysics minor and covers the essential aspects of stellar astrophysics and naturally follows on from PVB101, The physics of the very large. The unit covers the birth, life, death of stars and is a mix of theory and laboratory exercises. The laboratory exercises cover astrophysical topics relevant to everyday physics.

PVB220 Cosmology

Equivalents	PQB660
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Cosmology is the study of the universe as a whole including the origin and development of the universe. This unit is an introduction to modern cosmology and covers a wide range of topics related to cosmology, for example, general relativity, the Big Bang, the history of the universe from the Big Bang to now (inflation, nucleosynthesis, dark ages, surface of last scattering, origin and evolution of galaxies, cosmic microwave background radiation etc). The unit also explores the observational techniques of modern cosmology, for example, optical and radio galactic surveys, gravitational lensing, laser interferometry for detecting gravity waves. We will also explore the evidence for dark matter and dark energy. In the laboratory component of the unit you will gain experience in analysing original astrophysical data, for example measuring the red shift velocity of galaxies.

PVB301 Materials and Thermal Physics

Pre-requisites	PVB200 or MXB105 or PVB202
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides you with an overview of materials science and of the basic crystallographic and thermodynamic

Units

principles that describe the behaviour of solids and fluids. The three areas you will study in this unit, thermal physics, physical properties and the physics of solids are core concepts that underpin a physical science degree. This unit builds upon knowledge and skills obtained in PVB102 and PVB203 and it is a companion unit with PVB302 (Classical and Quantum Physics).

PVB302 Classical and Quantum Physics

Pre-requisites	PVB202 or PVB204
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Quantum mechanics is the last great conceptual hurdle for a physics graduate to overcome in an undergraduate degree, irrespective of any bias towards the theoretical or experimental aspects. Counter-intuitive concepts such as quantum tunnelling are the cornerstone of many technological advances in recent times and other quantum mechanical concepts form the physical basis of the universe. The ability to find counter-intuitive solutions to problems when necessary is one of the attributes that sets physicists apart.

PVB303 Nuclear and Particle Physics

Pre-requisites	PVB302
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit examines the microscopic universe from the nucleus down to the fundamental particles and forces from which matter is built. Some current theories of particle physics will be introduced, along with applications of nuclear physics such as chain reactions and medical applications. Theory will be complemented with experimental laboratory work. The unit synthesizes previous study in the course including mathematics and classical and quantum mechanics to develop advanced scientific experimental, communication and report writing skills.

PVB304 Physics Research

Pre-requisites	PVB301
Equivalents	PQB651
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is the capstone unit for the physics major. It further develops your knowledge, skills and application for carrying out physics based research. The unit focuses on experimental design, practical skills, critical analysis and communication. It links to work previously undertaken earlier in the course.

PYB000 Psychology in Professional Contexts

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

PYB000 is a foundation unit for students enrolled in the Bachelor of Behavioural Science (Psychology) degree. This unit provides an introduction to the nature, scope, and application of psychological knowledge in diverse professional contexts, and considers the social, cultural and ethical, and multidisciplinary frameworks that shape psychological practice. This unit aims to develop your skills as an active and reflective learner, by explicitly linking the academic and generic skills you will develop throughout the course, with their application to psychological practice.

PYB007 Communication for Health Professionals

Anti-requisites	PYB074, HHB113, PYB111
Credit Points	12
Campus	Kelvin Grove, Caboolture and Gardens Point
Availabilities	Kelvin Grove - SEM-1, SEM-2 Caboolture - SEM-2 Gardens Point - SEM-1

This introductory unit gives you the opportunity to build your knowledge of the factors that contribute towards effective communication and will help you develop core communication skills. While focusing on the allied health disciplines, the generic interpersonal processes and skills addressed in this unit are important

building blocks for developing and maintaining successful professional and personal relationships. These foundation skills will aid with client communication, multidisciplinary team communication, clinical interviews, conceptualisation and assessment, mediation, and leadership, many of which you will be required to demonstrate later in your course.

PYB054 Psychology and Gender

Pre-requisites	Completion of 48cp of PYB units including one of PYB012, PYB101, PYB102 or PYB100
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit asks 'What is gender?'. It includes theories of gender; male and female; masculine and feminine; roles versus power; counselling issues; old and new paradigms; history of psychology of gender; sexuality; mothers and fathers; psychology constructs the female; psychology in patriarchal discourse; family therapy theory and feminist critiques; psychological constructs and the media; film and media; psychology of gender and power.

PYB067 Human Sexuality

Pre-requisites	Completion of 96 credit points including PYB100, PYB110, and PYB102
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit explores historical approaches to studying, explaining and regulating human sexuality with an awareness of the social nature of definitions of 'normal' or 'acceptable' sexual behaviours. Students critically examine definitions of 'healthy' or 'morally acceptable' or 'normal' sexuality. Different models of sexuality are considered with an emphasis on contemporary critiques of the traditional paradigms of sexuality in the West.

PYB100 Foundation Psychology

Anti-requisites	PYB012
Equivalents	PYB101
Credit Points	12

Units

Campus	Gardens Point and Kelvin Grove
Availabilities	Gardens Point - SEM-1 Kelvin Grove - SEM-1, SEM-2

This unit provides an introduction to the major content areas of psychology, including an introduction to psychological research and report-writing, for students intending to pursue further studies in psychology. Psychology is a broad-ranging and multifaceted discipline which encompasses the scientific study of human behaviour, and the systematic application of knowledge gained from psychological research to a broad range of applied issues. The goal of this introductory unit is to introduce you to the major subfields and perspectives in psychology, and to develop your understanding of the research methods and report-writing conventions used in psychological research.

PYB102 Introduction to Psychology 1B

Pre-requisites	PYB100 or PYB101
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Introduction to Psychology 1B extends the introduction provided in Introduction to Psychology 1A to psychology as the scientific study of human behaviour. This unit introduces students to the basic biological and psychological processes underlying perception, memory, learning, problem solving, consciousness, and language. In addition, research participation experience is provided to the students.

PYB110 Psychological Research Methods

Equivalents	BSB123
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit includes the following: an overview of the purposes and strategies of research; elementary research design; operationalising variables; descriptive statistics; distributions; measures of central tendency and spread; standard scores and percentiles; understanding relationships between variables through correlation and regression; an

introduction to hypothesis-testing procedures using t-tests.

PYB159 Alcohol and Other Drug Studies

Anti-requisites	PYB158
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit aims to give students an understanding of the extent of substance abuse in our community: who uses what, where and when; the models that have been advanced for understanding substance abuse; the intervention and therapeutic models utilised within the field; the effects of substance abuse, physiologically, socially and psychologically.

PYB202 Social and Organisational Psychology

Pre-requisites	(PYB100 or PYB102 or PYB101) or (Admission into PY08)
Equivalents	PYB205
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

People are social beings. Their thoughts, feelings and actions are influenced by the real, imagined or implied presence of others. To obtain greater insight into people's behaviour, it is essential to investigate scientifically the relationship between the individual and the group. We will study the effects of the individual within the group and the group within the individual and also consider the influence of these processes in the organisational setting.

PYB203 Developmental Psychology

Pre-requisites	(PYB012 or PYB101 or PYB102 or PYB100) or (Admission into PY08)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an introduction to life span developmental psychology. It unit covers the major theories of life span development and includes biological, social and cognitive aspects of development from birth through to old

age. It emphasises the interdependency of all aspects of development and the importance of the physical, family, socio-cultural and historical contexts within which development occurs. The unit aims to develop the student's understanding of general patterns of human development and of the ways in which the development of particular individuals and groups may vary from these general patterns.

PYB204 Perception and Cognition

Pre-requisites	((PYB100 or PYB101 or PYB102) and PYB110) or (Admission into PY08)
Equivalents	PYB303
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Cognitive psychology is a major empirical and theoretical area of psychology which explores the processes and structures involved at each stage of information processing within the brain. The structures and processes involved in perception provide the brain with its basic information about both the external world and many of the current states of the individual. Higher level cognitive processes and structures provide the foundation upon which more complex aspects of behaviour are based. The unit is placed in second semester of second year so that students following the normal course structure have an adequate background in research design and data analysis.

PYB207 Psychology in the Community

Pre-requisites	PYB202 and PYB203 and PYB204 and PYB210
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

The aim of this unit is enable you to develop your work-literacy and work-readiness, by providing opportunities to apply psychological knowledge in workplace contexts, supported by activities that promote critical reflection on your learning and workplace practices. Your participation in this unit requires you to establish, conduct, and complete an approved period of volunteer work or

Units

placement. You may be asked to produce a Blue Card (suitability for working with children and young people clearance) before commencing your work placement and it is therefore your responsibility to have obtained this clearance prior to commencing your placement.

PYB208 Counselling Theory and Practice 1

Pre-requisites	PYB007 or PYB074 or HHB113 or SWB104 or PYB111 or PUB209
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops the student's knowledge of the counselling process and skills and provides practice in changing the ways in which people express, conceptualise and respond to their concerns. It builds upon the communication skills and concepts introduced in PYB007 and introduces a range of counselling approaches. It emphasises skills in solution oriented approaches but also covers a range of models and skills for workers in crisis situations. It provides a basis for further studies in counselling in clinical settings requiring psychotherapeutic intervention, and other modes of delivery such as couple, family or group work.

PYB210 Research Design and Data Analysis

Pre-requisites	PYB110 or Admission into PY08
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit takes a research design approach to data analysis. This means that quantitative and qualitative analyses are treated as one step in a larger process which includes formulating theoretically sound research questions or hypothesis, selecting suitable research methodologies, data collection methods and analyses to answer research questions or test hypothesis, and reporting the outcomes.

PYB215 Forensic Psychology and the Law

Pre-requisites	PYB012, PYB101, PYB102 or PYB100
----------------	----------------------------------

	and Completion of 72cps
Anti-requisites	JSB174
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Forensic Psychology is readily acknowledged as one of the fastest growing areas of psychology in the world. Psychologists are now involved significantly in policing, judicial procedures and correctional processes. By its very nature the study of psychology and law draws from a wide multi-disciplinary base for the application of specialised knowledge. As a student of this discipline area, you will need a broad introductory appreciation of (and a critical perspective on) what the study of psychology and the law involves and what it has to offer across the three criminal justice domains of the police, the courts, and corrections.

PYB257 Group Work

Pre-requisites	PYB007 or PYB074 or HHB113 or PYB111
Anti-requisites	HHB214 and SWB214
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides the skills and content to plan, organise and facilitate group sessions. It applies Kolberg's inductive learning cycle to organise and facilitate group experiences. It develops intervention skills for managing group development, decision making and conflicts. Ethical issues in group practice are also examined.

PYB260 Psychopharmacology of Addictive Behaviour

Pre-requisites	PYB102
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to develop and extend your understanding of issues relating to behavioural pharmacology. This unit focuses predominantly on those substances that are commonly associated with addiction, including substances used in the treatment of addictive behaviours

and mental illness. The context for learning about specific substances is built on an understanding of the principles of behavioural pharmacology (including a review of neurobiology and the pharmacokinetic effects of common substances) and related research methods.

PYB302 Advanced Social and Organisational Psychology

Pre-requisites	PYB205 or PYB202
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Psychology can serve an important role in the wider community in addressing social issues, and improving people's lives at work. This unit helps build your knowledge and skills in social and organisational psychology, helping you develop your capacity to use psychology to make positive changes in organisations and in society.

PYB304 Physiological Psychology

Pre-requisites	(PYB102 or PYB101 or PYB100) or (Admission into PY08)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit aims to provide a broad introduction to the area of neuropsychology and discusses both the clinical and cognitive approaches in the field. Three broad areas are covered: neuroanatomy, neuropathology, the cognitive analysis of resulting deficits. Students learn about major neuroanatomical structures and their interconnections, with an emphasis on how this information is applied in the clinical setting. They also study a number of neuropsychological disorders in terms of their diagnosis, assessment and treatment, as well as the psychosocial effects such deficits have on the patients.

PYB306 Psychopathology

Pre-requisites	(PYB012 or PYB101 or PYB102 or PYB100) or (Admission into PY08)
Credit Points	12
Campus	Kelvin Grove

Units

Availabilities	Kelvin Grove - SEM-2
----------------	--------------------------------

This core unit is designed to develop your understanding of psychopathology and your critical appreciation of notions of abnormal human behaviour.

PYB307 Health Psychology

Pre-requisites	PYB100, PYB101 or PYB102
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit examines the psychological dimension of physical illness, health, and health care. There is a strong focus on health psychology in an Australian context with particular emphasis on cross-cultural and indigenous health-related issues. The unit examines definitions of health and health psychology; the role of health psychology; the determinants of health behaviours (e.g., cognitive, attitudinal, motivational, personality, social, developmental); medical settings and patient behaviour; patient and practitioner communication; stress, illness, and coping; pain and pain management; chronic and terminal illness in childhood and adulthood.

PYB309 Individual Differences and Assessment

Pre-requisites	(PYB100 or PYB101 or PYB102) or (Admission into PY08)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Individuals differ on a broad range of characteristics that are influenced by many factors including culture, sex, intelligence, personality, life experiences and values. There are a number of ways, within the discipline of psychology, to conceptualise and explain these differences. In this unit we introduce the major theories that underpin explanations of individual differences and the ways in which those who hold to different perspectives seek to measure the various constructs. Important properties of measurement tools such as reliability and validity will also be covered as well as the utility and applicability of various measures.

PYB350 Advanced Statistical Analysis

Pre-requisites	PYB210
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The unit provides students considering further study in psychology with a thorough grounding in analysis of variance techniques, an introduction to multiple regression, and the data analysis tools used in a broad range of research designs in the social sciences. The unit extends the introduction to analysis of variance and regression provided in PYB210, considering more complex designs involving two or more independent variables. The unit is both theoretical (including the use of conceptual formulae to analyse simple data sets by hand) and practical (analysing data sets using the SPSS statistical package), giving students a firm understanding of the principles underlying each analysis.

PYB356 Counselling Theory and Practice 2

Pre-requisites	PYB208
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses on the common facilitative factors within a counselling process paying attention to the person of the therapist and the counselling relationship. In order to respond appropriately and therapeutically to the needs of their clients, counsellors must have a clear understanding of the social and interactive processes which occur. Consideration of verbal, non-verbal, social, emotional, gender, psychological and social dimensions enables counsellors to develop effective, functional and client-focused relationships and to control biases, needs and possible exploitive practices.

PYB358 Advanced Developmental Psychology

Pre-requisites	PYB203
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit advances your understanding of major theories and methods in the study

of human development, with a specific emphasis on development in childhood, adolescence and adulthood, including late adulthood. As a unit that focuses on the application of developmental theories and research it builds on the knowledge and skills you gained in PYB203 Developmental Psychology and prepares you for transition into professional life and/or fourth year and postgraduate studies in the area of educational and developmental psychology.

PYB359 Introduction to Family Therapy

Pre-requisites	PYB208
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Family therapy, based on a systemic or relationship understanding of human problems, has been one of the most significant influences in the fields of counselling and psychology in recent times. With the increasing emphasis on the family as a focus for social policy, support services, research, and intervention, it is important for counsellors and psychologists to have some familiarity with the basic concepts and skills of this broad approach. This unit focuses on providing basic skills and concepts from one particular approach which will be called 'Constructive Therapy', combining aspects of solution-focused therapy, possibility therapy, narrative therapy and reflecting team practice.

PYB360 Interventions for Addictive Behaviours

Pre-requisites	PYB159 or PYB158 or PYB260 or NSB223 or NSB023
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Addictive behaviours, in the form of alcohol-dependence, substance abuse and gambling, are recognised as major problems nationally and internationally. This unit focuses predominantly on psychological aspects of addictive behaviours. To establish a framework for learning, classes initially review issues relating to psychological models of addiction and methods of studying addictive behaviours. Issues pertaining to the symptomatology, etiology and

assessment of addictive behaviours, as well as the theoretical underpinnings of a range of therapeutic interventions are also discussed. This unit encourages critical thinking and analysis with the aim of enhancing students' understanding of the complex issues relating to management of addictive behaviours.

PYB372 Traffic Psychology and Behaviour

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is an elective unit within the Bachelor of Behavioural Science (Psychology). Content focuses on identifying and examining the factors that influence the behaviour of road users, particularly those that contribute to the incidence of road crashes or exacerbate their severity. The student examines a range of theoretical models which have been used to explain the behaviour of road users, especially high risk behaviours. The behaviour of all types of road users will be addressed, including motor vehicle drivers and passengers, motorcycle riders, cyclists and pedestrians.

PYB374 Applying Traffic Psychology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is an elective unit within the Bachelor of Behavioural Science (Psychology). The unit focuses on understanding human factors in road safety with an emphasis on the strategies and programs that have been used in an attempt to modify road user behaviour. The unit provides an overview of the different criteria and methods commonly used to assess the effectiveness of road user behaviour programs in order to facilitate a comparison of effective and ineffective approaches.

PYB400 Thesis (Part 2)

Pre-requisites	PYB401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The thesis component of the honours program comprises four 12 credit point

units leading to the submission of a 48 credit point research thesis. The thesis units provide an opportunity for you to extend, synthesise and apply the knowledge gained in your undergraduate degree and other units within the course. You will undertake a research project with the guidance of a supervisor that makes an original contribution to knowledge in the broad discipline of psychology, using either quantitative or qualitative methods of analysis. This research is reported in a written thesis submitted at the completion of the thesis units. Assessment of the thesis is in accordance with University assessment procedures.

PYB400 Thesis (Part 3)

Pre-requisites	PYB401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The thesis component of the honours program comprises four 12 credit point units leading to the submission of a 48 credit point research thesis. The thesis units provide an opportunity for you to extend, synthesise and apply the knowledge gained in your undergraduate degree and other units within the course. You will undertake a research project with the guidance of a supervisor that makes an original contribution to knowledge in the broad discipline of psychology, using either quantitative or qualitative methods of analysis. This research is reported in a written thesis submitted at the completion of the thesis units. Assessment of the thesis is in accordance with University assessment procedures.

PYB400 Thesis (Part 4)

Pre-requisites	PYB401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The thesis component of the honours program comprises four 12 credit point units leading to the submission of a 48 credit point research thesis. The thesis units provide an opportunity for you to extend, synthesise and apply the knowledge gained in your undergraduate degree and other units within the course. You will undertake a research project with the guidance of a supervisor that makes an original contribution to knowledge in the broad discipline of psychology, using

either quantitative or qualitative methods of analysis. This research is reported in a written thesis submitted at the completion of the thesis units. Assessment of the thesis is in accordance with University assessment procedures.

PYH400 Thesis

Pre-requisites	PYH401. PHY401 can be studied in the same teaching period as PYH400-2
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The thesis component of the honours program comprises four 12 credit point units leading to the submission of a 48 credit point research thesis. The thesis units provide an opportunity for you to extend, synthesise and apply the knowledge gained in your undergraduate degree and other units within the course. You will undertake a research project with the guidance of a supervisor that makes an original contribution to knowledge in the broad discipline of psychology, using either quantitative or qualitative methods of analysis. This research is reported in a written thesis submitted at the completion of the thesis units. Assessment of the thesis is in accordance with University assessment procedures.

PYH400 Thesis

Pre-requisites	PYH401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The thesis component of the honours program comprises four 12 credit point units leading to the submission of a 48 credit point research thesis. The thesis units provide an opportunity for you to extend, synthesise and apply the knowledge gained in your undergraduate degree and other units within the course. PYH400 Thesis

Pre-requisites	PYH401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The thesis component of the honours program comprises four 12 credit point units leading to the submission of a 48 credit point research thesis. The thesis units provide an opportunity for you to extend, synthesise and apply the knowledge gained in your undergraduate degree and other units within the course. You will undertake a research project with the guidance of a supervisor that makes an original contribution to knowledge in the broad discipline of psychology, using either quantitative or qualitative methods of analysis. This research is reported in a written thesis submitted at the completion of the thesis units. Assessment of the thesis is in accordance with University assessment procedures.

PYH401 Advanced Research Methods

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides you with an opportunity to develop skills in the application of multivariate statistics to specific research problems. The unit will give you, hands on

experience in entering, cleaning, analysing and interpreting data using SPSS as well guiding you through the logic of these procedures.

PYH402 Counselling Psychology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

As one of the advance electives in the 4th year psychology program this unit provides an opportunity to engage in critical analysis, comparison, and evaluation of selected counselling orientations (for example, Solution-focused therapy, Narrative therapy, Cognitive-behavioural therapy, Psychodynamic therapy. Through experiential lectures and workshops the unit provides you with the opportunity to critically evaluate and apply distinct counselling orientations

PYH403 Cognitive Neuropsychology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is one of four advanced electives in this course and provides you with the opportunity to gain an understanding of cognitive and neuropsychology building on from foundational units in these areas. The three broad areas of neuroanatomy, neuropathology, and the cognitive analysis of resulting deficits will be covered in this unit. Both the clinical and cognitive approaches in the field will be discussed in line with implications for research and clinical practice.

PYH404 Issues in Social Developmental Psychology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

As one of the four advanced electives in this program, this unit is designed to extend the students understanding of developmental issues across the lifespan with the special emphasis on the socio-cultural context in which development occurs. Students gain knowledge of key theories and perspectives that explain how human development impacts and is impacted upon by their socio-cultural

context and learn to appreciate the many interdependent factors that contribute to human development across the lifespan.

PYH405 Advanced Organisational Psychology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is one of four advanced electives in the course. It is designed to enhance and build upon the knowledge of organisational psychology gained in foundation units in this area. Through a range of applied assessments including a consultancy project with an organisation, this unit gives students the opportunity to develop skills in applying organisational psychology theory to a workplace setting.

PYH407 Research and Professional Development Seminar

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This course capstone unit is designed to develop and extend your understanding and critical evaluation of research and practice issues in psychology. The unit is also designed to enhance your understanding of career paths and professional issues in the broad discipline of psychology.

PYH450 Research Thesis

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The thesis component of the graduate diploma program comprises three 12 credit point units leading to the submission of a 36 credit point research thesis. The thesis units provide an opportunity synthesise and apply the knowledge gained in your undergraduate degree and other units within the program. You will undertake a research project that makes a contribution to knowledge to the broad discipline of psychology, using either quantitative or qualitative methods of analysis. This research is reported in a written thesis submitted at the completion of the thesis units. Assessment of the thesis is in accordance with University assessment

procedures.

PYH450 Research Thesis

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The thesis component of the graduate diploma program comprises three 12 credit point units leading to the submission of a 36 credit point research thesis. The thesis units provide an opportunity synthesise and apply the knowledge gained in your undergraduate degree and other units within the program. You will undertake a research project that makes a contribution to knowledge to the broad discipline of psychology, using either quantitative or qualitative methods of analysis. This research is reported in a written thesis submitted at the completion of the thesis units. Assessment of the thesis is in accordance with University assessment procedures.

PYH450 Research Thesis

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

The thesis component of the graduate diploma program comprises three 12 credit point units leading to the submission of a 36 credit point research thesis. The thesis units provide an opportunity synthesise and apply the knowledge gained in your undergraduate degree and other units within the program. You will undertake a research project that makes a contribution to knowledge to the broad discipline of psychology, using either quantitative or qualitative methods of analysis. This research is reported in a written thesis submitted at the completion of the thesis units. Assessment of the thesis is in accordance with University assessment procedures.

PYN000 Counselling Studies 1

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides the student with an initial overview of the field of counselling, before focusing on the theory and practice of one contemporary perspective

called 'Constructive' or 'Time-Effective' Therapy. It is an approach based largely in social constructionist principles and promotes a view of counselling as a unique conversational process which attempts to validate the client's experience, while pursuing possibilities for desired change. It also suggests a time-effective perspective, emphasising the possibility of working briefly and effectively with clients. Selected ideas and practices from several related approaches including solution focused therapy, collaborative conversational therapy, possibility therapy and narrative therapy will be integrated.

PYN001 Professional Studies 1

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This is an introduction to the professional study of counselling and the 'common factors' present in most counselling approaches. These factors, which include the working relationship, the focus on client resources, and the instillation of hope, contribute greatly to the counselling outcome. In order to respond appropriately and therapeutically to the needs of their clients, counsellors must have a clear understanding of the social and interactive processes that occur in counselling. Verbal, nonverbal, social, emotional, gender, psychological, ethical and cultural dimensions are all present in the counselling process. Consideration of these dimensions enables counsellors to develop effective, functional and client-focussed relationships.

PYN002 Counselling Studies 2

Pre-requisites	PYN000
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The development of various counselling and psychotherapeutic paradigms and their related models of theory and practice will be considered in the light of the cultural contexts that informed them. The evolution of approaches over time will be reviewed in terms of ideas about the social construction of knowledges and the way they are embedded into cultural processes. The evolution of the brief, post-modern approaches focussed on in other units will be examined and links made to previous therapeutic traditions. Critical analysis will be applied to the

possibility of engaging in integrative therapeutic practices.

PYN003 Group Studies

Pre-requisites	PYN001
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides the development of skills and approaches in organising and facilitating group work, in the context of personal support and therapeutic groups. It addresses the following: establishing group norms; facilitating stages of group development; responding to member behaviour and developing facilitator interventions; planning, implementing and evaluating ethical group work practices; dealing with defensiveness and hidden agendas; applying brief solutions-focused and reflecting team processes to groups; examining the motion of the therapeutic milieu.

PYN004 Counselling Studies 3

Pre-requisites	PYN000
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses on relationship counselling. It explores the history and development of systemic family therapy and couple work. It examines the potential of a constructive approach and orientation to working with relationships and relationship issues in therapy. Students will choose a specific issue or area of relationship counselling and, working in small groups, present a workshop for fellow class members which demonstrates the use (or adaption) of a constructive therapy approach.

PYN006 Professional Studies 2

Pre-requisites	PYN001
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an experiential introduction to the process of professional supervision. Supervision processes, roles, responsibilities, content, approaches and theories are reviewed. Professional issues commonly addressed in supervision such as power, gender, culture, consent, duty of care, etc are reviewed.

PYN007 Professional Studies 3

Pre-requisites	PYN006
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an experiential introduction to the process of providing supervision to counsellors. Supervision processes, roles, responsibilities, content, approaches and theories are reviewed.

PYN008 Project (Part 1)

Pre-requisites	PYN014 and PYN006
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

You will undertake an individual clinical project of theoretical and/or practice-based research/enquiry in a selected area of counselling. The project is supervised by a member of the teaching staff and regular consultation informs the development of the project. Both reflective and academic papers will be written as part of the assessment of the project. You will be required to work in the Counselling and Family Therapy Clinic on a weekly basis in order to achieve project requirements. Together, PYN008-1, PYN008-2 and PYN008-3 comprise a 36 credit point unit that can be studied over two semesters. Assessment items are submitted and a grade awarded for each sub-unit.

PYN008 Project (Part 2)

Pre-requisites	PYN014 and PYN006
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

You will undertake an individual clinical project of theoretical and/or practice-based research/enquiry in a selected area of counselling. The project is supervised by a member of the teaching staff and regular consultation informs the development of the project. Both reflective and academic papers will be written as part of the assessment of the project. You will be required to work in the Counselling and Family Therapy Clinic on a weekly basis in order to

achieve project requirements. Together, PYN008-1, PYN008-2 and PYN008-3 comprise a 36 credit point unit that can be studied over two semesters. Assessment items are submitted and a grade awarded for each sub-unit.

PYN008 Project (Part 3)

Pre-requisites	PYN014 and PYN006
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

You will undertake an individual clinical project of theoretical and/or practice-based research/enquiry in a selected area of counselling. The project is supervised by a member of the teaching staff and regular consultation informs the development of the project. Both reflective and academic papers will be written as part of the assessment of the project. You will be required to work in the Counselling and Family Therapy Clinic on a weekly basis in order to achieve project requirements. Together, PYN008-1, PYN008-2 and PYN008-3 comprise a 36 credit point unit that can be studied over two semesters. Assessment items are submitted and a grade awarded for each sub-unit.

PYN013 Advanced Counselling Studies

Pre-requisites	PYN004
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit is designed to allow students to build on the development of their counselling skills as they pertain to particular client populations or client presenting issues. Various specialist fields of counselling are reviewed and guest lecturers share practice experience.

PYN014 Research for Counselling Practice

Pre-requisites	PYN001
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to prepare students for the reflecting team counselling practice and associated individual project work in the

Family Therapy and Counselling Clinic. The unit also prepares students for applied counselling project work in professional practice settings. Students are assisted to use the outcome of current research findings and publications to inform and assist their clinical practice.

PYN023 Research Thesis 3

Pre-requisites	PYN022 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

To ensure high quality practice, psychologists working in the area of clinical psychology are continually required to reflect upon and modify their own practice to incorporate knowledge of the most recent research evidence. This requires clinical psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas. The aim of the research thesis is to provide you with the opportunity to develop high-level skills in the evaluation, interpretation and application of research. It will also enable you to undertake in-depth research, a specialised area of psychology and to make a contribution to the professional literature in clinical psychology.

PYN024 Research Thesis 4

Pre-requisites	PYN023 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 6TP1, SEM-1, SEM-2, SUM

To ensure high quality practice, psychologists working in the area of clinical psychology are continually required to reflect upon and modify their own practice to incorporate knowledge of the most recent research evidence. This requires clinical psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas. The aim of the research thesis unit is to provide you with the opportunity to develop high-level skills in the evaluation, interpretation and application of research. It will also enable you to undertake in-depth research in a specialised area of

Units

psychology and to make a contribution to the professional literature in clinical psychology.

PYN025 Clinical Psychological Interventions 1

Co-requisites	PYN028
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The broad aim of this unit is to cover fundamental aspects of psychological change with adults and children and to introduce you to the theoretical orientation and practical skills involved in cognitive-behaviour therapy. An associated aim is to integrate theory, research and practice, and to encourage students to articulate the link between these areas.

PYN027 Clinical Psychological Assessment

Co-requisites	PYN035
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is designed to build on undergraduate training in psychological assessment. The understanding of theoretical perspective in psychological assessment is reinforced. A range of assessment techniques and tests, supported by research, are taught. The unit will explore some of the contextual issues which may have an impact upon the clinical assessment of Indigenous Australians, and outline some important principles of culturally safe clinical assessment. Further, you will also learn the ethical and legal issues involved in psychological assessment.

PYN028 Clinical Psychopathology

Co-requisites	PYN025
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides the student with a foundation and critical awareness of the development and phenomenology of psychological disorders. The unit undertakes a systematic study of the mechanisms and etiology of psychological disorders in individuals across the lifespan.

PYN030 Professional Practice in Clinical Psychology

Co-requisites	PYN044
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Clinical psychology practice involves a unique process which requires an understanding of special roles, power relationships, boundaries and ethical principles in order to safeguard client rights. This unit presents an overview of ethical, legal and professional issues encountered in practice, and also emphasises the role of supervision in addressing these.

PYN034 Childhood Psychopathology and Treatment

Pre-requisites	(PYN025 and PYN027 and PYN028) or (LCN625 and LCN627 and PYN601)
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides students with a sound understanding of the aetiology, diagnosis and management of emotional and behavioural disorders in children. Emphasis is placed on understanding the child within the context of the family and the wider community, and the critical evaluation of the evidence for different strategies for assessing and managing the mental health needs of children and their families.

PYN035 Supervised Practicum Stage 1

Co-requisites	PYN027
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides students with the opportunity to develop psychodiagnostic assessment and clinical skills. Students undertake 250 hours of psychological practice including at least 60 hours of direct client contact in the QUT Psychology Clinic.

PYN036 Supervised Practicum Stage 2

Pre-requisites	PYN025 and PYN027 and PYN028 and PYN035
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides students with the opportunity to build on PYN035 and to develop psychodiagnostic assessment and clinical skills. Students undertake 250 hours of psychological practice including at least 100 hours of direct client contact in the QUT Psychology Clinic.

PYN037 Supervised Practicum Stage 3

Pre-requisites	PYN030 and PYN036
Co-requisites	PYN045
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This core unit of the Master of Clinical Psychology course is intended to provide students with the opportunity to build on previous placements and to develop higher level psychodiagnostic assessment and clinical skills.

PYN038 Supervised Practicum Stage 4

Pre-requisites	PYN037
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This core unit of the Master of Clinical Psychology course builds on PYN037 and provides the opportunity to develop advanced psychodiagnostic assessment and clinical skills.

PYN039 Health Psychology and Rehabilitation

Pre-requisites	PYN025 and PYN028 and PYN035
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

- SEM-2

This unit develops core skills and understanding in health psychology and rehabilitation within an applied psychology context. It includes modules in health psychology, behavioural medicine, rehabilitation and psychopharmacology. An integrated and scientific approach with the recognition of the importance of an evidence based perspective is used to explore the application of the principles in clinical situations.

PYN041 Supervised Practicum Stage 5

Pre-requisites	PYN038
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit aims to enhance professional knowledge and skills in the practice of clinical psychology, awareness of ethical guidelines and professional conduct through supervised clinical practice (250 hours including 120 hours of direct client contact) within an area of specialisation.

PYN042 Supervised Practicum Stage 6

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 5TP6, SEM-1, SEM-2

This unit aims to enhance professional knowledge and skills in the practice of clinical psychology, awareness of ethical guidelines and professional conduct through supervised clinical practice (250 hours including 120 hours of direct client contact) within an area of specialisation

PYN044 Clinical Psychological Interventions 2

Pre-requisites	PYN025
Co-requisites	PYN030
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

PYN045 Clinical Psychological Interventions 3

Pre-requisites	PYN044
Co-requisites	PYN037
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This core unit covers the theories and skills of systemic, narrative and solution-focussed approaches required for relationship counselling and family therapy. The unit has a practical emphasis on common child-focussed and adult-focussed problems. The unit will examine the implications of each of the approaches from an evidence-based practice perspective.

PYN052 Research Thesis (Part 4)

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 8)

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 1)

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 5)

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 7)

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 2)

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 3)

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN052 Research Thesis (Part 6)

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

PYN052 has 8 parts completed over years 2 and 3 full-time or years 3 to 6 part-time of the course. Students undertake in-depth research on a topic in clinical psychology and develop high-level skills in the evaluation, interpretation and application of research. They are required to submit a thesis or a 5,000 word literature review plus two prepared articles that report the research in a form that can be submitted for publication in an appropriate scholarly journal.

PYN054 Advanced Assessment Across the Lifespan

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit will explore cognitive function across the lifespan, moving from pre-natal issues to the elderly. It will explore both acquired and developmental conditions that impact upon cognitive function. This will take place through lectures, review of cases and formulation of conclusions.

PYN601 Counselling and Consultation in Educational and Developmental Psychology

Pre-requisites	EDN631. EDN631 can be studied in the same teaching period as PYN601
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Advanced skills in counselling and consultation are required as a core competency of educational and developmental psychologists who work both directly with children, adolescents and families, and also more indirectly with groups, organisations and communities. Their roles vary from counselling individual children and supporting families, to advising teachers and becoming agents of change within organisations and communities. This unit provides students with the knowledge and skills necessary for developing effective counselling relationships with children, adolescents, adults and families and for working as consultants to various groups and systems within educational and developmental settings.

PYN603 Professional Practice in Educational and Developmental Psychology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The practice of psychology requires an understanding of special roles, power relationships, boundaries and ethical principles in order to safeguard client rights. It requires skills in working with individuals and groups from diverse backgrounds, including those from other cultural groups. An understanding of legal

issues and relevant legislation and standards is also essential in professional practice.

PYN606 Applied Developmental Psychology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

In order to provide effective approaches to the developmental challenges facing individuals and families at all points along the life course, educational and developmental psychologists need skills for describing, explaining, assessing, intervening and collaborating in the promotion of optimum developmental outcomes. These skills are developed in this unit.

PYN610 Research Thesis 4

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

PYN610 Research Thesis 3

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides

Units

advanced skill development in these areas.

PYN610 Research Thesis 2

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

To ensure high quality practice, psychologists working in the area of educational and developmental psychology are continually required to monitor and modify their own practice to incorporate knowledge of the most recent research, assessment tools and interventions. This requires educational and developmental psychologists to have advanced skills in the critical evaluation, interpretation and application of research. The research thesis provides advanced skill development in these areas.

QCD110 Professional Communication 1

Anti-requisites	QCD111, QCD120
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3, SEM-2

A high level of English communication skills is essential for success in an Australian higher education context. International students need to become competent users of the English language in the four macroskills of listening, speaking, reading and writing to succeed in their undergraduate degrees. The aim of this unit is to provide students with the academic and English communication skills required for success in tertiary studies at the undergraduate level. It provides strategies for understanding, composing and presenting information in an academic context.

QCD111 Communication 1

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3, SEM-2

A high level of English communication skills is essential for success in an Australian higher education context. This unit is designed to give students a stronger grounding in, and understanding of the learning process. It will develop

English communication skills (reading, writing, listening and speaking). Students will also learn skills for carrying out scholarly research, and communicating it in written and spoken form in an academic context.

QCD210 Professional Communication 2

Pre-requisites	QCD110. QCD110 can be studied in the same teaching period as QCD210.
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3, SEM-2

Knowledge and understanding of academic genres are essential for success, particularly in a higher education context. International students will encounter new genres in an Australian higher education context. Not only will they need to become competent users of these genres to succeed in their undergraduate degrees, they may also need to adapt to different learning and teaching styles. This unit aims to explore different academic genres through the content of communication theory to enhance international students' competency in the use of these genres. It will provide opportunities for students to gain knowledge and understanding of common academic genres that will enhance their competency in terms of their use of these genres.

QCD211 Communication 2

Pre-requisites	QCD111. QCD111 can be studied in the same teaching period as QCD211
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3, SEM-2

Knowledge and understanding of academic genres are essential for success, particularly in a higher education context. International students will encounter new genres in an Australian higher education context. Not only will they need to become competent users of these genres to succeed in their postgraduate degrees, they may also need to adapt to different learning and teaching styles. This unit aims to explore different academic genres through the content of communication theory to

enhance international students' competency in the use of these genres. It will provide opportunities for students to gain knowledge and understanding of common academic genres in an Australian university context to enhance their competency in terms of their use of these genres.

QCE001 English for Academic Purposes 1

Credit Points	48
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 12TP1, 12TP1, 12TP2, 12TP3

This unit is designed to improve students' academic English and study skills in order to prepare them for further studies at QUT International College. Upon successful completion of EAP 1, students will gain entry into QUTIC courses including EAP 2 (currently called EAP Direct Entry) or 2 semester Foundation or Diploma Programs.

QCE003 English for Academic Purposes 2

Credit Points	48
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 12TP2, 12TP3

this unit provides assistance to international students to upgrade your English proficiency level to meet university entry requirements for QUT Degree and Post-Graduate programs. The aims of the EAP unit are to: (a) assist you to upgrade your English proficiency level in speaking, listening, reading and writing to meet university entry requirements. (b) prepare you for independent study and to familiarise you with an Australian academic context.

QCE004 English for Academic Purposes for QUTIC Courses

Credit Points	48
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 12TP1, 12TP1, 12TP2, 12TP3

This unit is designed to help you gain entry to University Entry programs (Foundation and University Diploma). Its purpose is to improve your English language and study skills in order to prepare you for independent study and to familiarise you with the Australian

academic environment. The aims of the EAP unit are to: assist you to upgrade your English proficiency level in speaking, listening, reading and writing to meet university entry requirements; prepare you for independent study and to familiarise you with an Australian academic context.

QCE007 English for Academic Purposes Advanced

Credit Points	48
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 12TP3

This course is designed for International Students intending to gain entry into QUT degree programs with a requirement of overall IELTS 7.0 (with no sub-scores lower than 6.5). Its purpose is to improve students' academic English and study skills in order to prepare them for independent study and to familiarise them with the Australian academic environment and student/lecturer relations and expectations.

QCE009 EAP Plus

Credit Points	48
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 12AP1, 12AP2, 12AP3

This course is designed for international students intending to gain entry into University degree programs. Its purpose is to improve students' academic English and study skills in order to prepare them for independent study and to familiarise them with the Australian academic environment. The aims of the EAP unit are to: (a) assist you to upgrade your English proficiency level in speaking, listening, reading and writing to meet university entry requirements. (b) prepare you for independent study and to familiarise you with an Australian academic context.

QCF100 Computing

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

The use of computers is prevalent in Australian universities for every study area. International students need to develop computing skills such as word

processing, presentations and spreadsheets in order to access, organise and present information both within QUT and in the wider learning environment. This unit will provide students with the necessary computing skills for successful completion of undergraduate studies in an Australian university.

QCF112 Academic English 1

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

International students require the necessary preparation to ensure that they enter first year Australian higher education contexts, they are familiar with the skills and strategies they will need across their units of study. Academic English 1 is an introductory preparatory unit which focuses on the development of academic literacy skills and English language proficiency to enhance international students' success within an Australian higher education context.

QCF115 Foundation English

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

In this unit students will develop the four macro English language skills: reading, writing, speaking and listening, through a variety of active learning tasks and experiences. The unit will provide students with skills to explore and use the English language in different contexts and prepare you to undertake further studies in communication. The aim of this unit is to introduce international students to a variety of contexts which require using and developing a variety of English language skills.

QCF122 Organisations And Management

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3

This unit is designed to develop understanding of the significant role that organisations play in many facets of our lives, how organisations function and what is involved in working in

organisations. The emphasis is on skills that are needed at all levels and in all areas of an organisation. Students will develop a range of skills that are required by the individual to function effectively in teams and in an organisation. The aim of this unit is to introduce students to the fundamentals of organisations and management, providing a clear understanding of systems, procedures and practices and ways for employees to operate effectively in an organisation.

QCF130 Accounting

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This unit is designed for students with little or no prior exposure to accounting. Its objective is to acquaint the student with the basic concepts underlying double entry accounting, enabling them to employ accounting techniques to process financial transactions from source documents through to end of period reports for a sole-trading entity. As well preparation of cash budgets and analysing and interpreting the financial reports using financial ratios and other measures will be considered from a management perspective.

QCF140 Economics

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This unit introduces students to fundamental microeconomic and macroeconomic concepts, enabling an understanding of decision-making in the context of consumers, businesses, markets and governments. It provides students with experience of problem-solving from an economic perspective and builds on knowledge, skills and applications that will help them with their other studies.

QCF153 Physical Sciences

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

The physical sciences are the enabling sciences that underpin all of the 'new

technologies'. Almost all areas of science and technology require a fundamental understanding of chemistry and physics. This unit is designed as an introductory unit for students who then can elect to take either Chemistry and/or Physics in second semester. Physical Sciences provide a solid foundation in both chemistry and physics upon which further knowledge can be built. The aim of this unit is to: foster an understanding of fundamental concepts in some topics within the broad area of physical sciences develop an attitude of open inquiry and an appreciation of scientific methodology

QCF155 Practical Mathematics

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This unit focuses on basic arithmetic skills, percentage calculations, working with ratios and proportion, geometry, graphing, basic statistics and fundamental financial mathematical calculations with an emphasis on real-world applications and contexts.

QCF156 Mathematics A1

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

To be an effective professional in a wide range of areas such as engineering, science, information technology, health and business, an appropriate level of mathematical competence is essential. In our own personal lives, a basic knowledge of topics such as statistics, probability, measurement and financial mathematics is also beneficial. This unit aims to give students a basic knowledge and the fundamental skills of arithmetic, statistics, probability, measurement and financial mathematics. This unit also aims to develop students ability to apply these concepts in solving problems.

QCF157 Mathematics B1

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

To be an effective professional in a wide range of areas, such as engineering,

science, information technology, health, accounting, economics and business, an appropriate level of mathematical competence is essential. In our own personal lives, a basic knowledge of topics, such as statistics, probability, measurement and financial maths is also beneficial. This unit aims to give students a basic knowledge and the fundamental skills of algebra, statistics, probability, functions and trigonometry. This unit also aims to develop students' ability to be able to apply these concepts in solving problems. This unit provides students with a foundation for further study in calculus, trigonometry and statistics.

QCF160 Introduction to Creativity

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

There is increasing recognition of the importance of creativity to all aspects of society. This unit provides opportunities to analyse and evaluate creative applications, ideas and concepts and to understand the creative processes involved in their development and production. Completion of this unit will assist in the learning of language, key terms and concepts related to creativity, with reference to creative applications and the creative industries. The aim of this unit is to provide a broad understanding of the nature of creativity and the processes involved for a person to be creative.

QCF200 Australian Studies

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3, 6TP6

An understanding and appreciation of contemporary Australian society is essential for international students wishing to progress to degree studies at an Australian university. In this unit, students undertake a directed exploration of contemporary Australian society, with a focus on critical historical events, current issues and social and cultural norms. Students are encouraged to develop their own analyses of contemporary Australia with reference to various academic and non-academic sources as well as personal experience.

QCF212 Academic English 2

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3, 6TP6

Academic English 2 is designed to provide international students with the necessary academic literacy skills to successfully transition to first year undergraduate studies. You will be introduced to a variety of spoken and written genres and language. The aim of this unit is to provide opportunities for students to practice, develop and apply academic literacy skills in context.

QCF222 Organisations and Management

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP2, 13TP3

This unit is designed to develop understanding of the significant role that organisations play in many facets of our lives, how organisations function and what is involved in working in organisations. The emphasis is on skills that are needed at all levels and in all areas of an organisation. Students will develop a range of skills that are required by the individual to function effectively in teams and in an organisation. The aim of this unit is to introduce students to the fundamentals of organisations and management, providing a clear understanding of systems, procedures and practices and ways for employees to operate effectively in an organisation.

QCF230 Information Processing

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This unit is designed to meet the general needs of students who will need to design ways to input, validate, process and display information. It is intended to develop students' knowledge and application of boolean logic, fundamentals for designing and developing small Java and MS Access database applications. The aim of this unit is to introduce students to the principles of interface design and data validation and develop

Units

students' skills in applying these concepts to programming and database applications.

QCF252 Biology

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

The aim of this unit is to provide learning experiences from a number of different biological disciplines (histology, anatomy, physiology) in order to develop a broad understanding and appreciation of the living world.

QCF254 Physics

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3, 13TP3

Physics is one of the enabling sciences that underpin all of the 'new technologies'. Almost all areas of science and technology require a fundamental understanding of physics. Physics is relevant to students who intend to pursue further studies in a variety of disciplines including, engineering, health sciences and applied sciences. The aim of this unit is to foster an understanding of fundamental concepts of physics and to develop an attitude of open inquiry and an appreciation of scientific methodology. This includes developing problem solving skills, team skills, research and communication skills within a scientific context

QCF255 Chemistry

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

The language and basic concepts of chemistry together with the associated skills of chemical analysis and experimentation are relevant to future studies in many fields, particularly engineering, applied sciences and health sciences. The aim of this subject is to provide students with an understanding of fundamental concepts of chemistry and to develop problem solving skills in a scientific context.

QCF256 Mathematics A2

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

To be an effective professional in a wide range of fields, an appropriate level of mathematical competence is essential. In our own personal lives a basic knowledge of topics such as statistics, probability, measurement and financial maths is also beneficial. This unit aims to give students a basic knowledge and the fundamental applications of algebra as well as an intermediate knowledge and understanding of the concepts involved in statistics and financial mathematics which will equip them well for their further studies at faculty level. This unit also aims to further develop the student's ability to apply these concepts in solving problems in real life situations.

QCF257 Mathematics B2

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP1, 13TP2, 13TP2, 13TP3

To be an effective professional in a wide range of areas, such as engineering, science, information technology, health, accounting, economics and business, an appropriate level of mathematical competence is essential. In our own personal lives, a basic knowledge of topics, such as statistics, probability and financial mathematics, is also beneficial. This unit aims to give students a sound knowledge and understanding of the concepts involved in calculus, trigonometry, statistics and financial mathematics which will equip them well for their further studies at faculty level. This unit also aims to further develop the students' ability to be able to apply these concepts in solving problems.

QCF260 Professional Studies

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

This unit is designed to provide international students with an understanding of creative thinking and problem solving tools and models. The unit recognises that creative thinking is

increasingly recognized as a key success factor in business, industry and education. The unit introduces ways of working in groups that are applicable to any field of study or industry sector. Students will work in a team environment using creative process frameworks to inform the development of a creative product or outcome. The aim of this unit is to enable students to develop skills in creative thinking and problem solving as an individual and as part of a group.

QCF270 International Perspectives

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP2, 13TP3

International students benefit greatly from consideration of a range of cultural, economic, environmental and political matters that impact on them as individuals and global citizens. These issues or challenges are intended to develop international students' cross-cultural awareness in an increasingly global society. The aim of this unit is to introduce international students to an understanding of the complexities of globalisation and its effects on a range of different cultures. At the end of the unit students should have a solid understanding of the challenges facing the global community and be able to express their point of view in an informed manner.

QCN011 English for Tertiary Preparation

Credit Points	8
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 5TP2

QCS230 Computing

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, 13TP3, SEM-2

It is important when studying at university to have the computing skills necessary for accessing, organising and presenting information and knowledge of the university computing facilities, services, procedures and culture. As these skills

Units

are needed at the beginning of university study, this is an introductory subject encompassing Windows, Office, Word, Excel and PowerPoint to provide students with these skills. The aim of this unit is to provide students with the basic computing skills for successful completion of their university study.

QCS240 Information and Data Processing

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP1, SEM-2

It is important when studying at university to have the computing, research and analytical skills necessary for accessing, organising and presenting information and knowledge of the university computing facilities, services, procedures and culture. For students aiming to progress to postgraduate study programs, it is important for them to have these basic skills as well as advanced skills which will allow them to successfully meet postgraduate study requirements. QCS240 provides students with higher level word processing, spread sheeting and presentation skills including advanced formatting techniques and statistical analysis skills that are useful in a post-graduate study environment.

QCS300 Introduction to the Language of Research

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 13TP3

International students at a postgraduate level need an understanding of the research process and the ability to interpret and critically read a wide range of research. This unit focuses on providing you with an introduction to the language of quantitative and qualitative research common to a range of disciplines which will enable you to better engage with published research. Completing this unit will provide the foundations for your progress to a higher level of learning.

QEL001 IELTS Advanced

Credit Points	20
Campus	Kelvin Grove
Availabilities	Kelvin

Grove	- 5TP6
--------------	--------

QEL002 IELTS Advanced

Credit Points	20
Campus	Kelvin Grove
Availabilities	Kelvin Grove - 5TP7

QEL003 IELTS Advanced

Credit Points	20

SCB500 Industry Project

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point

- SEM-1, SEM-2,
SUM

In this unit students will apply scientific methods and quantitative techniques to real work issues. Students will develop an appropriate plan for analysing and resolving an industry issue under the guidance of both a QUT supervisor and an associate supervisor from an industry partner. At the end of the unit students will present both an oral seminar and a written report.

SEB104 Grand Challenges in Science

Anti-requisites	SEB101, SEB102
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Grand Challenges in Science explores world events, problems or phenomena from a scientific perspective, discovering the many ways in which science is used and misused by practicing scientists and the public. You will understand the problems and challenges of modern scientific inquiry using a range of multidisciplinary perspectives and explore solutions focussed approaches.

SEB113 Quantitative Methods in Science

Anti-requisites	MAB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

Mathematics and Statistics underpins Science and Engineering research and practice. In Quantitative Methods in Science you will learn to apply the tools and skills of mathematics and statistics, to analyse, model and represent data for scientific purposes. It develops your practical quantitative problem-solving skills in real multidisciplinary scientific contexts. You will apply and augment your quantitative skills using real-world data collected during field- and laboratory work. This unit also builds awareness of how the different Science disciplines use and represent data, which will facilitate your choice of a discipline major in second semester.

SEB115 Experimental Science 1

Anti-requisites	SEB114
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Science is the systematic study of the structure and behaviour of the physical and natural world through observation and experiment. To this end scientists employ a unique methodology termed the Scientific Method. "Experimental Science 1" focuses on the applied principles and concepts embodied by the Scientific Method as it relates to the fields of Chemistry and Physics. You will conduct experimental science, via inquiry-led practice, working both individually and collaboratively. Through classroom activities, workshops and laboratory experiences, you will focus on real-world applications.

SEB116 Experimental Science 2

Anti-requisites	SEB114
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Science is concerned with developing testable, quantifiable models of the world around us for the purpose of creating a sustainable, safe future for humankind. To this end, scientists employ a unique methodology termed the Scientific Method. "Experimental Science 2" focuses on the applied principles and concepts embodied by the Scientific Method as it relates to the fields of biological, environmental and earth science. You will conduct experimental science, via inquiry-led practice, working both individually and collaboratively. Through field and/or laboratory experiences, you will focus on real-world applications.

SEB200 Communicating Science and Mathematics to Diverse Audiences

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit is designed to optimise your communication skills, so that you gain a range of language tools to articulate

research and convey complex scientific and mathematical ideas. You will learn how to engage different audiences and gain awareness of responsible communication in these areas.

SEB400 Foundations of Research

Pre-requisites	Admission in to one of (ST10, IN10, UD10, MS10) or (288cp in current course)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit facilitates the acquisition of knowledge and skills essential to engaging with, and conducting research. This unit introduces you to the research process, project planning and management, and methodologies used in science, information technology, engineering, mathematics, urban development and property economics. The learning acquired in this unit will be applied to your project which is further developed in the Research units.

SEB402 Project Proposal

Pre-requisites	SEB400 (can be enrolled in the same teaching period)
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This research proposal unit leads to the capstone unit in the SEF Honours degree and draws together the theory, practice and discipline fundamentals that have been covered in your Bachelor's degree as well as the Introduction to Research and Reviewing the Field units, which are taken in conjunction with this unit. You have the opportunity to apply your knowledge to a discipline related issue or problem and to carry out an independent and in depth study that will provide the opportunity to extend and broaden your understanding of the chosen issue.

SEB403 Honours Research Project-3

Pre-requisites	SEB400 and SEB403-2. SEB403-2 can be enrolled at the same time as SEB403-3.
Credit Points	12
Campus	Gardens Point

Units

Availabilities	Gardens Point - SEM-1, SEM-2
-----------------------	--

This is the third part of the capstone research project for the SEF Honours degree and draws together the theory, practice and discipline fundamentals that have been covered in your Bachelor's degree as well as the Foundations of Research, Project Proposal units. This unit will prepare you for your transition to the professional world or for a further career in research.

SEB403 Honours Research Project-4

Pre-requisites	SEB400 and SEB403-3. SEB403-3 can be enrolled at the same time as SEB403-4
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is the capstone research project the SEF Honours degree and draws together the theory, practice and discipline fundamentals that have been covered in your Bachelor's degree as well as the Foundations of Research, Project Proposal units. In this unit you will execute, complete and present your research project. This unit will prepare you for your transition to the professional world or for a further career in research.

SEB403 Honours Research Project-2

Pre-requisites	SEB400 and SEB403-1. SEB403-1 can be enrolled in the same teaching period as SEB403-2
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is the capstone unit for the SEF Honours degree and draws together the theory, practice and discipline fundamentals that have been covered in your Bachelor's degree as well as the Foundations of Research, Project Proposal units. In this unit you will execute, complete and present your research project. This unit will prepare you for your transition to the professional world or for a further career in research.

SEB403 Honours Research Project

Pre-requisites	SEB400, SEB401 (can be enrolled in the same teaching period)
Credit Points	36
Campus	Gardens Point
Availabilities	Gardens Point - SUM-2

This is the capstone unit for the SEF Honours degree and draws together the theory, practice and discipline fundamentals that have been covered in your Bachelor's degree as well as the Introduction to Research, Project Proposal and Reviewing the Field units. In this unit you will execute, complete and present your research project. This unit will prepare you for your transition to the professional world or for a further career in research.

SEB403 Honours Research Project-1

Pre-requisites	SEB400. SEB400 can be enrolled in the same teaching period as SEB403-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This is the capstone unit for the SEF Honours degree and draws together the theory, practice and discipline fundamentals that have been covered in your Bachelor's degree as well as the Foundations of Research, Project Proposal units. In this unit you will execute, complete and present your research project. This unit will prepare you for your transition to the professional world or for a further career in research.

SEB404 Honours Research Project-2

Pre-requisites	SEB400 and SEB404-1. SEB404-1 can be enrolled in the same teaching period as SEB404-2
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

SEB404-1, SEB404-2, SEB404-3 are the capstone units for the SEF Honours degree and draw together the theory, practice and discipline fundamentals that have been covered in your Bachelor's

degree as well as the Foundations of Research unit. In this unit you will execute, complete and present your research project. These units will prepare you for your transition to the professional world or for a further career in research.

SEB404 Honours Research Project-1

Pre-requisites	SEB400. SEB400 can be enrolled in the same teaching period as SEB404-1
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

SEB404-1, SEB404-2, SEB404-3 are the capstone units for the SEF Honours degree and draw together the theory, practice and discipline fundamentals that have been covered in your Bachelor's degree as well as the Foundations of Research unit. In this unit you will execute, complete and present your research project. These units will prepare you for your transition to the professional world or for a further career in research.

SEB404 Honours Research Project-3

Pre-requisites	SEB400 and SEB404-2. SEB404-2 can be enrolled in the same teaching period as SEB404-3
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

SEB404-1, SEB404-2, SEB404-3 are the capstone units for the SEF Honours degree and draw together the theory, practice and discipline fundamentals that have been covered in your Bachelor's degree as well as the Foundations of Research unit. In this unit you will execute, complete and present your research project. These units will prepare you for your transition to the professional world or for a further career in research.

SEB410 Advanced Topic 1

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This honours level unit develops

advanced knowledge and skills in one or more discipline areas. The unit will have an industry or research training focus to prepare you for a job in the real-world or for further studies. This advanced topic is designed to complement your studies in the Honours Research Project, Introduction to Research and Reviewing the Field units.

SEB411 Advanced Topic 2

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This honours level unit develops advanced knowledge and skills in one or more discipline areas. The unit will have an industry or research training focus to prepare you for a job in the real-world or for further studies. This advanced topic is designed to complement your studies in the Honours Research Project, Introduction to Research and Reviewing the Field units.

SEB412 Advanced Topic 3

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This honours level unit develops advanced knowledge and skills in one or more discipline areas. The unit will have an industry or research training focus to prepare you for a job in the real-world or for further studies. This advanced topic is designed to complement your studies in the Honours Research Project, Introduction to Research and Reviewing the Field units.

SEB413 Advanced Topic 4

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This honours level unit develops advanced knowledge and skills in one or more discipline areas. The unit will have an industry or research training focus to prepare you for a job in the real-world or for further studies. This advanced topic is designed to complement your studies in the Honours Research Project, and Foundations of Research units.

SEB701 Work Integrated Learning 1

Equivalents	BEB701
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2, SUM

This unit provides opportunities to learn from workplace experiences. It involves attendance, participation, observation, critical reflection, and report writing on workplace activities. The emphasis of your critical reflection and report writing will be on identifying and describing aspects of professional relevance incorporating: collaboration and teamwork; work place, health and safety; professional conduct; ethical responsibility; and other aspects of your work place experience. This unit may form part of your (compulsory) course core (as required by professional accrediting bodies e.g. Engineers Australia) or it may be one of several Work Integrated Learning (WIL) units (selected as part of a minor).

SEB705 Work Integrated Learning 5

Equivalents	BEB705
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces practice-led research and research-led practice and provides you with the opportunity to use action learning as a framework for further developing your discipline knowledge as well as advanced critical enquiry skills. That is, the unit provides the opportunity for sophisticated, collaborative and reciprocal learning and outcomes that have the potential to improve work-based practice through the implement of an action learning approach.

SEB709 Work Integrated Learning 1

Equivalents	BEB709
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

SEB709 is for students who are

undertaking a second primary major in the same course, and who have already completed SEB701 in their first primary major. Please note: Advance standing for BEB701 can not be granted for a second primary major in the same course.

SWB100 Orientation to Social Work and Human Services

Anti-requisites	HHB100
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

At the beginning of studies in Social Work and Human Services it is essential that you develop a clear understanding of the scope of social work or human services, the context in which they are located, and the changing patterns of professional occupations and service delivery. It is also essential that you begin to explore your own motivations for becoming a social work or human service practitioner and begin to develop a sense of professional identity. It is anticipated that your engagement with this reflective journey will continue throughout the social work or human services course. An understanding of cultural diversity and the construction of 'difference' are integral to social work and human service practice. Understanding and reflecting on cultural diversity will be an embedded feature of this unit.

SWB102 Human Development and Behaviour

Anti-requisites	HHB102
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Social work and human service students are studying for professional careers that enhance people's personal and social wellbeing and development, enhance problem solving in relationships, and promote human rights and social justice. To do this you need to understand how individual development and behaviour are shaped by a range of factors including biological, psychological, socio-cultural, political and economic factors. You will learn about a range of theories of development and behaviour and consider the implications of such ideas for social work and human service practice. You will learn about key aspects of human behaviour such as emotion, motivation

Units

and socialisation and integrate and communicate this knowledge. Studying this information in the first year of the course provides you with necessary foundational information about people and the environments that shape their lives.

SWB105 Contemporary Human Rights

Anti-requisites	HHB114
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit examines the relationship between human rights and thematic challenges including climate change, poverty, terrorism and oppressive forms of intolerance and discrimination. It offers the opportunities to investigate present day concerns relating to the human rights of women, indigenous peoples and minority groups as well as specific topics such as human trafficking, harmful cultural practices, workers' rights and child soldiers.

SWB108 Australian Society, Systems and Policies

Anti-requisites	SWB103, SWB218
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

It is imperative for human services and social work professionals to have a comprehensive understanding of the diversity of factors within Australian society which lead to and sustain disadvantage, marginalisation, social exclusion and injustice and breaches of human rights. This unit provides an introduction to Australian society with a particular focus on those institutions, structures, systems and processes which are critical and relevant for professional practice.

SWB109 Working with Aboriginal and Torres Strait Islander Peoples and Communities

Anti-requisites	EDB041
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

- SEM-2

Understanding the impacts of dispossession, colonisation and policy directives on the ability to achieve self-determination and empowerment as basic human rights provides a requisite platform for practice and thereby helps to redress the profound disadvantage evidenced across a range of social, health and economic indicators, social exclusion and marginalisation. Effective social work and human service practice with Aboriginal and Torres Strait Islander individuals and communities requires practitioners to possess an in-depth understanding and knowledge of past practices and policies and their continuing impact in contemporary society. Reflexive and reflective practice, where you look inward and deconstruct your own values and beliefs about Aboriginal and Torres Strait Islander people and their social and community contexts are critical skills for potential social work and human service practitioners.

SWB110 Understanding Families and Relationships

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The family is typically where people receive care and support. For most people it is in their family that they develop their sense of identity and establish the skills and attitudes fundamental to relating to others. Social workers and human service professionals are often responsible for assessing the needs of families or supporting family members to care for each other. In this unit you will gain foundational knowledge about the role of family in individual growth and development and in the provision of informal social care and support.

SWB200 Working in Human Service Organisations

Pre-requisites	SWB100 or HHB100
Anti-requisites	HHB200
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit critically examines professional roles within the organisational context of Human Service and Social Work practice. Using an approach that combines

traditional classes with an experiential approach, it examines the professional role, organisational requirements, student developmental needs, motivations, and personal responses to these factors in the Human Service/Social Work context.

SWB201 Human Services Practice Placement 1

Pre-requisites	(SWB100 or HHB100) and PYB007
Anti-requisites	SWB208 or HHB208, SWB209
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM- 2, SUM

The professional human service role requires practitioners to demonstrate proficiency in applying relevant knowledge and skills in complex situations. In order to integrate and contextualise the theoretical knowledge you have obtained thus far in your human services course, you are required to undertake work integrated learning (WIL) where you will demonstrate satisfactory achievement of the Australian Community Welfare Association's seven core competencies. This introductory practice unit encompasses 200 hours of direct practice within one human services agency. The placement provides the beginning practitioner with opportunities to assess firsthand the manner in which human service practitioners implement strategies to assist service users.

SWB204 Introduction to Child and Family Services

Anti-requisites	HHB204
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The unit focuses on developing competent social work and human services professionals by providing you with opportunities to develop knowledge, skills and dispositions specifically relevant to work with children and families. Students from education, psychology, and health related areas also find this unit useful as it provides a foundation in theories and approaches for inter-professional practice with children and families that is transferable to a wide range of professional settings.

SWB207 Introduction to Youth Services

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

As social work and human service practitioners it is essential to have an understanding of and capacity to critique the range of ways young people are constructed in academic and popular contexts. It is also important for practitioners to have an appreciation of current policies oriented to young people and the nature of the various service delivery systems and programs in operation.

SWB211 Casework and Case Management

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Social work and human service practitioners are expected to be familiar with casework and case management processes and practice models, including understanding their strengths and limitations and implications for practice. Accordingly, this unit provides foundational knowledge and skill for practitioners who will utilise these critical tools.

SWB212 Community and Place Based Practice

Anti-requisites	HHB212
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Community level practice is a key social work and human services method. Various theories and approaches to 'community' and community work have been developed and used in practice. In recent years this has extended to include the need for locality oriented frames of 'space' and 'place', particularly as these apply to disadvantaged localities and tensions in various people's use of public spaces. This unit develops baseline practice skills and techniques for community level practice underpinned by social work and human service ethics and values.

SWB214 Group and Team Practice Skills

Pre-requisites	SWB220. SWB220 can be studied in the same teaching period as SWB214
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Working collaboratively and effectively with colleagues and clients in groups and teams is a key skill in human services and social work practice, particularly when working with vulnerable and often marginalised groups across diverse settings. This unit provides you with an opportunity to gain a fundamental understanding of the dynamics of groups and teams and to acquire beginning skills for effective engagement and intervention. It is located in the third year to provide a platform for collaborative academic and professional work.

SWB219 Legal and Ethical Dimensions of Social Work and Human Services

Pre-requisites	SWB100 and SWB105
Anti-requisites	HHB277
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

The legal dimensions of practice range from the nature of legislative provisions to the legal accountabilities of direct practice. Practitioners often work with vulnerable and/or marginalised persons, groups and communities and need to understand the law as both context and as a dynamic resource with which they can engage. Legal and ethical considerations in practice often intersect and are usefully examined in conjunction with each other. An understanding and capacity to respond to ethical dimensions of practice situations is central to professional capability and requires you to develop literacy about key ethical approaches and concepts, and the capability to critically apply social work and human service professional Codes of Ethics.

SWB220 Practice Theories

Anti-requisites	HHB278
Credit Points	12
Campus	Kelvin Grove

Availabilities	Kelvin Grove - SEM-1
----------------	--------------------------------

In line with the orientation of the social work and human service courses as a whole, this unit emphasises the conceptual component of your developing personal and professional practice framework integral to working effectively with a range of services users in a variety of different contexts. It is essential that you have a capacity to integrate and apply theoretical concepts to specific practice contexts, consider your own practice frame of reference and ideological influences, and understand the implications of these for practice.

SWB221 Professional Practice Processes and Assessment

Anti-requisites	HHB279
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Human service and social work students must build foundational knowledge and skills in core practice processes and assessment. This unit begins that foundation through focusing on integration of theory and practice. Because of its importance in preparing you to undertake professional placements, the unit is strategically located in second year. Understanding and reflecting on cultural diversity will be an embedded feature of this unit.

SWB222 Advanced Communication for Social Work and Human Services

Pre-requisites	HHB113 or SWB104 or PYB007
Anti-requisites	HHB215, HHB282
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Developed interpersonal communication skills are the cornerstone for both personal and professional relationships. Human service and social work in a broad sense, aim to help people in their struggle for self-determination and social justice. At a fundamental level, the struggle for independence, justice and empowerment is facilitated by interpersonal processes involving the effective use of communication and conflict resolution skills. This is a skills based unit located in

the second year of the Social Work degree and the third year of the Human Services degree to build upon fundamental communication skills. These culturally sensitive and diverse skills are the core of sound practice, whether at a micro or macro level. The essential practitioner skill of a heightened sense of self is closely examined as are reflective strategies to effectively deal with and prevent vicarious trauma, burnout and enhance lifelong learning.

SWB304 Child Protection and Family Practice

Pre-requisites	SWB204 or SWB110
Anti-requisites	HHB304
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit contributes to the aims of the social work and human services courses by extending and deepening your knowledge for practice with children and families. In particular you will extend and apply understandings related to child development and family process, cultural safety and the wellbeing of Aboriginal and Torres Strait Islander children and families, service contexts and collaborative practice, and contemporary policy and practice frameworks for child and family work.

SWB306 People, Community and Disability

Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Social work and human service practitioners must have the relevant professional knowledge and skills to understand the impact of disability, chronic conditions and health-related issues experienced by people and encountered in the community. The experience of disablement, chronic conditions or health-related issues can universally impact on people of any age or culture at any point during life course transition. This unit provides a platform for developing and integrating knowledge and skills to effectively respond to disability issues and challenging social constructions located in international, national and local community contexts.

SWB307 Youth Services Practice

Pre-requisites	Completion of 144 credit points or more of study
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit focuses on a wide range of practice contexts relevant to work in services for young people. Increasingly professionals working with young people or in agencies concerned with or impacting on young people require expertise about specific issues and practice responses. This expertise may be related to a particular professional role (eg policy analyst and advocate), the orientation or framework employed by the funding program or service (eg early intervention or prevention), or particular practice approaches that respond to issues/needs that may be impacting on young people who constitute the target group (eg mental health, drug use, juvenile offending).

SWB312 International Social Work

Anti-requisites	HHB341
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit illustrates the scope of social work practice by applying social work knowledge, skills and values to a range of international and regional issues. You will explore the relationship between core social work principles and values and global international issues including social justice, human rights, development assistance, aid and key concerns identified in the Millennium Development Goals. The Unit considers opportunities for engagement with international social work organisation and related agencies.

SWB314 Human Services Practice Placement 2

Pre-requisites	SWB201 and SWB219 and SWB220 and SWB221
Co-requisites	SWB406
Anti-requisites	HHB301, SWB301
Credit Points	24
Campus	Kelvin Grove

Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM
----------------	--

The purpose of SWB314 Human Services Practice Placement 2 is to prepare you for employment as a competent human services professional. This unit enables you to further develop professionalism: notably your communication, assessment and intervention skills along with their own practice framework while undertaking 350 hours of work practice in a human services agency supervised by an experienced practitioner. The development of a Learning Plan (LP) will provide guidance in achieving the core competencies required for effective human service practice. You are able to undertake your placement in urban, regional, rural, national or international arenas. Overseas travel documents must be completed prior to approval being given for overseas placement. Students wishing to undertake a regional or overseas placement must contact the Field Education Unit Team at least 6 months prior to the semester their placement is planned for.

SWB316 Social Work Field Education 1A

Pre-requisites	(SWB219 or HHB277) and (SWB221 or HHB279) and (SWB222 or PYB208 or HHB282)
Co-requisites	SWB317
Anti-requisites	SWB309, HHB338
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

This is a designated unit. The combined Social Work Field Education 1A and 1B units require students to complete 500 hours of professionally supervised, staff-monitored, field education in a period of not less than 65 days. In accordance with AASW requirements, students are required to engage in planned activities which may include: direct practice with individuals, groups and communities; community development, education and capacity building; working with diversity; policy analysis and development; research, evaluation and knowledge generation; education and professional development. The combined Field Education 1A and 1B units make up the first placement, students undertake two 500 hour placements over the course of

Units

their degree, completing 1000 hours in total. Students build on the knowledge and skills developed in their first two years of the degree, providing opportunity to apply these in a real world setting. A strict requirement for this unit is that students must undertake the placement selection and organisation process that occurs in the semester preceding the placement.

SWB317 Social Work Field Education 1B

Pre-requisites	(SWB219 or HHB277) and (SWB221 or HHB279) and (SWB222 or PYB208 or HHB282) and SWB316. SWB316 can be enrolled in the same study period.
Anti-requisites	SWB309, HHB338
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

This is a designated unit. The combined Social Work Field Education 1A and 1B units require students to complete 500 hours of professionally supervised, staff-monitored, field education in a period of not less than 65 days. In accordance with AASW requirements, students are required to engage in planned activities which may include: direct practice with individuals, groups and communities; community development, education and capacity building; working with diversity; policy analysis and development; research, evaluation and knowledge generation; education and professional development. The combined Field Education 1A and 1B units make up the first placement, students undertake two 500 hour placements over the course of their degree, completing 1000 hours in total. Students build on the knowledge and skills developed in their first two years of the degree, providing opportunity to apply these in a real world setting. A strict requirement for this unit is that students must undertake the placement selection and organisation process that occurs in the semester preceding the placement.

SWB318 Disaster Health: Principles, Planning and Practice

Credit Points	12
Campus	Kelvin Grove

Availabilities **Kelvin Grove** - SEM-2

This interdisciplinary unit introduces students to the principles and practices used in the management of major incidents and disasters, and the processes affecting individuals, groups and communities in the response and recovery phases. It has a particular emphasis on health and welfare responses. The roles, responsibilities and tasks which authorities and others undertake in order to safeguard the community and minimise disruption, dislocation and trauma are examined. Effective response by these systems to major incidents and disasters is examined along with the responsibilities and roles of individuals who must understand organisational planning and preparation, disaster management, and service coordination.

SWB402 Social Work Field Education 2A

Pre-requisites	SWB220 and SWB221 and (SWB310 or HHB278) and SWB316 and SWB317
Co-requisites	SWB403 and SWB406
Anti-requisites	HHB408, SWB408
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

To practise ethically, competently and accountably, social work practitioners demonstrate proficiency in applying relevant knowledge and skills in complex situations, meet the six AASW Practice Standards and comply with the Code of Ethics. In order to integrate and contextualise the theoretical knowledge students have obtained thus far in their course, this unit requires students to undertake work integrated learning (WIL) where they will demonstrate satisfactory achievements of the six AASW Practice Standards and adherence to the Code of Ethics and the learning outcomes of this unit.

SWB403 Social Work Field Education 2B

Pre-requisites	SWB220 and (SWB310 or HHB278) and SWB316 and SWB317 and SWB402. SWB402 can be enrolled in the same teaching period as SWB403
----------------	--

Co-requisites	SWB406
Anti-requisites	SWB408, HHB408
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

To practise ethically, competently and accountably, social work practitioners demonstrate proficiency in applying relevant knowledge and skills in complex situations, meet the six AASW Practice Standards and comply with the Code of Ethics. In order to integrate and contextualise the theoretical knowledge students have obtained thus far in their course, this unit requires students to undertake work integrated learning (WIL) where they will demonstrate satisfactory achievements of the areas outlined in their PLP. They must completely apply strategies to assist service users, engage in critically reflective practice, enhance their personal practice framework and examine the influences of practice methods, clients, staff, organisational, cultural and community factors on program and intervention processes and outcomes.

SWB405 Advanced Social Work Project

Anti-requisites	HHB411
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2, SUM

This unit enables students to undertake an in-depth study on an approved topic relevant to social work practice. To enable this, students will extend their knowledge and skills in undertaking various aspects of the research process as this relates to their investigation.

SWB406 Transition to Practice

Pre-requisites	SWB314 or (SWB402 and SWB403). SWB314 or SWB402 or SWB403 can be studied in the same teaching period as SWB406
Anti-requisites	SWB409, SWB301
Equivalent s	SWB315
Credit Points	12

Units

Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM

This unit recognises that you are about to transition from university to social work practice and that you will need to sustain your professional and educational development. Accordingly, this final semester unit provides a dual platform for transition to practice and independent professional development.

SWH202 Health, Wellbeing and Social Work

Equivalents	SWB202
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Social workers frequently work within the health system and even where they work in other areas, the health and wellbeing of their clients remains central to their practice. The social determinants of health, as well as the social consequences of health problems, are both very much part of the social work landscape. Hence it is critical for social workers to ensure their knowledge and skill-sets include a specific focus on health and wellbeing. This unit is placed in the second year of the social work course, providing you with an opportunity to understand the foundation theories and systems relevant to health and wellbeing.

SWH310 Linking Social Work Theory and Practice

Pre-requisites	(HHB277 or SWB219) and (HHB279 or SWB221) and (HHB282 or SWB222 or PYB208) and SWB316 and SWB317. SWB316 and SWB317 can be studied in the same teaching period as SWH310.
Anti-requisites	HHB339
Equivalent s	SWB310
Credit Points	12
Campus	Kelvin Grove and External
Availabilities	Kelvin Grove - SEM-1, SEM-2, SUM External - SUM

It is imperative that social workers are able to clearly and concisely articulate well developed professional frameworks

that guide practice. All frameworks include important ethical components which in the Australian context are informed by the AASW Code of Ethics (2010). It is offered at this point in the course as an important complement to professional placement. Your personal and professional practice framework is perhaps the most important piece of work that you will develop and utilise following your academic studies.

SWH311 Mental Health and Social Work

Pre-requisites	SWB221 or HHB279
Anti-requisites	HHB340
Equivalents	SWB311
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Social workers need knowledge and skill to support their understanding and capacity to intervene and/or support individuals, families, groups and communities affected by mental illness or disorder. While social workers across the range of practice fields require this knowledge and these skills, those working in agencies that provide treatment for mental illness and alcohol and drug misuse need higher capabilities. Social work practice is concerned with the social context and social consequences of mental illness and disorder, and the promotion of mental health. The unit content builds on knowledge of human development, behaviour and emotion across the lifespan.

SWH400 Macro Context of Social Work Practice

Pre-requisites	SWB108 or SWB218 or SWB103
Anti-requisites	SWB302
Equivalent s	SWB400
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Social workers and human service workers must have a thorough understanding of the macro policy context and the structure of government, an awareness of political institutions and policy actors in Australia, policy-writing and research, policy-making processes, budgetary considerations and strategies

for change. An appreciation of the 'art' and extent of real world politics - 'realpolitik'- assists in understanding how these policy institutions, processes, cycles and strategies combine to shape and change social policy. This unit describes and explores the relationships between politics, economics and social policy placing particular emphasis on the implications of these and other macro forces for social work practice. This unit focuses on integrating policy knowledge, research and analysis to apply tools to real world policy issues for policy change.

SWH401 Research Methods for Professional Practice

Pre-requisites	SWB100 or HHB100
Equivalents	SWB401
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit equips you with knowledge and skills to investigate models of service and practice questions and to develop recommendations for change. A range of particular methods for developing, evaluating and improving models of social service and social care delivery will be examined including reflective practice, participatory action research, service evaluation and quality assurance processes, and the use of empirical research to inform practice. You will be able to apply methods learnt to a range of service delivery and practice contexts.

SWH404 Complexity in Social Work and Human Services Practice

Pre-requisites	(SWB201 or SWB316 or SWB317) and SWB219. SWB219 can be studied in the same teaching period as SWH404
Equivalent s	SWB404
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Social work and human service practitioners are often faced with presenting issues which display a high level of complexity. For example, in direct practice it is common for individual difficulties to include multiple dimensions which may be categorised as relating to

mental health, homelessness, disability, family conflict, unlawful behaviour, poverty, income support, and or drug/alcohol usage. It has become increasingly recognised that direct practice should be more client focused or 'holistic', with workers being able to effectively deal with multiple issues, rather than provide a narrow response to a single issue. This presents a challenge to social workers and human service practitioners, particularly in the context of policy and program 'silos' which tend to promote a narrow focus. This unit broadens the analytical and practice framework for human service and social work professionals.

SWN002 Researching Trends, Challenges and Opportunities

Pre-requisites	SWN018 or SWN001. SWN018 may be studied in the same teaching period as SWN002
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit describes and analyses the characteristics and workforce of the human services sector, along with the purpose, roles and methods of social workers within it. Current issues affecting the profession are examined with particular emphasis on the dynamic interplay of existing social, economic and political events and their implications for social work practice and institutional contexts. You develop high-level understanding of core knowledge, values and ethics that underpin practice, in particular, the use of research to expand the evidence base for efficacious interventions at the macro, mezzo and micro levels in a changing society. Research and analytical methods and skills are the basis for practitioners who must interrogate and critically examine current and future trends, challenges and opportunities to inform ethical practice and program redesign.

SWN003 Political Economy and Policy Making

Pre-requisites	(SWN001 or SWN018) and SWN002
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

(Block), SUM

This unit recognizes the importance of political and economic factors for professional practitioners in the human service and social welfare sector. It describes and analyses the fundamentals of the Australian political system including the Parliamentary structures and law making processes at different levels of government. It explores the 'real politik' of political parties and vested interest groups in the political process giving particular attention to the development of policy. It provides an overview of public sector policy making process including the budgetary procedure. The unit encourages students to be active actors in relevant political/economic processes.

SWN004 Professional Communication Skills

Pre-requisites	SWN018 or SWN001. SWN018 may be studied in the same teaching period as SWN004
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block)

This unit provides the skills for the cornerstone of social work practice; the development of constructive relationships through the differential use of self and professional communication. Through a heightened sense of self, practitioners are best equipped to select the most appropriate approach to work with others. This unit examines a number of approaches to practice and together with an exploration of self, lays the foundation for an emerging framework for practice and equips you with skills for your field education, your capstone unit and professional practice.

SWN005 Health, Wellbeing and the Human Condition

Pre-requisites	SWN018 or SWN001. SWN018 may be studied in the same teaching period as SWN005
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block)

This unit considers the contested and changing understandings of human wellbeing across the life cycle. Key aspects of wellness and health are

examined for their impact on individuals, groups, and community wellbeing. IT explores selected psychosocial theories and looks at their utility for social work practice particularly in relation to mental health, child and family welfare, and disability services. The unit views health and wellbeing from an holistic perspective, and critiques the dominant bio-medical model and challenges perceptions that quality of life is determined merely by acquisition and consumption.

SWN006 The Ethical, Legal and Organizational Context of Practice

Pre-requisites	SWN018 or SWN001
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block)

This unit locates social work practice within its ethical, legal and organisational context. It emphasises the imperative for students to know, understand and actualise core social work values particularly those incorporated in the profession's national and international codes of conduct, professional standards and ethical practice requirements. The statutory and organisational dimensions of social work practice are described and explored with case scenarios providing opportunities to develop strategies for self-management within diverse organisational contexts.

SWN007 Casework Practice

Pre-requisites	SWN018 or SWN001
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2 (Block)

This unit builds on the fundamental communication skills essential for professional social work case work and case management practice. It assists students to achieve professional levels in understanding and applying contemporary social work theories and principles which underpin case work and case management. The application of core principles that are essential in social work practice, such as client self-determination and empowerment, are developed through experiential learning of

skills including interviewing techniques, counselling, short-term intervention, problem-solving and facilitation of change.

SWN008 Group, Team and Community Work for Professional Practice

Pre-requisites	SWN018 or SWN001
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2 (Block)

This unit critically reviews the theory and research base of group work, team work, and community work and explores the strategic use of each as an intervention method in professional practice. It requires students to develop and demonstrate high level skills for the effective use of each of these as intervention methods for addressing disadvantage and marginalisation. It focuses particularly on group, team and community engagement, and tests skills for research and analysis of community needs, capacity building, advocacy, negotiation, conflict resolution, project management, planning and leadership.

SWN009 Social Work Assessment and Intervention

Pre-requisites	(SWN018 or SWN001) and SWN004
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block)

At the core of social work knowledge and skill is the capacity to make assessments and, in consultation with the service user, decide on the most appropriate intervention. Assessment and intervention almost always involves individuals, groups and communities experiencing disadvantage and vulnerability, and is therefore characterised by disparities in authority and power. Hence, assessment and intervention must incorporate planning and actions which are highly professional and ethical, and based on principles of social work practice, and practical experience with client collaboration and partnership for engagement and empowerment.

SWN010 The Socio-Cultural Context of Professional Practice

Pre-requisites	SWN018 or SWN001
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block)

This unit develops your knowledge about historical and contemporary issues impacting on Aboriginal and Torres Strait Islander peoples and culturally and linguistically diverse Australians. It also introduces you to ways of working with cultural diversity in a culturally responsive and safe way.

SWN011 Professional Practice 1

Pre-requisites	(SWN001 or SWN018) and SWN002 and SWN004 and SWN007 and SWN008. SWN007 and SWN008 may be studied in the same teaching period as SWN011
Co-requisites	SWN012
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2 (Block)

This is a designated unit. The combined Professional Practice 1 and 2 units require students to complete 500 hours of professionally supervised, staff - monitored, field education in a period of not less than 65 days. Students who have advanced standing for SWN011 are required to complete 280 hours of placement. In accordance with AASW requirements, students are required to engage in planned activities which may include: direct practice with individuals, groups and communities; community development, education and capacity building; working with diversity; policy analysis and development; research, evaluation and knowledge generation; education and professional development. This unit is the first of three Professional Practice units undertaken. A strict requirement for this unit is that students must undertake the placement selection and organisation process that occurs in the semester preceding the placement. (Designated unit)

SWN012 Professional Practice 2

Pre-requisites	(SWN001 or SWN018) and SWN002 and SWN004 and SWN007 and SWN008 and SWN011. SWN007, SWN008 may be taken in the same teaching period as SWN012
Co-requisites	SWN011
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2 (Block)

This is a designated unit. This second Professional Practice unit requires students to complete 280 hours of professionally supervised, staff monitored, field education in a period of not less than 40 days. In accordance with AASW Education and Accreditation Standards and AASW Practice Standards for Social Workers, engagement in professional practice is a core component enabling students to demonstrate social work knowledge, skills and values within in a professionally supervised field education social work context. A strict requirement for this unit is that students must undertake the placement selection and organisation process that occurs in the semester preceding the placement. This unit is the second of three Professional Practice units.

SWN013 Professional Practice 3

Pre-requisites	SWN005 and SWN006 and SWN009 and SWN010 and SWN011 and SWN012
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1 (Block), SEM-2

This is a designated unit. In accordance with AASW requirements, students are required to engage in 500 hours of professionally supervised, staff-monitored, field education. Field activities may include: direct practice with individuals, groups and communities; community development, education and capacity building; working with diversity; policy analysis and development; research, evaluation and knowledge generation; education and professional development. As a capstone unit, Professional Practice 3 synthesises the

Units

social work knowledge, skills and values of student's 'whole of course' experience. A strict requirement for this unit is that students must have undertaken the placement selection and organisation process that occurs in the semester preceding the placement.

SWN018 Planning, Theories and Frameworks for Social Work Practice

Equivalents	SWN001
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

A reflexive interface enables each social worker to formulate practice approaches and a frame of reference that is responsive to complex and dynamic societal and practice environments. Social work has a theoretical architecture that informs practice. This unit focuses on providing you with knowledge and skills of the core values, theories, perspectives and models that underpin social work practice frameworks and which are the foundation for effective helping interventions. Students undertake an audit of their extant knowledge, skills and values and then plan their learning needs for their professional social work development path, consistent with AASW Practice Standards.

SWN019 Research Skills for Social Change

Pre-requisites	(SWN018 or SWN001) and SWN002
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit develops your knowledge and skills in terms of research and scholarship relevant to the social work profession. The role of research in social work is to provide a sound knowledge and evidence base for practice. The unit covers approaches to social inquiry, the role of social theory, methodology, methods and ethical considerations relevant to the conduct of social research.

SWN020 Practice Research Project

Pre-requisites	SWN019 and SWN012 and SWN003. SWN003 may be
----------------	---

	studied in the same teaching period as SWN020.
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit scaffolds the design and undertaking of a research project of significance to social work. This unit synthesises the knowledge and skills you will have gained earlier in your studies, in particular your methodological skills taught in SWN019 Research Skills for Social Work. Within this unit you will design and implement a research design in a manner which reflects appropriate rigor and ethical consideration and within a scope that is logistically possible. The unit will also provide you with the opportunity to present your findings in a scholarly way appropriate for a social work and human service audience.

UDB283 Surveying Computations

Pre-requisites	(MAB100 or MAB120) and UDB182
Equivalents	DBB646
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes the use of advanced scientific calculators and their application for geometric computations, solution of road and area problems, missing data closes, and simple curve problems. It offers solutions for more difficult problems including the three point problem, interrupted bases and various types of curve problems. It introduces spherical trigonometry, the solution of spherical triangles and the use of spherical trigonometry to determine position and direction on the Earth's surface from observation to astronomical objects. Practical exercises determine position and direction.

UDB285 Cadastral Surveying

Pre-requisites	UDB182
Equivalents	PSB620
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes land title systems, reinstatement: an explanation of the options of land title systems, with particular reference to Customary Land Tenure, Private Deeds registration, Public Deeds Registration, and Registration of Title. It includes an analysis of reinstatement of property boundaries as applicable to Queensland; the undertaking of a field survey to reinstate the boundaries of a section in the Brisbane Metropolitan area; preparation of cadastral and detail survey plans for survey actions; the legal aspects of reinstatement of boundaries; case law associated with re-instatement; statutory requirements that relate to the zoning and development of land.

UDB301 Research Methods

Pre-requisites	Completion of 240cp including 216cp in in UDB, USB or UXB units
Equivalents	CNB395
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Research Methods will introduce students to the range of methods and techniques that may be utilised in examining questions related to professional practice. A comprehensive overview of research methods will be provided in order that students are able to contribute to research as a part of their professional practice, and to enable them to critically analyse research findings and publications.

UDB302 Development Process

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

UDB313 Programming and Scheduling

Equivalents	CNB335
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit covers the following: Project time and resource planning techniques such as bar charts, critical path networks

Units

(precedence, time scales, and activity on arrows); Line of balance; Resource allocation and levelling; Schedule updates and progress control; Delays and claims analysis. Applications of computer-based project planning software will form an important part of the study in this unit.

UDB381 Geospatial Mapping

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit will provide the student with a sound knowledge and understanding of image mapping principles (including photogrammetry) and processes as well as practical skills and understanding required to collect spatial information and to produce fundamental mapping products. In addition this unit will provide the skills and knowledge of the principles and characteristics of cartographic communication, surface modelling techniques and digital mapping.

UDB382 Photogrammetric Mapping

Pre-requisites	UDB383
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds upon the Geospatial Mapping unit to provide the student with developed knowledge and understanding of photogrammetric mapping theory and processes including spatial geometry, mathematics and aerotriangulation. The unit will also provide the student with an integrated knowledge and understanding of map production principles and practice applied to photogrammetric outputs.

UDB383 Control Surveying and Analysis

Pre-requisites	MAB730
Equivalents	PSB642
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes the following: reconnaissance for geodetic surveys (formulate mathematical models for the solution of linear and non-linear

positioning in one, two and three dimensions); geodetic observations techniques and reduction of observations; the three classical methods of geodetic surveying (triangulation, trilateration and traversing); precise levelling including instrument testing; properties of the meridian ellipse; radii of curvature, meridian arc; spheroid as a geodetic reference surface, latitude, longitude, geoid separation and ellipsoidal height; mutual conversion of geodetic and Cartesian coordinates.

UDB384 Geodesy

Pre-requisites	UDB383
Equivalents	PSB643
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit contains the following theory: concept and classification of geodesy, the basic concepts of Earth's gravity field, level surfaces and plumb lines, heights, geoid, mean sea level, spherical harmonics etc, fundamentals of satellite geodesy, reference coordinate systems. It considers GPS positioning models and algorithms, software, GPS field observing, various GPS applications in geomatics; mapping terms and definitions; the mapping problem; principles for deriving projections; the use of skew graticules; the UTM system.

UDB387 Spatial and Land Information Management

Pre-requisites	UDB281
Equivalents	PSB612
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides you with an understanding of the spatial data infrastructure that will increasingly underpin decision making in diverse areas of development including resource management; urban and rural planning; cadastral administration and facilities management. The unit will provide an introduction to the concepts of a spatial data system planning overview, system implementation, and standards, legal issues, and knowledge-based techniques.

UDB388 Spatial Analysis

Practice

Pre-requisites	UDB281
Equivalents	PSB654
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit expands a student's knowledge in the field of spatial information science within the framework of a practical exercise focussing on advanced spatial analysis techniques. This approach facilitates exposure to and the incorporation of emerging processes of acquisition, validation, storage, extraction, analysis and presentation of spatial information. A geographic information system environment is utilised to provide a practical introduction to industry practices and client expectations. This unit will provide students with enhanced knowledge of the extent, theory and practice of spatial information science and an enhanced ability to define and solve problems associated with manipulation of spatial information systems to meet client expectations.

UDB410 Strategic Construction Management

Pre-requisites	UDB310 or Admission into BN85 or Admission into UDBXSMJ-CONSMGT
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

UDB410 is a capstone construction management unit bringing together all the skills you have learnt so far in your UD40 construction management course. Construction Managers require a strategic focus on site management, business and corporate responsibilities to manage time, cost, quality and safety on a construction project. UDB410 Construction Management is the last of a series of construction units UDB110, UDB210, UDB310 and consolidates skills students have learned throughout their degree to advance to a work-ready construction manager.

UDB471 Urban Planning Practice

Pre-requisites	UDB266
Credit Points	12

Units

Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Students develop skills of interpretation and problem solving to plan the development of a locality or suburb with a population of up to fifteen thousand. Consulting with local governments, communities and stakeholders, and working in supervised multi-disciplinary teams, they produce a real-world local area plans, integrating a wide range of housing, access, work, play, community, cultural and environmental concerns.

UDB472 Community Planning

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Students gain information on the many issues involved in community planning, including affordable housing, environmental quality and design, employment, human services, community access and culture. Combining this with knowledge and skills acquired earlier in the course, they learn to produce solutions and formulate policies which link government policy to local outcomes. This involves community involvement, consultation and conflict resolution.

UDB473 Planning Theory and Ethics

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The application of theory to practice defines the essence of planning. The unit explores the historical and contemporary theories of planning; links the relationship of theory to practice; defines the role of ethics in planning practice; and aids the student in developing his or her own theoretical and ethical foundation for planning practice.

UDB474 Regional Planning Practice

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Students develop and apply the knowledge of policy formulation and skills of analysis and synthesis imparted in Regional and Metropolitan Policy, to real world problem-solving at a scale which is larger than a single local government. This culminating practice unit concentrates on the broader regional and metropolitan scales to develop skills in strategic-level planning.

UDB475 Regional and Metropolitan Policy

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Students learn to focus and apply material from a wide range of disciplines and locations to understand and develop current regional and metropolitan policy. Issues of global, national and state regionalism, demography, economics, human services, central place theory, regional resource evaluation and public administration are related to work in the Regional Planning Practice unit.

UDB483 Global Positioning Principles and Practice

Pre-requisites	UDB383 and UDB384
Equivalents	PSB644
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit includes the following: GPS operation and navigation messages; GPS observable and error budget; differencing techniques; GPS positioning models and algorithms; software; GPS field observing; static, kinematic, RTK and various GPS applications in geomatics. It also includes a practical on the GPS network.

UDB484 Topographic, Hydrographic and Mining Surveying

Pre-requisites	UDB383
Equivalents	PSB645
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit includes the following: field surveys for DTMs as-constructed surveys; associated specifications and standards; mining surveying for surface and below surface mining activities; Hydrographic surveying for exploration and port management.

UDB485 Property Development Practice

Pre-requisites	UDB302 and UDB385
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops your knowledge and capability to engage in a professional manner with land and property development practice. Land development issues dealt with in preceding units are bought together in this final semester unit to prepare you to fulfil your professional role in the practice of land and property development. This unit will further develop the practical skills necessary for the preparation of lot reconfiguration plans suitable for sealing and registration with appropriate organizations.

UDB486 Cadastral Practice

Pre-requisites	UDB285
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

UDN503 Track Geometry and Train Interaction

Credit Points	12
Campus	External
Availabilities	External - SEM-1

The sole purpose of track is to support the safe and speedy passage of trains carrying passengers, minerals, freight, primary produce and so on. Although tracks can deteriorate due to environmental factors, the primary source of deterioration is the passage of trains. Operators want trains to carry larger and larger payloads at ever higher speeds, which induce increasingly large static and dynamic forces in the track. Those forces deteriorate the track which leads to a rougher ride for the trains, causing even

higher dynamic forces down into the track and up into the vehicle. This unit is intended to provide you with an understanding of the interaction between track and trains, which builds on and develops your knowledge of the track structure from UDN500, UDN501 and UDN502, explains aspects of vehicle design, and provides you a basis for appreciating how incidents such as derailments occur when you come to study UDN505.

UDN504 Track Construction, Civil Structures

Credit Points	12
Campus	External
Availabilities	External - SEM-2

This unit will give you opportunity to research and manage the construction of track and structures within the rail right of way, together with geotechnical risk.

UDN505 Assets, Environment and Safety

Credit Points	12
Campus	External
Availabilities	External - SEM-1

At the heart of your responsibilities as a railway civil engineer is management of the rail corridor to ensure safe, reliable, environmentally sound train operations through that corridor. This unit provides students with knowledge and abilities for managing the assets in the corridor to ensure safe operations and environmentally responsible activities.

USB100 Understanding the Built Environment

Equivalents	UDB101
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit exposes students to the various professions and concepts that determine, develop and manage the built environment and how the disciplines of construction management, quantity surveying, urban and regional planning and property economics interact to achieve an economic and sustainable built environment.

USB140 Imagine Property

Equivalents	UDB140
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces the underlying concepts of property and describes the various participants in the industry and how their roles interact to develop, acquire, value and dispose of residential property in both the public and private sector. The unit will provide the foundations for further study in the property valuation, property law and property investment and finance units from primarily a residential perspective. Interactive activities and assessment will be used to convey and test these fundamental property principles.

USB141 Building Big

Equivalents	UDB141
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds on the construction fundamentals covered in the unit UXB110 Residential Construction and further develops these concepts and applies them to the construction methods, building area measurement and quality of design and construction for industrial property, retail centres, high rise commercial and high rise residential property. These concepts will provide the basis for the understanding of how construction type and quality are reflected in the market demand and value of these property types from a development, valuation and investment perspective.

USB240 Market Analysis

Pre-requisites	BSB113 or UDB104
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit builds upon the foundation property, valuation and economic units from your first year studies. You will apply demographic, economic and key urban economic theories and policies in the property market

environment. Understanding property markets will assist in the creation of marketing and investment strategies to meet targeted consumer supply and demand. You will conduct property market research and interpret the outcomes from research publications.

USB241 Money and Wealth

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit provides the opportunity for you to learn basic accounting and investment principles within the context of the property industry. You will also develop basic financial, cost and management accounting and financial management skills. This unit will support you to conduct more advanced financial and statistical calculations in later valuation and property units and is complementary to units in market analysis and property investment analysis

USB242 Experience Property

Pre-requisites	USB140 or UDB140
Equivalents	UDB242
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit builds upon the preliminary property fundamentals covered in the unit USB140 Imagine Property, expanding those key concepts to income producing and investment grade assets. This unit develops an understanding of the various commercial market sectors and how various features of these markets impact on the value of a property asset. The unit will provide the foundations for the further study in the property valuation, property law and property investment and finance units from a commercial property perspective. Interactive activities and assessment will be used to convey these fundamental income producing property principles.

USB243 Property Legislation

Pre-requisites	USB242
Equivalents	UDB241
Credit Points	12
Campus	Gardens Point

Units

Availabilities	Gardens Point - SEM-1
----------------	---------------------------------

A practicing property professional and property valuer needs a good understanding of several areas of property related legislation as it applies to property transactions and property practice to be able to manage and avoid risk, identify property and valuation legal issues as they arise and identify when specialised legal counsel is necessary. This unit focuses on extending and applying the theoretical knowledge obtained in Experience Property and Urban Development Law to explore how Commonwealth and State legislation is applied to property practice and property transactions, with particular focus on statutory valuation and property acquisition and resumption. The unit covers areas of property rights, contract, agency, statutory valuation, consumer protection and dispute resolution as applicable to a practicing property professional in Queensland.

USB244 Asset Performance

Pre-requisites	Completion of 96 credit points or more of study
Equivalents	UDB344
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

With an increasing number of companies and institutions now leasing and investing in property the management of these assets is becoming a crucial aspect of business practice and investment performance. This unit will cover the physical and financial aspects of commercial, retail and industrial property management and the role of property as a strategic real estate asset and its role in a diversified investment portfolio. The area of corporate real estate and asset management will be covered in the unit

USB245 Property Investment Analysis

Pre-requisites	USB242 or UDB242
Equivalents	UDB246
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

Property analysts are required to analyse

property as an investment and provide investment recommendations. This involves a close scrutiny of property investment options, and selection of the most appropriate option given the investor's preferences, goals and market conditions. This unit provides the basis to enable the property analyst to examine the property's investment worth over time using discounted cashflow techniques, including an introduction to the effect of financing and tax considerations, risk and return and comparison against investment objectives.

USB246 Transaction Process

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The buying and selling of property is a critical point in any property development, valuation or property investment. This unit provides you with an understanding of the transaction process in respect to acquisition, contract negotiation, due diligence, taxation considerations, legal structuring, sales and/or lease negotiation, compliance with relevant legislation and settlement. It demonstrates the relevance and interaction of units such as property valuation, investment analysis, market analysis, property law and planning in all property transactions.

USB300 Property Development

Pre-requisites	192 Credit Points
Equivalents	UDB302
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit brings together concepts gained on strategic evaluation, risk, organisational structure, planning, construction and development feasibility analysis. It places this knowledge in a total project context and provides students with an understanding of the processes involved in property development from conception to completion and beyond.

USB341 Money and Property

Pre-requisites	USB245 or UDB246
----------------	------------------

Equivalents	UDB341
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Property is a major asset class of all available investment options. Due to its distinct characteristics, debt and equity financing plays a major role in investment decisions. As such, this unit further develops students' understanding of property investment and financing techniques and the place of property assets within the capital markets. This unit covers the financing of a range of asset types including residential, income producing, development and property funds.

USB342 Property Software

Pre-requisites	USB245
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces students to a range of industry-standard property software products. Students will gain knowledge in the operation of a variety of industry specific software for the analysis and management of a range of property types. Students will develop their competency in using these products, as well as skills in the analysis of the outcomes generated, using the property software as a decision making tool to support investment recommendations. This capability will help students to prepare their readiness to work in the industry. This unit is an advanced unit that builds upon the skills and knowledge you developed in USB245 Property Investment Analysis and it links with USB300 Property Development.

USB343 Boutique Valuations

Pre-requisites	USB242
Equivalents	UDB247
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is the capstone valuation unit and applies the valuation principles and procedures developed in the units USB140, Imagine Property, and USB242, Experience Property, to the more complex property classes such as

Units

rural property, special premises, retail and business based property that require a greater level of student expertise for analysis and value calculation. Assessment items will provide students with the opportunity to undertake practical valuation exercises to link this unit with the property knowledge and valuation principles developed throughout their studies.

USB344 Property Project

Pre-requisites	192 Credit Points
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This is the capstone unit for the Property Economics degree and draws together the theory, practice and property fundamentals that have been covered in the units studied to date. You will have the opportunity to apply knowledge learnt in previous units to a property related issue and to carry out an independent and in depth study that will provide the opportunity to extend and broaden your understanding of a chosen issue. This unit prepares you for transition to the professional world.

UXB110 Residential Construction

Equivalents	UDB110
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops your knowledge, skills and application for residential construction management. The unit introduces current domestic construction techniques and materials that are the core of any construction process. You are taught to read plans and build a house by studying construction theory and legislation, visiting building sites, and sketching construction details. This first year unit complements USB100 and prepares students for Integrated Construction Management and Commercial Construction Management.

UXB111 Imagine Construction Management

Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-1
----------------	---------------------------------

Imagine what your future construction management career will be like. This unit introduces you to the essential professional skills and practices you will need throughout your studies and professional career, and provides a sense of identity as a construction management professional. Key concepts such as occupational health and safety, professional practice, ethics, information management and sustainability are explored. Recent developments in construction will be highlighted and the future of construction will be explored.

UXB112 Introduction to Structures

Equivalents	UDB111
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The choice of material and the reliance on the material being "fit for purpose" is essential to the success of any building project. This unit provides an introduction to building materials, such as rock, soil, timber, masonry, concrete and metal and forms the basic building blocks of subsequent units. We will cover the structural and non structural materials used in the construction process and focus on the basic properties, construction applications, behaviour, strength, durability, suitability, sustainability and limitations.

UXB113 Measurement for Construction

Equivalents	UDB113
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces aspects of the scope of the role of construction cost management professionals independently and for contractors. It examines the Australian standard method of measurement introducing formal measurement techniques and methodologies of residential and small commercial building works within the context of the tendering/procurement process and the introduction of cost management / building area

measurement. The unit also provides a basic appreciation of virtual building graphical models as they relate to integrated practice concepts used in industry, by way of the graphical representation and spatial relationships of digital building models. It links to foundation units in construction technology and prepares you for further advanced units in building and infrastructure measurement and construction estimating.

UXB114 Integrated Construction

Equivalents	UDB112
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit further develops your skills and knowledge of residential construction. It has a focus on integrating residential/ small commercial construction processes in a collaborative digital environment by utilizing building information technology. It links to the work previously undertaken in UXB110 Residential Construction and prepares you for UXB211 Building Services and other units.

UXB120 Introduction to Heavy Engineering Sector Technology

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit introduces resource sector technology associated with on and off Shore Oil and Gas (LNG), open cut and underground mining and power generation and distribution infrastructure including processing plants/plant design and infrastructure systems. Students will also develop introductory knowledge of safety and risk management within these sectors and develop an appreciation of mineral economics. It links to the work being undertaken in units Imagine Quantity Surveying and Cost Engineering.

UXB121 Imagine Quantity Surveying and Cost Engineering

Equivalents	UDB216
Credit Points	12
Campus	Gardens Point

Availabilities	Gardens Point - SEM-1
----------------	---------------------------------

Imagine what your future Quantity Surveying and Cost Engineering career will be like. This unit focuses on three broad areas of professional quantity surveying and cost engineering and in doing so, considers the similarities and differences across Quantity Surveying and Cost Engineering. Firstly, what it means to be a professional is considered including image and status, fees, codes of ethics, professional competence and continuing professional development. Secondly, ways in which professionals engage with a workplace including terms of appointment are explored. Finally, the work of quantity surveying and cost engineering takes place within a social and environmental context and the unit will relate interactions between business and environmental interests including the natural environment, environment economics and ecologically sustainable development. This unit occurs in the first year of your course to provide you with the foundational context in quantity surveying and cost engineering and relates in particular to units in measurement and cost planning and controls.

UXB130 History of the Built Environment

Equivalents	UDB162
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The unit looks at the interactions of forces and events that act to produce elements of the built environment, and the role played by the built environment in shaping human history through the use of historical examples from around the world.

UXB131 Imagine Planning and Design

Anti-requisites	DEB101
Equivalents	UDB161
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit, generally taken by first year students in QUT's planning course, will introduce you to planning and design in

urban and regional planning. You will learn about basic theories and practices of planning and design, planning policy and the planning profession. This unit involves both individual and group work and you will also develop project management, research and communications skills necessary for professional practice.

UXB132 Urban Analysis

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit equips you with the necessary skills to comfortably undertake statistical and spatial analysis of cities and regions. Lectures will be based thorough urban analysis and will introduce a variety of quantitative analysis techniques, with hands-on exercises during the practical sessions.

UXB133 Urban Studies

Equivalents	UDB164
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to the various demographic, economic, social and physical aspects of our cities to help understand the nature of cities we live in. This unit builds upon the knowledge introduced in Imagine Planning and Design and Urban Analysis, and provides the theoretical foundation for application in studio type units in subsequent years.

UXB134 Land Use Planning

Equivalents	UDB163
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides you with knowledge of and skills in land use planning and geographic information system (GIS) in an integrated way. This unit provides you with a balanced and clear introduction into the substantive domains of land use planning, one of the primary functions of planners. This unit builds on the academic skills learnt in USB100 - Understanding the Built Environment, UXB131 Imagine Planning and Design

and UXB132 - Urban Analysis.

UXB210 Commercial Construction

Pre-requisites	UXB110 or UDB110
Equivalents	UDB210
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The aim of this unit is to provide you with extensive theoretical knowledge to manage and supervise the construction of a cross section construction types such as low rise residential apartment buildings and commercial and industrial buildings. Incorporated within the unit is a sound understanding of how a building achieves structural stability and equilibrium through its load paths through basic study and analysis of engineering components and systems. It links and builds on the earlier studies undertaken in your first year including residential and integrated construction; building services and prepares you for further advanced units in designing structures and highrise construction management.

UXB211 Building Services

Equivalents	UDB215
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops your knowledge, skills and application for Building services focussing on fire, hydraulics, mechanical and electrical services. It links to basic work and understanding previously undertaken in your first year of study and prepares you for further advanced units in Commercial and High-rise Construction Management and Services and Heavy Engineering Measurement.

UXB212 Designing Structures

Pre-requisites	UXB112 or UDB111
Equivalents	UDB211
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

The unit is an introduction to the basic

Units

principles of structural engineering applicable to basic structure. Quantitative and qualitative techniques are used as a basis for learning structural analysis. This unit requires an understanding of mathematical knowledge relating to the ability to work with equations.

UXB213 Advanced Measurement for Construction

Pre-requisites	UXB113 or UDB113
Equivalents	UDB212
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

Measurement is a core skill and attribute among building and infrastructure professionals. This attribute is particularly important in relation to the production of descriptive and quantified documents within the design cost management process for the purposes of tendering, estimating and construction cost management practices within the construction and infrastructure sectors. This unit develops a deeper appreciation of the measurement of more complex work sections and trades focused on more complicated structural trades and the development and application of suitable and accurate construction cost management documents in a concise and systematic manner. With the introduction to Measurement software applications you will develop strategies and abilities in dealing with more advanced virtual building graphical models as they relate to integrated practice concepts used in industry. This unit occurs in the second year of your course as it builds on the measurement attributes developed in the first year and assists you with further advanced units in Services & Heavy Engineering Measurement, construction estimating and other Cost management areas.

UXB214 Construction Estimating

Pre-requisites	UXB113 or UDB113
Equivalents	UDB213
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This intermediate unit further develops your knowledge, skills and application for estimating techniques to quantify cost. Cost quantification is a major factor in the building and development process and sound knowledge of these techniques will also be of benefit in other units within this program. This unit occurs in the later part of the second year of your course as it builds on key principles developed in earlier technology and integrative units with Cost management aspects.

UXB220 Services and Heavy Engineering Measurement

Pre-requisites	UXB213 or UDB212
Equivalents	UDB315
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit develops a deeper appreciation of the measurement of more complex areas of services and Heavy Engineering including building services (hydraulics, drainage, mechanical and electrical) and heavy engineering works within the resources and infrastructure sectors. It builds on units previously undertaken in the earlier years of the course such as the Measurement of Construction, Heavy Engineering Sector Technology and Building services.

UXB230 Site Planning

Pre-requisites	UXB131 or DEB101 or UDB161
Equivalents	UDB265
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

The objective of this unit is for you to learn, practice and apply site planning processes, techniques and skills on a selected project site. Topics include information retrieval, site appraisal and analysis techniques, constructive critique, and presentation skills.

UXB231 Planning Processes

Pre-requisites	(UXB133 or UXB134 or UDB163 or ENB274 or EGB274) and 96 credit points of study completed
Equivalents	UDB266

Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

You will study the logic, role and methods of successive stages of planning including aims, information analysis and synthesis, evaluation, strategy development, monitoring and review. You will learn how to integrate widespread consultation both within communities and with other professionals to help develop flexible and widely applicable planning processes.

UXB232 Negotiation and Conflict Resolution

Pre-requisites	UXB231 or UDB240 or UDB266 or 144cp of completed study
Equivalents	UDB369
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1, SEM-2

This unit introduces you to the theory and practice of negotiation and conflict resolution. In this unit you will acquire skills in effective communication, analysis of disputes and creative problem solving through active participation in role playing activities and intense investigation of real world conflicts that arise through the development of land. While it links to a previous unit in planning processes undertaken by students in the planning course, students from other fields will be able to participate fully in the unit. This unit prepares students for negotiations implicit in the more complex group projects undertaken in the third and fourth years of study, as well as for early career professional practice.

UXB233 Planning Law

Equivalents	UDB267
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit provides the understanding of the basic political, policy, and legislation essential for planning professionals, whether they work in the public or the private sector. This unit provides important professional context and grounding in urban policy development, implementation, development assessment, and evaluation.

UXB330 Urban Design

Pre-requisites	192cp of completed study
Equivalents	UDB368
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops skills in urban design analysis and communication. You will learn, practice and apply techniques and knowledge required to produce urban design plans and policies.

UXB332 Transport Planning

Pre-requisites	144 Credit Points in completed study
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to transport systems in selected cities around the world. This involves investigation into the schemes and policies implemented in these cities for promoting sustainable transport including walking, cycling and public transport. The unit also assists you to integrate transport modelling theory with a set of analytical approaches which are frequently used in transport planning practice. These include aggregate and disaggregate models, analysis of travel behaviour, theory of choice models, four stage transport model, parameter estimation, and model calibration. Particular emphasis is on transport surveys for collecting revealed and stated preference data, which have been prominent in travel behaviour research. Designing such surveys and analysing the data they generate form an important part of this unit.

UXH310 High-rise Construction

Pre-requisites	UXB210 or UDB210
Equivalents	UDB310
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

You will be taught how to construct a high rise structure from the basement to the

roof. The unit has a focus on protection of the public during construction, and temporary support, and also covers issues around: demolition; temporary services; deep excavation and foundations; retention and shoring systems; general engineering of structural components; multilevel formwork; interaction of building components, systems and services; common building faults and failures and rectification; alternative forms of external cladding; waterproofing problems; and general cost planning relevant for high rise construction. It builds upon principles and theory learnt in Commercial Construction, Designing Structures, and Building Services.

UXH311 Contract Administration

Pre-requisites	LWS012 or UDB102 or EN40MJR-CVCOENG
Equivalents	UDB312
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-1

This unit develops your skills and application for the administration of construction contracts which represents one of the core applications for construction managers, quantity surveyors and cost engineers. In order to appreciate some of the commercial implications of contract administration you will study administrative implications for both parties to the contract. It links to the work previously undertaken in the earlier years of the course such as Introduction to Law and Commercial Construction Management and prepares you for the final semester projects.

UXH312 Construction Legislation

Pre-requisites	(LWS012 or UDB102) and (UXB211 or UDB215) and (UXH310 or UDB310)
Equivalents	UDB314, UXB312
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit introduces you to the Australian building law and legal frameworks specifically relevant to building work and construction activities. It introduces the

National Construction Code, Queensland Building Act, Queensland Development Code, relevant Australian Standards and legislation. The unit builds upon your understanding of Urban Development Law, High-Rise Construction, Building Services and other construction management units to understand statutory building compliance and regulatory requirements to solve problems associated with building construction.

UXH314 Modern Construction Business

Pre-requisites	BSB113 or UDB104
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit prepares you to be part of a Modern Construction Business, integrating a range of legal, commercial, accounting and business concepts and practices within the specific context of construction. Topics you will cover include: commercial Law; sale of goods; hire purchase; trade practices; negotiable instruments; insurance law; partnership law and company law; bankruptcy and liquidation; standard accounting practices; taxation; business protocol and ethics; business plans; entrepreneurship; assessing business risk; professional liability; human relations; human resource and personnel management; business management; debt management. This unit builds on knowledge developed in Introductory Economics and Law, and complements Statutory Construction Law.

UXH321 Cost Planning and Controls

Pre-requisites	UXB114 or UDB112
Equivalents	UDB316
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit develops your understanding of the fundamental principles of cost management including design and construction cost planning and project controls, along with your ability to apply important techniques in managing project cost in the context of working closely in multidisciplinary teams.

UXH331 Environmental Analysis and Planning

Pre-requisites	(UXB230 or UDB265) or (ENB274 or DLB600 or DAB525)
Equivalents	UDB370
Credit Points	12
Campus	Gardens Point
Availabilities	Gardens Point - SEM-2

This unit increases your understanding of environmental analysis and planning issues, policies, and methods, aiming to prepare you for incorporation of environmental objectives and constraints in professional practice. In this unit you will engage in dialogues on contemporary environmental dilemmas, exploring ethical and practical aspects which underpin conflict. You will further refine skills acquired in site analysis units by learning to create and modify spatial models to facilitate collaborative problem-solving. These skills will aid in preparations for final year planning studio units as well as professional practice.

XNB151 Food and Nutrition

Equivalents	PUB201
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit introduces the food and nutrition system and its role in health. It will cover food and its constituents, changing requirements throughout the lifecycle and the application of dietary assessment methodologies and food selection guides. Basic skills to search and appraise scientific literature are developed here to underpin more advanced studies in Nutrition Sciences. This unit is also of interest for students from a range of study area with an interest in nutrition.

XNB171 Fitness, Health and Wellness

Equivalents	HMB171
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The dimensions and interrelationships of health, physical activities and wellness are studied. Basic principles and theories of conditioning, behaviour change and

exercise prescription necessary to demonstrate the impact of physical activity on lifestyle diseases, health behaviours and wellness are examined.

XNB172 Nutrition and Physical Activity

Equivalents	HMB172
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit introduces you to the role of appropriate nutrition and physical activity in the creation and maintenance of optimal health according to the national guidelines. The unit develops foundational knowledge established from evidence based practice. The focus is on the importance of a healthy lifestyle in multiple contexts and developing an appreciation of the complex factors which influence individual and population behaviours. The unit complements XNB151 Food and Nutrition. This unit develops the knowledge and skills required to underpin later units which address the role of nutrition and physical activity in the prevention and management of disease and enhancement of wellbeing. It is also relevant for students from a range of study areas where nutrition and physical activity are applicable.

XNB192 Home Economics Curriculum Studies 2

Pre-requisites	XNB191 or PUB343
Equivalents	PUB643
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is the second in a suite of three curriculum units studied concurrently with Teaching and Learning Studies 3 and Field Studies 2. The unit provides students with opportunities to develop knowledge and skills pertinent to the professional educator, including the ability to critique current paradigms. Learning experiences are organised to build deeper understanding of outcomes based syllabuses. This knowledge is applied to the design and management of learning environments and practices that engage learners. The importance of self regulatory practice is emphasised.

XNB193 Advanced Home Economics Curriculum Studies

Pre-requisites	XNB192 or PUB643
Equivalents	PUB743
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces students to the theoretical and practical knowledge and skills required by an effective practitioner in the complex social environment of the home economics classroom. There are opportunities to observe, explore, analyse, implement and reflect on learning and teaching strategies that can be used to enhance the learning for the diversity of students found in any classroom.

XNB250 Food Science

Pre-requisites	XNB151 or PUB201 (This unit is available ONLY in courses where listed as a core unit)
Equivalents	PUB474
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is in the developmental stage of your course and introduces you to elements across the food supply chain from paddock to plate. The unit exposes you to aspects of food science including the composition of food and its behaviour, food product development, food selection and evaluation and food spoilage and preservation. Laboratory based workshops enable students to develop practical skills in food preparation and use an experimental approach to develop understanding of the scientific principles that govern the changes occurring during food preparation. Food Science prepares you for units later in the course that require an ability to apply practical aspects of food and food preparation as part of interventions to prevent or solve nutrition problems.

XNB251 Nutrition Science

Pre-requisites	(LSB308 or LQB381) and (XNB151 or PUB201)
Co-requisites	LQB481

Units

Equivalents	PUB405
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

Nutrition Science investigates the biochemistry and physiology of macro and micronutrients and their manipulation in the prevention and management of nutrition problems in individuals, groups and populations. It integrates nutrition knowledge with the science of biochemistry and physiology, and provides the foundation on which further studies of nutrition and dietetics can be built.

XNB252 Nutrition across the Lifecycle

Pre-requisites	XNB151 or PUB201 or XNB172 or HMB172 or CSB441
Equivalents	PUB648
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit covers nutrition as it relates to the life-cycle phases beginning with pre-conception and continuing with each major life stage through to old age. This unit further develops your knowledge of nutrition to an intermediate level and concentrates on the promotion of health and prevention of disease. The unit will focus on nutrition requirements and practical food based advice for each lifecycle stage as well as taking into consideration social and cultural food patterns such as vegetarianism.

XNB271 Foundations of Motor Control, Learning and Development

Pre-requisites	LSB131 or LSB231 or LSB255
Equivalents	HMB271
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit introduces students to the behavioural and neural bases of movement control through an examination of the central nervous and neuromuscular systems, hierarchical control, human information processing and dynamical systems. It covers elements of sensory mechanisms related

to movement. Foundations of motor learning and adaptation are introduced, linking underlying mechanisms of learning with principles that may be applied in teaching, coaching and rehabilitation.

XNB272 Biomechanics

Pre-requisites	LSB131
Equivalents	HMB272
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

An ever-increasing range of qualitative and quantitative information about human performance is available, whether in sport or rehabilitation data extracted from workplace or research studies. Extracting key information from this data to support decision-making is an important process, particularly with the increasing demand for evidence-based practice. This is essential in optimising training, talent identification or tracking performance in sport as well as informing clinical and rehabilitation decisions following injury or in more specialised settings in exercise and movement science research. Therefore, providing training opportunities to enable this evidence-based practice with a sound biomechanical perspective is paramount for health related professionals, physical education teachers, podiatrists, personal trainers and exercise physiologists. As the XN53 and XN54 are accredited courses through the national association Exercise and Sport Science Australia (ESSA), this unit aligns with the required skills and competencies recommended by ESSA.

XNB273 Exercise Physiology 1

Pre-requisites	LSB231 or LSB142 or LQB388
Equivalents	HMB273
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit describes the immediate physiological responses to exercise, and the adaptations that occur with long-term exercise training. Exercise places a demand on the human body to provide sufficient energy to perform. The metabolic, hormonal, cardiovascular and pulmonary systems must adapt to meet the challenge of homeostasis. The active skeletal muscle must increase extraction and utilisation of oxygen and other fuels,

the cardiovascular system must respond to improved gas and fuel transport, and lung function must change to facilitate increased respiratory gas exchange. NOTE for Summer Semester students: Teaching will not commence until January 2010, but some unit information will be available from 16 November 2009. Students wishing to enrol up to the beginning of January will need to email enquirieshms@qut.edu.au

XNB274 Functional Anatomy

Pre-requisites	LSB131
Equivalents	HMB274
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit covers the structural and functional requirements of musculo-skeletal system in relation to human motion for a variety of activities. You will build upon prior knowledge of anatomy to evaluate human motion from a variety of situations. Content includes the following: surface anatomy of the trunk and upper and lower limb; morphological and mechanical properties of bone, muscle-tendon units with implications for physical activity; joint structure and function; analyses of movement tasks including walking and running; cinematography and electromyography in functional anatomy of movement task.

XNB275 Exercise and Sport Psychology

Pre-requisites	PYB100 or PYB012 or EDB002
Equivalents	HMB275
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit introduces exercise and sport psychology. The primary focus of this unit is the understanding of psychological principles and issues related to participation and adherence in physical activity, exercise and sport.

XNB276 Research in Human Movement

Equivalents	HMB276
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove

Units

- SEM-1

This unit includes principles of research: purposes, philosophy, applications. It addresses quantitative research including basic statistics, descriptives, ANOVA, correlation, regression and non-parametrics, and basic research design hypothesis testing. Qualitative research includes methodology, data collection, and theory building. Research presentation includes: writing a research report and developing conclusions. This unit also considers application of research, examples in human movement, related literature, computer data analysis, and information retrieval.

XNB277 Exercise and Sport Nutrition

Pre-requisites	XNB172 or HMB172 or XNB151 or PUB201
Equivalents	HMB277
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit will provide you with concepts related to the relationship between nutrition and exercise/physical activity. It builds on introductory nutrition and physical activity and includes dietary and energy requirements in exercise and sport; the influence that nutrition has on performance; and the use of nutritional supplements and water and electrolyte balance in exercise and sport. It covers recommendations for individuals and more broadly for population groups.

XNB282 Resistance Training

Pre-requisites	XNB274 or HMB274
Equivalents	HMB282
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit aims to equip students with the basic knowledge, skills and competencies required for exercise prescription in resistance training for muscular fitness. Students build on prior knowledge of biomechanics, anatomy, physiology and motor control to develop understanding of the mechanical and physiological determinants of muscular fitness. The unit incorporates a blend of theoretical background, practical knowledge and skills in the main areas of

muscular hypertrophy, strength, power and endurance. This understanding is then used to critically analyse resistance training programs.

XNB283 Wellness Processes and Strategies

Pre-requisites	XNB171 or HMB171
Equivalents	HMB338
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit examines the adoption of health behaviours that contribute to the attainment of optimal health, wellness and quality of life. It reviews how various dimensions of health and fitness together form the basis of an individual's well-being, and traces the achievement of a high level of wellness through awareness, education and growth.

XNB291 Health and Physical Education Curriculum Studies 1

Pre-requisites	(XNB171 or HMB171) and (XNB295 or HMB315)
Equivalents	HMB231
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit presents an introduction to the concepts, philosophies, pedagogies and culture of Health and Physical Education. It provides an exploration of the basic curriculum components as they apply to the planning, teaching and assessment practice in the Health and Physical Education key learning area.

XNB293 Understanding Physical Activity Participation

Equivalents	HMB313
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides an introduction to the socio-cultural areas associated with the study of sport, physical activity and exercise. It draws on a range of social science disciplines and pays close attention to how and why people participate in physical activity as a leisure

pursuit.

XNB294 Constraint Based Learning in Performance Activities

Equivalents	HMB314
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit involves the application of movement principles to the analysis and development of techniques in all major swimming strokes, water rescue methods, and track and field events. Students explore teaching strategies, motivational, conditioning and training activities, the development of learning experiences for various ability levels and event rules application.

XNB295 Constraint Based Learning in Games and Sports

Equivalents	HMB315
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

In this unit various game forms are analysed in order to identify fundamental game skills and problem areas in skill development. Emphasis is placed on the application of relevant movement knowledge and skills to suit game situations and on learning appropriate strategies for teaching and coaching selected games.

XNB298 Foundations of Movement for Educators

Equivalents	HMB278
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides an opportunity for critical inquiry and analysis of human movement from a multidisciplinary perspective. The integration of the human movement principles of sub-disciplines (functional anatomy, biomechanics, motor control, sociology of sport and physical activity and development) are evaluated and applied to coaching of sport and teaching and learning in physical education.

XNB350 Community and Public Health Nutrition

Pre-requisites	XNB151 or PUB201
Equivalents	PUB509
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is in the third year of your program and is core to your development in the area of community and public health nutrition an essential competency for both nutritionists and dietitians. It explores issues in public health nutrition and provides you with the necessary skills to undertake program planning and evaluation in the application of nutrition to communities and populations.

XNB351 Medical Nutrition Therapy 1

Pre-requisites	(XNB251 or PUB405) and (XNB252 or PUB648) and LQB481 and LQB488
Equivalents	PUB541, PUB641
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit develops your knowledge and skills in the application of the nutrition care process to the nutritional management of disease. The unit focuses on the application of critical thinking in the nutritional management of individual clients including assessment, diagnosis, practical food-based advice and evaluation. This unit is only for students undertaking studies in dietetics.

XNB352 Foodservice Management

Pre-requisites	XNB250 or PUB474
Equivalents	PUB506
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit develops your knowledge and skills in the application of a systems approach to food and nutrition services. It introduces management and leadership principles and facilitates their application in a variety of settings. This unit develops your competencies in foodservice management which is essential as an

accredited practising dietitian.

XNB353 Dietetic Communication, Counselling and Practice

Pre-requisites	(XNB351 or PUB641) and completion of 240cp including all core units
Co-requisites	XNB354
Equivalents	PUB645
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit focuses on the development of client-centred dietetic counselling skills. It will introduce a variety of counselling approaches, including motivational interviewing and cognitive behavioural therapy, to assist in improving nutrition outcomes through negotiated evidenced based interventions. You will be given opportunities to gather and interpret data from a client and to provide a practical nutrition plan in socially and culturally sensitive ways. This unit is only for students undertaking studies in dietetics.

XNB354 Medical Nutrition Therapy 2

Pre-requisites	XNB351 or PUB641
Co-requisites	XNB353
Equivalents	PUB628
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit consolidates your knowledge and skills in the application of the nutrition care process to the nutritional management of disease focussing on more complex cases and/or co-morbidities. The application of critical thinking in the nutritional management of individual clients includes the assessment, diagnosis, practical food based advice and evaluation. This unit is only for students undertaking studies in dietetics.

XNB355 Nutrition Assessment

Pre-requisites	XNB151 or (XNB172 and XNB252)
Credit Points	12
Campus	Kelvin Grove

Availabilities

Kelvin Grove
- SEM-1

This unit will develop your knowledge, skills and application for nutrition and diet-related data collection methods at the individual, group and population level. It will continue to develop your ability to write a systematic review by identifying, synthesising and applying evidence to practice problems across the continuum of care and to develop your clinical reasoning and advocacy skills to improve outcomes at an individual and population level.

XNB370 Performance Analysis

Pre-requisites	(XNB271 or HMB271) and (XNB272 or HMB272) and (XNB273 or HMB273)
Equivalents	HMB347
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit applies the theories and concepts in exercise physiology, biomechanics, motor control and functional anatomy to analysing and monitoring human performance. It integrates the use of technology to collect, analyse and interpret data for athletes and coaches and provides you with skills that can be applied in the sports settings.

XNB371 Motor Control and Learning 2

Pre-requisites	XNB271 or HMB271
Equivalents	HMB371
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is an advanced unit which provides an in-depth view of theories and concepts in motor learning and control; how we control actions in both everyday and skilled behaviours, and how this capability is acquired. This course provides a multidisciplinary perspective, drawing on research on psychology, neuroscience, biomechanics, robotics, neural networks and medicine. The unit is organised around the theme of sensorimotor integration as related to posture and balance, locomotion and arm movements such as reaching, grasping and pointing.

XNB372 Biomechanics 2

Pre-requisites	(XNB272 or HMB272) and (XNB274 or HMB274)
Equivalents	HMB362
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit includes the following: measurement techniques within biomechanics; analysis of force systems; photographic, goniometric and electrographic analysis of movement; an introduction to viscoelasticity and biological materials; material properties; mass and inertial characteristics of the human body; applied aspects of biomechanics undertaken from a research project perspective

XNB373 Exercise Physiology 2

Pre-requisites	XNB273 or HMB273
Equivalents	HMB381
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit examines the integrated regulation of the organ system examined in Exercise Physiology 1. Within this integrated perspective current research areas will be highlighted, including but not limited to (1) exercise performance and environmental stress, (2) special aids to exercise training and performance, and (3) limitations to exercise in healthy normal individuals, elite athletes and selected patient populations.

XNB375 Applied Sport and Exercise Psychology

Pre-requisites	PYB100 or PYB012 or HMB275 or XNB275
Equivalents	HMB348
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

The application of psychological techniques and processes in sport and exercise explores theory, research and practice of methods that facilitate participation, enjoyment and optimum

performance through enhancing the psychological knowledge and skills of coaches, athletes, parents, exercisers, fitness professionals, and athletic trainers. The practice of applied exercise/sport psychology involves individual and group interventions, and the capacity to select and use appropriate methods in each setting is crucial.

XNB380 Cardiorespiratory and Metabolic Disorders

Pre-requisites	(XNB271 or HMB271) and (XNB272 or HMB272) and (XNB273 or HMB273) and (XNB274 or HMB274)
Equivalents	HMB373
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit builds on foundation units to examine selected disorders of human movement that have a cardiorespiratory or metabolic basis. The unit identifies major features of each disease together with assessment methods, and forms the basis for subsequent units in clinical exercise prescription.

XNB381 Neurological, Psychological and Musculoskeletal Disorders

Pre-requisites	(XNB271 or HMB271) and (XNB272 or HMB272) and (XNB273 or HMB273) and (XNB274 or HMB274)
Equivalents	HMB378
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit provides you with a knowledge of the principal features of a set of neurological, psychological, and musculoskeletal disorders that prevent, limit or modify a person's capacity to move, and in turn, to undertake different forms of physical activity and exercise. It builds upon the foundational work previously undertaken with the areas of motor control, biomechanics, exercise physiology, and functional anatomy.

XNB382 Principles of Exercise Prescription

Pre-requisites	(XNB273 or HMB273) and (XNB282 or HMB282)
Equivalents	HMB382
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

A combination of theoretical knowledge and practical skills are required to enable the safe and effective prescription of appropriate exercise. This unit is designed to introduce students to these basic theoretical concepts, and to apply them to practical situations. Topics covered will include: health risk appraisal and fitness testing; dose-response and physical activity recommendations; and exercise programming and prescription. This unit builds upon materials covered in Exercise Physiology 1 and Resistance Training, and provides context for Principles of Exercise Programming.

XNB385 Principles of Exercise Programming

Pre-requisites	XNB382 or HMB382
Equivalents	HMB385
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit provides you with the knowledge and capacity to design and implement safe, effective evidence-based exercise programs for individuals and groups in order to achieve specified goals. It provides you with a structured exposure to exercise programming, covering major forms of exercise and activity modalities, the planning and logistics of exercise programs for the athletic and generally healthy population and the use of appropriate evidence in the design and implementation of programs.

XNB390 Teaching Primary HPE

Equivalents	HMB300
Credit Points	12
Campus	Kelvin Grove and Caboolture
Availabilities	Kelvin Grove - SEM-1 Caboolture - SEM-1

Units

This unit provides students with knowledge of how to integrate Health and physical education within the other key learning areas. Students learn the connection between physical activity and health and its role in meeting the developmental needs of children. Additionally, they participate in a range of learning experiences appropriate to the developmental needs of children and acquire the skills necessary to safely deliver student learning in an open environment. Topics include principles of the health and physical education years 1-10 syllabus; motor skill development and ability related expectations for teaching HPE; planning for quality instruction and linking physical activity with health; planning and teaching HPE; classroom management and safety issues.

XNB391 Health and Physical Education Curriculum Studies 2

Pre-requisites	XNB291 or HMB231
Equivalents	HMB331
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit extends the principles of professional practice established in the first curriculum studies unit and further encourages students to develop a critically reflective approach to teaching. Students learn how to extend professional practice with a range of understandings and competencies for interpreting and managing the health and physical education classroom as a complex environment for teaching and learning and develop competencies needed for planning and teaching a range of health and physical education units of work. Current health and physical education curriculum documents are explored.

XNB395 Personal Health

Equivalents	HMB305
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

Lifestyle is largely determined by an individual functioning in a socio-environmental context that places some limitations on choice and resultant health. This unit is designed to assist individuals to develop a positive self-concept, a

sound knowledge of lifestyle issues and their implications, and decision-making skills necessary to make wise choices. The focus of this unit is the development of such qualities for personal maintenance and improvement. Movements in this direction are achieved by analysing the processes involved in developing individuals capable of taking control of their lifestyles and resultant health. Much of this analysis will be self-focused.

XNB396 Child and Adolescent Health

Equivalents	HMB333
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit focuses on the wide range of factors that impact on the health of individuals in the two crucial stages of life: childhood and adolescence. An analysis is made of knowledge, beliefs and skills required for promoting health-enhancing behaviours during these ages and experience is provided on some of the skills needed to assess and maintain the health status of children and adolescents.

XNB397 Administration of School Sport and HPE

Equivalents	HMB337
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

School physical education departments and sporting associations are medium-sized organisations requiring direction for servicing a large client base. In this unit students examine the role of administrators and the administration of monies, facilities and human resources in a school physical education and sports setting.

XNB450 Nutrition and Dietetic Project

Pre-requisites	PUB416 and (XNB353 or PUB645). XNB353 can be enrolled in the same teaching period as XNB450
Equivalent s	PUB720
Credit Points	24
Campus	Kelvin Grove

Availabilities
- SEM-2

This unit provides an opportunity to identify a relevant nutrition area for further investigation and to undertake a research project or literature review, under the supervision of a qualified dietitian practitioner.

XNB451 Clinical Practice in Individual Dietetic Case Management

Pre-requisites	(XNB353 or PUB645) and (XNB351 or PUB641) and (XNB352 or PUB506)
Equivalents	PUB723
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Students require skills in the management of nutritional care of clients in clinical settings to a standard that allows entry to the Dietetics profession. The application of evidence-based strategies using the framework of the nutrition care process (nutrition assessment, diagnosis, intervention, monitoring and evaluation) will support provision of high level nutrition care to clients representing a variety of disease states.

XNB452 Clinical Practice in Community and Public Health Nutrition

Pre-requisites	Completion of 288cp including (XNB350 or PUB509)
Equivalents	PUB725
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Clinical Practice in Community and Public Health Nutrition integrates theory with practice in the workplace setting. The Work Integrated Learning placement allows you to synthesise your specialised knowledge and experiences from across your degree and in particular XNB350 into a real life project. Your broad, coherent knowledge of the food system will align with vital skills in project management to implement nutrition education sessions as preparation for your transition to practice.

XNB453 Professional Practice in Nutrition

Pre-requisites	(XNB350 or PUB509) and (XNB251 or PUB405) and LQB488
Anti-requisites	XNB452
Equivalents	PUB875
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This unit provides students with the opportunity, in real world settings, to further develop knowledge, confidence and skills to apply theoretical principles covered in earlier years in the area of community and public health nutrition practice. [Designated unit]

XNB454 Clinical Practice in Foodservice Management

Pre-requisites	Completion of 288 cp including (XNB353 or PUB645) and (XNB352 or PUB506)
Equivalents	PUB822
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

Practice in the area of foodservice management is vital to integrate knowledge of standards, food legislation and regulations theory with clinical practice. Dietetic professionals manage foodservices or components of foodservices to provide safe and nutritious foods for groups, and this unit provides opportunities to engage in real-life food and nutrition service settings to undertake quality improvement initiatives to consolidate your skills and competence in this area. The unit expectations meet the Dietitians Association of Australia minimum practice requirements.

XNB455 Dietetic Business Management

Pre-requisites	Completion of 288 credit points including (XNB353 or PUB645) and (XNB350 or PUB509)
Equivalents	PUB730
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

In an increasingly competitive

environment, entry level dietitians need knowledge of the true cost of a business and skills to plan, market and evaluate a business and service. This is in the final year of your course and builds on your understanding of management principles, and integrates with your professional practice placements in nutrition and dietetics

XNB456 Dietetic Leadership and Management

Pre-requisites	Completion of 288cp including (XNB353 or PUB645) and (XNB351 or PUB641) and (XNB351 or PUB506)
Equivalents	PUB606
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This is a capstone unit for nutrition and dietetics, and occurs in the final semester of the program. It converges the knowledge, skills and attributes you have developed over this course to enable you to be a reflexive nutrition and dietetics leader in increasingly complex environments.

XNB457 Contemporary Issues in Nutrition and Dietetics

Pre-requisites	XNB353, XNB354, XNB451, XNB452, XNB454 and XNB456. XNB451, XNB452, XNB454 and XNB456 can be enrolled in the same teaching period as XNB457.
Anti-requisites	HLB402
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-2

This unit explores the evidence base for emerging areas of nutrition and dietetics. You will engage with researchers and experts to extend your skills in critical analysis of evidence and theoretical constructs in controversial areas relevant to practice now and in the future.

XNB470 Practicum 1

Pre-requisites	(XNB382 or HMB382) and (XNB385 or HMB385).
----------------	--

	XNB385 can be studied in the same study period as XNB470
Equivalent s	HMB470
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

In the first of the Human Movement dedicated practicum units, students undertake in-depth experience at two different workplaces (40 hours each) while maintaining ongoing involvement in the School's clinics (20 hours). The student is provided with an extended opportunity to apply classroom learned knowledge and skills under the supervision of Human Movement Practitioners. Workplace involvement is preceded by a vocational skill seminar and workshop program while an interactive analysis program is instigated post practicum. [Designated unit]

XNB481 Clinical Exercise for Cardiorespiratory and Metabolic Disorders

Pre-requisites	(XNB380 or HMB373) and (XNB382 or HMB382)
Equivalents	HMB481
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit synthesises your knowledge and skills from previous units of study across the whole range of activities associated with the assessment and programming of exercise and activity for individuals with cardiorespiratory and metabolic disorders. The unit focuses on the screening, assessment, prescription and evaluation of exercise and activity in the treatment and management of these disorders, including disease-specific considerations in preparation for your transition to professional practice.

XNB482 Clinical Exercise for Neurological, Psychological and Musculoskeletal Disorders

Pre-requisites	XNB381 or HMB378
Equivalents	HMB482
Credit Points	12
Campus	Kelvin Grove

Availabilities

Kelvin Grove
- SEM-1

This unit synthesises your knowledge and skills from previous units of study across the whole range of activities associated with the assessment and programming of exercise and activity for individuals with neurological, psychological and musculoskeletal disorders. The unit focuses on the screening, assessment, prescription and evaluation of exercise and activity in the treatment and management of these disorders, including disease-specific considerations in preparation for your transition into professional practice.

XNB484 Practicum A

Pre-requisites	(XNB470 or HMB470) and (XNB481 or HMB481) and (XNB482 or HMB482). XNB481 and XNB482 can be enrolled in the same teaching period as XNB484.
Equivalent s	HMB484
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This practicum unit examines the assessment and programming of exercise and activity for individuals with cardiorespiratory and metabolic disorders. You will experience working with clients/patients utilising the skill sets of screening, assessment, prescription and evaluation of exercise and activity in the treatment and management of these disorders, including disease-specific considerations.

XNB485 Practicum B

Pre-requisites	(XNB470 or HMB470) and (XNB481 or HMB481) and (XNB482 or HMB482). XNB481 and XNB482 can be enrolled in the same teaching period as XNB485
Equivalent s	HMB485
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This practicum unit examines the assessment and programming of exercise and activity for individuals with neurological disorders and

musculoskeletal conditions. You will experience working with clients/patients utilising the skill sets of screening, assessment, prescription and evaluation of exercise and activity in the treatment and management of these conditions and disorders, including disease-specific considerations.

XNB486 Practicum C

Pre-requisites	(XNB470 or HMB470) and (XNB481 or HMB481) and (XNB482 or HMB482). XNB481 and XNB482 can be enrolled in the same teaching period as XNB486
Equivalent s	HMB486
Credit Points	24
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1, SEM-2

This practicum unit will allow you to undertake a clinical or non-clinical placement depending on your interests and as negotiated with the Placement Coordinator.

XNB491 Advanced Health and Physical Education Curriculum Studies

Pre-requisites	XNB391 or HMB331
Equivalents	HMB431
Credit Points	12
Campus	Kelvin Grove
Availabilities	Kelvin Grove - SEM-1

This unit is the culminating unit of the Health and Physical Education component of the course. The focus of the unit is on the application of principles learned throughout the course in both HPE curriculum and HPE discipline units within the framework of the Senior Physical Education syllabus.
